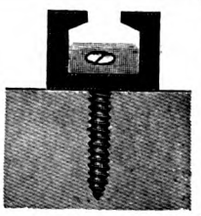
MEASURING TAPES.

We beg to announce that our line of Measuring Tapes has been made complete by the addition or

"Favorite" Cotton Line Tapes (Ass skin)

"Tip Top" low-priced Steel and Linen Pocket Tapes.

Our assortment of Tapes should now meet every demand as it comprises a greater variety than any other maker's. Each grade represents the highest standard of its kind.



MORE SHELF ROOM

Easily secured without increasing the size of the store by using

BAINES SHELF BRACKETS

Adjustable or Fixed

The accompanying cuts show the entire absence of obstructions, usually found on Hardware shelves; the manner of adjustment; and the way they are attached to the walls.

Our catalogue "H," for Hardware men, tells how to estimate the number of brackets required, how to install them, etc, It will be of interest to any merchant.

PIQUA BRACKET CO.
PIQUA, O.

We make a line of

Iron Fences and Gates

that cannot be equalled either for merit in the goods or variety of style. The Patent Adjustable Steel and Malleable Iron Foundation Base and the Patented Steel Rail used in **Stewart's Fence** add *durability, ease* of *adjustment*, and *freedom from breakage* not reached in any other fence.

We Want Agents

Up-to-date Hardware Dealers, who want up-to-date goods—goods that will satisfy the most particular customer.s

Our Catalogue No. 26 is full of information concerning Stewart's Fence, Gates, Iron Reservoir Vases, Settees, Tree Guards, &c. Its yours for the asking.

HIGHEST AWARD ST. LOUIS WORLD'S FAIR

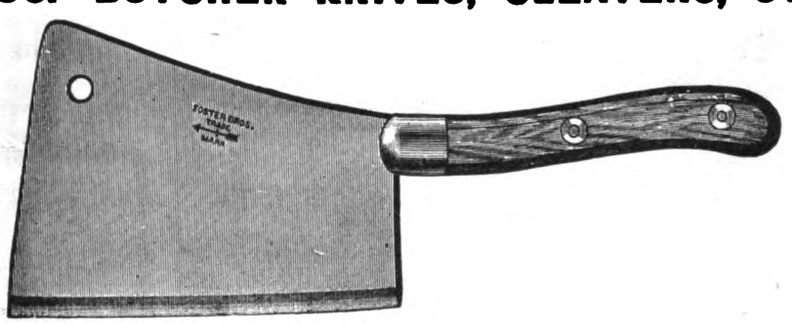
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

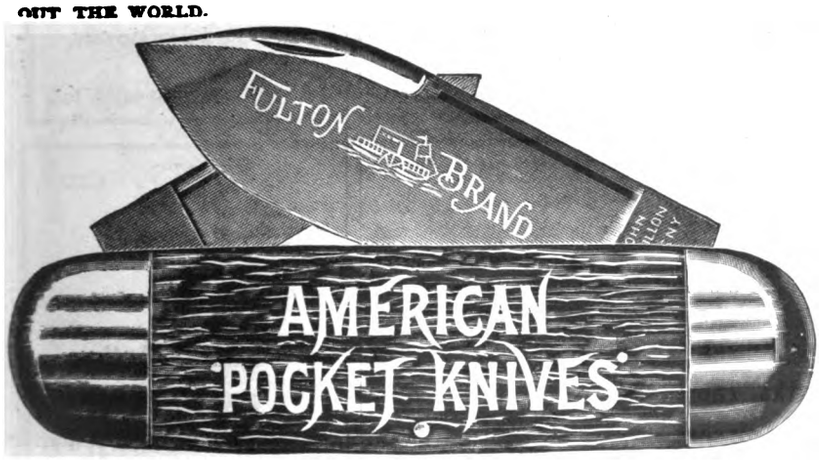


has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York U.S.A.

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.



These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.

Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

ESTABLISHED 1835

JOHN CHATILLON & SONS, New York City.

The Blackstone Rotary Washer

It's very name is a mark of merit and a guarantee of its superior workmanship and working qualities.

* * *

It is a genuine washday worry killer.

* * *

No woman ever invested in a Blackstone Rotary without immediately finding out that it adds to her purse, subtracts from her worries and compounds her interests in life.

The Blackstone Rotary Washer is a washday favorite.

* * *

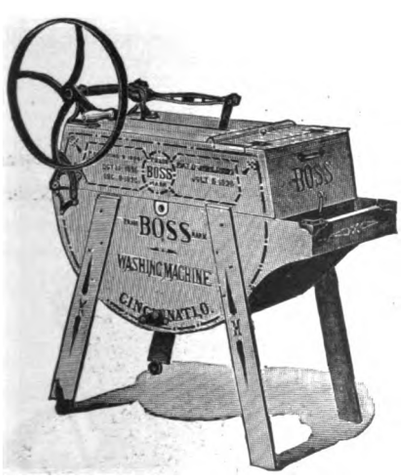
For these very reasons it has been, and always will be, a good seller.

* * *

You miss an opportunity by not handling it and displaying it in your store.

* * *

You ought to have our catalogue and prices. It puts other washers in the shade when it comes to giving all-round satisfaction.



The Blackstone Mfg. Co., Jamestown, N. Y.

"BOSS" WASHING MACHINES

Illustrations represent our two best selling washers.

They are non-competition, therefore, most profitable to handle and sell.

Write at once for catalogue and price list, also our nearest distributing point to your location.

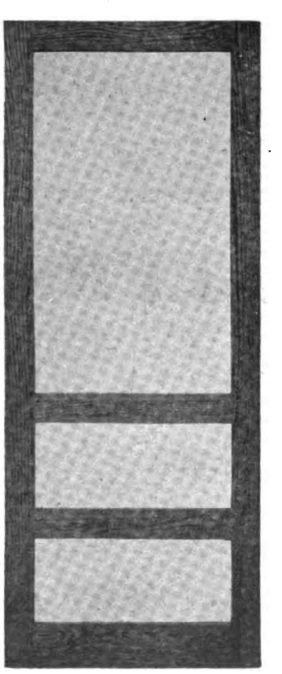
Black Satin Polish Co.
107 Chambers St., NEW YORK.



In a Recent Competition

The "Air Line Window Screen"

Was submitted to a very severe test by a Department Store buyer in New York. Two standard makes of screens were thrown out on "general principles" as undesirable. Another standard screen and the "Air Line" were soaked in water then *buried in snow* on the roof and left over night. This was done without the knowledge of our representative who was to call the next morning. He writes as follows: "He was ready for me. When I called, he sent for the two screens and they were soaked "for fair." With much trouble and wriggling he got the ——— screen open and closed but *the "Air Line" stood the racket* finely, considering the severe test. M—— says 'The order is yours, Wilkey.' By the way the ——— screen has ⅛ or ¼ inch narrower frame stock than "Air Line." Did you know this?"

"Air Line"

Style "F"

The new style "F" Screen Door with its coat of dark paint, meets the demand for a better "common door."

Filler Supremacy

is conceded the "NICE" Brands. There are reasons—Lots of them. They are BEST for the PAINTER because they dry flat, work freely and do not show laps, which means economy in time and labor. They cover 800 square feet to the gallon, which means economy in material. They are BEST for the Architect, Builder and property owner because they are the greatest preservatives known,

all of which means that they are unquestionably best for the DEALER.

HARDWARE

The Peck Edge Tool Company, Cohoes, N. Y., has been reorganized with the following officers: Joseph A. Powers of Troy, president; Thos. O'Connor of Waterford, secretary; D. J. Halpin of Waterford, treasurer and general manager; Albert W. Powers of Troy, director. It is stated that ample capital has been provided to manufacture and furnish promptly Edge Tools of the best quality.

✤

The Engineering News Company, 220 Broadway, New York, in order to stimulate the production of literature on the subject of "Concrete Block Manufacture and Construction," announce the offer of $350 in prizes for the best papers on "The Manufacture of Concrete Blocks and their use in Building Construction." The author whose paper is judged to be the best will receive a prize of $250. The author whose paper is second in rank will receive a prize of $100. The merit of the papers will be judged chiefly from the standpoint of their practical usefulness to an engineer who proposes to establish a local business in the manufacture of concrete blocks. The length of the paper should be not less than 5,000 and not more than 10,000 words. It may be accompanied by any drawings or photographs which the author deems necessary for its illustration.

HARDWARE CLUB OF NEW YORK.

At a meeting of the Board of Governors of the Hardware Club of New York, held on Thursday evening, March 23d, the following gentlemen were unanimously chosen as the officers to serve during the coming term: President, J. Leonard Varick; Vice President, Eugene Bissell; Treasurer, Thomas F. Keating; Secretary, Arthur G. Sherman.

BLUE LINE LUMBERING TOOLS.

Morley Brothers, Saginaw, Mich., issue a circular in the form of a heavy hanger 9 by 19 inches in size showing some of the important specialties included in the "Blue Line Lumbering Tools," fuller details regarding which are given in their catalogue "G" which illustrates the complete line, and should be in the hands of every dealer handling these goods. The articles illustrated on this hanger are the Blue Line Swivel Timber Carrier for handling timber, telephone poles, trolley poles, ties, eye beams, etc.; the R. & S. Patent Lumber Loader in connection with the Car Door Loader which is "A very useful device, often saving more than its cost in loading and unloading a single shipment of lumber;" the Patent Load Binder for handling timber, rails, etc., Timber Tracks, Horse Shoe Dolly, Etc.

THE EAGLE MOP WRINGER.

The Eagle Cooperage Works, Circleville, Ohio, are busy congratulating themselves on the great success they have made of the Eagle Mop Wringer, which when placed before a criticising public has met an amount of success that has carried it far toward the 300,000 mark. They have given the trade an article which meets every claim they have made for it. Their business policy is always backed up by the inflexible rule "Treat everybody alike, making no deviation, and furnishing the best goods which makes for the best business."

HARLEM'S NEW HARDWARE EMPORIUM.

At 55 West 125th Street, near Lenox Avenue, the Neal and Brinker Co., the old established Hardware firm of 18 Warren Street, have opened their Harlem branch. Their stock, which is complete in every detail and consisting of mill supplies, carpenter and mechanics' tools, sporting goods, cutlery, etc., has been so arranged that with the use of glass show cases, tables, racks and stands, the cutomer can see at a glance at least one of the endless articles for sale. The promise to surpass anything of its kind in this and other parts of the city in all branches and especially in sporting goods, has been more than lived up to.

"THE SIMMONS COMPANY" FIRM'S NEW TITLE.

The retail store of the Simmons Hardware Company, Broadway and St. Charles Street, will hereafter be known as "The Simmons Company." The business will be conducted in just the same manner as before, with merely the change in name. The wholesale house will continue to be known as the Simmons Hardware Company. The retail store, in its advertisements, inaugurated the change in the style of the house name.

V. P. HUMASON'S REMOVAL.

V. P. Humason, formerly at 80 Chambers Street, New York, has moved to the Franklin Building, 9-15 Murray Street, where he displays a full line of samples of the products of the various companies he represents. Mr. Humason is vice-president of the Chapin-Stephens Co., Pine Meadow, Conn., manufacturer of Rules, Planes, Levels, Gauges, etc., and treasurer of the Humason & Beckley Manufacturing Co., New Britain, Conn. He also represents the Wm. Rogers Manufacturing Co., manufacturer of Silver Plated Table Flat Ware, and the West Silver Co., manufacturer of Silver Plated Table Hollow Ware. He will carry a stock of the Chapin-Stephens Co.'s line and also of Silver Ware. The export department of the business will be under the direct supervision of Mr. Humason's son, John E. Humason.

STEVENS-POPE ACCURACY.

At the annual open indoor tournament of the Zettler Rifle Club held at New York City, March 1st to 11th, 1905, nine-tenths of the perfect scores in the 100 shot and re-entry matches were obtained by the use of the Stevens and Stevens-Pope rifles. The record score of 2468 out of a possible 2500 was secured by Louis P. Ittel, Pittsburgh, Pa. Mr. Ittel was equipped with a Stevens-Pope rifle and Stevens Telescope Sight. He used Peters .22 short cartridges. Stevens Telescopes again had a notable bearing on raising records and their use was permitted in this National Competitive Shoot. Judging by the splendid assistance they proved at both the tournaments of the .22 Caliber Rifle League and Zettler Rifle Club, it is very apparent that the field for these shooting accessories is constantly widening and rifle clubs in all sections of this country will no doubt follow the lead of the representative organizations who already allow 'scopes to be used in National Shooting Contests. This latest Stevens victory amply demonstrates that a crack marksman equipped with Stevens-Pope rifle and Stevens Telescope is an unconquerable factor in a rifle tournament.

SHOW CARD PAINT.

In the Minnesota convention report published in the Hardware Trade papers were a few lines to the effect that Hardware men wanting a recipe for an inexpensive card sign paint could obtain it by writing George M. Evenson of St. Peter. Mr. Evenson has had many requests for this recipe from Hardwaremen who say they read these few lines. This goes to show that these convention reports are quite thoroughly read. To reduce the necessity of Mr. Evenson answering so many letters, the *Hardware Trade* published this recipe, thereby giving its readers an opportunity to get the recipe on file. It is as follows:

"Buy from a dealer in dry colors 5 cents worth of the following—chrome yellow, carmine, burnt umber, chrome green, lamp black, white lead, ultramarine blue. Procure a case knife and a sheet of glass, then a bottle of mucilage. Deposit the colors, one at a time on the sheet of glass and add to the dry color enough mucilage to make a salve. Of a druggist purchase a half dozen tin salve boxes and into these boxes put the various colors after they have been mixed with the mucilage. When you desire to use a color, dip your brush in warm water, pass it over the surface of the paste in the box and you will discover that you have as fine a color paint for show cards as you can buy anywhere. You can modify the colors by uniting the light and the dark ones."

DEATH OF SIDNEY P. JOHNSTON.

Sidney P. Johnston, Editor of *The American Artisan*, died March 19, 1905. He was born November 30, 1869, in Chicago. In 1891 he was graduated from the classical department of Northwestern University. Just two years later he was made editor of *The American Artisan*, a position which he had since filled both to his own credit and the honor of his paper. In this capacity he was perhaps more instrumental than any other one man in the successful organization of the different retail Hardware dealers' associations. Besides filling his editorial duties so successfully, Mr. Johnston was regarded as perhaps the foremost authority on chess playing in America, having successfully participated in several national and international matches, and having been chess editor of the Chicago *Tribune* for a great many years.

APRIL 10, 1905.

Editorial Trade Review

While the Trade generally have had a good month during March, showing an encouraging increase of sales when comparison with last year is made, they look forward to the month of April to prove conclusively the optimistic views they have announced as giving a sanguine estimate to conclusions formed. Purchases have been made by the Jobbing trade in support of this belief, anticipating the future to that extent, and exceeding in the quantities ordered the natural demands of a season otherwise most promising. During the present month the purchasing of supplies and filling in of stock will govern the action of the retailers and relieve any doubt the Jobber may entertain that the demand will prove all that could be wished.

There have been a number of lines which, by changing the list prices and averaging up the cost, have advanced the quotations over former prices to a marked extent that would warrant a close comparison being made. Favorable reports are being received of the conditions that surround the Hardware trade in all the leading trade centres. Collections are reported as being good for the opening of a Spring trade, and the wants of the West will be demonstrated as being of the most sanguine character when compared with previous seasons; and the views entertained by the Retailers who are familiar with the wants of this vicinity would imply a state of affairs rarely catered to, and of a kind that would involve the most general buying to do it justice.

Shelf Hardware generally in the way of improved tools shows no marked activity as yet; but when the conditions of labor become free from all possible doubt as to the future, it may be heard from. The Jobbing trade is engaged in forwarding orders containing large quantities of goods which were ordered early, to be delivered at the present period, while the "boys on the road" are encouraged by the assortment covered by the orders they send "the house," which embraces a wide variety of such goods the early demands of Spring are sure to call for. The warm days in March have stimulated the belief that trade will open early in all its fullness, and he who is not supplied with warm weather necessities will miss it greatly.

The demand for Builders' Hardware in all the trade centres is unmistakably prominent. There is much of the best character of houses being promoted in the largest cities, both in the way of great public improvements, as well as those fostered by private capital, such as Banks, Hotels and fine residences, for which provision must be made in the more excellent grades of Builders' Hardware; while the smaller, but regular, wants of the more conservative communities call for a greater amount of Builders' Hardware than usual at this season of the year; for building is a most active business of the Spring months, and the indications are that a field of activity will soon spring from this one source particularly, that will reassure the Hardware dealer for his preparation for it.

ALWAYS BE ABLE TO DELIVER THE GOODS.

A word to the young man, in the midst of all this cry about modern enterprise; don't be more enterprising than you can make good. The commercial world is filled with wrecks caused by a too reckless application of that one word, enterprise. However, up-to-date the young man of to-day, he frequently would do well to stop and take a few lessons in conservatism from slow-going old "dad," who hasn't quite as much dash to his ideas but who someway manages to get around once in awhile to pay the bold young plunger's bills.

It is well for any man, old or young, to keep just a little in advance of his business but don't let expenses get too much in advance. A business plunger is on almost an equal footing with the race-track plunger. He may win, but the chances are many times in his favor—to lose. However enterprising a certain course may seem, think first whether it will leave enough free working capital to permit the business to follow it up; if not, don't take the course. There is a difference between recklessness and true enterprise.

ON SELECTING OF ASSISTANTS.

A good many Hardware dealers can learn some valuable lessons in store management from their detested rivals, the department stores; one is the art of specialization.

The girl at the ribbon counter is not expected to be posted in the stationary department but in Hardware stores where several clerks are employed we find them indiscriminately putting up nails and the most intricate Builders' Hardware. It is hardly economy for the real expert to devote his time to commoner lines of goods; neither is it good business policy to put any one but an expert after the more complex orders. The line of course cannot be drawn with entire exactness but every store should have at least one salesman of enough practical experience to render his services too valuable for him to take the place of the cheap helper.

Every store should have a careful and reliable man who understands Builders' Hardware from the practical standpoint and every order of that kind should be referred to him. An order for a certain number and kind of locks coming from a contractor does not as a rule designate the special size of screw and number of them required for putting the locks on; the salesman is supposed to know that, but he frequently doesn't. If a customer don't know what sort of a hinge he wants or whether a rim or mortise lock the expert salesman can frequently tell him by knowing the thickness of the door. Even in nails, for building purposes, the adaptation of special kinds are taken into consideration by the clerk who really knows his business.

Right here let me say that every Hardware store ought to have one man who really does know something about nails but not one in a hundred has that man. For certain purposes the old cut nail is vastly ahead of the modern wire nail while in some cases the relative merits are reversed. An expert nail man will consider exposure, strain (both extent and direction,) kind of wood used, paint, etc.

Somebody ought to know, too, the difference in effect between the commoner so called explosives, powder, dynamite, etc.: also the conditions under which it will be set off and how it may be safely handled. There should also be a practical machinist on the force, especially if agricultural or other machinery is handled. Of course in small country stores it may be necessary to unite some of these specialties in one man; the point is, have that one man and then don't keep him busy filling orders that a cheaper clerk can handle. It is no small matter to have a reputation which will lead local contractors when sending for some line of Hardware to say:

"Be sure and go to Browns. They have a man who knows just how to fill that sort of orders and they always put them in his hands."

TALKS WITH RETAILERS

By AMOS

MORE "REFORMERS."

What would this poor benighted country do were it not for reformers, reform leagues, progress leagues, purification societies and the like? Think of the hundreds of spell binders, hack writers and secretaries who would be compelled to get down to business and really work were it not for the "waves of reform" that are continually agitating portions of our Land of the Free. I don't mean by this that reforms are never needed or that the time will ever come when there will be nothing that needs correcting. It may be that my living in the territory of Tammany Hall has formed in me the habit of looking in behind each new reform before I permit myself to be carried away with it.

Many reform movements are legitimate in every particular but about eight out of every ten are organized for the purpose of giving some one a job or of putting through some scheme that has been carefully covered up by some other scheme that has some chances of winning popular favor.

Just at present, the fad seems to be "Postal Reform," and we are being told by different organizations that our post-office is something less than a hundred years behind the times; that it is managed in the interests of the big express companies; that the industrial classes are being robbed for the benefit of others, and a lot of other awful things together with the fact (?) that by "our plan" all things can and will be corrected, our postal affairs brought not only up-to-date, but somewhat ahead of all other countries, the express companies put out of business, etc.

One of the latest of these many organizations is the "Postal Reform League" office in New York with Immanuel Pfeiffer (a splendid name for a reformer) as general manager.

Here is their "Platform:"

The Post Office is the people's official agent for intercommunication, and should be the full, the faithful minister of their needs.

We therefore propose:—

1. An improved parcel post system, such as European countries have, to carry parcels weighing up to at least eleven pounds.

2. A postal check system, for the safe and convenient payment of small accounts by mail.

3. A reclassification of all matter on the basis of the cost of carrying it, and free delivery throughout the country.

4. Business methods in administration and in contracts with railway and other transportation companies, with a reduction of postal rates in proportion to the saving thus assured, beginning with an immediate reduction of letter postage to one cent an ounce.

5. A court trial before destructive action by the department in all cases of alleged abuse of postal privileges.

6. A legal construction of the provisions concerning second-class mail matter safe-guarding the rights of legitimate publishers.

7. The extension of domestic rates to foreign business.

8. Postal insurance for all mail matters.

9. The appointment of a joint committee of Congressmen and businessmen to revise and codify the postal laws, in order to insure clearness and certainty in detail, and more efficient postal service.

THEREFORE—We desire to unite our efforts to keep up intelligent discussion and agitation of the subjects of postal reform.

If they would remove the first paragraph in the above, little in the way of protest would come from the merchants of this country. A "look behind" however shows it's dollars to doughnuts that this first paragraph is the one on which almost the entire work of this organization will be done. Their printed matter shows a membership of thirty-one, of which fifteen are publishers and advertising agents who derive a large share of their income from the mail order business and who would be immensely benefited by the adoption of laws that would increase the business of those who sell by mail direct to the consumer. Five of the members are manufacturers or wholesale dealers in articles that could be shipped by mail if the parcels post went into effect. Of the remainder there is one firm whose occupation is given as "General Manager," one lawyer, one insurance agent, four with no occupations given in the New York City directory, and one professional reformer, George Fred Williams of Boston; the president is a manufacturer of watch cases, and the general manager and secretary-treasurer are physicians. It would hardly seem that any further comment is necessary, but I cannot forbear printing a few extracts from one of their folders entitled "Who Will be Benefited by a Parcels Post."

They put at the head of the list the merchant in the country town and explain how he will be enriched in the following language.

Country Storekeepers.

"The advantages of a Parcels Post system will perhaps be realized by no other class so quickly as by the small storekeeper in country towns and villages. The chief difficulties with which the small merchant has to contend are insufficient capital, distance from wholesale centers and cost of expressage on small parcels. A Parcels Post system would afford immediate relief from this disadvantage.

The country merchant has the acquaintance and goodwill of his customer, and is able to give personal attention to his special wants and preferences. In the nature of things, it is to his advantage and theirs that he receive the bulk of their patronage. Where this is not the case, it is because the local merchant cannot afford to keep in stock all the goods desired, and is prevented by the extortionate mail and express rates from ordering the articles in small quantities. Hence the prospective customer is driven to look elsewhere. With the aid of a Parcels Post system, the small storekeeper could readily keep in touch with the great wholesale distributing agencies. From these he could readily obtain by Parcels Post such articles as the customer might decide to order from the wholesale catalogue, thus earning a reasonable commission without the inconvenience and risk involved in carrying a stock of goods likely to become unsalable.

Suppose, for instance, that the country merchant could receive parcels weighing from one ounce to one hundred and eleven pounds for one cent a pound—four times the actual rate in Germany. Outside of his regular stock, few articles in occasional demand would go beyond this weight limit. This would enable him to carry an extensive line of samples, instead of a superfluous stock in a few lines of goods. This would immensely increase his trade, and enable him to meet the varied demands of his customers at a great saving of expense. As his delivery could also be made by Parcels Post, two or three handlings, truckage, and other expenses would be saved."

I wonder if they imagine that such an argument will influence any number of members of State Hardware Associations or any one else with even half the average amount of gray matter, who reads farther on in the same circular of the benefits to others. Of the "Merchants in Large Cities" the league says:

"The Parcels Post System would be of special benefit to the merchants in large cities, by avoiding the enormous waste incident to the delivery of goods to local and suburban customers. Under the present ruinously extravagant method, the delivery wagons of a dozen merchants follow each other over practically the same territory. The Parcels Post system would systematize the industry and lessen the expenses of all these establishments."

And now see how cleverly the following is worded:

The Farmers.

The many discomforts of a farm life, under present circumstances, are immensely aggravated by lack of adequate postal facilities. The Rural Free Delivery, while a decided step forward, is very incomplete, and must always be operated at a heavy loss, unless accompanied by a Parcels Post system. With such a law as that of Austria-Hungary, the farmer would not be compelled to drive several miles in order to make a few purchases. He could simply draw a postal check, mail it free, and within a few hours receive the goods by mail from his local merchant. Is there any reason why the farmers of the United States should remain destitute of the simple conveniences provided by European governments

Digitized by Google

to their agricultural class? A Parcels Post law would at once put the Rural Free Delivery system on a paying basis, as well as effecting enormous saving in time and money to the farmer, and increasing to an inestimable extent the comforts of farm life.

Does any one notice how careful tney were to say that the farmer sends his check to his local merchant? The idea that he would send it to a city department store or to a catalogue house is too preposterous to be given a moment's consideration.

In all of the literature sent out by this league not one word is said about catalogue houses—the reason is of course obvious.

♣ ♣ ♣

Five excellent specimens of "talky" ads are reproduced herewith. Note the smooth easy reading style particularly of the two headed "Hunting Coats" and "Floor Varnish." These ads are small, but they are so displayed that they attract attention and the reader is led without a hitch from the head line directly into the body of the ad where he finds facts enough to cause him to investigate further, if he is at all interested in the articles advertised. Modern business is quick business—modern advertising should be a reflex of the business-getting to the heart of the matter in double-quick order. In writing an advertisement get right at your story. Plunge into it as the bather plunges into the ocean. Preamble is obsolete.

The ad with the cut at the top is an exception to the general rule which demands talk and description. The value of this ad lies in the fact that the guns mentioned in it are well known to all users of guns because of liberal use of space by the makers of those guns in publications of a general circulation. The "Home Exerciser" ad is another exception, this time to that rule, so often broken, that headlines should not be misleading. If the top line of this ad was the only display line, it would attract the attention of would-be athletes and few if any others, but arranged as it is the reader sees not only the headline but the real subject matter of the ad at one and the same moment.

After some merchants have decided to advertise they do not stop to consider what kind would be the best for them, but take up with whatever scheme first comes to them in the name of advertising. A sick person might as consistently rush into an apothecary shop and snatch down the first bottle within reach without stopping to investigate whether its contents were adapted for use in his particular case or not. The indiscriminate advertiser has about as much prospect of being benefited as would the sick person who might seek relief in the manner described above. In either case more harm than good would result.

♣ ♣ ♣

Every baseball crank remembers at least one time when the score was three to nothing in the ninth inning, the bases full, two out, and the next batter swatted the ball "Clean over the fence" and brought in four scores in a bunch, winning the game for the home team. Here is a suggestion for the new advertiser who puts in one ad and says "If that pays I'll continue." He might as well say on the first day his store opens "If I make money to-day I'll keep open another day, if not, I'll give it up." It takes more than one ad to win the game. The road to advertising success has been travelled by thousands, but its fence corners are filled with the bleaching skeletons of the victims of one insertion.

♣ ♣ ♣

A writer in *Printers Ink*, complaining of trading stamps says: "This stamp question has been the means of raising the price of my goods, as I could not afford to give away my profits to a go-between. This scheme has compelled the poor people to purchase articles that they don't want in order to fill their books and get a shoddy present." And by way of comment the editor adds: "The trading stamp is now more than half way down the slide to oblivion, and every day merchants, who in common with their customers have become disgusted with it, are giving it a good, hard push in that direction."

♣ ♣ ♣

"Shall we stop our advertising for a while now?"

This is a question that some business men—says an exchange—are apt to ask themselves particularly in their "dull season."

Suppose your engineer asked you:

"Shall I stop putting coal on my fires, sir?"

What would you reply?

"Why no—unless you want the engine to stop!"

The advertiser who thinks of discontinuing may argue, "We have been advertising so long and so steadily that our name and specialties are well known, and we intend to advertise again when business is better in our line than it appears to be now; in the meantime our business won't stop."

No; neither will the engine stop, says the "money maker," the minute the men suspend shoveling in coal. The point is, however, that when the engine is to be started again, ten times as much will have been lost in power as has been saved in fuel or feed.

Using up reserve force never pays. If it is a loss, however, it may be looked at. The buying public is prone to forget. It is, moreover, much more difficult and much more expensive to regain a lost customer than to prevent his staying away.

SOUTHERN HARDWARE JOBBERS' ASSOCIATION.

Since our last issue the following letter has been sent to the members of the Southern Hardware Jobbers' Association:

Knoxville, Tenn., March 27, 1905.

To the members of the
SOUTHERN HARDWARE JOBBERS' ASSOCIATION.
Gentlemen:—

A meeting of the Executive Committee of our association was held in Knoxville on the 22d and 23d inst., the following being in attendance: W. M. Crumley, President, Atlanta; O. B. Barker, Lynchburg; Charles H. Ireland, Greensboro; Bruce Keener, Knoxville; C. B. Carter, Secretary-Treasurer, Knoxville.

Mr. F. B. Dunlop was prevented from attending the meeting on account of sickness.

Many matters of interest and some of great importance were presented for the committee's consideration and action. It is gratifying to report the deep interest our members are taking in the work in which we are engaged. The individual members are awakening to the fact that the Southern Hardware Jobbers' Association is a great power and has far reaching influence for good. Complaints are promptly and satisfactorily adjusted, the interchange of ideas and methods which is made possible through association work enables many needed reforms to be inaugurated and the opportunities afforded at the annual conventions for the jobbers meeting their competitors in a social and friendly manner, is conducive to more generous and liberal competition, eliminating to a great extent the petty jealousies and grievances which have previously existed.

Further details of the matters taken up at the committee meeting will be presented to you from time to time; however, a large part of the committee's work was devoted to arranging programme for the Virginia Hot Springs Convention, which will be held on the 6th to 9th of June. Among the important subjects which will be discussed at that time, are as follows:

"Restricted Prices," "How to Enforce Uniform Terms," "Where Are We At?" "Observations of a Traveling Salesman," "Mutual Fire Insurance in the Southern Hardware Jobbers' Association," "Increasing Expenses vs. Decreasing Profits," "Postal Laws and Reduction of Letter Postage," "The Hardware Business—Past, Present and Future," "Advantages and Opportunities Afforded by the South for Manufacturing," "Encroachment of Manufacturers and Their Representatives Upon the Jobbing Trade."

The Executive Committee were very much pleased at the bright prospects for a very large and successful convention at Hot Springs. Ample social features will be provided by the efficient Reception Committee. The railroads of the South have granted a rate of one fare for the round trip; from other sections the rate will be one and one-third fare. Special Pullman cars and even special trains will be provided, giving every possible comfort and convenience.

SOUTHERN HARDWARE JOBBERS' ASSOCIATION.
C. B. CARTER, Secretary-Treasurer.

A SPECIAL TRAIN TO HOT SPRINGS.

At the request of a number of those who made the trip to Atlanta last May with HARDWARE's party, the manager of this paper will run a special train to Hot Springs, Va., for the June convention. An announcement of this was made by mail a few days ago and already a large number of reservations for space on the train have been received. Present indications are, therefore, that a good sized train will be filled.

On previous occasions considerable annoyance had been caused by the necessity of standing in line to register at the hotel desk. No trouble of this sort will be experienced by those who go with HARDWARE to Hot Springs, as we have arranged with the manager of "The Homestead" to have a clerk meet our train several miles out of Hot Springs and notify each member of the party as to the number and location of his room, so that without any delay we can go to our rooms at once after reaching the hotel. Breakfast tables for our entire party will be ready on our arrival so that the hungry can be fed without delay.

The train will be run over the Chesapeake and Ohio route, a line noted for its scenic beauty and the officials of that company are making every effort possible to the end that the trip be one to be remembered with pleasure.

Although the schedule of the train has not been decided upon definitely, present arrangements are that it will leave Jersey City (Pennsylvania Depot) at about 5 P. M. Monday, June 5, West Philadelphia, 7.35 P. M., Washington 11.10 P. M., and arrive at Hot Springs about 8 o'clock Tuesday morning. The train will be made up to the best equipment including Pullman sleepers, compartment cars, and dining car.

The return trip will very likely be made in daylight leaving Hot Springs Saturday morning, June 10; this, however, will be decided upon during the down trip.

A list, from which reservations will be made later in the order in which they reach this office, is now being made up and we will be pleased to enter on this list the names of those who will make this trip with us. Correspondence concerning this train should be addressed to A. Eugene Bolles, Manager of HARDWARE, 309 Broadway, New York.

Time tables, information concerning the trip, etc., can be obtained from the following representatives of the Chesapeake and Ohio Railway Co.: H. W. Fuller, General Passenger Agent,, 609 14th Street, Washington, D. C., or U. L. Truitt, 362 Broadway, New York.

The headquarters of the convention will be at The Homestead Hotel and over two hundred rooms have already been reserved. It is therefore advisable that all those who intend being at this convention, make application for rooms at once, addressing Fred Sterry, Manager of "The Homestead," Hot Springs, Virginia.

The following special rates have been secured for the period of the convention, June 6-7-8-9, 1905:

HOMESTEAD HOTEL AND COTTAGES. Official Headquarters both Associations.

Single Room, American Plan, without bath, two in room, $3.50 per day each.

Single Room, American Plan, without bath, one in room, $4.00 per day.

Single Room, American Plan, with bath, two in room, $4.50 per day each.

Single Room, American Plan, with bath, one in room, $6.00 per day.

HOTEL ALPHIN. (Within five minutes walk of the New Homestead.)

Single Room, American Plan, without bath, $2.50 per day each.
Single Room, American Plan, with bath, $3.50 per day each.

GIVING THE CUSTOMER A SHOW.

A well arranged show-case is an illustrated catalogue, of which the display in the window is the cover. The latter may be unique through some original design or an artistic effect or just through a good, business-like arrangement, so long as it is attractive in some way. It's purpose is really to catch the eye and awaken interest in what is inside.

With internal arrangements it is different. Here almost any feature that would be of service in the printed catalogue, in the line of classification for ready reference, may be made use of to advantage. The general effect should be pleasing, it is true, but in the place where the actual business is done the most pleasing effect is that which renders the desired line of goods the most available for the inspection of the purchaser.

Frequently the purchasing idea is still too vague for the customer to feel warranted in expressing it; at the same time he is sufficiently interested to appreciate the chance to do a little quiet inspecting on his own hook. If, after some trifling purchase he can walk about the store and see a classified display of the coveted article as convenient to all his senses as the printed catalogue is to his eye, it frequently happens that an interested listener to the salesman's story is secured where least expected. It is always a safe rule to make it as easy as possible for the visitor to help himself to information. A man always likes better to talk about something he understands than something he doesn't.

HOW TO USE HUMOR.

Happy is the man who has an ever ready fund of funny stories—if he only knows how to use them; otherwise he is an abomination. Nothing is better for relieving a strained situation caused by the blundering or want of tact in another than the laugh caused by some impersonal little story that harms no one. Often, too, it is the easiest refuge for the merchant who is questioned for an opinion upon some topic he prefers to remain neutral on; a political campaign, a religious discussion or possibly a neighborhood quarrel. Many an unwelcome question has been answered in this way and where a sober answer would seem certain to give offence to one side or the other of the controversy, the funny story, if new and funny enough, may not only relieve the situation for the party questioned but in the laugh, the controversy itself may be forgotten by the principals.

In resorting to this method however it is well not to select such a story as will bring a laugh upon either of the disputing parties or seemingly ridicule the subject of the discussion. Rather have it, if possible, throw the laugh upon yourself as a non-participant.

A young lady explained to a printer the difference in printing and publishing and in conclusion said: "Now you may print a kiss on my cheek, but you must not publish it." With that he locked the fair form in his arms and went to press.

UNDERPAID POSTAGE ON LETTERS FOR FOREIGN COUNTRIES.

United States consuls are constantly calling attention to the importance of putting the proper amount of postage on letters sent to foreign parts. "It seems," says one writer, calling attention to the prevailing carelessness of the American people, particularly business men, in this connection, "that our people do not fully realize that the postage to foreign countries is 5 cents for each half ounce or fraction thereof, and not 2 cents for each ounce or fraction thereof. The sending of letters at local rates to Canada, Mexico, Cuba, Etc., has greatly increased the liability to stamp letters for all other countries at the same rate."

The same writer thinks it would be a good idea to have "the letters upon which the postage has not been paid in full returned to the sender." It might be a good plan; but it may be best for all concerned to have their attention called to the actual conditions under which letters are now carried. Parties who are so careless as to have their letters sent with insufficient postage must not be surprised if the letters are returned, or, when not returned, if answers never come.

It not infrequently happens that the letter, when read, is relegated to the wastebasket by an exasperated merchant or manufacturer. It indicates a degree of carelessness that leads foreign business men to believe it best to avoid dealings with those who do it.

A leading firm in Gottenborg, Sweden, writing to an American trade journal points out the evils of the present system in no uncertain tones. It says:

In the December number of your journal we find some lines on the prepayment of foreign postage. We have read the article with great interest and think it well worthy of consideration. Being importers of great quantities of American goods we receive very many letters from the United States, and can, from our own experience, say that business men of no other nation are so extremely careless in these things as are the American firms. Not a single week passes without half a dozen or more letters coming to us with underpaid postage. And this not only from firms with which we are in regular correspondence, but also from manufacturers making us offers and sending their catalogues for inspection. Whether this is due to the ignorance or negligence of the "office boy" we do not know. At any rate, we do not blame the boy, but the firm, for the carelessness.

The foreign firm you refer to writes about 1s. 2d. (26 cents) underpaid postage. This is enough, but we can give you a still better example as far as postage due is concerned. Upon the request for catalogues and quotations a firm in the United States sent us a heavy parcel of printed matter, the cover with a 2-cent stamp on it. The underpaid postage amounted to 5.64 kroner (about $1.50). We thought this rather too much and returned the lot.

United States Consul John C. Caldwell, San Jose, Costa Rica, says that the question of underpaid postage is becoming an irritating one in his district, and is beginning to have a bad effect on merchants trading with the United States.

Success in the foreign field is sure to come to those who do well the little things that consuls and others, familiar with the facts, are constantly advising. Letters sent abroad without sufficient postage are penalized. Usually double postage is demanded before the letter is delivered to the party to whom it is addressed. The penalty, however, is not the dangerous feature in connection with this carelessness; it is the disgust of the recipient of the letter. How very great should be the care taken will be seen from the following statement of an incident in the office of the leading export journal referred to. The editor says:

Some time ago we received a letter from a corresponent in Liverpool inclosing the cover of a letter on which full postage had not been prepaid, stating that he simply called our attention to it because the same mistake had occurred several times before, and suggested that we give our mailing clerk instructions to be more careful. We answered, apologizing for the mistake, and promised to do what we could to prevent its recurrence. In due course we received another letter calling our attention to the fact that even this letter containing our apology had been short paid in spite of all our precautions.

What does this mean? Simply that the men in charge of the mailing division have their minds on other things. Only an ordinary degree of intelligence is required in such a division; and yet the record here is of inexplicable, inexcusable carelessness.

Another fact often called to the attention of business men by consular officers, is the importance of putting extra postage into letters asking for information. Stamps of the country to which the letters are sent need not be used. United States stamps are, as a rule, preferred, for the foreigners often have use for them when asking for information here. The whole question of foreign postage is important. Too much attention can not be given to it. At times a great deal depends upon it; more than merchants and manufacturers may think.—*Consular Reports.*

A NEGLECTED POINT.

That one of the first advertising duties of the Hardware dealer to his business is to give his place a distinguishing name around which to crystalize all his other forms of advertising may be readily enough conceded, but the equally important fact that such a name should be selected for some definite object is quite often overlooked. The "Empire" Hardware store or the "Beehive," or the "Hub," may use their handle as a sort of hook from which to dangle occasional packages of advertising effort, but there is nothing in names of that sort to bring the firm out by itself and make it a distinct individuality among all others of its class.

The advertising cognomen of any business house or man should disclose one of three things:

Who he is,
Where he is, or
What he is.

If more than one of these three objects can be served at once so much the better, providing all can be forcefully expressed in a very few words. But space means more in this form of publicity than in any other. A few extra lines in a newspaper means that much greater expense. A few extra words may mean the difference between success and failure when the medium of public speech is made use of. A bright idea cleverly expressed in a few words is pretty apt to make a hit; but drawn out, it falls flat, and the whole idea is spoiled.

Often the name of an individual or a location will offer special opportunities for this form of advertising. To illustrate, a man by the name of Irons had in big letters over his door,

THE PLACE OF IRONS
AND OTHER HARDWARE.

the second line being in considerably smaller type, but still large enongh to be easily read. This same form of business identification he also used in all his newspaper advertising until with the average person in that town "The Place of Irons" was as much a local land mark as "Herald Square," New York, while the facetiously inclined of both the juvenile and mature classes considered the rest of the cognomen a real hit until Mr. Irons was as well known by the pseudonym of "Irons and other Hardware" as by his own name. He had perhaps builded better than he knew in giving the public a brief business name which meant something and a longer one which meant a little more and which the people might let alone without hurting the effect of the main idea or make use of if their sense of humor so inclined them. In either case Irons and Hardware were inseparably associated in that town.

Where the individual name does not present special linking opportunities the location may sometimes be made to yield one. In a certain town a Hardware firm that happened to be located at No. 2 Eighth Street, utilized a big figure 8, across the face of which were laid two monster machine bolts, making the $ sign. No doubt they reasoned that that mark attracts more people than any other and their newspaper advertising was largely made up of suggestions on "What a $ will do" along housekeeping and other lines. Their sign, which suggested their location, once it was understood, also their line of business, was therefore made a pertinent part of their newspaper advertising and also made a good hit. It has one weak point, however—reproduction among customers. While the firm can themselves produce good results through their own medium, type, the people who see their advertising and are pleased cannot very well reproduce it to their friends through their medium, speech; so the concern lose the opportunity of being talked about or at least of having their hit become a part of current street jargon and are forced to do their own talking.

A great deal might be said about the advertising value of a store name and in regard to its wise selection; indeed, from the infrequent and inadequate use made of this opportunity a good deal more ought to be said than ever has been. It is about the only form of modern advertising that in itself costs absolutely nothing but some careful study and the one that can be made to add materially to the value of all other forms. The linking of a man, his location and his business with some tangible idea around which his more expensive forms of advertising and the public's Hardware interests can group through association can be made the most effective form of advertising within anything like a similar cost. It may require a good deal of careful study—indeed, should be given such. Perhaps no hit is always possible through some happy chance of names, but that is not an absolute necessity, only the occasion should be embraced if it presents itself. It is a task that has to be done but once, and once well done it imparts a great amount of vigor and individuality to all advertising put out; but for some reason, perhaps because it *is* done but once, its importance is lost sight of and it is generally treated as an incidental both by business houses and by writers in trade periodicals.

Xeno W. Putnam.

THE SAVANNAH CONVENTION.

The Fourth Annual Convention of the Southern Supply and Machinery Dealers' Association will be held at the De Soto Hotel, Savannah, Ga., April 25 to 28.

The following programme will be carried out:

TUESDAY, APRIL 25.

MORNING SESSION, 10 O'CLOCK.

Open session to which the manufacturers, their representatives, visitors and ladies are especially invited.

Prayer—Rev. W. A. Nesbet, pastor Westminster Presbyterian Church, Savannah, Ga.

Chorus—"America."

Address of Welcome to the Convention—Col. J. H. Edtill, president chamber of commerce, Savannah, Ga.

Response—Peter E. Blow, Southern Brass and Iron Co., Knoxville, Tenn.

Address of Welcome to the Manufacturers—William Wilmot, Wilmot Machinery Co., New Orleans, La.

Response—Chas. F. Aaron, chairman, Auxiliary association.

Report of Entertainment Committee.

Adjournment.

AFTERNOON SESSION, 2 O'CLECK.

Roll Call.

Reading of minutes of Old Point Comfort convention.

Report of the president.

Report of the executive committee, read by C. H. Briggs, Dallas, Tex.

Report of transportation committee, read by J. J. Disosway, chairman, Atlanta, Ga.

Report of manufacturers' committee, read by John G Christopher, chairman, Jacksonville, Fla.

Report of grievance committee, read by Thos. G. Hyman, chairman, Newbern, N. C.

Appointment of Special Committees.

Communications.

Adjournment.

ENTERTAINMENT FEATURES.

TUESDAY AFTERNOON, APRIL 25.

Automobile ride for the ladies, starting from the De Soto Hotel about 2:30 p. m.

Committee in Charge—John J. McDonough, chairman; Geo. W. Tiedeman, W. G. Austin, James M. Dixon.

EVENING.

Smoker—Beginning at 9 p. m. in dining room of the De Soto Hotel.

Music—Committee in Charge—John W. Golden, chairman; C. C. Martin, W. F. Tranin, T. J. Peterson.

WEDNESDAY, APRIL 26.

MORNING SESSION, 10 O'CLOCK.

Joint session of dealers and manufacturers.

Open discussion on the following subjects:

"What has been the Practical Result of the Establishment of Minimum Prices by the Manufacturers."

Discussion opened by—

"Is it to the Interest of the Dealers to Have Manufacturers Establish Minimum Prices." William D. Simmons, of Keith, Simmons & Co., Nashville, Tenn.

Communications.

Opening of question box.

General discussion.

STEAMBOAT EXCURSION.

WEDNESDAY AFTERNOON, APRIL 26.

Leave hotel promptly at 12.30. Take electric cars for Merchants' and Miners' Wharf.

Luncheon served on boat.

Music—Committee in Charge—W. W. Tull, chairman; C. C. Martin, George Loyal, Henry Blum, Jr., Samuel Roos, W. W. Star.

WEDNESDAY EVENING, APRIL 26.

Informal reception, dining room De Soto Hotel, 9:00 o'clock. Address by John Temple Graves. Subject—"The Modern Demagogue."

THURSDAY, APRIL 27.

MORNING SESSION, 10 O'CLOCK.

Report of auditing committee.

Report of nominating committee.

Election of new president and address of acceptance.

Discussion on executive committee's suggestions. Each speaker limited to five minutes.

Opening of question box.

General discussion.

Adjournment.

AFTERNOON SESSION, 2 O'CLOCK.

"Methods of Filing Catalogues in the Office," Bayless Lee, Lee Bros., Memphis, Tenn.

"The Southern Supply Dealer—His Worst Enemy," Thomas Fritts, Tom Fritts Hardware Co., Chattanooga, Tenn.

"Our Salesmen. First, Which is the Best Method of Keeping Record as to the Results Accomplished? Second, What Daily Information Should They Submit to the House? Third, Best Method of Compensating Salesmen—Fixed Salary or Commission or Fixed Salary and Commission?" Forbes Liddell, Liddell Machinery & Supply Co., Montgomery, Ala.

ENTERTAINMENT FEATURES.

Thursday afternoon, trolley ride over the city for the ladies. Leave hotel at 12:30. Lunch at Bannon Lodge. Committee in Charge—Harry Willink, chairman; N. B. Rhoads, Thomas H Dickenson, Reuben Butler, M. J. Kavanaugh.

THURSDAY EVENING, APRIL 27.

Dance at the De Soto Hotel tendered by Watson & Powers, proprietors of the De Soto Hotel. Refreshments—Committee in Charge—J. M. Motte, chairman; W. S. Blun, D. C. Barrow, F. W. Garden, John H. Strous, Alvin Bell, Joseph W. Heffernan.

FRIDAY, APRIL 28.

MORNING SESSION, 10 O'CLOCK.

Open session to which the honorary members are requested to meet with the active members.

FRIDAY AFTERNOON AND EVENING, APRIL 28.

Dinner and vaudeville performance at Casino. Leave hotel at 5:00 o'clock. Committee in Charge—J. H. Haslan, chairman; W. H. Connerat, George M. Gadsden, W. J. Kehoe, E. J Haslam, Joseph Doyle, W. J Harty, W. J. Merkle.

This organization has an active membership of 64 and 265 honorary members, the latter comprising the principal manufacturers of goods handled by active members of the association.

Its officers and principal committees are as follows:

President, Peter E. Blow, Knoxville, Tenn., Southern Iron and Brass Company; Second Vice-President, C. H. Briggs, Dallas, Tex., Briggs-Weaver Machinery Company; Secretary-Treasurer, C. B. Carter, Knoxville. Tenn.

EXECUTIVE COMMITTEE.

George V. Denny, Savannah, Ga., Georgia Supply Co.; George A. Smith, Richmond, Va., Smith-Courtney Co.; Edward L. Stream, New Orleans, La., Gibbens & Stream; John C. Doyle, Nashville, Tenn., Nashville Machine Co.

MANUFACTURERS' COMMITTEE.

John G. Christopher, chairman, Jacksonville, Fla., John G. Christopher; A. D. Schofield, Macon, Ga., J. S. Schofield's Sons' Company; C. B. Jenkins, Charleston, S. C., Cameron & Barkley Company.

GRIEVANCE COMMITTEE.

Thos. G. Hyman, chairman, Newbern, N. C., Hyman Supply Co.; W. B. McGee, Jackson, Tenn., Southern Engine and Boiler Works Co.; Wm. Wilmot, New Orleans, La., Wilmot Machinery Company.

TRANSPORTATION COMMITTEE.

J. J. Disosway, chairman, Atlanta, Ga., Cotton States Belting & Supply Company; Thos. S. Bowles, Norfolk, Va., Henry Walke Company; E. A. Peden, Houston, Tex., Peden Iron and Steel Co.

It is reported that at this time an association may be organized by the manufacturers of those goods handled by the Southern Supply and Machinery Dealers' Association and that the new organization will have for its nucleus the honorary members of the Southern Association.

For the above meeting a rate of one and one third fares on the certificate plan has been authorized. Tickets will be on sale April 21st to 26th with return limit of May 2d.

The Southern Railway operates daily service between New York, Philadelphia and Savannah the year round on following schedule:

LEAVE—New York 3:25 P. M., West Phila. 5:55 P. M.

ARRIVE—Savannah, 3:10 P. M. next day.

LEAVE—New York 12:10 night, West Phila. 6:38 A. M.

ARRIVE—Savannah 5:00 A. M. second morning.

By the above schedule delegates could leave New York on Sunday afternoon the 23d, arriving at Savannah at 3:10 P. M. on the 24th (Monday), in good time for opening of convention the next morning.

From Boston and New England delegates can either leave on "Federal Express" at 7:45 P. M., Saturday 22d, running through without change to Washington and arriving Savannah 5:00 A. M. Monday 24th, or if they wish to travel with New York and Philadelphia delegates, leave Boston on evening train Saturday arriving New York Sunday morning and leaving at 3.25 P. M. as above. All through trains between New York and Savannah on Southern have through Pullman and dining car service.

From Chicago the best schedule is:

LEAVE—Chicago ("Big Four"), 9:00 A. M.

ARRIVE—Cincinnati 6:00 P. M.

Digitized by Google

Leave—Cincinnati (Queen & Crescent), 8:10 P. M.
Arrive—Savannah, 5:00 A. M. second day.
A through sleeper can be secured from Cincinnati to Savannah.
From St. Louis.—
Leave—St. Louis (So.) 10:00 A. M.
Arrive—Lexington, 10:20 P. M.
Leave—Lexington (Queen & Crescent), 10:30 P. M.
Arrive—Savannah, 5:00 A. M. second day.
Parlor cars run from St. Louis to Lexington and through sleepers from Lexington to Savannah.

POPULAR TALKS ON LAW.

Copyrighted by Wm. C. Sprague, President of the Sprague Correspondence School of Law.

LIABILITY OF A COMMON CARRIER FOR LOSS OF A PASSENGER'S BAGGAGE.

A common carrier is a carrier that makes a business of carrying for hire and for the general public. The general rule is that a common carrier is liable for a loss of goods which he agrees to carry, under all circumstances, save such as arise from an act of God or from the public enemy. In general, a passenger's baggage comes within this rule, even though there is nothing paid to the carrier specifically for the transportation of the baggage separate and apart from what is paid for the transportation of the passenger.

The term "baggage" under the law may mean what one carries for personal convenience in traveling, such as a trunk containing wearing apparel for use; or such effects as commercial travelers' samples; or effects that one carries in the hand as hand baggage.

The liability of the common carrier in these three cases is not the same. We will discuss first ordinary baggage, for which the passenger pays no extra charge, it being assumed that the charge for his passenger ticket covers it also, and which he places in the care of the carrier. In general, as we have seen, for this sort of baggage a common carrier is liable, and proof on his part that he has not been guilty of negligence will not absolve him from liability for loss.

The courts have laid down what may be included in the term "ordinary baggage," saying it must be such effects carried by the passenger as are for his convenience in travel and while at his destination, suited in amount and character to his station in life. The law will look to the person's station in life, habits, tastes, etc. In one case a Russian lady of wealth, traveling in this country, was held entitled to reimbursement for loss on $10,000 worth of lace carried in her trunk for her own use. In another case a German traveling in this country with six dozen shirts among his effects, was permitted to hold these as baggage, for the reason that in Germany it is customary to keep on hand large quantities of linen, since washing is done less frequently in that country than in America. The purpose of the journey will determine something. One going on a fishing excursion might claim as baggage things which if going away to school, or going into the military service, he might not so claim. It is necessary to take into account the station in life, the business, the object of the journey, the character of the effects, as to whether they are personal or not, and the reasonableness of the amount. Among the things declared not to have been baggage in the ordinary sense as here treated are bedding and household goods, presents, jewelry, etc., not intended to be worn, and the samples of a traveling salesman.

There is a law of Congress dealing with this subject so far as it affects articles shipped as baggage on vessels. Under that law watches not intended for use on the journey, a muff carried by a male passenger, money of a large amount, are held not to be baggage; so with stage properties, costumes, advertising matter. For such things among his baggage as are not reasonably suited to the passenger en route or at his destination, the carrier is not liable where he can prove that he was not negligent.

If, of course, the carrier accepts as baggage something that is not, at the same time knowing that it is not, he is liable for it as baggage.

One may not carry another's baggage with him as his own and in case of loss hold the carrier liable irrespective of the carrier's negligence. This does not prevent one carrying articles hired or borrowed, where they fall within the proper description of ordinary language, and for the loss of such things he is entitled to reimbursement in case of loss as under the general rule.

If a passenger gave no consideration at all for the carrying of himself and his baggage, as where he rides on a free pass, the carrier is not liable under the rule, excepting where he can be proven to have been grossly negligent. If, however, there was anything valuable given for the pass, even though it be not money, as, for instance, where the user of the pass gives advertising space in a publication, or services, the carrier is liable under the general rule.

In this talk we have been discussing such baggage as is put into the control of the carrier, as in the case of a trunk put into the hold of a ship, or into the baggage car of a passenger train. In our next we shall discuss the liability of the carrier for the loss of hand-baggage kept by a passenger in his own custody, and for the loss of traveling salesmen's samples.

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Payment by Note of Third Party.

Question: I sold a cart to a man and took from him in payment the note of a third person for $25. That note was not paid. I want to sue the man to whom I sold the cart, but he claims that I cannot hold him, because I accepted another man's note in payment. Is this claim correct?

Reply: If the purchaser endorsed the note to you, you can of course hold him on his endorsement, provided you gave due notice of protest. If he was not an endorser on the note, and the note was given and accepted for a debt contemporaneously contracted, a presumption of payment would arise. Where a creditor accepts the obligation of a third party for a debt contracted at the time the note is accepted, the presumption is that it was taken in payment and the burden of proving the contrary rests upon him. Where, however, the obligation is received for a preceding debt, the presumption is that it was not taken in payment and the burden of proof is shifted accordingly. We think, therefore, that unless you can show that the debt was contracted before the note was given or some agreement to the contrary, the acceptance of this note was a payment of the debt and your only remedy is against the maker of the note.

Savings Bank—Right of Person Presenting Pass Book to Draw Deposit.

Question: If a person deposits money in a savings bank and receives a pass book which is lost or stolen, is the bank justified in paying the money to any person presenting the book, provided its officers did not know of the loss or theft? In case such a payment is made, can the depositor compel the bank to pay the money a second time?

Reply: A pass book is not negotiable and its mere possession constitutes in itself no evidence of a right to draw money thereon. It merely implies a liability of the bank to the depositor for the money deposited, and an agreement to repay them at such time and in such manner as he shall direct. The depositor may by special contract authorize payments to be made in some other manner than by his direction, but in order to make such payments a protection to the bank, it is necessary for it to show some special agreement with the depositor authorizing such a mode of payment. Many banks require a depositor on making a deposit to sign and agree to certain by-laws which provide that the bank may lawfully pay the deposit to any person presenting the book. But unless such a special agreement was made with the depositor, the bank in relying on the mere possession of the book in paying out the deposit, acts at its peril.

Separation Agreement not Impaired by Divorce.

Question: A husband and wife agreed to separate, and he promised to pay $15 per week for her support during the term of her natural life. Thereafter she obtained an absolute divorce against him for his misconduct, but did not apply for, or obtain any award of alimony from the court. Is he still bound to support her?

Reply: If the separation agreement was made directly between the husband and the wife and in contemplation of a future separation, it was illegal and void. But if it was made through the medium of a trustee and after a separation had actually taken place, then it was effective to bind the husband to pay the sum therein provided for his wife's support. Assuming that the contract was valid at the time of its execution, we think that the subsequent granting of the decree of divorce did not affect the husband's obligation to continue the payments. Because of the marriage relation the husband was bound to support his wife. This legal obligation was the basis for the agreement. After the agreement was once made, it was not in the power of either party acting alone and against the will of the other to do an act which would destroy or affect their contract. If it was intended that a divorce should have this effect, the parties should have so provided by their contract.

RECENT TRADE PUBLICATIONS.

The Richmond Cedar Works, Richmond, Va., have issued a unique pamphlet in which an opening in the front cover supplies an oval frame for a picture of the Majestic Rotary Washer which they manufacture. They claim to be the largest manufacturers of Wooden Ware in the world, and turn out 60,000 washing machines annually. The above mentioned little booklet shows their leading machine, the Majestic, which they claim, is the best washer on earth. They are thoroughly equipped for manufacturing washers, and turn out eight different makes. The tub of the Majestic is made of Virginia White Cedar, and has a flat hoop at the top, and electric welded wire hoops, at the middle and bottom, sunk in grooves—their patent. The ball bearings, and the well-balanced fly wheel, they state, will almost make it run itself. This machine operates in either direction, and is fully guaranteed. Send for pamphlet.

Lane Brothers Company, Poughkeepsie, N. Y., manufacturers of Hardware Specialties, have issued a neat catalogue illustrating and describing their products, which include Parlor and Barn Door Hangers, Track, Stay Rollers, Fire Door Fixtures, Ball-bearing Store Ladders, Patent Automatic Lock Tackle Block, Carriage Jack, Coffee and Spice Mills, Etc. A very convenient table of shipping weights is provided on all articles found in their catalogue. The "Standard" barn door hanger is the original steel anti-friction loop frame barn door hanger, and is a familiar one through the trade. It has the popular "U" shape frame which was first introduced in this hanger and placed on the market by the Lane people. Send for catalogue for description of their entire line.

Oakman Brothers Co., 45 Murray Street, New York City, manufacturers of Paper Hangers' Tools and Supplies, have sent us a copy of their catalogue No. 2, a neat and attractive book of twenty-four pages, illustrative and descriptive of the above goods. They call particular attention to the novel feature connected with the Nos. 1 and 2 Goodell Improved Glass Cutters, which lies in the turret-like holder for the six cutters which may be revolved on or clamped to the frame, by the screw at the center. This arrangement enables the operator to place any of the cutters in position for use instantly, or, if desired, the turret may be removed, and the cutters be replaced with new in a minute's time. The turret is sunk within a circular recess, which protects all of the cutters not in position for use. Many other novel and useful tools in this line may be found in above catalogue which will be gladly sent upon application.

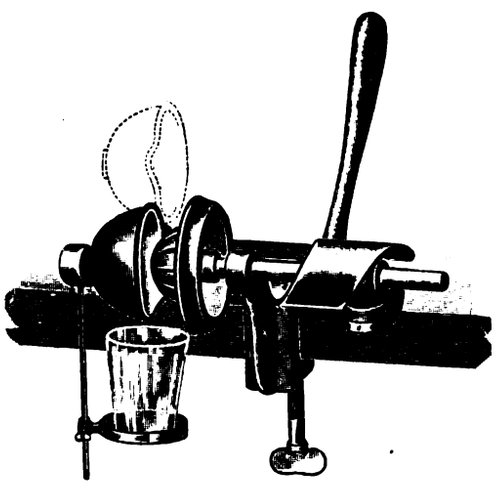
Patterson, Gottfried & Hunter, Ltd., 146-150 Center Street, New York City, dealers in machinery, metals, Hardware, tools and supplies, have recently distributed among the trade their No. 39 catalogue. It is in large pamphlet form containing 252 pages of illustrations, descriptive matter and price lists, and is particularly devoted to Blacksmiths' Tools. The book is well gotten up and will be found of more than usual value to those interested in their line. They show an extensive line of drills, among which is the No. 200 Combination Upright Blacksmiths' post drill which has two feeds; the automatic self-feed and the lever feed, each of which is independent of the other, and can be changed in a second. By the use of their patented split-feed nut, with each of the above feeds, the drill bit has an instantaneous quick return by counterbalance at the back end of the lever. Each of their many different style drills as well as their other goods is described, giving prices, etc. A copy of this useful book may be obtained by applying to the above firm. Write at once.

North Brothers Manufacturing Co., Philadelphia, Pa., are placing in the hands of the trade an attractive envelope size catalogue exploiting "Yankee Tools" which they manufacture. They have been named "Yankee" because they are the invention of a Maine Yankee. The manufacturers claim for them: They are simple in construction, strong, durable and do not get out of order; work smoothly and quickly, wear well; are accurately made of best quality of materials, handsomely finished, thoroughly tested and guaranteed in every particular as to quality. The "Yankee" line includes screw drivers, chucks, countersinks, drills, tool sets, etc. Send for a 1905 Yankee catalogue.

Eagle Cooperage Works, Circleville, Ohio, are distributing an envelope size pamphlet, on the cover of which in large letters, are the words "A Difference." Inside they proceed to explain the difference between the old and new method of the laborious work of mopping, proving conclusively the superiority of the new way, which is to use an Eagle Mop Wringer and Bucket. It is guaranteed to be well made, and perfect in every respect. If not found exactly as represented after thirty days use, you may return it to them by express at their expense, and they will refund your money by return mail. Send for one of their little booklets which tells you all about it.

Columbian Hardware Co., Cleveland, Ohio, successors to Van Wagoner & Williams Hardware Co., and the Trenton Vise & Tool Company, have recently issued an artistic catalogue of Vises and Anvils. The book is a very fine production of the printers' art and does credit to the concern issuing it. It is in pamphlet form and contains twenty-five pages of descriptive and illustrative matter. Another pamphlet catalogue of the same high type accompanies the above, which exploits their line of high grade Hardware. This includes spring hinges, strikes, latches, spiral door springs, Torry rod door springs, steel wire coat and hat hooks, and ceiling hooks, sash lifts, door pulls, etc. A third book, having a plain green egg shell finish cover, and a bond paper interior is designated "A Hand Book of Joist Hangers for Architects" which gives blue prints of several special hangers they have made, and also gives joist and timber tables, compiled by the Osborn Engineering Company, the object of which is to enable the architect and engineer to select the proper size of timber joist which should be used for a given load per square foot of floor area, a given spacing of the joists, and length of same. Send for any or all of these books. They will be found valuable if you are interested.

Allith Manufacturing Co., Chicago, Ill., manufacturers of Reliable Door Hangers and Hardware Specialties are the authors of a very handsome new catalogue, in presenting which they call attention to the many improvements and additions in their lines. These include, besides door hangers, fire door fixtures, store ladders and merchandise carriers. They state that in response to repeated demands they have made two styles of Parlor Door Hangers; the Reliable and the Allith. The Reliable is a radical departure in parlor door hangers. The hanger and plate for attaching to the door are of malleable iron; the adjusting screw has an extra long bearing in the frame of hanger. The track is their No. 1 round steel track with malleable iron supports, fitting tightly inside of track. Wheel is 3¼ inches in diameter, steel cased with hard paper tread and brass bushing. On the Allith, they have adopted their round steel track to a wood header, allowing an adjustment in both track and hanger. The track is fitted with a wood header and attached by adjusting screws through the track and into a long nut set in the wood header, which allows a perfect adjustment of the track after it is placed in position. Send for catalogue.



Screen Door & Window Co., Ltd., Owosso, Mich., have recently issued a pamphlet catalogue, showing their line of screen doors and adjustable screen windows. Their line is one that should appeal to all interested in the use or disposal of screen doors and adjustable window screens. Their intention this year is to manufacture entirely mortised goods which they anticipate will especially please their friends. In manufacture they use wire cloth of all standard mesh of the best brands; black unless otherwise ordered; the varnish is a special gum prepared for outside use. Screen doors are packed one-half dozen in a crate, or an additional charge of fifteen cents per dozen for packing one-quarter dozen in a crate. Window screens are packed one dozen in a crate. The average weight of their doors is 225 pounds per dozen, and average weight of windows 40 pounds per dozen. They specially call attention to the "Clipper" adjustable window screen, which is a good low-priced screen made of hard wood, oiled. Center iron is held in place by a slot cut in frame and securely held in position with staples. A slight groove is made in the slides to make room for the wire cloth to work freely, which gives a free action to the adjustment. Clips are securely held in position by a groove for the clip to fit in and nailed. Manufacturers will be glad to send a copy of their catalogue to interested parties.

NEW GOODS AND SPECIALTIES.

THE LEADER LEMON SQUEEZER.

The Leader Manufacturing Co., Hartford, Conn., are the manufacturers of the Leader Lemon Squeezer, which is shown in the accompanying illustration. It is a compact, strong and rapid

THE LEADER LEMON SQUEEZER.

squeezer. Having no loose parts, it is ready when taken from the box to clamp at once to the counter or table. It is made in two styles, No. 8, having frame heavily japanned with nickel parts, and No. 7, which is finely polished and heavily nickeled with tinned plunger and receiving cup. The receiving cup is made of the best malleable iron and is practically unbreakable.

PRISCO MOVABLE FRONT SINK STRAINER.

The Pritchard-Strong Company, Rochester, N. Y., have recently placed upon the market through the Hardware and house furnishing goods trades, the Prisco Movable Front Sink Strainer, the different features of which are shown in the accom-

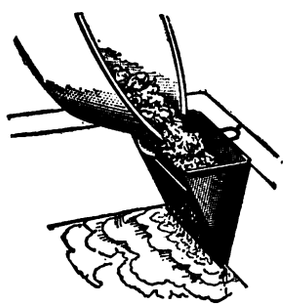

FIG. 1.

panying electros. It is substantially made of sheet steel to be held to the side of the sink by a nail or screw, as shown in Fig. 1, although it may be ordered with leg instead of ring so it will stand in any part of the sink. Fig. 2 shows the manner of its use when parings or other refuse wet with dishwater are prevented from clogging up the pipe by pressure. The advan-

FIG. 2.

tage of the movable front is shown in a graphic manner, as the liquid freed from other obstructive material is prepared for the drain, and the solid matter for the garbage pail or for range cremation, the movable front facilitating the latter by lifting

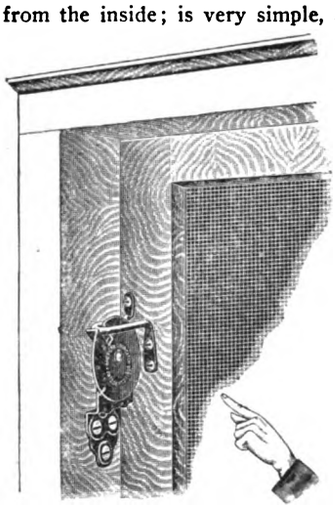

FIG. 3.

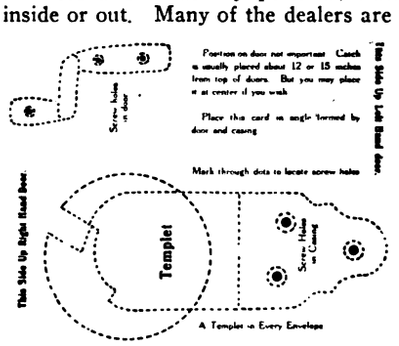
out, as shown in Fig. 3. It is made to be sold at the moderate price of ten cents.

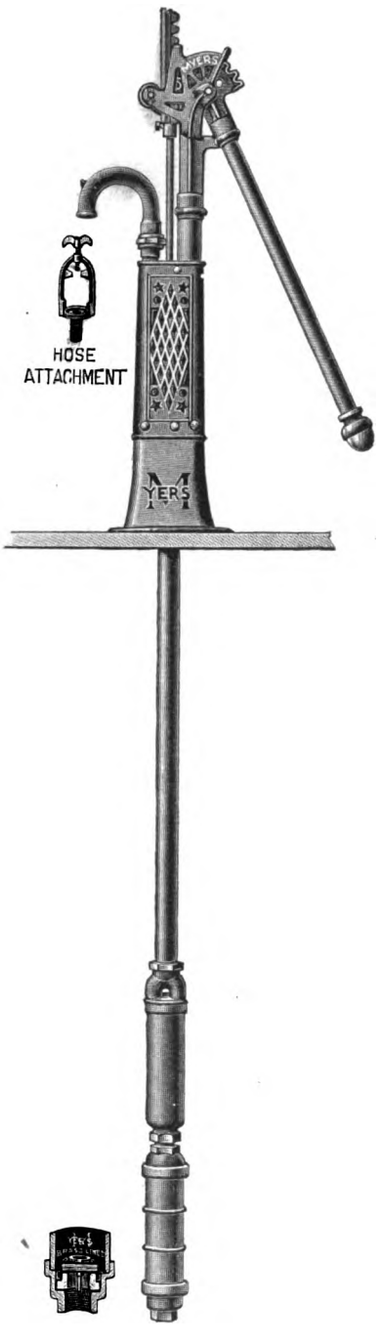


A "DOOR NECESSITY."

The American Hardware Manufacturing Co., of Ottawa, Ill., are the manufacturers of a Door Catch that is especially adapted for screen doors, in fact it is a "Door Necessity;" no door complete without it. Will draw a door three-quarters of an inch, and do it from the inside; is very simple, strong and posi-

AMERICAN DOOR CATCH.

tive in its action, holding a door firmly against the casing. Will work equally as well on cabinet doors, storm doors, gates, etc. Will keep out flies and dirt, and keep the door from rattling or warping. We show below a cut of the templet, which comes with each catch showing how simple it is to put up. The American Catch will hold a door in any position; flush or lapping, right or left, inside or out. Many of the dealers are meeting with



TEMPLET.

so much success with this article, and at the same time netting them a neat profit, and pleasing their customers so well, tnat one dealer termed it the "one a minute seller." The manufacturers, as proof of its evident merits, say they will mail to any dealer in the United States or Canada a sample catch, prepaid, without charge.

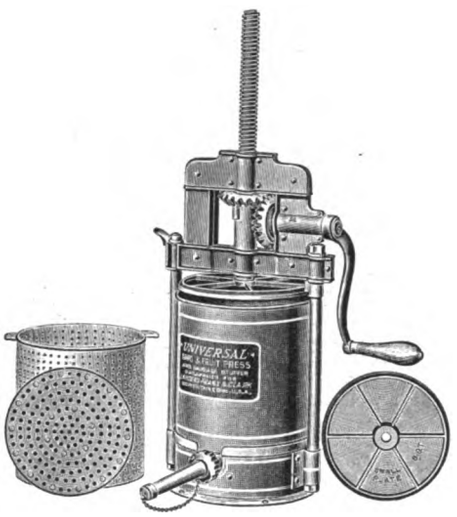
SUBMERGED CYLINDER DRILLED WELL PUMP.

F. E. Meyers & Bro., Ashland, Ohio, have recently added several new pumps possessing a special adaptation for certain lines of work, which are referred to as being of great importance. **Fig. 1109 represents** the Submerged Cylinder Drilled Well Pump



SUBMERGED CYLINDER DRILLED WELL PUMP.

fitted with cog gear or ratchet handle, of which we give an illustration. The special feature of this style of handle is that it allows the piston to move in a direct line. Instead of the ordinary slide guard, a roller bearing is used, which reduces the friction to a minimum. This pump is especially adapted for deep well work, owing to the short fulcrum of the handle. The distance from the bolt on the handle to the piston rod is 3 inches. as against 5½ inches on the ordinary pump. The base of the pump is hollow, with a pipe running through the center of the pump rod to pass through, making the base an air-tight chamber, which forms a part of the air chamber. The handle bearer is a wrought steel tube, forming a handle support and completing the air chamber. The upper cylinder is a seamless drawn brass tube enclosed in an iron shell,. and is connected to the base by a 1½ inch pipe, making the strongest and most compact pump possible, and especially adapted to drilled wells. The handle is wrought steel and can be made in any length desired by using an ordinary pipe; this will adapt the pump to any depth well.

THE UNIVERSAL LARD AND FRUIT PRESS AND SAUSAGE STUFFER.

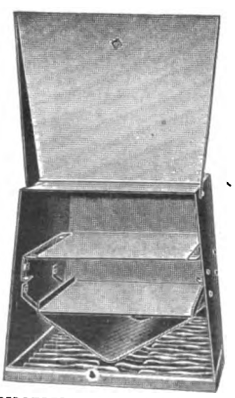
Landers, Frary & Clark, New Britain, Conn., are placing upon the market the Steel Fruit Press of which we give an illustration. The bowl is made from a single piece of sheet steel drawn up by the use of dies to insure the most perfect uniformity in size, and to permit a close fit between the sides of the plunger plate and the cylinder. The top can be swung around, permitting

THE UNIVERSAL LARD AND FRUIT PRESS AND SAUSAGE STUFFER.

the machine to be filled where it stands, while the bowl can easily be taken out to be filled, emptied or cleaned. The point is made that the steel construction has the advantage of being light, strong and unbreakable; also that as there is a saving in weight of about 15 pounds on each press, freight charges are much reduced. The diminished weight of the press will be greatly appreciated by housekeepers. The machine is made in two sizes, to hold four and eight quarts, respectively.

KLIP-KLIP, JUNIOR.

The Klip Klip Co., Rochester, N. Y., are the makers of a novelty which has been classed for some time among articles that possess selling merit, and worthy the attention of all dealers



KLIP-KLIP JUNIOR.

handling special side lines. It is called the "Klip Klip, Junior," and we present an illustration of it herewith. It is a nail cutter, which is manufactured from fine steel, heavily nickeled and of guaranteed quality. The device forms a combination of nail trimmer, nail sharpener and file. Well made and attractive in appearance, it is self-sharpening and will not rust or tarnish, and is made to be sold at a moderate price.

SCHOFIELD ECONOMY OVEN.

Schofield & Company, Freeport, Ill., are manufacturing an oven which appeals to the housekeeper for its efficiency. It is especially adapted for a gas or gasoline stove, for it can be placed

SCHOFIELD ECONOMY OVEN.

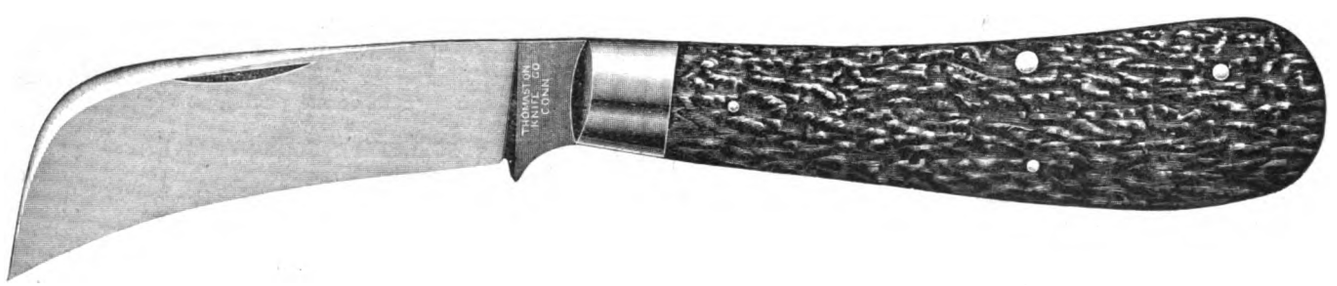
over a single burner, and is claimed to save three-fourths of the expense of baking. The "V" shaped heat deflector throws the heat to each side and up to the top of the oven, making a per-

Digitized by Google

fect balanced heat, and ensuring large efficiency. The oven weighs eight pounds, and they are shipped knocked down and nested, the weight of a dozen ovens packed being about one hundred pounds, and the space occupied being but little larger than that required for one oven set up. A factory devoted exclusively to the manufacture of this oven is contemplated by the company, early this Spring.

STEVENS "NITRO SPECIAL" SHOT GUN.

The J. Stevens Arms & Tool Co., Chicopee Falls, Mass., intend placing upon the market shortly, their new No. 93 single-barrel shot gun, shown in the accompanying illustration. This shot gun will be furnished with both extractor and ejector, the latter being known as No. 97. It will be made in gauges No. 12 and 16; with 28, 30 and 32 regular lengths; either nickel plated

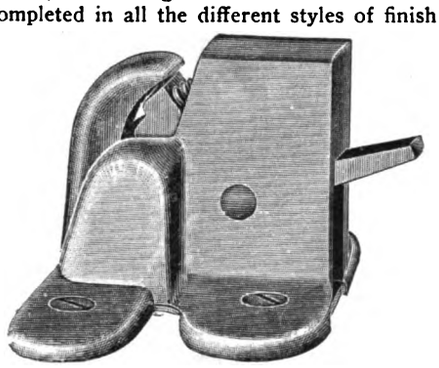


STEVENS "NITRO SPECIAL" SHOT GUN.

or case hardened frames; with a special steel, cannon breech barrel; and top snap, rebounding hammer action. Coiled springs will be used. Other attributes include a highly finished walnut stock, pistol grip and rubber plate adapted for any standard make of ammunition. The manufacturers announce that since the dense powders have come into general use, the strain on cheap, single-barrel guns has been greater than many of them would stand, hence, they have built this gun especially for dense powders, making the breech extra heavy. The gun will be branded "nitro special," indicating that it is especially designed for nitro powder. The No. 98 plain gun will list at $8.00 and the No. 97 automatic ejector at $9.00, subject to the usual trade discount, and will be ready for the market about April 15th.

THOMASTON PRUNING KNIFE.

The Thomaston Knife Co. (Reynolds Bridge P. O.), Thomaston, Conn., are manufacturing a fine assortment of American Pocket Cutlery, for the good quality and select styles of which they have achieved a notable success, and which will be found fully displayed in their extensive catalogue. As this is the time of the year when the dealer gives his thoughts to the Pruning Knife question and the desire to possess one that he can recommend to his trade for quality, we present the illustration of No. 157E, one of the most popular of the Thomaston line. It has an English Pressed Stag Handle, iron lined, iron bolsters and a hand forged blade. Made extra heavy in order to do successfully the work it may be called upon to perform.



THOMASTON PRUNING KNIFE.

The Cronk & Carrier Manufacturing Co., Elmira, N. Y., have distributed a Revised Price List which is a supplement to their 1904 catalogue. This covers their B. S. Pliers No. 95; adjustable wrench; buckshot lineman's plier No. 80; diagonal cutting plier No. 85; long reach side cutting pliers No. 65; Giant and cutting pliers No. 600; screw drivers and Oregon pattern pruning shears. They are putting some of their goods up in different finishes and have also changed their price list on some items. If you have their 1904 catalogue, don't fail to secure this revised price list.

SAUNDERS AUTOMATIC SASH LOCK.

The Saunders Automatic Sash Lock Co., Kansas City, Mo. are placing before the Hardware trade the Automatic Sash Lock of which we present an illustration herewith, and of which they are the patentees and sole manufacturers. This Sash Lock, it will be seen, automatically draws the sashes together and securely locks them; thus eliminating possibility of loss by carelessness or negligence, as it is impossible to manipulate this lock from the outside; while all rattling and shaking caused by the wind is prevented, and the cold and draughts of air kept out. From within, the lock may be instantly released by a simple thumb pressure on the lever, so that the window can be readily unlocked and raised with one hand. The locks are made of cold rolled steel, the strongest material and construction possible; and completed in all the different styles of finish to match the Hardware of any house or building. An attractive booklet giving further information will be sent upon application to the above address.

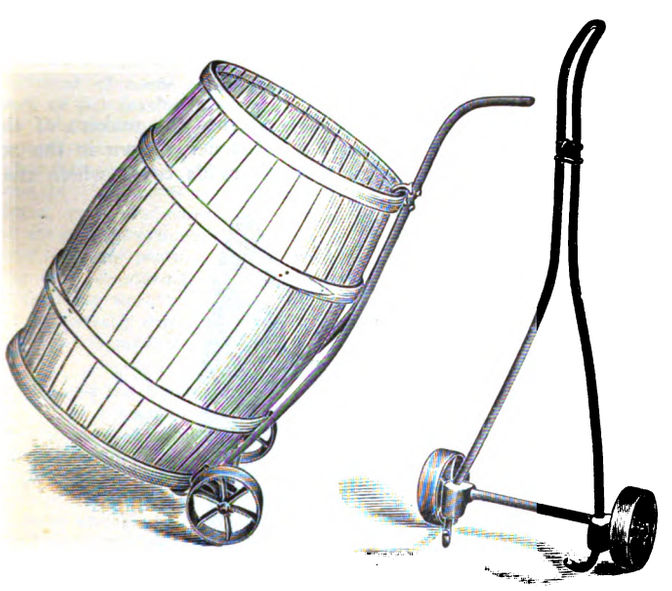
SAUNDERS AUTOMATIC SASH LOCK.

SAVAGE RELOADING TOOL.

The Savage Arms Co., Utica, N. Y., are the manufacturers of this Reloading Tool, the directions for using which for the reloading of cartridges are here given. First remove exploded primer by placing the cap extractor in the die "A." See that the bullet seater "D" is adjusted at its right length and locked with its ring "E." Insert the shell die "A" into the body "F," turn to the right and the die becomes locked. Take care that the point of the cap extractor is fitted into the primer hole of the empty shell. Then press on the lever sufficiently to remove the primer. The backward movement of the lever extracts the shell from the die. To recap, start the new primer in its pocket, place the shell in position "H" and press home with the lever. Care should be taken that the primer is seated at its fullest depth. To load a cartridge, charge shell with powder, seat bullet in mouth of shell and place the cartridge in die "A." Adjust crimper "B"—to crimp or not to crimp as desired—and lock

Digitized by Google

same with its ring "C." Adjust bullet seated to the right length locking same with ring "E." After pressing bullet home re-

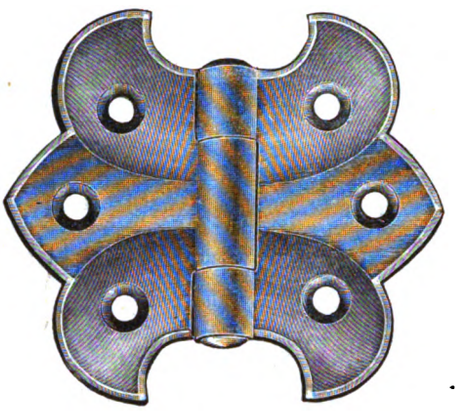


SAVAGE RELOADING TOOL.

verse lever, remove die and the cartridge will drop out. The end of bullet seater "D" is beveled and can be used to open mouths of shells as required. Any variety of bullet may be used and the same seated by proper adjustment. Send for new catalogue for 1905.

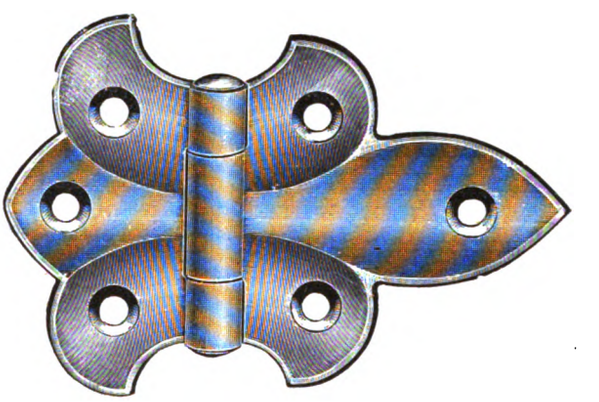
ASH BARREL AND ASH CAN TRUCK.

The Knowles Scale Works, Fletcher Street, Liberty Square, Lowell, Mass., are placing upon the market a new Truck which is so great an improvement upon the methods of moving ash barrels and ash cans now so generally in use, that we give an illustration showing its handy features. Made entirely of steel, light and strong, it is easily handled; the wheels are of sufficient size and are placed wide apart, so there is no danger of



ASH BARREL AND ASH-CAN TRUCK.

tipping the barrel over. A sliding dog runs up and down on the frame of the handle, and is held in place when not in use by a spring, which bears against sides of handle as shown in the illustration. The two prongs at the bottom are easily pushed underneath the barrel. The operation is to insert the prongs, push the handle up against the barrel, and slide down the dog until it catches hold of the upper edge of the barrel, then pull back on handle till barrel is balanced on truck.



"FLEUR DE LIS" SURFACE HINGES.

The Griffin Manufacturing Co., Erie, Pa., are placing upon the market the new pattern of Ornamental Surface Hinges,

NO. 460.

which they have named the "Fleur de Lis" and which are shown in the accompanying illustrations. They are referred to as having a heavy, massive appearance to correspond with furniture and interior wood work of modern design; and as having an extra

NO. 440.

long joint with patent riveted pin. They are furnished in all the popular finishes including bronze, brass, nickel, antique copper, Roman bronze, etc. They are packed one dozen pairs in a card board box, with screws plated to match.

THE FOOTHOLD DUST-PAN.

Lawrence Manufacturing Company, Toledo, Ohio, are the manufacturers of the Foothold Dust-Pan which is claimed to possess a number of positive advantages over the old-fashioned kinds now on the market, that must be seen to be appreciated. We give an illustration herewith. It is enameled and decorated red, blue and green. The points of interest in the Foothold Dust-Pan are: They are held firmly to the floor by the foot,

THE FOOTHOLD DUST-PAN.

thus obviating the necessity of stooping while sweeping; the point of pan is held so firmly to the floor that all dirt assembled to one place can be easily brushed on the pan; the pan being held by the foot allows free use of both hands in sweeping. It is claimed to be the most durable pan sold to the trade and costing no more than the ordinary kind.

380,275. Mop Wringer. A. M. Burnham, Gardiner, Me.
380,299. Sliding Door Track and Hanger. H. Soulen, Milwaukee, Wis.

PATENTS ISSUED MARCH 28, 1905.

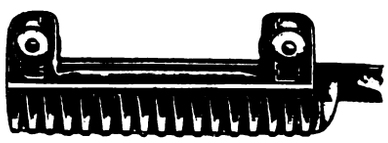
785,722. Cork Extractor. H. H. Dunn, Dayton, Ohio.
785,727. Squeezer. R. S. Gilchrist, Newark, N. J.
785,762. Floor Polishing Apparatus. J. Rischke, Idlewood, Pa.
785,770. Mangle. C. R. Stake, Worcester, Mass.
785,869. Faucet. J. J. Fitzgibbon and J. M. Travis, St. Louis, Mo.
785,880. Griddle. C. E. Hill, Millington, Mich.
785,934. Shears. A. E. Border, Los Angeles, Cal.
785,953. Monkey Wrench. J. Jarnberg, Minneapolis, Minn.
786,129. Ice Cream Freezer. M. Lichtentag, St. Louis, Mo.

PATENTS EXPIRED APRIL 3, 1905.

380,331. Pliers or Pinchers. B. J. Leslie, Bulter, Ky.
380,408. Can Opener. W. P. Quentell, Kansas City, Mo.
380,551. Dust Pan. E. S. Colt, Kansas City, Mo.
380,562. Tray for Wheelbarrows. D. A. Garver and C. H. Straight, Bryan, Ohio.
380,564. Egg Beater. E. Hadley, Chicopee Falls, Mass.
380,583. Pruning Implement. M. C. Malone, Palnyra, Ill.

PATENTS ISSUED APRIL 4, 1905.

786,335. Saw Handle. D. Worden, Whatcomb, Wash.
786,344. Brick Trimming Tool. S. C. Campaigne, Niagara Falls, Canada.
786,371. Pruning Implement. R. J. Meyer, Grand Junction, Col.
786,430. Combined Door Stop and Holder. D. H. Devereux, Brunswick, Ga.
786,434. Sash Balance and Fastener. W. H. Gardener, Park City, Utah.
786,439. Self Heating Sad Iron. M. Hoetger, Elkhart, Ind.
786,451. Adjustable Hinge. J. Luppino, Los Angeles, Cal.
786,454. Wire Working Tool. W. R. Montgomery and H. F. Megenity, Shreveport, La.
786,505. Jar Top Remover. W. T. Loofbourrow, Issaquah, Wash.
786,576. Mop or Brush Holder. J. C. Look, Tudor, Cal.
786,766. Pruning Implement. J. G. Hunt, Lenox, Mo.



Weary—The eye doctor said I'd have to give up booze or go blind.

Hobe—That's hard luck. What did you say?

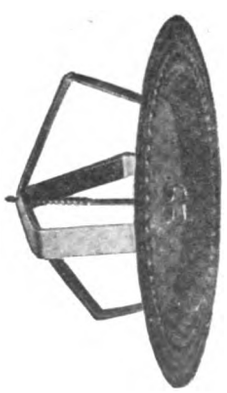
Weary—I guessed I'd seen everything.

THE SHAVEZY RAZOR GUARD.

L. T. Weiss, 286-290 Graham Street, Brooklyn, N. Y., is placing upon the market a new device in the "Shavezy" Razor Guard, illustrated herewith. Any ordinary razor may be used, the device being adapted to fit the blade with accuracy and remain in any position where it is placed; a rack and pinion movement making the adjustment which is quickly made by turning the

THE SHAVEZY RAZOR GUARD.

screws which feed the comb of teeth which form the guard, up or down until they overlap the edge of blade. The use of this guard does not in any degree impair the full and perfect action of the razor, and makes a cut impossible. It also strengthens the thinnest hollow ground blades, so that they cut the heaviest beards. It is quickly adjustable to any width blade, can be



MODE OF USING IT.

removed in an instant, and changed from right to left. After use the guard can be held under running water and thoroughly cleansed. As it is made of brass, heavily nickeled, it will not rust even if not thoroughly dried. In connection with the use of this guard, the manufacturer suggests that it removes the nervous feeling of the most hurried user, who fears cutting himself with the naked blade.

PERFECT FLUE STOP.

G. A. Higgins & Son, Galesburg, Ill., are the makers of the Perfect Flue Stop and Perfect Pipe Fastener, shown in the accompanying illustration. This new reversible cover which they

PERFECT FLUE STOP.

have just got out is one of the most successful devices they have put upon the market. There has long been demanded by the trade, it is claimed, a flue stop, which can in papering a room, be papered over; and this cover reversed, provides the flat surface required, so that the dealer need but carry the one style of flue stop. Dealers are invited to correspond regarding this stop as they will find it a ready seller.

HARDWARE STORES, PAST, PRESENT AND FUTURE.

By GRANT W. PORTER.

Commercialism of to-day, as compared with that of one hundred years ago, makes us wonder if it were not allotted to the nineteenth century to record the greatest material advancement the world has ever, or will ever, know. When we look upon the greater achievements and their relation to business conditions; and if, perchance, we see in our imagination the sudden illumination of one or more of these great commercial agencies, the next thought that comes to us is chaos and utter disruption. So necessary to our present methods and needs are these powerful facilities, that an internal strife like that of the sixties which wrought so much misery and suffering would be compared to the calamity which would follow in the wake of this chaos, as a match compares to a conflagration.

Business, like concerns, has grown to meet the demand, yea and past.

THE AGGRESSIVE BUSINESS PROMOTERS OF TO-DAY

do not wait for demand to come, they make it come. It used to be that a man bought his goods now it were better to say, his goods were sold to him. True, we must have a sympathetic public to work on, and conditions must have advanced far enough to receive our propositions, but in the majority of cases the burden of consummating the transfer of goods is carried on by the seller. He does not wait for you to determine your needs, he anticipates them for you.

The success of any enterprise depends upon these prime factors:

1st. It must either fill a long felt want, or fill some want which its creation generates.

2d. It must be presented with force enough to convince your prospective purchaser.

3d. The length and size of your success depends upon integrity and constant effort. When you see a man or a concern who thinks that his past efforts are sufficient to warrant future business, and who gradually lessens his push, and leans upon his past achievements, it don't need a gypsy to tell his future.

The constant swirl of commercialism soon undermines and rots his prop off, and nine times out of ten he never regains his equilibrium. I have in mind

FIRMS WHO, YEARS AGO, OCCUPYING THE TOP RUNG OF THE LADDER,

were so thoroughly pleased with their position and themselves that their attitude seemed to place them beyond further effort, but here we see a young, agressive fellow at the foot who is not satisfied with his position, and he immediately starts in pursuit. Mr. Contentment on the top rung of the old ladder sees the new extension which Father Time is running up, but thinks he is high enough. Our young friend below keeps his eye on Father Time, and before he is aware of a close second, our satisfied competitor, looking up, sees Father Time shaking hands with his young rival as he clambers to the top.

Did it ever occur to you that there was such a disease as self-satisfaction? After you get on the top, don't watch your neighbor on the nearest rung to you; watch Father Time as he shoves the ladder up. A runner never looks behind. His business is ahead. We have for a great many years quoted "Necessity is the Mother of Invention." which has been proven thousands of times since its utterance; but invention looking into the future becomes many times the parent of a child which at some future day becomes so universal in its fulfillment of needs as to be one of the rocks upon which the successes of our institutions rest.

In this century, a great many so-called luxuries, when they at first appeared, have grown to be absolutely indispensable after being thoroughly introduced. Take, for instance, our great telephone system. When in 1874 Frederic Graham Bell, of Boston, working on a suggestion, gave the world its first proof of what it could expect from this great achievement, it was considered a decided luxury, occupying about the same position then as wireless telegraphy does to-day. Now what is it considered, and what has it been considered for years in the business world? It is so far reaching in its office as to be not only universally employed in cities and towns, but the farmer sees its value, and is making use of it. Constant changes are being made, the

BUSINESS CONDITIONS ARE BEING ADJUSTED

to them and the Hardware store has not been the last to be converted.

A HARDWARE STORE IS AS GOOD A BAROMETER

of the world's progress as any of the other lines of trade which go to make up our industrial activities. When we say Hardware we cover a larger variety of wares than can be absorbed by any other trade emblem. It harbors to-day in various localities specialized lines which are large enough in other localities to be treated as such, occupying a field in themselves, capable of absorbing the whole attention of some of our shrewdest managers. Draw for a moment a focus on a Hardware stock when nails were made by hand. Think back and picture to yourselves the variety of shelf goods, if they may be so called, for few were boxed like to-day, and in your imagination you will see a very meager display. Take from our present stocks those lines which have been invented and adopted during, if you please, the last fifty years. Substitute for our modern articles of trade those which were sold before the fifties. Employ the same methods which were then employed. Eliminate all modern tools and appliances from your work shop, and you have indeed "an old curiosity shop."

Delivered before the Illinois Retail Hardware Dealers' Convention.

Our steel industry and its constant growth is a good barometer, not only of our industrial activities, but of our advancement in the introduction of new ideas as each takes its place to become one of the many factors to which we are indebted for our present splendid conditions.

On the other hand, we have our ebb, if you will allow the phrase. To-day we are deprived of the sale of certain articles which our general advancement has eliminated from our stocks. Certain lines of carpenter tools are no longer needed because of the increased amount of mill work being done. A tinner can no longer afford to make his own stock, nor a blacksmith his own tools, his horseshoes and his horseshoe nails; yet this is the result of growth.

THIS IS AN AGE OF CENTRALIZATION,

as well as specializations.

Now we have a machine shop with a collection of specialists who, like machines, know not their neighbors' work. One man now fits your horse's shoe, another drives the nails. Now we have a salesman and a buyer, a credit man and a man to iron down the goose pimples after his cool reception.

All are fitted for the positions, and results are more satisfactory than as if each man did his share of each office. We have all noted this gradual change and can recall the constant displacement from year to year of certain lines by others. My experience as compared with that of most of you is small indeed. But as I look back and compare conditions, I can see in many instances,

LINE AFTER LINE WHICH HAS GRADUALLY BEEN LOST

to the Hardwareman and been absorbed by some special trade, unless the Hardwareman, following the evolution, sees fit to adopt the change.

No longer does a Hardwareman in some localities have any use for base burners. The number of furnaces in use is constantly being lessened. Every time a change is made, and a new building goes up, steam or hot water goes in; and some one else gets the profit. The same with oil cook stoves, displaced by gasoline, gasoline by gas. The sale of gas ranges, transferred to the gas company, which has established a custom of dispensing all appliances used in the consumption of their product.

This last evolution has driven those manufacturers not affiliated with the gas company to sell direct to the consumer at as low a price or even lower than they will sell to us. Here is an evolution which in the course of our progress works an ill to the Hardware store. There are certain lines in our trade which, no matter where the locality, are considered necessary stock. All stores with the word Hardware over their doors carry these. Then again, there are lines which owing to the judgment of the concern and the needs of the locality, are added to these staples, until

SUCH A NUMEROUS VARIETY OF STOCKS

can be found as to bewilder even some of the oldest and most experienced Hardwaremen.

Our stock harbors no culinary utensils, stoves, screen doors, paints, oils, glass, refrigerators and a score of other lines which I might mention. Some carry one or more and others the whole variety, depending upon local conditions. When a man sells much of one line and little of another, he is going to confine himself to that which his judgment tells him brings in the dollars, and eliminate that which grows shopworn before he cuts off the profit to induce his customers to relieve him of it.

Much could be said in this regard, but very little of it would be new to the majority of us.

In summing up the whole situation, no one here, I believe, will deny the fact that the most successful among us are those who are abreast of the times. As I have said before, I do not believe that there is any line of business which calls for

BETTER OR MORE LEVEL-HEADED MEN

to make it a success. It is one of the best educators of the trades and if a man is capable of carrying on a successful Hardware store his business capacity and universal knowledge is far ahead of the majority of trade managers. Our future rests where it ought, largely upon our own shoulders as individuals, and what we get out of our organizations.

We have not been the first to organize, but the rapidity of our growth as an organization, both local and State, shows us the value of mutual helpfulness and good fellowship. Some will insist upon standing in their own light until a sudden burst of illumination shows them their advantage; and I do not hesitate to predict that our organization and others are approaching that brilliancy, when all subject to any impression will record themselves and become a part of our unity.

In looking into the future and judging from our past advancement, I predict that our posterity and theirs will see conditions which are as foreign to us to-day as ours would have been to our forefathers.

I am not prophet enough to tell what these changes and growth will be, but come they will. I can see a great need for systematized education, especially for those upon whom we depend for assistance. The success of our business rests more than we know in the hands of our help, and the impression which they make upon the trade make for or against our success.

For instance, a local association could be made more of a school, not only for the Hardwareman, but for his clerks. Certain courses of

Digitized by Google

study could be employed where more could be learned in our work than in six months by absorption in connection with store duties. Why not familiarize ourselves with modern needs in salesmanship and systematized accounts, as well as talking over prices of goods? Our clerks could enter into competition with each other to demonstrate their ability as salesmen. Following this suggestion make actual approaches to supposed customers and endeavor to make selling impressions.

Place him in a position to make more money for the concern and incidentally for himself. Raise him out of the rut of thinking like the little fellow did, who, upon asking for a job and was asked by the proprietor, what he thought he wanted a boy for, replied, "to pay $3.00 per week to." Show him what he can do and make him acquainted with the size of other clerks, then he will have a standard to work to.

How much Latin would a man be expected to absorb by selling Latin grammars? Show him the inside of things whose outside appearances look natural, and he'll make customers for you. Again, we must endeavor to fight against the tendency of direct-to-consumer business. Help those jobbers and manufacturers who are true to our interests.

Do not assume a lazy attitude where your interests and theirs are concerned and through lack of push and education do not compel a manufacturer to be his own retailer. This tendency is increasing because of the gulf which is the

RESULT OF LARGE CONSUMERS ON THE ONE HAND

and the acknowledged inability of the Hardware merchant to handle the business on the other. A line of goods once lost is rarely ever regained. When a concern commences to dispense its own product, sometimes from choice and sometimes from necessity, they seldom if ever cater to our interests again. Our existence and growth depends, as I have said before, upon our ability, and our ability is the result of education and experience. We need the manufacturer and the jobber, and they need us. Be fair.

In the process of evolution we must conform to its demands, striving to adjust ourselves to some changes, and also prevent, as much as possible, changes which divert the stream of trade to other channels than ours. One of these channels has grown to such an extent as to demand our utmost vigilance, and cannot be passed without a remark.

Our friends, the catalogue houses and department stores, are

NOT ONLY A MENACE TO LOCAL DEALERS

and their trade, but to the community which they drain. They differ from any of our great drainage systems in that out of the vast wealth which they annually absorb from our various localities, it returns not a farthing. Your local dealer bears the burden of accounts while they pick up the loose change. If we expect to check their growth in the future we must do so more as an organization than as individuals. We must show the public the proposition as it appears to us and as it really is.

Place ourselves in a position to cope with them, increase our facilities, prevent if possible unjust legislation, and show our community the necessity of home patronage and home institutions. To do this we must be a power. Power rests in unity, a unity is the result of concrete action, and concrete action is inspired by mutual grievances. Have we any?

BALTIMORE BUSINESS BOOMING.

Like a twentieth century Phoenix, the New Baltimore has risen from the great fire of a year ago. Never, in the history of the world, has a burned city been so rapidly and so well rebuilt. Never has such a fire occurred before without bringing in its wake a large number of failures. But here in Baltimore no business disaster followed and the volume of business being done in Baltimore is greater than ever before. This is shown by the bank clearings.

Now in about twelve months after the fire, many blocks of modern office buildings, handsome stores and up-to-date warehouses stand where there were only ruins and ashes.

Already the feeling of larger business is making itself felt, and Baltimore is sure in the future to take even a more prominent place in the business world than it has in the past.

A number of large Hardware stocks were completely destroyed by the fire of a year ago—but with hardly an exception these burned-out concerns resumed business at once. The energy and push displayed by the Hardware trade was remarkable—one concern, the Stewart-Crook Hardware Co., having a compete new stock and being ready for business within ten days after the fire. Mr. Stewart, when asked about trade conditions, said: "Outlook for Summer trade is very bright—never has been better. At the present time we are rushed to our very limit with business, having just all the trade we possibly can handle. We have now some forty or fifty contracts to figure on, and no doubt Spring and Summer will bring even more new building than is now taking place." The Stewart-Crook Hardware Co. will probably be located in their store at 7 No. Liberty Street by the middle of April. The new location is within a half block of their old store.

Another Baltimore concern reporting business good is the Anderson & Ireland Co., whose business is about three-quarters wholesale. Mr. C. W. Ireland, of the firm, said: "Of course, it was a loss to us to be burned out, but in a few days we had our organization working again and our men 'on the road.' Country trade now is good, and, of course, city trade is all right. We have our men see their customers every three or four weeks, and in this way keep in close touch with the trade. No doubt at all but that our city will become a greater jobbing centre, and, with improved docks, will be a still more important port."

F. H. Davidson, of the firm of F. H. Davidson & Co., with stores at 509 W. Franklyn Street, in speaking of the general outlook, said: "In all probability there will come some setback to the good business of the present, but Baltimore is prepared for anything now. We have faced and overcome the great losses that were brought by the fire and the business concerns here now are probably in better shape than ever before."

With four salesmen on the road, the Wilcox Hardware and Iron Co. carry on a good wholesale trade from their stores, located at 404-6 N. Gay Street. "Country trade is very good," said Mr. Louis Wilcox, "and advance orders were larger this year than in 1904. All indications point to a good business for at least three years to come." The Wilcox Hardware and Iron Co. keep in close contact with the small Hardware stores.

A fine new Hardware store is that now occupied by Finley Roberts & Co., who have succeeded Duke, Peterson & Co. The arrangement of the store is especially good and up-to-date shelving is used to good advantage in the displaying of stock. This concern cater to the general retail trade and carry everything in Hardware and builders' supplies.

One of the largest jobbing and commission houses of Baltimore is Henry Keidel & Co. This concern act as Southern agents for many of the best-known manufacturers and are in this way in position to handle large quantities of goods. The entire South, into Texas, is traveled by Henry Keidel & Co. Business was reported as being very good throughout the South, especially in the coal and iron counties.

One of the most progressive retailers of Baltimore is The "Little Joe Wiesenfeld Co.," with a large double store on Baltimore Street. The original business of this concern was bicycles and bicycle goods, in which lines a large business was done five or six years ago. General sporting goods were taken up and the line has gradually been enlarged. A complete stock of small Hardware has been added and all these lines go well together. In referring to business conditions Mr. Wiesenfeld said: "During 1903 and 1904 we found a constantly growing business and the outlook for this Summer's trade is very good. All sporting supplies are in good demand and the Hardware end of our business has been very active all the Spring. The future of Baltimore's business will be even greater than the past." The Wiesenfeld Co. devote much attention to the window displays and have at all times very attractively trimmed windows.

In referring to the business which has come as a result of the large amount of building due to the fire, one Baltimore dealer said: "One would naturally think a great fire would be a benefit to the Hardware trade—but it is not! I don't think there has been any better business in our line than in 1900 or 1901. You know, many of the large building Hardware contracts are taken by the manufacturers direct, and those that we get are of necessity taken on a very close basis. Then, too, there has been less small building than usual—all building operations are very expensive—and the small building trade consequently has been very slow. But the outlook is very encouraging—business in Baltimore generally is on the boom and the future seems unusually bright."

Hammernail.

WHAT A BOY SHOULD KNOW.

A very successful man, in speaking of what a young man should know to begin a business life in the right way, summarized the qualifications about as follows:

He should be able to write a good, legible hand.

To spell all the words that he knows how to use.

To write a good social or business letter.

To add a column of figures rapidly.

To make out an ordinary account.

To deduct 16½ per cent. from the face of the account.

To write an advertisement for the newspaper.

To write an ordinary promissory note.

To reckon the interest of the discount on the note for years, months or days.

To draw up an ordinary bank check.

To take it to the right place in the bank to get the money.

To make neat and correct entries in day book or cash book.

To tell the number of yards of carpet required for the parlor.

To tell something about the great authors, statesmen and financiers of the present time.

If, says the successful business man, a boy can do all this, it is probable that he has enough education to make his way in the world.—*Young People's Magazine.*

SALESMANSHIP AS AN APPLIED SCIENCE

BY R. U. CONGER,
of the Sheldon School of Scientific Salesmanship, Chicago, Ill.

(Concluded from last issue.)

One of our great merchants was recently asked how many salesmen he had, and he answered, "three." When it was called to his attention that he had a great many men selling goods, he said, "Yes, I have a great many, but only three salesmen, the rest are order takers." It is one thing to know this and another thing to know the best methods by which attention can be secured, interest aroused, desire created and resolve to buy intensified.

People might think that our institution taught the subject of hypnotism, when, on the contrary, we believe it to be a fact that you could not hypnotize a man to sell him goods if we wished to and we would not wish to if we could.

Every one who has ever watched a hypnotist work will recall that he focusses the eyes of his subject upon a very bright light, or will close the eyes to make inoperative the optic nerve and will have nothing odoriferous around, his object being to entirely set aside the objective mind. He must have a willing subject, one whose reason and judgment are in harmony with his, in order to accomplish this result. If he can get such a condition where the objective mind is entirely set aside, and he says to his subject, "You are a King on a throne," he is, in his own mind, because the subjective mind obeys the suggestion. That man is hypnotized, but this is a condition which we cannot get in salesmanship. In the first place we do not have very willing subjects, and in the second place, it is impossible to get a condition where there are no detracting influences, so that as I said before, we cannot hypnotize a man to sell him, even if we desired to. However a knowledge of this fact has its value.

One of the psychological laws which is of value to the salesman, in this connection, is as follows: The influence of your suggestion upon the sub-conscious minds of a customer, is in direct proportion to the intensity of his attention, that is, if we can make his attention so intense that he never hears anything nor tastes anything, and then, by logical arguments, bringing his reason and judgment into harmony with our own, when we make a suggestion to his sub-concsious mind, that he shall buy, he buys in obedience to this natural law. This is merely an approach to the subject of hypnotism, that is all.

What I have said merely illustrates the mental law of sale and that law is well worth remembering. Attention, properly sustained, develops into interest; interest, augmented, becomes desire and desire, intensified, resolve to buy.

The eductive and instruction process of education, are very closely bound together, as one will readily recognize if they will stop to think what a great factor in commanding attention, is really a strong personality.

I have said a great deal about this subject, and will pass on in this filling-in process of useful knowledge, to the next step, which is a discussion of those subjects which make the salesman the all-round business man. He should, primarily, have an ambition to be a well-rounded, and well-grounded merchant. He should fill in with useful knowledge pertaining to such subjects as credits, advertising, costs in relation to selling, system, wholesaling, specializing, retailing and promoting. The merchant buys his goods to sell, not because they look well on the shelves, and the real salesman is the one who realizes this fact and uses his own mind to assist in disposing of them. He who originates unique methods of advertising them, in order to attract the attention of consumers to them; he who understands window trimming and the laws which govern its success; he who knows the whys and wherefores of everything about the business, and his customer does not work blindly, realizing that if he would be truly successful he must build up a great emergency reserve of knowledge which fits him to contend, successfully, with the new conditions arising daily.

A doctor does not use all of his knowledge in prescribing for one case, nor does a mechanical engineer use all his knowledge in designing a single mechanical product, but both have a ground work of the underlying principles which enable them to successfully apply such knowledge when occasion demands.

In what I have said, I have merely endeavored to give a general outline of the scope of this subject, and in conclusion I merely want to challenge your attention to a few of the good old-fashioned laws which bind all these others together. There is one without which, they would all be like faith without work, that is the law of hustle. We never see any progress of nature, without activity, and the law of activity makes us realize that the reason most men do not accomplish more, is because they do not attempt more. It is this law of activity that makes us realize also that genius is nothing more than energy intensified. I sometimes recall what Paderewski said to Queen Victoria when she commanded him to play for her. Complimenting him upon his genuine he replied: "Yes, your Majesty, the world now calls me a genius, but there was a time when I was only an ordinary piano player, yet I had made up my mind that the world should call me a genius, so I practiced, days, nights, weeks. months and years, and finally the world called me a genius, but before I was a genius, I was a drudge." And this is what we all must be, not in the sense of slaves, but in the sense of loving labor for labor's sake and the rewards which it brings.

We should be willing to pay the price of success, both in building up ourselves and in gaining knowledge. I never think of this law of activity that I am not impressed with the value of the margins of time. I sometimes recall what Garfield replied when he was asked why he was the best Latin scholar in school. He pointed across the campus and said: "You see that light over there, well that's Fain's light, now Fain recites Latin next best to me and I found out that he studies his Latin lesson the same hour that I do, which is just before we retire, so that I watch Fain's light, and when I see his light go out, I study fifteen minutes longer, and that's where I have got him." It is that law which carried Garfield from the canal boat to the White House, and it was that law which gave him an opportunity to make himself "genuinely fit."

There is one other law that I wish to speak about and then I will conclude, and that is, the eternal law of faith.

Some might think I am usurping the place of the clergy, but, on the contrary, I am talking from the standpoint of dollars and cents, talking from the standpoint of the pocket-book, and not from any standpoint of a future life.

It was recently said that theologians tell us where we are going to, the scientists where we came from, but thank God, we are here now, and it is from the here and the now viewpoint that I am talking.

There are just five links in the chain of faith, and it is well to remember that no chain is stronger than its weakest link. There is first, faith in the infinite, in an all-wise power which created wisdom. Second, faith in ourselves, faith that we are a bundle of wonderful possibilities. Third, faith in our mission, faith that that which we have to sell is the best in the world. Fourth, faith in our fellow-men, faith that they know our service, and our mission, and that they are reasonable men and will recognize reasonable arguments, and lastly, faith in our employers.

Gentlemen, when this chain of faith shall have been completed, the words spoken 2,000 years ago become the expression of a wonderful, living force, it must absolutely follow that "according to your faith be it unto you."

The Northern Supply Co., Inc., 32-36 La Salle Street, Chicago, Ill., are distributing a Net Price List to the merchant. This concern does not sell to the consumer or to catalogue houses. The price list is neatly gotten up in pamphlet form of fifteen pages, and includes galvanized slip and lap joint eave troughs, lock seam galvanized conductor pipe; galvanized steel mitres; valleys in rolls; roofing and siding, galvanized and painted; wire conductor strainers; dripping pans; drag road scrapers; crayons; "Hercules" rubber roofing; "Gem" sad irons; repair knobs; mica flake lubricant, etc. In this price list, prices are made for prompt acceptance. They state "As prices on goods are firm, and prices are liable to advance further we would recommend you to send us your orders for early or later shipments and will guarantee prices on orders placed with us for shipment until May 1st." Write to-day for price list.

The Daisy Manufacturing Co., Plymouth, Mich., makers of the Daisy Air Rifles have issued another "Daisy Pointer" in the shape of an attractive envelope size folder, which illustrates and describes the Daisy "Take Down" Repeater; 20th Century "Take Down" Daisy; 1,000 Shot Daisy; Sentinel Single Shot; Sentinel Repeater; "Air Rifle" Shot and Darts, Etc. Daisy Air Rifles, they state, are handled only by jobbers of unquestionable dependability. This little leaflet contains more valuable pointers than would be imagined in so small a space. Write for one.

JAP-A-LAC

REGISTERED TRADE MARK

"WEARS LIKE IRON"

DON'T DELAY

HAVE you seen our double-page advertisement appearing in the Ladies' Home Journal, April issue? If not, we would advise you to take a look at it. This double-page advertisement cost us EIGHT THOUSAND DOLLARS. We did not spend this money entirely from philanthropic motives. We expect to get big returns, but if we do, the dealer who sells it to the consumer must get them first.

You are certain to have a great many calls for JAP-A-LAC, this Spring. This big, double-page advertisement is only the first gun fired. The enormous advertising, which we will do during the three months following, will surely storm and capture the citadel.

The great American public is influenced by good advertising. Ours is so overwhelming this season, that it is absolutely certain to largely increase the business of every dealer handling JAP-A-LAC.

We are forcing the merits of JAP-A-LAC into the minds of the American people, and there is not a town in the country where JAP-A-LAC advertisements will not be read.

We have one of the most complete systems for following up inquiries, that could possibly be devised. The readers of the magazines who inquire about JAP-A-LAC are given a great deal of information, and suggestions are made to them of how to use JAP-A-LAC in various ways.

JAP-A-LAC can be used almost as generally as soap. It beautifies the home and makes it sanitary and cleanly. There are uses suggested in our booklet which cannot but increase the consumption of JAP-A-LAC and your community is no different from any other. People are alike the world over, and every home should keep a can of JAP-A-LAC constantly at hand.

In pushing JAP-A-LAC, we do it with the honest conviction that we are furnishing to your customers the very best thing of the kind made. There is nothing in the market which can be substituted satisfactorily for it. You can sell JAP-A-LAC profitably, no matter what make of paint or varnish you are handling. Add it to your list. It *spells profit* in the most simple and convincing way; *profit to the dealer* in every letter.

No groceryman would think of handling one kind of soap only. Why should you confine yourself to unadvertised articles claimed to be similar to JAP-A-LAC when you can sell more of them by also stocking JAP-A-LAC?

If a customer inquires for JAP-A-LAC, and you say you do not keep it, you may not only lose a sale, you may lose a customer. Save your customer.

We believe you have already had some calls for JAP-A-LAC, and we know you will have a great many more, soon. If you are now handling JAP-A-LAC and have a sufficient supply of it for a window display, be sure to get the free display matter. It will cost you nothing and we want your assistance.

Let us hear from you at once. DON'T DELAY.

THE GLIDDEN VARNISH COMPANY,

MAKERS OF HIGH-GRADE VARNISHES FOR ALL PURPOSES

641 WILLIAMSON BUILDING,

CLEVELAND, OHIO

BRINGING THE SCHOOL TO THE MAN.

It is estimated that more than ninety per cent. of the people in the United States have received or are receiving education reaching no higher than the primary or grammar schools. Out of every 1,000 men, women and children now attending school 948 are in primary and grammar grades, 39 in high and preparatory schools and only 13 in colleges, normal and technical schools. The struggle for existence is so keen that the great majority of men are forced to enter their callings without any special preparation, and once in, school days are over. The expense in time and money of attending a technical school is so great that only a favored or unusually determined few are ever enrolled in such institutions. Meanwhile the marvelous development and increasing intricacy of industrial life call for men of trained minds as well as skilled hands, and the few men thus equipped in each establishment forge ahead to positions of responsibility, while the rank and file are machine tenders or simply "hands."

The small enrollment in technical schools shows how hard it is to bring the man to the school. But a new force is at work in which the school is brought to the man. Nearly 1,000,000 men and women have been or are now enrolled as students in the technical correspondence schools of the country, and to each one is given the sort of instruction he requires for his advancement in his daily labor without interruption to his work. Such men study during their evening hours with a definite purpose in view. They learn more about the theory and practice of their work that they may earn more. In doing this they become possessed of the secret of success—namely, that their futures lie, not with unions or a socialistic government, but with themselves. The habit of self development, the new impulse of looking within for strength and help in time of perplexity and need, and the consciousness of the ability to bring a trained mind to the aid of trained hands, are developing a new race of engineers and mechanics whose influence for good is almost incalculable.

Up to the present time these home study courses in practical work are carried on only by private institutions or in connection with two or three great colleges; but the benefits are so great to both employer and employed that employers' associations in each trade or industry should give earnest consideration to some plan of offering to every employee home instruction supplemented by shop practice. Better still would be the results if the trade unions could be brought to see that the greatest good they could do to their members would be their education along practical lines—practical courses in instruction leading up to diplomas which would advance their holders to higher and higher grades on the union rosters and to better pay in the shop. A union card backed by such a system would be a sesame to the shop of most wide awake employers, and the competitive demand for men of the higher grades would insure higher wages for good men than the unions will ever be able to force on employers by present methods.—*Metal Worker.*

AN INVITATION BY TELEPHONE.

I recently saw a Hardware dealer making use of the telephone in a way that seems to me worthy of record—only beware of overdoing it.

After he had fixed up his show window with special care he began calling up some of his country customers who were on the line, giving them a talk somewhat as follows:

"Hello! We have a dandy window display on now; feel just a little proud of it and like to have our friends enjoy it with us. Couldn't you make it convenient to bring the children over to see it some day this week? We will try and make it pleasant for you and I think they would rather enjoy the sight."

In several instances the invitation was accepted and not in any was offense given. The invitation was so cordial and entirely devoid of anything like advertising in the giving, that people seemed to rather regard it as a matter of good will only, in regard to themselves, although of course it was recognized that the window was gotten up for advertising purposes. The invitation was not so regarded, or if it was, the display gave pleasure enough to remove the advertising flavor for those who responded and the personal attention seemed to please those who did not.

B. B.

* * *

"Oh, my friends, there are some spectacles that one never forgets!" said a lecturer, after describing a terrible accident he had witnessed.

"I'd like to know where they sell 'em," remarked an old lady in the audience who is always mislaying her glasses.

REVIEW OF THE MARKETS.

WIRE NAILS: Specifications on contracts form the bulk of the deliveries at Mill. The Jobbers at this time in the year always have good orders to supply their retail customers. Builders' Hardware is improving as the weather becomes warmer, which makes a more active market for Wire Nails. The Market is firm at the following quotations: f.o.b. Pittsburgh, 60 days or 2 per cent discount for cash in ten days:

Carload lots to jobbers.....$1.80
Carload lots to retailers..... 1.85

New York. The demand is becoming more active and Nails are more frequently disposed of, especially to nearby trade. Quotations are as follows:

Single carloads $1.99
Small lots from store..... 2.05

CUT NAILS: At the recent meeting of the Cut Nail Association, prices were reaffirmed for the month of April with the understanding that an advance in Wire Nails would be followed by a corresponding advance in the price of Cut Nails without the necessity of a formal announcement. News comes from Chicago and Pittsburgh that Cut Nails on large transactions have been slightly shaded in price in some instances. The official quotations are as follows:

Carload lots $1.80
Less than carload lots to jobbers..... 1.85
Less than carload lots to retailers..... 1.95

f.o.b. Pittsburgh. Iron Cut Nails for delivery at Pittsburgh, Buffalo and all points west of these cities 10 cents advance per keg on Steel Cut Nails.

New York. The local demand is a moderate one, although a better trade is anticipated as the weather becomes settled. Quotations remain as follows:

Carloads on dock.....$1.94
Less than carloads on dock..... 1.99
Small lots from store.....$2.00 to 2.05

BARB WIRE: The business done by the Jobbers in the West is of the most satisfactory character; specifications on contracts are the most active demands on the Mills for Jobbers' wants. The quotations remain as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in ten days:

	Painted.	Galv.
Jobbers carload lots	$1.95	$2.25
Retailers carload lots	2.00	2.30
Retailers less than carload lots	2.10	2.40

SMOOTH FENCE WIRE: The Mills are kept busy supplying requisitions on contracts, which are making the demand an active one. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent discount for cash in 10 days:

Jobbers, carload lots.....$1.65
Retailers, carload lots..... 1.70

The above prices are for base numbers, 6 to 9. The other numbers of plain and galvanized wire take the usual advances.

SET AND CAP SCREWS: At a meeting of the Milled Screw manufacturers, held in New York on March 31, a new list was adopted which corrects the inequalities of the former Cap and Set Screw lists. On account of the very small quantity of Square Head Cap Screws consumed, it was decided to abandon the old list on this line, and hereafter Square Head Cap Screws will be sold from the list, and at the prices prevailing on Hexagon Head Cap Screws. The new lists are subject to the following discounts:

Set Screws.	*Discount.*
Regular C. H. Cup and Oval Points.....	80%
Soft Screws, Cup and Oval Points.....80 and	5%
Headless C. H., Cup and Oval Points.....	80%
Steel Set Screws, 25% net advance over Iron.	
Cap Screws.	
Square or Hexagon Heads, regular finish...	75%
Square or Hexagon Heads, rough or black..75 and	5%
Steel Cap Screws, 25% net advance over Iron.	

LESTER SAW SET: The Puritan Manufacturing Co., Norwich, Conn., manufacturing the Lester Patent Saw Set, announces that this article will be sold to the retail trade until May 1 at $6.50 per dozen. This is a special introductory price, and after May 1 the price will be $7.50 per dozen.

TACKS, NAILS, BRADS, &c.: The manufacturers of Tacks, Nails, Brads, &c., have adopted a revised Hardware price-list of these goods, as here reproduced, taking effect April 1. In some of the schedules there are changes throughout, others remaining as formerly. An important feature of the list is the reversal of the mode of differentiating prices. The table of rebates appended to the list covers this matter in detail. The discounts applying to this new list are as follows:

Goods Papered, Full, Half and Quarter Weight.

		Discounts.		
American Cut	90	37½	and	10%
American Cut, Tinned	90	37½ 10	and	10%

CONDUCTOR PIPE AND EAVE TROUGH, GALVANIZED: Advanced quotations were made on Galvanized Conductor Pipe and Eave Trough by the manufacturers, under date of March 23, the new discounts being as follows, less than carloads to dealers: Nested, Eastern territory, 70 and 15 per cent. discount; Central, 70 and 7½ per cent.; Southern, 65 and 10 per cent.; and Southwestern, 60 and 15 per cent.; not nested, Eastern, 70 and 10 per cent.; Central, 70 and 2½ per cent.; Southern, 65 per cent., and Southwestern, 60 and 5 per cent. It will be observed the A. & B. Eastern classifications have been discontinued, the quotation now being simply for Eastern territory.

Eave Trough, galvanized, less than carloads to dealers, is now quoted: Eastern territory, 80 per cent. discount; Central, 75 and 10 and 5 per cent.; Southern, 75 and 5 per cent., and Southwestern, 70 and 5 per cent. discount. The freight allowance on both Conductor Pipe and Eave Trough is now on 500 lineal feet, instead of as formerly 250 lineal feet.

The extras on these goods have been advanced as follows, viz.: No. 27 gauge per lineal foot, 4 cents (formerly 2 cents); No. 26 gauge, 6 cents (formerly 4 cents), and No. 24 gauge, 12 cents per lineal foot.

ROPE: The following prices represent the market:

	Cents per pound.
Pure Manila, 7-16 and larger	12¼ to 12½
No. 2 Manila	10
Pure Sisal, 7-16 and larger	10
No. 2 Sisal, 7-16 and larger	8¼

Less ¼ cent to the large trade.

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....48 cents per gallon.
In lots of 5 barrels or more.....47 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil.....60 cents per gallon.

THE PITTSBURGH TRADE.

The closing week of March and the opening days of April presented us with fine warm Spring weather and trade responded to it with a jump. Merchants are calling for their goods in a hurry and every available man is put onto the order gang so that

FILES AND RASPS
NICHOLSON, KEARNEY & FOOT, ARCADE, AMERICAN, GREAT WESTERN, McCLELLAN, EAGLE, J. B. SMITH, "X. F.", GOLD MEDAL.

they may not be disappointed. After the subsidence of flood stage in our rivers last month, a large shipment of coal went out for the down river cities. This means more work for the river coal miners and large returns to the coal companies. The bill introduced in Pennsylvania Legislature imposing a tax on coal mined, is said to be killed. There was fear it might go through but better counsel prevailed. Pennsylvania is not the only State mining bituminous coal and would be badly handicapped with such a tax. The making of a general Hardware catalog is a task that is not appreciated until it is tried. Both time and expense are involved and when a customer cuts out a page to describe what he orders, it is discouraging. Among the annoyances of the work, is the frequent changes of manufacturers' lists, so that it is hardly possible to get out a complete catalog without several changes while it is in the printer's hands. Collections in the small towns have been quite slow but we look for an improvement now that April 1st, the annual settlement time in the country, has passed.

Logan-Gregg Hardware Co.

THE CLEVELAND TRADE.

With the Preacher and Doctor, the merchant can do much to make a country village a pleasant place to live. The morality, health, prosperity and happiness may be helped or hindered. If the spirit of selfishness and greed be manifest among these leaders, it is sure to become contageous. A lack of loyalty to the public interest in the merchant opens the field for catalogue houses. If customers who question prices are treated in an offensive way, the difficulty will rapidly increase, while the manifestation of a lively interest and painstaking care to get at the facts, gives evidence that the merchant believes that his price is correct. He should be careful not to make the impression that he regards it an unfriendly act to question his prices; for if others make lower prices it is his interest to know it and if it is impossible to meet such prices it should be his first business to find out why. Modest people are likely to buy in other places without giving reasons for doing so. To know why a customer leaves you is very important since your business depends upon your reputation. Friendship and loyalty to you will depend largely upon your loyalty to the community. Pride of locality will not avail to keep trade at home unless friendship for the merchant helps to do so. Whatever aids in building manly character is expedient in business. This is the permanent compliment to virtue that it is wise always to remember. To expect more than is due invites disappointment. March trade has improved somewhat over February, but hardly meets expectations. Neither optimism nor pessimism find much encouragement. There is an impression that consumption will not keep pace with the immense production of pig iron, that present buying is being based on an expected demand that may not materialize, and this causes caution. In some sections trade is almost dull and taken together is only moderate. Very much depends on the crop outlook as to trade for the balance of the year.

The Lockwood-Taylor Hardware Co.,
C. B. Lockwood, President.

THE ST. PAUL TRADE.

We have experienced a very satisfactory business, largely due to an early Spring. Usually our business opens up about the first of April, but this year it started almost a month earlier and has continued in splendid shape. We feel that our Spring business is assured on a good basis, as prices are held up to a large extent so that the confidence of dealers and consumers is strong, that no declines are in sight. Altogether, conditions could not be better. Hackett, Walther, Gates Hardware Co.

THE DAVENPORT TRADE.

We are pleased to report an improvement in business, the volume of which is again satisfactory; and also that collections are much better. The Spring crops are being planted; have had sufficient moisture during the Winter to encourage the hope of a bountiful crop. Building operations will be extensive. One of our leading architects said to the writer, that as far as he could estimate, there would be ten times as much building in Davenport this year as ever before. Suppose we accept this statement, subject to a liberal Hardware discount; we may still look for the largest amount of building this year, ever known. We forecast an excellent season's trade, to some extent, on the fact that nearly all our sales are on "Rush" and "Hurry up" orders.

Sickels, Preston & Nutting Co.

Who gives a thought as to how and why and when keys were invented? It is claimed that Samos invented the first keys in 730 B. C., while others place it just before the siege of Troy. Strips of wood bent at the end were first used. Then an ambitious Spartan improved on this by making a key with three notches. In the Middle Ages keys became things of beauty and showed a wonderful amount of labor. The handles represented arabesques, flutes, gulpure patterns, windows, dolphins, mermaids, birds, horses, crosses, Arabic letters, and all sorts of odd devices. Louis XVI., who had a taste for mechanics, fashioned several keys; their handles formed double "L's" and each was surmounted by a crown. These are in great demand among collectors and bring fabulous prices. A key made by a master who embodied in it the arms of the Strozzis was recently sold a collector, and brought the enormous sum of $7,000.

Other odd shapes for key handles were bows, rings, clubs, spades, trefoil, castles, crowns, monograms, etc.

AMERICAN SAWMILL MACHINERY.

One of the most important industries in the United States, says the *American Exporter*, is the manufacture of sawmill and wood-working machinery, which, as it has developed within the past few years a comparatively large export trade, is well worthy of consideration by all our readers.

Undoubtedly the first power saw mills were the old-fashioned upright or Mulay mills, which were probably first used in France Shortly after the settlement of this country, the New Englanders began to use water power mills, and these mills were employed quite extensively in the United States after that time—equipped solely, however, with upright saws.

Early in this century experiments began to be made with what is known as the circular saw; and in time, on account of its rapid production, this variety of saw became almost universally used. At first it was necessary to employ very thick blades, which caused a great waste of material; but with the introduction of improved steel and improved methods and machinery, circular blades nearly as thin as the old-fashioned upright saws were finally made to work successfully.

Circular saws for sawing lumber from the log have never been extensively used outside of America, probably owing largely to the fact that expert circular sawyers are not to be found in other countries, and, further, the saws and the mills of other countries are very inferior to those of America; and also because of the thickness of the cut and consequent greater loss by sawdust of the circular saw.

The broad statement that American saw-mill machinery is much superior to any made abroad, though unquestionably true, will, no doubt, be challenged by foreigners who have not had experience in operating English, French, German and American sawmills of various types will confirm the assertion, and a little investigation will prove it beyond a doubt.

An instance came to our notice some little time ago, where one of the principal English manufacturers of sawmill machinery, finding that English sawmills in one of the South American countries were being rapidly supplanted by sawmills of American make, instructed their agent in that country to purchase one of the most popular American mills that were being sent out there, and forward it to them in England, where a copy of it was made and returned. This mill was sold and erected, but as it failed to give the satisfaction that the American mills which were being operated in the same district were giving, it was condemned and an American mill ordered in its place.

This is not an isolated case. A number of similar instances have come under our notice. There is a peculiar knack in manufacturing and operating saws and sawmills which is only acquired by years of experience and careful training, and manufacturers in America possess the great advantage of having hundreds of men at their command, schooled from boyhood in the art of operating saws and timber-reducing machinery, and who can almost by intuition detect the slightest defect in the saws or in the machinery employed by them in doing their work.

The reasons why Americans (and in this term we include Canadians) make superior machinery of this class are obvious. Since no other country in the world has ever produced, or is now producing, anything like the same quantity of lumber as America, our manufacturers have found it necessary, on account of the increasing value of the lumber and skilled labor, to take advantage of everything that might reduce the labor and improve the production in either quantity or quality, and there is no one, having any knowledge of the inventive genius of our people, who will not readily admit that they are pre-eminently quick to perceive and to supply the best means for accomplishing any desired purpose, and especially is this true when, as in the lumber industry, the conditions are favorable and the necessities urgent.

For many years the steel used in the manufacture of saw blades was imported. Now, practically speaking, the steel used in the manufacture of our saws is all made in this country. It was here also that the inserted and bit-tooth circular saws now so extensively used were invented and first made, especially for the large circular saws which are generally sent to foreign countries, owing to the greater ease with which they are kept in working order, and also because the diameters of such saws are not materially reduced by long use, as is the case with solid-tooth saws.

For many years, owing to the enormous tracts of timber land in America which it was desirable to clear off for agricultural purposes, no thought was taken of the great waste caused by the cutting of timber with thick circular saws, quantity being the first consideration. As a very large output was desired, thick blades were employed, in order to be able to saw rapidly; and many circular sawmills in this country, even with a single saw, cut as high as 10,000 feet of one-inch lumber in an hour. Sometimes even larger quantities than this are cut and a day's production is commonly from 40,000 to 50,000 feet. When the amount of power and of cutting necessary to produce this output is considered, it will be readily understood that great care must be taken of the saw and the machinery.

Now that timber lands are scarcer or more remote, the subject of economy in the cutting of lumber has become a question of great importance, and the manufacturers of sawmill machinery have been compelled to produce mills that would cut a corresponding quantity of lumber without so great a waste in sawdust. The gang saw extensively used in large mills is not practicable for this work in the smaller mills, nor is it possible with the gang mill to take advantage of the different qualities of lumber that may be in a single log, as with the circular mill. The only thing left then, apparently, was to take up and perfect the band mill. Probably, the first band mill known was the "Newberry," invented early in this country. At that time the thinness of the kerf or cut made by the saw was not the quality that recommended its use. As mentioned before, quantity in cut, and not economy, was the standard. Thinking men, however, perceived the fact that the time must come when, owing to the great waste of the circular saw, it would have to be done away with, and something more economical employed in its place. This, therefore, kept the band mill alive, and constant experiments went on, to perfect this mill and the saws employed, until now a 15 or 16 gauge band saw is made to produce about as much lumber in a given time as a 6 to 8 gauge circular saw.

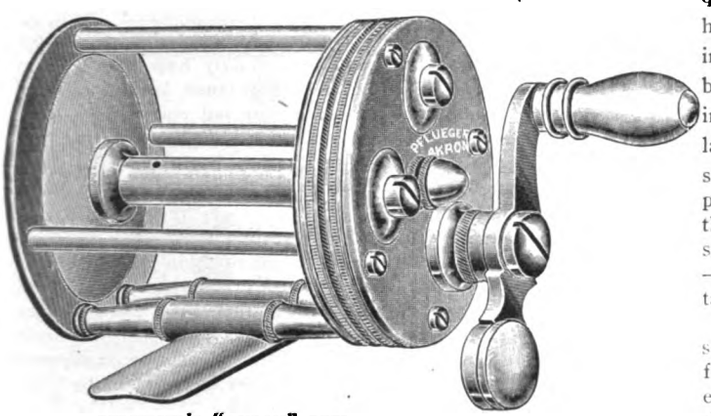
France, we believe, claims the first band mill for log sawing, and this was brought to Canada about the year 1870. Owing to defective saws, and the small experience that had been had with band mills, it was not a great success, but it showed the possibilities of its ultimate employment for sawing logs into lumber. This being the case, practical experiments were made with it, until at the present time the American band saw for cutting logs stands far ahead of any machine of its kind ever made. To gain this, not only the machine itself had to be perfected, but saws had to be produced that would run successfully on these mills. This also American skill accomplished, and we are no longer depending on England, France or Germany for band sawmill machinery, but are actually beginning to return the compliment by sending mills and saws to the countries to which we formerly had to look for these machines.

Band mills are now made to compete in quality and output with the best circular mills, at the same time saving in lumber from 7 to 20 per cent., according to the thickness of the stock into which the logs are cut. This result has been reached within a comparatively few years, and improvements will doubtless continue.

By referring to the advertising columns of English and European trade journals, it will be noticed that many of the cuts and descriptions of the leading sawmills and machines therein contained are, in reality, those of American machines. We fail to see how a greater compliment than this could be paid to American manufacturers and American ingenuity.

The term "wood-working machinery" applies more particularly to those machines employed in manufacturing lumber after it comes from the sawmill. It is possible, by the aid of the wood-working machinery now produced in America, to perform nearly every detail of the work of dressing and finishing woods, even in the most complicated and delicate designs. American wood-working machinery is largely exported, and the trade continually increased. At present it would be difficult to find any large or well appointed wood-working establishment in any country of the world that does not contain machines of American manufacture, and invariably the proprietors speak most favorably of them.

A SMOKELESS STOVE.



Device That Prevents Formation of Carbon.

A new type of stove, the object of which is the abolition of smoke, no matter what fuel is employed, has been demonstrated in London. The invention comprises a screen of tubular fire bricks, made of special material built up in the furnace in such a position that all the products of the fire pass through the screen. The latter quickly becomes incandescent and flashes the gases as they pass through, thus preventing the formation of carbon. By the aid of this device, says the *Scientific American*, coal of the worst description can be burnt in the ordinary boiler with practically no smoke, and with a considerable saving in cost. For this purpose of demonstration, cheap, damp coal dust was burned. The only result was a light gray cloud at the top of the chimney stack, which cleared away in a few seconds.

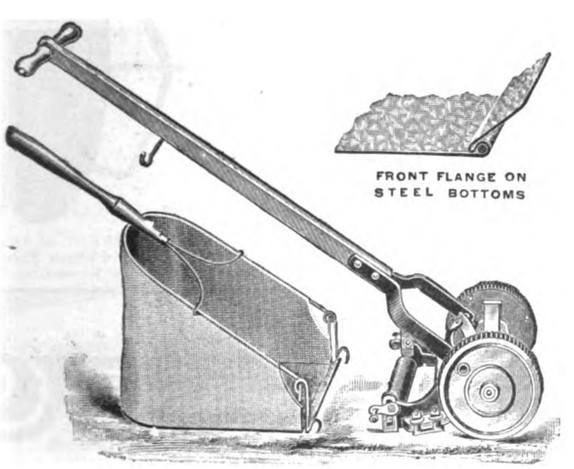
PFLUEGER'S "AKRON" REEL.

The Enterprise Manufacturing Co., Akron, Ohio, are the manufacturers of the Pflueger's "Akron" Reel of which we present an illustration. This is pre-eminently an article for the expert angler, embodying as it does in every detail of a faultless construction, about all that the manufacturer knows of building a fine reel. It is claimed to be made exclusively by hand, and that hand the best and most skilled that long experience can produce The "points" of the "Akron" may be mentioned in detail as follows: Round wide pattern having quadruple front sliding



PFLUEGER'S "AKRON" REEL.

click and drag reel. It is made of German silver, hand polished with a satin finish. The pinions and pivots are cut from a single piece of Stubs steel, hardened, ground and polished. The bushings are of phosphor bronze with dead center bearings of either Agate or German silver as preferred, with fancy oil cups. The cog-post is of Stubs steel; perfectly finished ivory handle finished with or without jeweled bearings; for the latter, genuine sapphires alone are used. Each reel is packed in a black leatherette box, with gold bronze printed label, and to protect the reels, three of these boxes are in a carton.

THE "EASY EMPTYING" GRASS CATCHER.

The Specialty Manufacturing Co., St. Anthony Park, Minn., are the manufacturers of the Easy Emptying Grass Catcher, which is made from heavy duck with a galvanized iron frame, and which has achieved considerable popularity as a salable specialty We give an illustration of it herewith. It is now made in two sizes which fit perfectly any size of Lawn Mower. It is made with bottoms of either duck or galvanized steel, being formerly made of duck only, they have improved it by adding also a gal-

THE "EASY EMPTYING" GRASS CATCHER.

vanized steel bottom, after experimenting last season with the testing of several samples they have attained success. Their galvanized steel bottom catchers are provided with a flange in front which effectively prevents the grass from being carried forward against the roller, and greatly adds to the grass-holding capacity of the catcher. This flange may be adjusted by bending either up or down in order to fit any make of lawn mower perfectly. It is emptied, by lifting from mower by handle and emptying grass into a basket, wheelbarrow or wherever desired. Can be left off when mowing steep banks, or when it is not desirable to catch the grass.

OUT OF THE BOGS OF THE PAST.

"Why should not as efficient 'helps' be provided for Hardware merchant to take care and sell his goods as to buy them? Have not modern methods made obsolete the maxim 'Goods well bought are half sold,' a phrase coined when factories were few and buyers many, and the quantity bought determined the amount of discount, but now 'Goods well displayed are half sold,' as good buying to-day consists largely of correct selections that selling acquires a knowledge for, and if the same time, ability and brains heretofore used in watching prices were devoted to selling, trusting the costs mainly to the competition and honor of reliable jobbers and their traveling salesmen, would it not result in greatly increased profits at the end of the year? The fine building, the large stock, the low cost amount to little if the goods are not sold. The financial success of every merchant depends upon profitable selling. The jobber wins success in selling, through the unlimited aid of fine catalogues, sample rooms and the above salesman, but after the goods land at the retail merchant's store —what then—what has been done for him in the one all important part—selling?"

"These are a few of the many questions that presented themselves to the traveling man who has originated, designed, manufactures and places in the Hardware store—fixtures that release every Hardwareman from the dilemma that he has been in, carried to such completeness, that every article can be seen, the price given and the article delivered within one minute. These fixtures take capital and save it—prevent wasteful storage—keep it from slumbering, and make greater returns by more practical use of it; renders in every store equal service and advantages, regardless of the firm's individuality or location. They enable capital to be so invested that $2,000 renders greater profit than $5,000, heretofore under old methods. This is not theory, but fact—verified by hundreds using them. They are workers reliable and constant, ever present and active. The goods become self-selling if attractively and invitingly displayed in such a way that they appeal and fascinate, which begets a desire to possess. In place of only selling the articles inquired for, the increased sales thus made resulting in a handsome profit—to you—instead of to the other merchant that displays them."

The above is a portion of the introduction to a set of handsomely printed (in colors) illustrations and descriptions of different combinations arranged with sectional shelving made by the J. D. Warren Manufacturing Co., Chicago. The entire circular is well worth the time any dealer would spend in reading it carefully. It will be sent to any Hardwareman on request.

WHERE CARE SHOULD BE USED.

Varying prices almost always occasion complications, but where they must be used, do not, oh do not, make the recipient of the cut price think he is the only favored one or the most favored unless that is strictly true. Here is an actual occurence that I happen to know about. How often is it repeated in part at least in every neighborhood.

Mr. Jones went to the Hardware store to buy a plow and after a good deal of haggling was given "an un-heard-of cut price on account of his being such a good customer."

As a matter of fact the price given was a bargain over which Jones had a right to feel well satisfied, if the thing had only stopped there. But on the way home he meets Smith, who looks at the plow and asks the price. Jones finally gives it confidentially with a chuckle of satisfaction and some exultation. The word passed around, Jones really enjoying his own special standin quite as much as his bargain—till it comes out that Mr. White got equal consideration a week before. It hurts Jones' pride even worse than his pocketbook and he comes back upon the Hardwareman in spirit for revenge; while his neighbors, though they may enjoy his discomforture, are none-the-less mindful not to get caught by that Hardwareman themselves.

I once heard a man say that he hated to mention the price he paid a certain dealer for anything he did not know the market value of himself, especially if it was sold him as a "bargain." If he gave the price he expected to be laughed at for paying too much and if he quoted lower figures than he really gave he ran the risk of making a statement that the real value of the article would not warrant him in making to a man who was posted in values.

For the protection of your customers don't fool them in the real price of an article. If you are really giving them a bargain say so; if only ordinary value, don't invite a comparison of prices from which you will have to suffer by claiming to give a value that you do not give.

THE "DRUMMER" IN ENGLAND.

A contributor to the *Ironmonger* (London) gives, in a recent issue of that paper, his experiences with traveling salesmen—"travelers" they call them over there, and in some few respects the British Knight of the grip and orderbook seems to bear a faint resemblance to his American cousin. The article reads as follows:

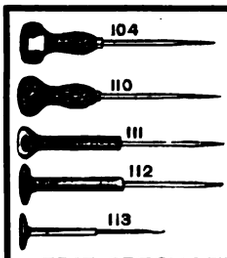
A traveler is a human animal with which we are forced to put up, because we may possibly at some time need some of the "extra special lines" which, he assures us, are being sold by every ironmonger except ourselves like "hot cakes," "ripe cherries," or any other thing that gives indigestion.

Travelers vary in size, shape and manners. We are glad to see some and hate to see others. I have even heard of travelers who offer to stand drinks, "just because they have ten minutes to spare." But that is distinctly wicked, and a great waste of time (and, of course, we hate that class.)

We know one traveler whom we will call "John." When he calls we first hear the shop-bell ring, then a waistcoat comes majestically through the door by degrees, and we know that in a short while "John" will be doing himself the pleasure of waiting upon us. When all of him is in the shop we get our window-reacher to shake hands with him and we welcome his smiling face.

We know another traveler, who comes in, starts in the key of A flat minor, sticks to his keynote, and goes through his list of prices "currant" (which, he assures us, are wonderfully raisinable) from beginning to end, with a sob or two interspersed to arouse our sympathy. At the first pause we hasten to tell him that we are quite satisfied with the firm we already do business with. But that does not appear to affect him at all. He starts again. We try passive resistance, and begin siding up things on the counter. No use; he continues to intone, and at last we leave him in despair, chanting to the parcels on the shelves.

There is the traveler who comes in and waits to hear how we talk to customers while we are selling goods in his line. Often our customers get impatient, and then we slip round the counter and suggest to the traveler that we may be busy for a few minutes. But a traveler of that type always tells us: "Oh, I'll wait, thanks." "All right, my boy," we think, and after our customers are gone we indulge in a few observations which make that traveler think we are the most eloquent ironmongery firm in the world. He never calls again.

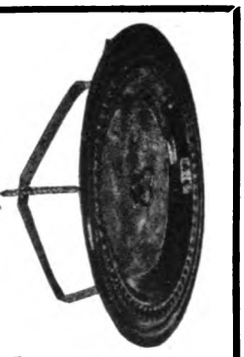


Top-hatted and kid-gloved travelers are very sweet. They usually remember what sort of weather we've had each day for months back, and we feel very proud of them because they set the shop off so. Then there's the old traveling chap, who always brings a special sample with him wrapped up in an old brown-paper parcel without string, and the Yankee, who can't possibly guess how on airth we can carry on business without buying from him. However, he'll mail us his "catalog," and he knows there will be a good account for him to collect next journey.

All travelers' samples are broken. Their owners explain this by saying that they (the samples) have been knocked about all over the country. Every traveler's firm is better than the other travelers' firms. Most travelers know exactly how many gross of their things you can sell before "they come around again." They have always booked huge orders from our competitors, and, surely, if those competitors can sell such things, we ought to! Some travelers speak the truth when they begin traveling, but they either get cured of this affliction or they are removed from the road.

The height of perfection in the "traveling trade" is "the boss with a curate." The curate comes round to make appointments at the stockroom, and we are graciously received by the "real head of the real firm." He is most gushing, and even shakes hands with us! Everybody always gets "special prices to himself only" from the boss. Everything is marked in private mark, and the curate is not allowed to speak unless he is appealed to. He has then to answer in private mark, and the boss reduces the reply to plain language. Then, there are such things as travelers' statements, and, really, they are the worst part of the traveler. We can get over every other defect by either shaking hands with him or pushing him out! But if he has a statement we have to be civil to the brute till we've paid him. I'm experimenting with a patent to see if the beastly statements can be exterminated! When it is perfect I shall put it on the market.

But, taking them all round, travelers, although a horrible nuisance, are not a bad lot.



TO AN engergetic salesman with $2000 or more to invest an exceptional opportunity to establish himself in a profitable, growing business offered. B. 1112, 379 Broadway.

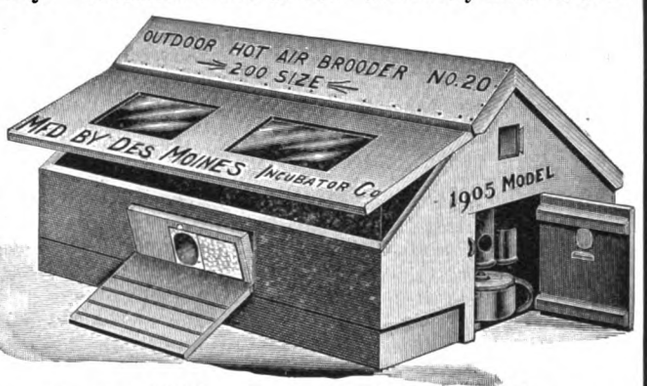
Successful Incubators and Brooders.



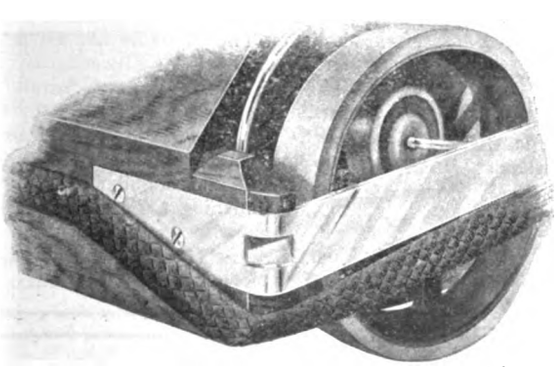
The poultry raisers are an important part of every community—a good class of people to get on the good side of. You can do it with the Successful Incubators and Brooders.

Best Hatchers and Chick Mothers in the World.

Not only best, but best known. It requires no argument at this day to convince poultry raisers that Successful Incubators and Brooders hatch and brood more and better chicks with less expense and less attention than any other machines made. That's the record of years.

Poultry raisers want certainty and they want simplicity. Successfuls are as near absolutely automatic in all workings as it is possible to make them. Only the simplest rules to observe. The beginner gets the same good results with Successfuls as the expert.

Everything for Poultry.



In addition to Incubators and Brooders we manufacture a full line of Poultry Foods and Supplies. We can supply you any article your customers may call for. And we can supply your customers with high bred fowls, any breed, from our Thoroughbred Poultry Farm. If you are not handling a line of Incubators and Brooders don't fail to write for our 1905 Incubator, Supply and Poultry Catalogue with dealers' terms.

DES MOINES INCUBATOR CO., Dept. 1001, Des Moines, Iowa.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Akron, Ohio.—The Hardware and Supply Co., of Akron, has been incorporated. The incorporators are: J. Edward Good, Crannell Morgan, Edward S. Bunnell, William W. Wohlwend and H. E. Andress. These men, excepting Mr. Andress, are connected with the Standard Hardware Co. and the Morgan & Bunnell Co., whose consolidation is effected by this new incorporation. The new company will occupy the building used by the Standard Hardware Co. Five floors in that building will be utilized, and in addition three other floors in the Kubler Building to the south will also be occupied. The capital stock of the new company is $150,000. That of the Standard Hardware Co. has been $75,000, and that of the Morgan & Bunnell Co., $25,000.

Ashland, Ohio.—The Ashland Steel Range and Manufacturing Co. has been incorporated by Allen Thomas, Frank Wharton, Thomas Wharton, C. W. Landis, F. M. Masters and Abram L. Sherick. Capital stock, $100,000.

Bradford, Pa.—The Bradford Manufacturing Co. has recently been organized. The new company comprises the stockholders of the Thermal Footbath Co. and F. A. Ansell and H. E. Crandell. The change in the name of the company and the new charter is because the company will manufacture a level in connection with the footbath. Messrs. Ansell and Crandall had control of the Hodge patent level, plumb and inclinometer, and the members of the old company thought it would be a desirable article to manufacture in connection with the footbath.

Camden, N. J.—The Juniata Supply Co. has been incorporated to manufacture, buy and sell supplies, tools and materials used by contractors. Capital, $100,000. Incorporators: C. N. Snyder, John A. MacPeak and Joseph F. Cotter.

Cleveland, Ohio.—The P. A. Geier Co. has been incorporated. Capital, $10,000. Incorporators: P. A. Geier, Philip E. Hintz, George K. Byrd. R. W. Edwards and William S. Geier. It will manufacture tools.

Hamilton, Quebec.—A meeting was recently held in New York to make arrangements for the organization of the Canadian Shovel and Tool Co., of Hamilton, Limited, with a capital of $250,000. Messrs. Skelton and McCarthy, of New York, who are proprietors of two of the American factories, are interested in the Canadian plant, and are closing arrangements for the locating of the works in Hamilton. The company will erect buildings and plant in the manufacturing district at a cost of $100,000.

Hartford, Conn.—The Hinckley Specialty Co., of this city, has been incorporated, with a capital of $50,000. The incorporators, F. Ellsworth Fuller, Fred. P. Holt and James R. Graham, all of Hartford, will manufacture, buy and sell Hardware, mechanical novelties and vending machines.

Hespeler, Ontario.—The Clark-Demill Co. has been incorporated. Capital, $100,000. Purpose, to manufacture machinery Z. A. Hall, W. H. Weaver, A. Oches, J. R. Phin and C. M. Shultz, all of Hespeler.

Keokuk, Iowa.—The Weser-Kirch Manufacturing Co. has been incorporated. Dealers in Hardware and specialties. Capital stock, $10,000.

La Harpe, Ill.—A $50,000 stock company has been organized to manufacture a chicken waterer. Coulson, Brundage & Co. are the promoters and have secured the patent. It is the intention of the company to establish two manufactories besides the one located there—one in the east and one in the west.

Minneapolis, Minn.—The International Lighting Co. has been incorporated, with $2,000 capital stock, to manufacture lamps. C. W. Jenne, John W. Furber and George F. Furber are the incorporators.

Montreal, Can.—The Ryall Screw and Specialty Co. has been incorporated with a capital of $40,000. The company proposes to purchase the business of the present Ryall Machine Screw Works, and develop the same.

New York, N. Y.—The Burton Hose Holder Co. has been incorporated. Manufacture tools, Hardware, etc. Capital, $20,000. Incorporators: H. C. Murray, L. C. Boehm, C. M. Gilpin, all of New York.

New York, N. Y.—The Self-Heating Tool Co. has been incorporated. Capital stock, $50,000, and directors, J. N. Cooke, Donn Wood, P. M. Randall, New York.

Stamford, Conn.—The Hefumos Manufacturing Co. has been incorporated. Capital stock, $50,000. There will be a paid in capital of $17,500. The incorporators are: Frank B. Gurley, J. H. Bullard and Andrew Schlectivig. The concern will manufacture all kinds of household specialties made of metal.

St. Louis, Mo.—The Bradley Heating Co. has been incorporated by J. H. Rosene and J. H. Hicks to manufacture, construct and install heating plants, etc., and deal in heating and plumbing appliances, Hardware, machinery, house furnishing goods, tin and metal wares. Capital stock, fully paid, $30,000.

St. Louis, Mo.—The Climax Co. has been incorporated. Capital stock, $2,000. Incorporators: R. E. Tommerson, G. A. Sykes and William Sanders.

St. Louis, Mo.—The Foster Range and Stove Co. has been incorporated. Capital stock, $50,000. Incorporators: John S. Lowry, Robert M. Foster, R. P. Martin, T. J. Mitchell and Sterling C. Foster.

St. Louis, Mo.—The Plywel Neck Yoke Co. has been incorporated. Capital stock, $50,000, full paid. Incorporators: Dempster Wishart, C. M. Merry, E. L. Stratton, Robert E. Collins and Edwin R. Chappell.

St. Louis, Mo.—The Standard Tool and Novelty Co. has been incorporated. Capital stock, $5,000, full paid. Incorporators: Edward T. Goodberlet, Meyer Cohen and Isy Cohen.

Toledo, Ohio.—The Best Manufacturing Co., a new stock company, has commenced the manufacture of a garbage receptacle.

Urbana, Ill.—The Twin City Malleable Iron Range Co. has been incorporated. Capital, $10,000. Manufacture stoves and furnaces. Incorporators: George P. Bliss, H. W. Leavitt and William J. Lowe.

White Bull, Tenn.—Preparations are being made to put in a large axe-handle factory here. The principal stockholders are and tools. The directors are: G. D. Forbes, Richard Bibb and Gus Anderson.

Windsor, Ont.—The Peninsular Tool and Specialty Co., with a paid-up capital stock of $22,000, has been authorized to do business in Windsor. The company will erect a factory on Caron avenue, where fine tools and other goods will be manufactured.

Winnipeg, Man.—The Norris Implement Co. has been incorporated. Capital stock, $100,000. Incorporators: John R. Norris, George E. Norris, Thomas L. Metcalf, E. E. Sharpe and Dick A. Stackpoole.

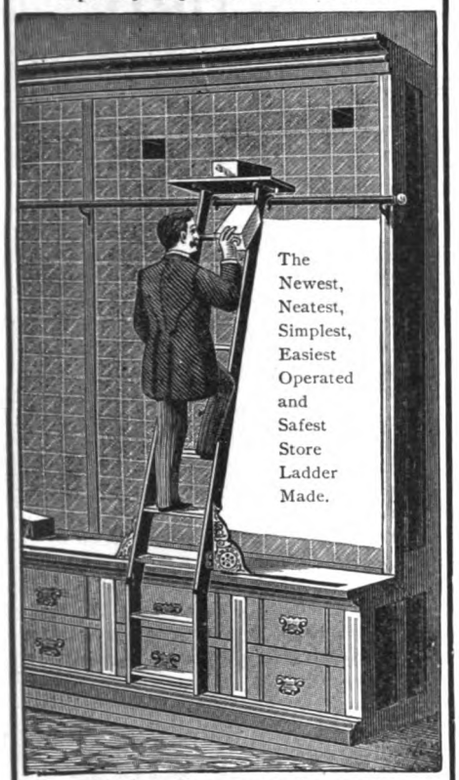
Youngstown, Ohio.—The Ohio Novelty Co. has been incorporated, capital, $5,500, by Richard Cole, Charles E. Peterson, Emil J. Anderson, W. P. Barnum, Jr., and Henry O. Nelson.

Changes.

Alexandria, Ind.—The American Solidifying Wood Co., of Marion, capitalized at $100,000, has begun the preliminary work of removal from Marion to this city, where it will locate on the former Kelly Axe Co. site. It will manufacture pulleys, blocks for tackles, mauls, mallets, bowling and croquet balls, printers' furniture, wood for wood type, engraving blocks, caster rollers and handles.

Dayton, Ohio.—The Fox Stove Co. is now established at its new place at 27 West Fifth street, where they have plenty of room for their rapidly growing business. The concern occupies three floors, and are able to display their large stock to advantage.

Detroit, Mich.—At the special meeting of the stockholders of the National Twist Drill and Tool Co., held at their office, on Twenty-first and Standish Streets, on March 23d, the capital stock of the corporation was increased from $20,000 to $40,000, which has all been subscribed for.



Ellwood City, Pa.—The holdings of the Pittsburgh Wire Co., organized fifteen years ago, and headed by H. W. Hartman, are transferred to a new company, composed of Ellwood City and Pittsburg capitalists. The directors are G. A. Gaelbach and H. S. Beatt, of Ellwood City, and J. A. Gaelbach, president, and Samuel A. Roelofs, secretary and treasurer.

Ft. Wayne, Ind.—The fourth large building composing the Fort Wayne plant of the National Handle Co. is just receiving the finishing touches and the company will begin at once the erection of another just like it. The new building is a warehouse covering an area of 50x200 feet.

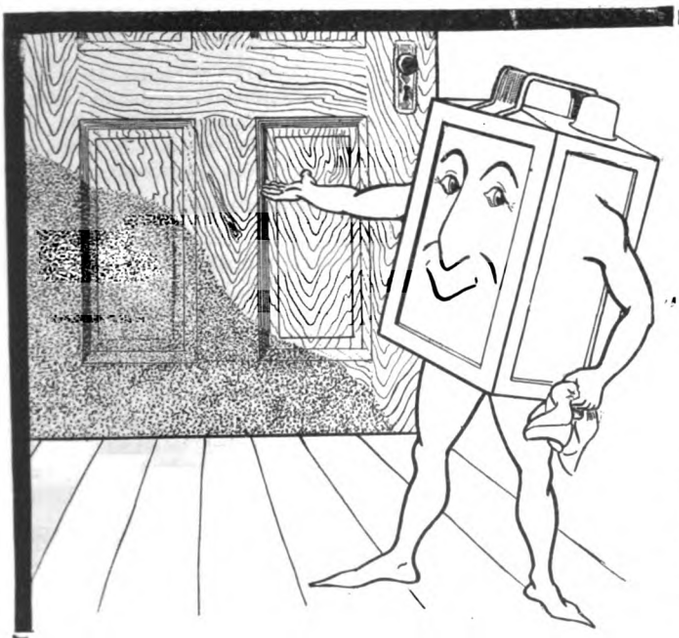
Sargent's Gem Food Chopper

s sold by leading jobbers everywhere. You can get a stock quickly so as to supply the women of your vicinity who need the Gem in their kitchens.

The fact that the Gem is such a useful—yes, indispensable—household utensil is becoming known to thousands of women. We are advertising extensively to make its merits known and in all our advertising we state that the Gem is sold by hardware dealers. That is the story in brief, and it shows that there is



An Opportunity for Every Hardware Dealer

—an opportunity to increase profits by taking hold of this popular article and pushing its sale. It is easy to sell the Gem; housekeepers want it as soon as they learn of it through our advertising. It will help if you make use of some of the attractive advertising matter we furnish for local use—showcards, slips and electrotyped ads; also Cook Books, so that you can present one with each chopper sold.

Montreal, Can.—The Canadian Ammunition Co. has been incorporated to manufacture ammunition of all kinds. Capital stock, $500,000.

Morristown, N. J.—The W. H. Dutton Co. has been incorporated to manufacture and deal in Automobiles and Bicycles. Capital stock, $20,000. Incorporators: Willis H. Dutton, Hattie S. Dutton and James E. Dutton.

New York City, N. Y.—The National Powder Co. has been incorporated to manufacture explosives. Incorporators: F. B. Hunt and E. Dotmold, New York, and J. Von Lengerke, Orange, N. J.

New York, N. Y.—The Eagle Powder and Chemical Co. has been incorporated for the manufacture and sale of explosives of all kinds. Capital stock, $25,000. Incorporators: R. M., R. B. and E. W. Cushing, all of New York.

Oakland, Cal.—The firm of Lancaster & Lancaster has just been established to handle Sporting Goods, cutlery and tools. Complete lines of each will be carried in stock.

Paducah, Ky.—S. E. Mitchell has opened a new store and will deal in Bicycles and Automobiles.

Paterson, N. J.—The Paterson Toboggan Co. has been incorporated. Objects, to manufacture, erect and operate toboggan slides. Capital, $14,000. Incorporators: T. M. Borton, R. H. McBrown and George M. Harton.

Philadelphia, Pa.—The Keim Saddlery Co. has opened a completely equipped sporting goods emporium at 1227 Market Street. The company has the exclusive agency for the Victor sporting goods, and will also carry every other good make.

Plymouth, Mass.—Charles E. Cayden has opened a repair shop.

Pueblo, Colo.—The Du Pont Powder Co. have acquired a tract of 5,000 acres near here and will establish factories for the manufacture of explosives. Work on the buildings has already commenced.

Reed City, Mich.—George R. Rice has opened a new store.

Spring Valley, N. Y.—Louis F. Hoyt will open a Bicycle store in the Heidgart Building.

St. Louis, Mo.—The St. Louis Boat and Engine Co. has been incorporated. Capital stock, $6,000, full paid. Incorporators: Frederick Roth, Herman and Oscar Gidionsen.

Waterloo, Iowa.—C. E. Shook has opened a new Bicycle store.

Winnipeg, Man.—The Hingston Smith Arms Co. has been organized with a capital stock of $50,000.

Woonsocket, R. I.—A new firm has been organized by Stephen Richards, Jr., L. J. Simonds and Roy Simonds, and will be conducted under the firm name of Richards & Simonds. They will locate corner of Main and Elm Streets and will conduct an Automobile and Bicycle salesroom, repair shop and garage.

Changes.

Atlanta, Ga.—The general southern offices of the DuPont Powder Co. have been removed to Birmingham.

Boston, Mass.—E. H. Corson, who is to trade in Boston as the manager of the Indian Motorcycle Co., has leased the store at 258 Columbus Avenue. He purposes not only to sell and repair Indians, but to teach both their operation and care; in other words, he will, on a small scale, combine with his business a school of instruction.

Boston, Mass.—Following the establishment of a branch in Cleveland, Ohio, the G. & J. Tire Co. have set up a depot in Boston, which will facilitate their business in New England.

Goshen, Ind.—The Office Supply Co. will remove its plant to South Bend and will increase its capital stock to $50,000. Its specialty has heretofore been the Worden Bucktail bait, and the output will be largely increased and other specialties manufactured.

Hoffmansville, Md.—Buildings considerably larger than those recently destroyed by an explosion will be at once erected by the Rockdale Powder Co.

Hornellsville, N. Y.—Charles Burdett has purchased the Sporting Goods stock and business of William Rewalt, on Seneca Street, and will merge his Bicycle business with it. Mr. Rewalt retires on account of ill-health.

Kent, Ohio.—It is announced that F. A. Pardee, of the firm of F. A. Pardee & Co., manufacturers of the Kent double spinner artificial minnow, has withdrawn from the business, which will be continued by Samuel H. Friend under his own name.

Los Angeles, Cal.—The Goodyear Tire and Rubber Co. have opened a branch store at 932 South Main Street, in charge of W. D. Newerf.

Lowell, Mass.—L. W. McKay has disposed of his Bicycle business to Connor & Farner.

New York, N. Y.—Harry A. Gliesman, proprietor of the Tiger Cycle Works, has removed his business from 563 Seventh avenue to 782 Eighth avenue, and thus secured more room.

Paducah, Ky.—The Paducah Baseball Co. has increased its capital stock from $500 to $3,000.

Syracuse, N. Y.—The Syracuse Arms Co. has sold to the Simmons Hardware Co. its entire stock of guns, valued at $140,000. It will take about eight months to complete the manufacture of the stock now on hand.

Miscellaneous.

Cambridge, Mass.—Harvard University is about to show the way to the other big colleges; a motor bicycle club is now forming in the big Cambridge institution.

MANUFACTURERS' RECORD.

(Continued.)

Muskegon, Mich.—The Muskegon Cutlery Co. has suspended business. Trust competition is said to be the cause. The concern manufactured patent alloy tableware. It was capitalized at $107,500.

New Haven, Conn.—The plant of the New York Lock Co., of Branford, has been sold at auction to E. A. Williams, of this city, representing the bondholders, most of whom are New York men. The purchase price represents the equity, the plant being subject to a mortgage of $65,000. Several years ago the business was bought by the Yale & Towne Co., of Stamford. Subsequently the concern was reorganized as the New York Lock Co., and went into the hands of a receiver. The plans of the purchasers with reference to the property have not been announced.

Oshkosh, Wis.—The Oshkosh Logging Tool Co. expect to commence at once the erection of the third and last building of its new plant, to be used as a warehouse and office. The building will be of brick construction and three stories high, 133 by 92 feet.

PRICES CURRENT

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

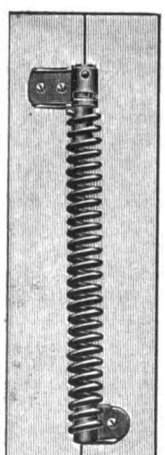
Get Ready
FOR THE
"GOOD OLD SUMMER TIME"

It will be here before you know it and so will a generous supply of flies and bugs.

Same old crowd swarming around the screen door anxious to get at the good things within.

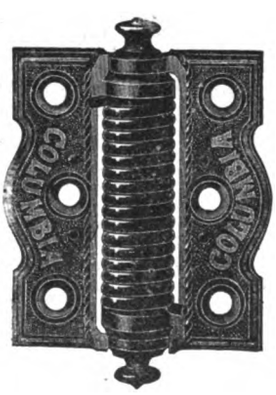
Same old crack through which they pour in because the same old, worn out, weak spring hinges keep the door constantly ajar.

Fine for the flies but hard for the housewife.



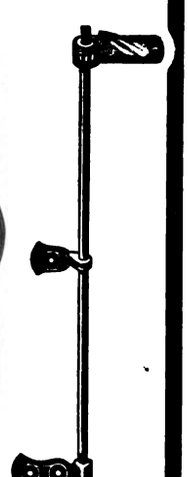
And yet you can supply her with our "Columbia," "Acorn" or "Cloverleaf" screen door hinges at the price she paid for those inferior hinges.

Our hinges have strong springs which close the door quickly and keep it closed.



They are the kind that last from year to year and they are nicely japanned or plated in a variety of finishes.

Further information given in our "Builders Hardware" Catalog No. 12, which also describes our door springs and door pulls.



Send for it now and be prepared to buy early.

The Gate City Filter

The Original and Only

Natural Stone "Gate City" Filter

No composition stone, sand or cement is used in it.

The stone used is mined from our celebrated Gate City Stone Mine for use only in our Gate City Filters—the only natural stone that will remove absolutely all disease germs and all other impurities, making all drinking water pure, odorless and sparkling.

Perfect Filtration

Easy Cleansing

Moderate Cost

Endorsed by leading Physicians Everywhere

Tested for Twenty Five Years

in homes, offices, factories, schools, hospitals. So great is its popularity that

One Million Five Hundred Thousand

have been sold during that time. Need more be said?

*

Display one in your store—explain its points of excellence—the sale is made.

*

We furnish you with plenty of literature to help you sell it.
Send for "Gate City Folder H" and prices. Mention HARDWARE.

"Right Up To The Scratch"

in every particular. No matter what you wish to duplicate· letters, circulars, invoices, menus or music,—or how many, 50 —150,—

"DAUS' TIP TOP DUPLICATOR"

is always ready for service.
Thousands of pleased customers testify to this fact.

HAVE YOU GOT ONE?

If not, get one. **Price $5.** It saves time and money on your print bill.

The Felix P. J. Daus Duplicator Co.,
111 John St., New York, U. S. A.

TRADE Sterling MARK

The average Hack Saw is still full of faults. Get the "Sterling". It is above the average. It is as near Hack Saw perfection as mechanical skill can make it.

"STERLING" HACK SAWS

Sell well for that very reason. We invite the investigation of the most critical as to quality and price.

Diamond Saw & Stamping Works,
357 Seventh Street, BUFFALO, N. Y.

TRADE Sterling MARK

BEST BY EVERY TEST

You want the best goods because you want the largest profits.

You want **Hauthaway's "Star" Harness Specialties.** They are best by stable test, and they are the tested best because they are made of the best material, in the best manner, by the best process.

They are "stars," brilliant, effervescent in selling and pleasing qualities. Each year but confirms their superiority over all other similar articles.

Hauthaway's "Star" Harness Oil Soap

The purest made. It is food to the leather, and has the shine in it. It is kind to the hands, healing and cleansing, because there is no free alkali in it, mainly mutton tallow. It is a Cresceus in selling ability. Best, and works that way.

Hauthaway's "Star" Harness Oil Blacking

The much demanded thing. Oils and blackens and shines, all at the same time. Puts new life and good looks into the leather. Best by test. Always sells in a hurry, and at a good profit. Try a sample order.

HAUTHAWAY'S SPECIALTIES

Hauthaway's "Star" Harness Dressing

The "star" of them all! Outclasses all others, surpasses all others in popular favor. Makes old harness look new, and new harness look newer. It is the king-pin dressing, and sells like a spicy novel. It puts money into the dealer's pocket, because it sells and keeps right on selling. Ask for facts.

Hauthaway's "Star" Axle Oil

Makes axles slippery as an eel. No more heated boxes. The Hauthaway body does it—not a greasy body, but a full frictionless body that resists wear. There is money in it for the aggressive dealer. Yes, there is!

Send to us for HAUTHAWAY'S Literature. Tells more facts worth knowing. Secure our prices, and know our goods. The rest is easy.

C. L. HAUTHAWAY & SONS, Sole Proprietors
346 CONGRESS STREET BOSTON, MASS.

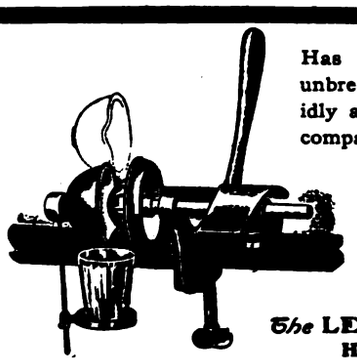
WIRE GOODS

of every description for office and household. Send for Catalog No. 15.



We do TIN PLATING

We pride ourselves on the excellence of our goods and their low prices.

J. R. Dawson Mfg. Co.

1520 & 1522 N. Palethorp St., Phila. Pa.
N. Y. office, 434 Broome St.

The "Leader" Lemon Squeezer

Has no loose parts. Is unbreakable. Works rapidly and thoroughly. Most compactly put together.

Two styles — nickel plated and Japanned.

Mention HARDWARE.

The LEADER MFG. CO.
Hartford, Conn.

THERE'S A HEAP O' SATISFACTION

in a name—a name that stands for bestness—best quality.

Take Axle Grease for instance: if there's any kind that gives all-a-round and lasting satisfaction, it's

FRAZER'S AXLE GREASE.

Its the Grease of quality; puts all the "just as good as" Frazer kind in the shade. Sells quickest; lasts longest. Sold in boxes, cans, pails, kegs. barrels. The question is: how much do you need?

FRAZER LUBRICATOR COMPANY,
85 Murray St., New York.

DEALERS

Throw your line among fishermen and you'll get a **strike**—with a rush for the goods—if it's the general line of

Pflueger's Fine Fishing Tackle

made only by the

ENTERPRISE MFG. CO.

Twenty-five years' experience, combined with the largest manufacturing facilities in this country, enable us to produce a superior line of fishing tackle that fishermen insist on having.

Hooks, Flies, Trolls, Spinners, Phantoms, Reels, Furnished Lines, everything in fishing tackle, packed for effective display—best selling line you can carry.

PFLUEGER'S PATENTED REVERSIBLE HINGE INSURES FREE SPINNING AND PREVENTS BENDING OR BREAKING

NOTICE

Free to any dealer in SPORTING GOODS, sent express prepaid, 155 page illustrated catalogue No. F23, Metal Fish Sign and Window Transparency in eight color lithograph.

The ENTERPRISE MFG. CO.

Akron, Ohio, U. S. A.

A Kettle that Gives Pleasure

and makes work easy because it is light, smoothly finished and can be handled without the usual strain.

Let us have your order for trial lot.

Peerless No. 7 Screw Driver

Ducharmes Tools

H and D No. 5 Screw Driver

WE make a specialty of Hand Forged, Hardened and Tempered Screw Drivers, using positively none but the highest grade stock in both steel and handles.

We guarantee each driver to the trade, and will replace free of charge any that break, bend or are not perfect in all respects,

Each driver is tested to break a screwhead in its size.

Send for our latest catalog and discount sheet. We know you'll be interested.

A Better Location Than Yours

would be in Virginia, the Carolinas, Georgia, Florida or Alabama, and the special Southern edition of the Seaboard Air Line Magazine will convince you. It contains specific opportunities, and lists of orange groves, pine apple plantations, farm, fruit and truck lands.

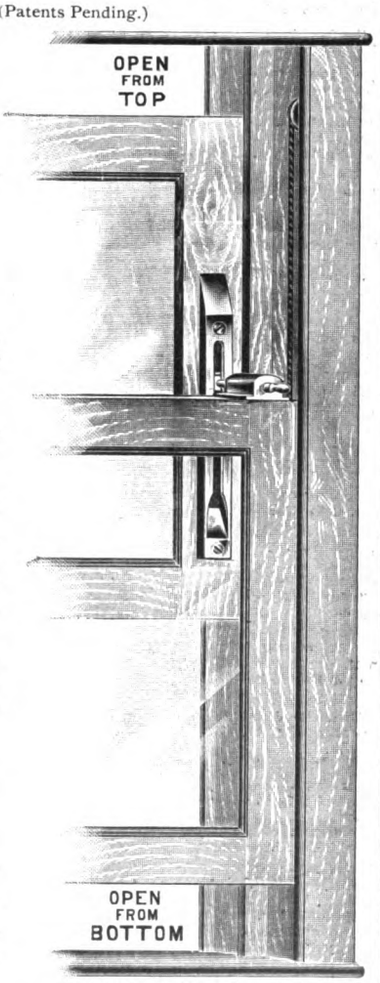
"Picturesque Florida" containing over a hundred full page photogravures illustrating typical scenes, but containing no reading matter or advertising, together with other literature sent on receipt of ten cents to pay postage.

J. W. WHITE,
General Industrial Agent,
Seaboard Air Line Railway,
Portsmouth, Virginia.
We have a good location for your plant.

This **couldn't have happened** if the window had been protected by

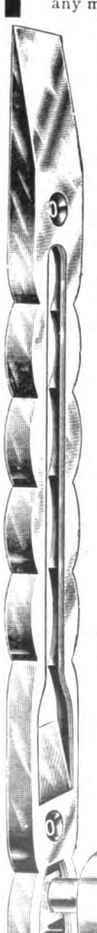
Rosenberg's Perfection

Burglar Proof



SASH LOCK and VENTILATOR

(Patents Pending.)



Permits the sash being raised from the bottom or lowered from the top from one to six inches, without sacrificing security.

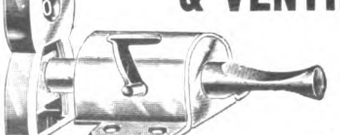
Draws sashes tightly together, preventing rattling and draught.

It is impossible to unlock the opened window from outside by any means.

Simplex Lock shown in operation.

The window when locked either open or closed cannot be raised with a crowbar by 2000 lbs. pressure.

Not necessary to cut sashes to attach.



Anybody can attach it with a screw driver.

This lock is one of the fastest selling of all counter goods as it quickly demonstrates its usefulness to customers. Women, especially, are enthusiastic over it as it affords them such complete protection in the home.

Retail Price: 25c., 35c. and 50c.

According to style and finish.

Samples sent free to dealers, with prices and terms.

Perfection Lock ⅔ original size.

THE ONLY CLEANABLE REFRIGERATOR

SEE HOW IT'S MADE ?

THE "GURNEY"

The "Gurney" can be kept absolutely pure and clean because of its Removable Galvanized Ice Compartment.

The "Gurney" is packed with MINERAL WOOL and constructed in the best possible manner, and will show, by actual test, the lowest average temperature with the least consumption of ice.

The "Gurney" is leader in style and finish, and first class in every particular.

MADE WITH ZINC OR ENAMEL LINING

COLD FACTS

THAT MAKE WARM TRADE

A Refrigerator is no longer considered a luxury but a necessity.

A good Refrigerator is a source of economy, a poor one an extravagance.

The best is the cheapest; you can't afford to sell a poor Refrigerator.

A poor Refrigerator consumes ice but does not refrigerate.

A poor Refrigerator is a delusion and a snare with nothing to recommend it but price.

The price is soon forgotten, the quality never.

A poor Refrigerator cheats both the dealer and his customer.

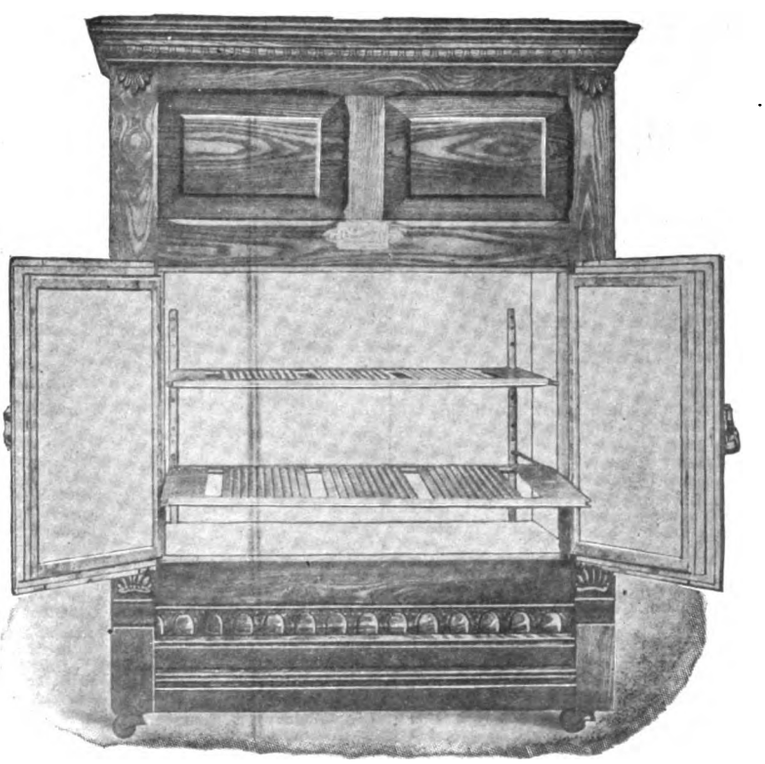
A low priced piece of furniture may answer the purpose for which it was made as well as more costly.

This is not true of Refrigerators.

In buying a Refrigerator the first cost is not the last cost.

A Refrigerator to be satisfactory must be so constructed as to be economical in the use of ice and in the preservation of food.

A profitable and satisfactory refrigerator trade can be built up only by handling high grade honest goods.



The "Gurney" is the best.

The La Belle is the highest grade refrigerator of its class.

The Gurney Patent Chinaline Refrigerator is the height of refrigerator perfection.

The Gurney Refrigerator Co. leads the world in the manufacture of Refrigerators because the "Gurney is the Best."

The Gurney is sold on the exclusive agency plan. One dealer every town.

BEST-NESS IN HORSE NAILS

We make only one grade of Horse Nails—The Best—

The New Putnam

Ⓦ

Horse Nail

It will not crimp, break nor sliver, will not cut off, will hold in the clinch. Drives most easily. Has stood the severest practical tests. It has stood the highest test for tensile strength, elongation and elastic limit.

1½c. per horse is the difference in price between the cheapest Horse Nail and The Best—The New Putnam.

Say that last over out loud—slowly.

PUTNAM NAIL COMPANY
Neponset, Boston, Mass.

You overlook a good thing when you neglect to investigate the merits of Snow Flake Axle Grease.

It took from the very beginning—21 years ago.

If it's dollars you're after, send us a trial order—Snow Flake will do the rest.

MENTION HARDWARE

Snow Flake Axle Grease Co.
Fitchburg, Mass.

"The Proof of the Pudding Is the Eating"

That's exactly the case with

L & G 800 Butcher Knives

They are made of special steel, carefully hammered and finely tempered.

Every Blade Warranted

We've made them ever since 1837.

Sixty Eight Years On the Market

Our Butcher Knives, like the rest of our line of

Fine Table Cutlery

have "improved with age." There's nothing like them on the market. They can't be beat in quality nor price.

Get a copy of our catalog— Make up a sample order and we feel confident you will send us many duplicate orders.

Don't delay—
Write to-day.

Philadelphia, Pa., U. S. A.

RICHARDS' ROYAL

"The Noiseless, Smooth Running" Ball Bearing Trolley House Door Hanger has been designed with special thought for the Dealer catering to the trade of the man who demands perfection in the appointments of his home.

These hangers are *noiseless*—the wheels running on *hard maple*, a wood especially adapted for this use, as it retains an even, level surface under years of constant usage. There is a surplus of material for every strain, but no excess of metal where it is not needed, insuring a tight *non-rattling* hanger of great durability. The track may be removed or adjusted at any time without injuring the walls or plaster.

There's a Richards Door Hanger for every requirement of your customers. Write for our book of Facts and Figures.

THERE'S A HEAP O' SATISFACTION

in a name—a name that stands for bestness—best quality.

Take Axle Grease for instance: if there's any kind that gives all-a-round and lasting satisfaction, it's

FRAZER'S AXLE GREASE.

Its the Grease of quality; puts all the "just as good as" Frazer kind in the shade. Sells quickest; lasts longest. Sold in boxes, cans, pails, kegs barrels. The question is: how much do you need?

FRAZER LUBRICATOR COMPANY,
85 Murray St., New York.

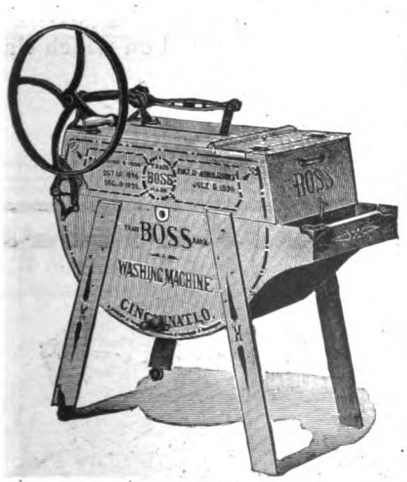
A $250.00 Cash Register for $125.00

HOW CAN WE DO IT?

The New Hallwood Leader embodies all of the up-to-date features on every make of Cash Register; it has many features which no other machine has; it meets every need of 80 per cent. of all businesses. We are thus able to bring it out in large lots and to reduce the cost of manufacturing to a minimum.

It will pay for itself in a short time.

Write for our catalogue and our booklet "SYSTEM" for a retail store.



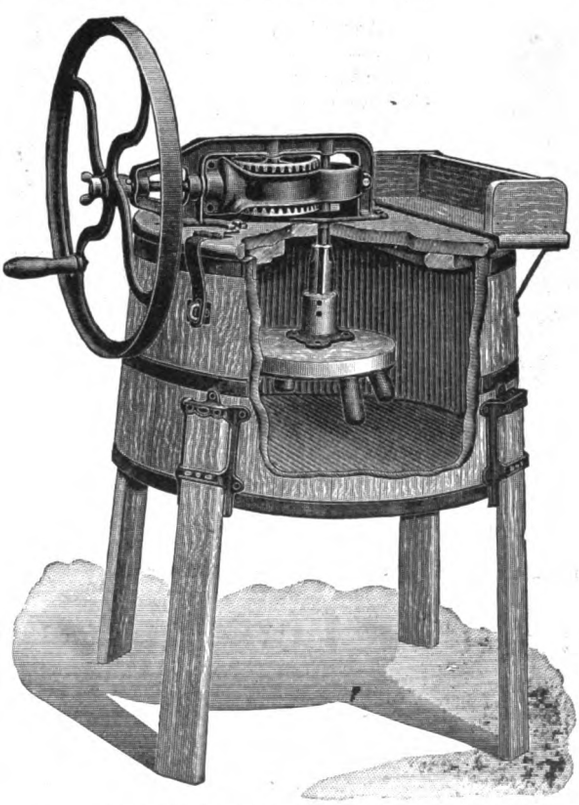
THE INTERNATIONAL CO., Sole makers Hallwood Cash Registers.
1161 Yale Avenue Columbus, Ohio.

"BOSS" WASHING MACHINES

Illustrations represent our two best selling washers.

They are non-competition, therefore, most profitable to handle and sell.

Write at once for catalogue and price list, also our nearest distributing point to your location.



The only line of Washers not found in the catalogues of Catalogue Houses, therefore appeal to every dealer for support.

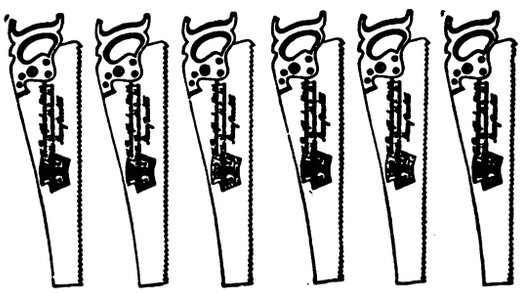
ADDRESS

Boss Washing Machine Co.

CINCINNATI, OHIO

BOSS DOUBLE ACTION

This machine is built on the true principle of rubbing clothes, similar to rubbing them on the old fashioned board, only that it just rubs a quantity at one time, and without the slightest injury to the finest of fabric including laces.



IMPROVED BOSS ROTARY

Has gears protected by shield or cover.
Has Telescopic dasher post.
Has large cypress tub and rub block.
Has either stave or detachable legs.
Has Highest Speed of any rotary.

HARDWARE

J. Gordon Smith Company, 17 Warren Street, New York, manufacturers' agents and jobbers of a general line of Shelf Hardware and Hardware Specialties, will about May 1 next remove to 49 Warren Street.

W. B. Fox & Brother, buyers of Hardware for domestic and export trade will move on or about May 1st from 97 Chambers Street, New York, where they have been for over twenty-five years, to 21 Warren Street. W. B. Fox originated the kind of buying they now do in 1874, since which time they have bought extensively every description of Hardware for a number of clients.

The De Witt Wire Cloth Company, Newark, N. J., on April 10, removed its executive office and sample room from 17 Warren Street, to the new Barclay Building, 299 Broadway, where a suite of rooms has been taken. They will hereafter carry all surplus stock at their factory near Newark from which point they can deliver all orders promptly the day following their receipt.

The Standard Tinware & Manufacturing Co., Toledo, Ohio, are the sole manufacturers of the "Standard" self-lighting lantern, which is possessed of a number of advantages over the lanterns of the tubular form as to give it a distinct individuality. It is very quickly and easily lighted by inserting a match into the lighter, the friction caused by doing so ignites the match which lights the lantern, and the operation of withdrawing the match extinguishes it, which eliminates all danger of fire from that source. This improvement enables it to be lighted in a rain or wind storm, or it can be lighted without lifting or removing the globe.

The National Enameling & Stamping Company announce the fact of their occupancy of the new building and offices in the following:

"Some time ago we announced our intention of removing to a more commodious and centrally located building at 374-376-378 Broadway (corner of White Street), and are now pleased to advise that we have done so, and with our increased space are prepared to show samples of the largest line made by any manufacturer in the world, consisting of Royal granite steel, blue and white, and white and Venetian enameled wares, tin, japanned, galvanized, hotel, nickelplated wares and kindred lines."

Warner & Haviland, 17 Warren Street, New York, will about May 1, remove to larger quarters at 49 Warren Street. They are manufacturers' direct representatives, carrying a full line of wood screws made by the Rogers Screw Company, Providence, R. I., and the line of Mechanics' Tools made by Braunsdorf-Mueller Company, Elizabeth, N. J. They also represent the Thomas Devlin Manufacturing Co., Philadelphia, Pa., making all kinds of malleables, and the Brohard Company, Philadelphia, manufacturers of expansion bolts and door holders. They have recently been appointed agents for the Bonney Vise & Tool Works, Philadelphia, who make vises, wrenches, etc., and also for Baker, McMillan & Co., Akron, Ohio, who make the Akron levels.

THE SUCCESS PAINT COMPANY.

F. T. Blish, who up to January 1st of the present year was the treasurer and manager of the F. T. Blish Hardware Co., South Manchester, Conn., has entered the Paint Manufacturing Line as secretary and general sales manager of the Success Paint Company, with main office at 48 Weybosset Street, Providence, R. I. Any and all of his old friends, of which he has a legion, are earnestly invited to renew their old friendships and cement old associations by getting acquainted with the merit of his new line, which can be carried in stock by any Hardwareman.

THE CRACK-ER-JACK STROP.

E. A. Langdon, 121 Michigan Street, Toledo, Ohio, is the maker of the "Crack-er-Jack" the steel back razor strop made of horse hide properly prepared by having one side filled with prepared steel that cuts a bevel on the razor, square and flat, and doesn't allow it to become round and thick. Write for one of his circulars which gives the names of a number of barbers who endorse this strop thoroughly.

NEW YORK'S POPULATION.

William C. Hunt, Chief Statistician of the Census Bureau, has been designated by Director North to assist the State authorities of New York in taking the census of that State next month.

Estimates of the Bureau, made according to the regulation methods, place the population of the State at 7,901,754, and of the city of New York at 3,902,097, against 7,268,894 and 3,473,202, respectively, in 1900. It is expected, however, that the figures will be exceeded in both cases, as an unusually large percentage of the exceptionally large immigration of the last five years has remained in New York.

KEYSTONE NAIL CO.

The Keystone Nail Co., of Philadelphia, have incorporated with the following officers: H. J. Maroney, President; George F. Breisch, Vice-President and Secretary; J. D. Seidell, Treasurer. This concern is operating the Porter machine for galvanizing nails, screws, washers, etc., and are making a specialty of galvanized nails. They claim that by this method, which is used in addition to the regular Hot process, they are enabled to produce an absolutely perfect galvanized nail, using pure Spelter (zinc) and cooling same by the Porter method without submerging in water which prevents the nail from becoming brittle, as is the case by the old method used. They have the largest plant in the country devoted to galvanized nails and small articles and are meeting with great success, on account of the superior quality of their goods and the low prices they are able to produce them for.

"A FREEDOM PARTY" TO THOMAS A. FERNLEY.

On Friday, April 14th, at their residence in Philadelphia, Mr. and Mrs. T. James Fernley, gave a "freedom party" to their son, Thomas Adamson Fernley, in honor of his twenty-first birthday. The party served largely as a formal introduction of Thomas A. Fernley to the Hardware trade. T. James Fernley is well known as the secretary of the National Association of Hardware Jobbers, and also as secretary of the Philadelphia Hardware Merchants' and Manufacturers' Association.

REDUCED FREIGHT RATES.

DAVENPORT, Iowa, March 21, '05.

Our petition for a reduction from first to third class rate on iron pumps shipped loose to all points covered by the Western Classification, which we presented through the chairman of the Freight Committee of the National Association of Agricultural Implement and Vehicle Manufacturers, has been granted and will take effect April 1st.

This means a big reduction in freight from Davenport to our Western customers, and, we hope, will mean increased orders for us.

We now have a petition in before the Iowa State Commissioners, and expect soon to get the same reduction to all points in Iowa.

RED JACKET MFG. CO.

AMERICAN WRINGER CO.

At the annual meeting of the stockholders of the American Wringer Company, the following were elected directors of the company: W. S. Ballou, A. G. Bearsley, Jr., W. S. Granger, J. S. Hemenway, L. A. Mills, George Reuter, Jr., Stanley G. Smith and Dr. J. E. Sullivan. The only change in the board is the election of Dr. Sullivan in the place of John J. Banigan. The directors met and organized, by electing W. S. Ballou president, Stanley G. Smith, secretary and George Reuter, Jr., treasurer and general manager.

DEATH OF WILLIAM H. TOWNSEND.

William Halsey Townsend died at his home, 535 Greene Avenue, Brooklyn, April 15. He was seventy-nine years old and was born in Lowville, Lewis County, N. Y. His father, Palmer T. Townsend, founded the firm of Townsend, Clark & Co., which was for many years a leading Hardware house in this city. William H. Townsend became a member of his father's firm when a young man, and when it was dissolved organized the firm of Quackenbush, Townsend & Company, Hardware merchants, who were for many years at 85 Chambers Street. Mr. Townsend retired from active business about six years ago. He is survived by his wife, four sons and a daughter.

Editorial Trade Review

The Country has every reason to look forward to a period of prosperity. There was never a time when the trade were so hopeful of the conditions surrounding them, and found them prevailing to so great an extent, prophesying prosperity in every interest, with labor so well employed as to hazard the prospects of a confidential continuance. Manufacturers are looking at it optimistically, and manufacturing goods with confidence in excess of present orders, so as to be prepared for anticipated demands and be able to supply the goods promptly. Prices continue without important changes, although raw material in a good many lines would warrant from the rigidity in prices and scarcity of goods, that some slight movement upward was contemplated. They prefer not to check a good demand, in many instances, by trying to get along without an advance, notwithstanding every surface indication would prompt a change; the manufacturers hold to present quotations in many instances, but a firmness is visible all along the line.

Nails and other wire products are unchanged, and screen and wire cloth of all kinds, woven wire and poultry netting are in exceedingly good demand. On screen cloth the demand is annually increasing by remarkable orders; the same may be said of screen doors and windows, sales of which have been phenomenal, as though each buyer were afraid he would be left, and deliveries are being made daily. There is but a nominal profit in many cases, the goods being so cheap the dealers fear competition; complaint is made by the dealers that many descriptions of Hardware are too cheap, compelling the dealer to handle large quantities at a small profit. "Maintaining the price" seems to govern the day, but when the price is based upon a conscientious scale of profit on a cheap line, it's hard to be satisfied.

The demand for Builders' Hardware continues to be good and the sales correspondingly large, which indicates the prevalence of conditions favorably affecting this particular class of labor involved in building. It has rarely shown a more satisfied condition. The skilled workmen demanding high wages and getting them, while the unskilled workman is in demand at all times.

Many shovels, spades and scoops, and, in fact, every description of garden tools in general, were specified by the Jobbers for early deliveries, which have been made, and the distribution already begun by the Retailers, who have thus anticipated their wants with good results. Crop prospects are bright and promising, and the wants of the agriculturist are many, and he strenuously demands the attention of the Retailer. There is no check to the country's prosperity apprehended; while the farmer has the prominence in the trade of the future, he is master of the situation and deserves his unqualified precedence.

The retail trade seem to be all bent on maintaining prices, with little or no price cutting, the competition taking a more conventional turn. The many lessons taught by the popular Hardware conventions among the retailers, are having their effect, and, with the desire to succeed, the trade has begun to realize that it is not desirable to try and do so by throwing away profits.

The increased facilities for manufacturing by the adding to the plants of many leaders among the manufacturers, places us at once in a good condition to hold all the Export trade we succeed in establishing. The rule hitherto has been to drop this close selling trade, just as soon as every facility we possessed was working on domestic orders, which averaged a more remunerative class of trade. We tried to fill the profitable orders, while the others were compelled to wait. The export trade has now grown to such proportions that it commands the attention that it formerly had vouchsafed to it, and the facility for production enables the manufacturer to count his export trade as being a valuable auxiliary in preventing the accumulation of an undesired stock. The trade is handled by a circumscribed number of large houses who are noted distributors of Hardware in specified localities, and in a number of instances where manufacturers have established agencies abroad, which position is a coveted one, and greatly in request.

THE FREIGHT COMMITTEE.

The freight committee of the American Hardware Manufacturers' Association has been doing some very thorough work since its appointment, in the line of collecting information and material for the purpose of formulating a plan of action, and E. B. Pike, the chairman, has in hand an immense amount of data from which good results can be expected in the future.

In speaking of the progress of the committee's work, Mr. Pike said recently that so far the most important matters under consideration were the following: Delay in shipments, settlement of claims, freight classification and stealings.

In the matter of delay in carrying goods, a number of cases have been cited showing that it is quite the common thing for instance for a New England shipment to be en route three weeks for Pennsylvania points. On the second subject—the settlement of claims—it has been stated that it seems practically impossible to get even the most reasonable claims for loss or damage of goods, overcharges, etc., adjusted unless suit was threatened. The different classifications of freight that prevail in different sections of the country, is another great source of annoyance; and the opening of packages at different shipping points by freight inspectors, is apparently responsible directly or indirectly to a great extent for the fourth trouble—loss by stealing.

On each of these subjects a large amount of evidence has been received, together with many valuable suggestions as to methods for correcting these and other evils.

In view of the fact that the interests of Hardware Jobbers and Manufacturers are identical in this matter, it would seem that the work in this direction could be greatly promoted if a joint committee were appointed, made up of members of the American Hardware Manufacturers' Association, the Southern Hardware Jobbers' Association and the National Hardware Association. Such a committee could get at the question from the viewpoint of both shipper and receiver, and, backed as it would be, by three strong organizations, should be able to bring about the desired reforms.

GETTING THE FARMERS' TRADE

By AMOS

Catalogue Houses, at least the larger ones, depend to a great extent for trade on the rural population, and it is to the farmers that the most of the advertising of these houses is directed. Throughout the whole country efforts have been made to enlist the services of Rural Free Delivery carriers, postmasters and others to obtain lists of all farmers and to place catalogues and other advertising matter in their hands.

"The rural mail routes that have been established in many sections of the country, have had the effect of making it less necessary for the farmer and his family to go to town. Mail order papers and mail order catalogues are brought direct to his door, so that in many instances, the farmer is really in closer touch with the city establishments, and is better informed as to their offerings, than he is of the goods carried by the merchants in the towns on the rural mail route.

The Ad World says: "If people don't come in and see what you are doing, it is up to you to go to them and tell them what you have for sale, and why it will be to their advantage to trade with you. You must keep them in mind of you, if you want them to remember that you are still doing business. Don't rely upon the county paper alone, get in direct touch with your possible patrons. Send them a circular or a letter occasionally, telling them about your goods. Do this when you have a lot of new goods come in. Do this whenever you have a bargain to offer.

"If your letter or circular comes in the same mail with a letter or circular from the far away concern, you will at least divide the attention with that concern. People will understand that you are not conceding the trade to the big Chicago mail order concerns, nor to the nearer department stores. They will see that you also claim to sell the most meritorious goods at moderate prices. If you quote your prices, and they are as low, or nearly as low in price as the big stores, you will, in most cases have the first chance of making a sale. Given the chance, it is your own fault if you don't make it.

"The reason that the big concerns are taking

AWAY SO MUCH OF YOUR TRADE

is because they keep hammering people with the assertion that they can give the best values. An assertion made over and over again, without being disputed, is at last accepted as a fact. If you want to hold your trade, go out to your patrons in true mail order style and tell them your side of the story. There is no doubt at all that there are many effective arguments that can be used by the local dealer, and he can quote prices on many goods to back up his claims.

"The form letter is an especially effective way of sending out direct advertising. It would pay many retail dealers to put in a mimeograph or other duplicating device, and send out a letter weekly. Silence is no answer to the persuasive talk of the mail order men. You must meet them on their own ground, with more convincing arguments."

* * *

A recent issue of the *Herald*, of Mt. Jewett, Pa., looks as if it might have been owned entirely by Thompson & Company of that place, for it carries in its six pages two and three quarter pages of Thompson advertising which the paper considered of sufficient importance to warrant nearly two columns of editorial space in the same issue. I regret that lack of space prevents the reproduction of these advertisements. They are liberally illustrated with cuts of farm machinery and tools and goods for the house and workshop, and the text is readable and convincing. A circular recently sent out by Thompson & Company is reprinted in text columns of the *Herald*. It reads as follows:

To Our Patrons:—

And especially to those who are thinking of sending to the catalogue houses for goods in our line, we wish to make you this offer,—Bring in your list and we will sell you the same or better goods at their prices, for cash same as they, yes—we will go you one better, we will save you the freight on all bills purchased at one time amounting to $5 or more and weighing not over 200 pounds. You can bring your catalogue with you if you wish, but it will not be necessary as we have all their catalogues on file in our office and know their prices.

Give us a trial. We feel certain we can convince you that we can serve you better than the catalogue people, not only in price but in quality, which is remembered long after the price is forgotten, to say nothing of the satisfaction of seeing the goods you are buying as well as being able to get matters adjusted promptly when anything is wrong.

We keep constantly on hand a large assortment of all goods usually kept in a first-class Hardware store, including household goods, farm implements, wagons, buggies, paint, etc. (See our advertisement) and if we do not have what you want in stock will send to our wholesale houses and get it for you at catalogue house prices.

The Catalogue House furnishes no market for the farmers' products, pays no taxes, supports no schools nor churches and gives nothing to the poor in your community. At even prices are we not entitled to your trade?

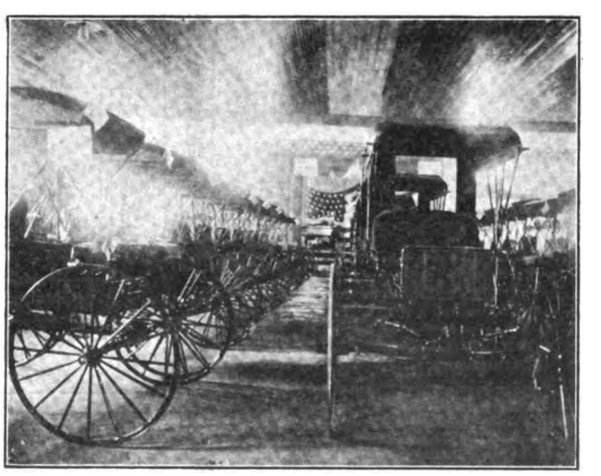
We are not making you this offer for more buncombe but have considered the matter carefully and are prepared to do exactly as we offer. We are offering better than the catalogue houses. Will you give us a trial?

You owe it to the best interests of the community in which you live, you owe it to the best interests of yourself (and we think you owe it to us) to do this. Will you do it?

We enclose with this our advertisement of goods now in season to which we invite your attention. We wish to thank you for past favors and assure you that we appreciate your trade. Wishing you a prosperous season we are, Yours respectfully,

Thompson & Co.

There's an argument that goes straight to the point. A



GUARANTEE TO DUPLICATE PRICES

—even to save freight—backed by the word of a home concern certainly ought to get the business.

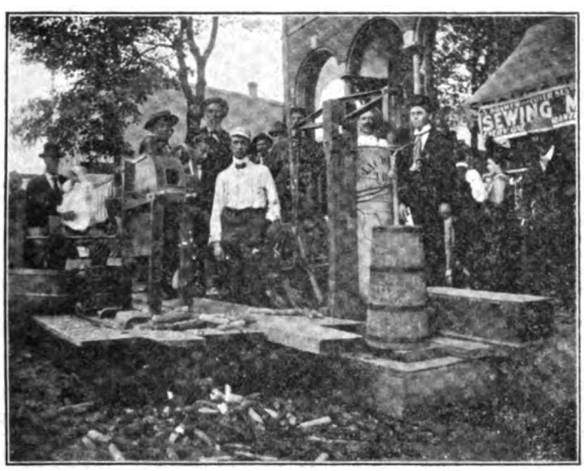
* * *

Carl Brothers & Company of Shreve, Ohio, believe in the good old Methodist "Revival" doctrine. They write us concerning their method of stirring up business in the following:

"We still use and practice as we always have done, the old time tried motto, "That a pleased customer is the best advertisement." We also find that a pleased customer is also the cheapest advertisement. While that is very well in every day transactions, we find that our trade needs a stimulant, a revival, a good stirring up each year, so every Spring we have an 'opening.' We have tried this plan for several years now, and find that it pays immensely in several ways. It makes cheap advertisement, a firm gets acquainted with trade that does not come to its store at any other time, and sells hundreds of dollars worth of goods from stock that it would not otherwise.

CARL BROS.' STOCK OF BUGGIES.

"In this particular opening that I am about to describe, we had bills posted all around the country and announced in all the local papers in the towns nearest us that a 'buggy and couch will both be given away free, at our opening. The couch the first day and the buggy the second. Every person, over 16 years of age, that comes in our store and registers will be given a ticket with a coupon, which will be detached and placed in a sealed box, the coupon and ticket both having the same number. At the end of



Digitized by Google

the first day the couch will be given to the person who holds the lucky ticket, which will be drawn out of the box by a person, selected by the audience, who will be blindfolded. The buggy will be given away on the second day in the same manner."

"When a person registers he is questioned as to his wants which will be noted, together with that of his neighbor's wants if he happens to know them. Soon after we send our men out to see these parties, which often results in a sale, that would not be made otherwise, as we would not know they were in the market until too late. During this particular opening we sold 14 buggies, some of which are shown in the accompanying illustration.

"We had the buggies in a large Armory where the buggy and couch were given away by the above means. But before this drawing of the tickets took place, we gave a short entertainment, in fact had fine music all the afternoon and evening which assisted quite a bit in filling the room with a cheerful air, and made the room not only attractive but very pleasant indeed and assisted in making sales.

"It so happened at this opening that a person who got the buggy lived on the dividing line between us and our competitor in a neighboring town. The result was, that we not only gained his friendship entirely, but his trade also, and since then he has been coming regularly to our store for everything he needs in our line, and has even brought several of his neighbors our way, who have been good customers ever since, and I presume we have

IN FRONT OF CARL BROS.' STORE—A GAS ENGINE AT WORK.

sold them, all together, enough goods to pay for the buggy several times over, besides selling several thousand dollars worth of goods on those two days. And that was not all, we could feel its good weeks before the opening and weeks after. Besides the 14 buggies sold, there were several wagons, farm implements and much Hardware sold from stock, together with hundreds of dollars worth of furniture, stoves and tinware, making it extremely profitable to say the least."

pushing those, rather than dabbling in a few of all kinds. Regarding seeds, we buy and sell only the best the market affords, for we believe, no one can afford the time and labor necessary to plant any other.

"We do not issue a catalogue, as we find by careful investigation, that the returns do not justify the additional expense, and the catalogues furnished by the manufacturers and wholesale houses, seem to answer all requirements, and are furnished free of charge. We use glass jars to display small seeds, and square wooden boxes of uniform size, for the larger, and devote one room on the second floor, to farming tools and implements, and the storage of surplus stock of seeds."

* * *

The one item, that, more than any other thing, is keeping down American trade in foreign countries, is the unwillingness of American manufactutrers to make goods that fit the tastes of foreign buyers. So the main thing that is driving the farmer to the catalogue house is either the fact that his Hardwareman don't keep the goods or he does not keep the farmer posted on what goods he does carry, while the catalogue house claims to carry everything in stock, and keeps continually in touch with Mr. Farmer with advertising matter, all filled with glowing descriptions of the wonderful goods that can be ordered so easily by mail.

Of course, it cannot be expected that the country Hardwareman can carry everything or issue big catalogues, but he can keep in stock the main things the farmer needs, and he can, at a moderate expense, keep the farmer posted as to what he has in stock and his prices.

Of course, the goods in which the tiller of the soil spends the most of his money are tools and machinery for use on the farm, and I have never been able to discover any good reason why a Hardwareman should not include such goods in his stock. It is true they require special attention, but for that matter, is there any line of goods that can be sold in large quantities without intelligent effort on the part of the dealer? A prominent implement manufacturer said to the writer recently:

"One of the great bugbears formerly for handling implements in connection with Hardware was because the implement part of the business was not really conducted upon strict business principles, but in a loose way, granting unreasonable time and long credits; but now-a-days the implement trade is improving in this respect, and a great many Hardware and implement dealers are requiring all their implements and vehicles to be settled for in cash or good note before delivery of machine to farmer, and the very fact of doing this enables the dealer to sell these goods on shorter time, and in a more businesslike way at a fair profit, and we believe the more Hardware trade takes up implements, the less such goods will be handled by outside parties of little capital and small experience, and good to the farmer. Where so much Hardware is sold it can be handled with very little extra expense—some of the very best Hardware dealers in the country are also the best implement dealers—handling the two together; and we hope to see the day when implements will be very generally handled by the old and reliable Hardware dealers, believing fully that it will result to the best interest of both the

F. R. Washburn, Taunton, Mass., handles agricultural implements and seeds along with a regular stock of Hardware and Sporting Goods. Three of their advertisements are reproduced herewith. In a recent letter Mr. Washburn says:

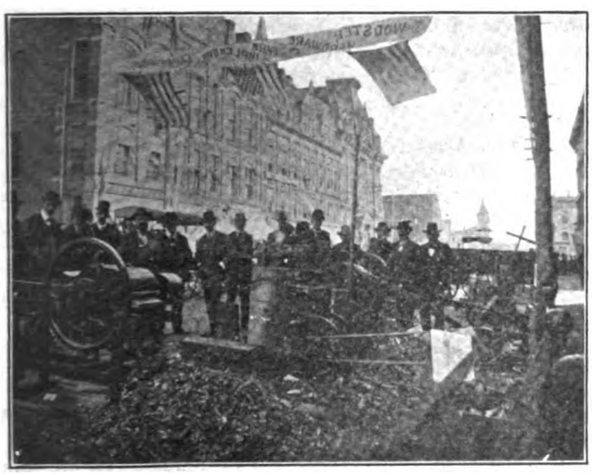
"We have followed the policy of selling about two lines of the best known high grade farm tools, and confining our efforts to

Another manufacturer, a leader in this line (hand agricultural tools), expresses himself as follows:

dealer and manufacturer of implements; and by securing the farmer's implement and vehicle trade the Hardware dealer has that much more opportunity to sell him his Hardware and other goods."

* * *

Digitized by Google



"A certain class of Retail Hardwaremen are content to buy those things which have always been carried in their stock, the most of which are staples; they are also content to make a living, but the wide-awake Hardwareman is always looking for something which is new—which will increase his sales,

AND BRING HIM A LARGER PROFIT.

While Staples are a necessity in any line, they usually pay only a moderate margin; and it is the Specialties—the Novelties—the new things, which pay the dealer the largest profit, and he has it in his way to encourage the sale of them. This is quite as true in Hardware as it is in dry goods—both have their seasons, and the Hardwareman can as well take up novelties as the drygoodsman.

"In the line of Farm and Garden Tools, the variety continues to increase in patterns and shapes; and, in fact, new tools are brought out annually; perhaps not always suitable for all markets, but all suitable for some. Users of such tools would be glad to know of these improvements, and to purchase them, did the retailer carry them in stock and call their attention to them. In selling such specialties, the dealer is not only making a good profit, but is doing the customer a favor in carrying them in stock. It is not an uncommon thing to go into a store to buy an article, and before leaving, to buy other articles, of which you had no knowledge before, but which were there, and which were displayed by the dealer, and you were attracted to them and made the purchase, and you were glad to know such articles were made, and to have an opportunity to buy them. This is just as true in Garden Tools as in dry goods, neckties and other articles.

"The Retailer should study the Manufacturers' catalogues, and keep in touch with the advance and improvements and introduction of new articles just as much as the buyer of the wholesale house does, and whether he be a dealer in Hardware, Dry Goods, Millinery or any other line."

SCENE IN FRONT OF THE WOOSTER HARDWARE CO'S STORE DURING AN "OPENING."

In a recent letter, a leading maker of Farm Machines says: "The most successful Hardware dealers are those who handle implements and vehicles.

"A successful business man is one who can master more than one line of trade. Especially is this true in the retail trade, where the volume in any one line is limited. To produce a volume of business it is necessary to handle a great variety of commodities.

"The day is past when a retail dealer can sit in his store and handle only a small variety of articles and have small sales. The department stores and the mail order stores compel the retail dealer at the present time to be selling something all the time and at a small margin of profit, and if he is successful, he must give but little credit, and when credit is given, it should be for a short time and must see that it is promptly paid. As above stated, the successful stores to-day are those which do a variety of business, and especially those who do a business on a strictly cash basis."

* * *

A maker of Seeding Machines suggests that the reason why more Hardwaremen do not handle larger implements is that they do not get out after business. As has already been stated, real success in the mercantile business depends entirely on that one thing; goods can't be sold unless one of three things happen; either the prospective buyer comes where the goods are kept, or the goods are taken to him, or he is told by printer's ink or word of mouth concerning the goods. The seeding machine manufacturer writes:

"The majority of local dealers selling farm implements and vehicles do not handle a full line of Hardware goods, and I think, as a rule, regular Hardware dealers do not handle farm implements and vehicles. Local Hardware dealers do not canvass among farmers to sell their goods, but expect customers to come to their place of business to buy their goods. On the other hand, local dealers in agricultural implements and vehicles do canvass among farmers to sell the goods, at least wide-awake, energetic dealers canvass, and do not wait for customers to come to their place of business. A large majority of local implement dealers have not the capital to successfully engage in a line of Hardware goods. Hardware goods are usually sold direct by the manufacturer to the local dealer, and on short time; while manufacturers of implements and vehicles consign many goods, but even those that sell direct usually give long time terms. In fact, the terms on implements and vehicles are quite different from terms on a line of Hardware goods.

"Hardware dealers usually handle some small tools or articles that could be classed as farm tools, even including small cider mills and full line of hoes, shovels, forks, etc., but there are not many Hardware dealers that take in a full line of farm implements. There are not as many changes; that is, going in and out of business in the Hardware trade as there are in the implement trade. Hardware dealers could no doubt frequently handle a full line of implements and vehicles in connection with their trade, but to successfully do so it would be necessary for them to have a salesman that would go out among the farmers and hustle for trade.

"As above stated, Harware dealers, as a rule, do not handle farm implements and vehicles, but we have a great many Hardware dealers that are also agents for our full line of seeding machines, and also full line of other implements and vehicles, and some of our very best local agents are Hardware dealers. It is true that manufacturers would prefer establishing an agency with a regular Hardware dealer, providing said dealer would canvass and work the trade on said goods, for one reason, if no other, namely, that Hardware dealers are more permanent in their business."

* * *

One of the largest manufacturers of Plows takes the following view:

"With the change of the trade to the wheel riding plow instead of the old walking plow, the tendency has been more to develop the implement business as a special business until the thing has been overdone generally. Now that the pioneering has been done on wheel plows and they do not require following in the field, the tendency is to bring the trade back to the Hardware store. Plows are now shipped in partly knocked down shape and require much less storage room than when shipped with beams and handles on. We count the Hardware dealer as among the largest dealers we have in plows and, in fact, the general line of agricultural implements, wagons, etc., that we handle, and the tendency is in the direction of the trade being done to a large extent by the Hardware dealer.

"The handling of a good, well-known make of plows is

A GOOD DRAWING ADVERTISEMENT.

A farmer who is wedded to a good make of plows is not easily turned from it and will hunt out the merchant who handles this very important implement to a farmer. A good plow will recommend a store, and good plowing sets the pace to the season's work on a farm, spirit of the work, and quality of all the operations on the farm following its use."

"TAKE OFF YOUR HAT TO MYERS."

P. A. Myers, of F. E. Myers & Bro., the well-known pump and hay tool manufacturers of Ashland, Ohio, has added two more important patents to the already long list owned and controlled by this progressive firm. These patents are numbered 786,455 and 786,456, granted April 4th, 1905, and relate to improvements in Sling Hay Carriers. The tendency among progressive farmers is towards the adoption of slings instead of forks in the unloading of hay from wagon to mow. This invention is designed to fully cover this requirement. One of the scientific claims for the invention is that it provides a carrier that will lift and carry the load or bundle in the sling in such a way that the bundle will be lifted, transported and delivered into the mow in the same relative position as on the wagon, thus obviating the use of right angle pulleys or other cumbersome attachments to the carrier. The invention also covers an improved Rope Lock which firmly grips the rope, and supporting the bundle during the travel of the carrier and avoiding the wear of the rope by dragging it over the gripping devices during the hoisting and lowering operations. The invention also provides for a Triple Hoist so that the weight of the load can be increased at pleasure and the gripping effect of the rope lock increased in the same ratio as the load is increased. This improved carrier certainly offers new features that will recommend it to the trade and the consumer in general. The carrier manufactured under these patents will be known as the "Myers Sure Grip Sling Unloader."

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Landlord and Tenant—Surrender of Premises.

QUESTION: I moved from the tenement in which I have been living March 31, having given my landlord four days' notice. I have paid my March rent and the landlord has accepted the keys. He now insists that I pay him rent for April or thirty days from my notice. Can he collect it?

REPLY: If you were accustomed to pay rent monthly, we think your landlord was entitled to thirty days' notice of your intention to quit the premises. (Public Statutes of Mass., See 121, par. 12.) We think, however, that if he accepted the keys knowing that you thereby intended to give up possession of the premises, without then demanding a month's notice or requiring the payment of the April rent, that this would be strong evidence that he had accepted a surrender of the premises. The effect of a surrender is to discharge both parties from further liability. Whether there is a surrender in any case depends upon the intention of the parties. It is clear that the landlord cannot accept a four days' notice, take the keys and accept the surrender of the premises without protest, and then subsequently insist on the payment of rent for the ensuing month.

Right to Prohibit the Use of Trading Stamps.

QUESTION: May the Legislature pass a law prohibiting the issuing and use of trading stamps. Have such laws been passed?

REPLY: Such laws have been passed in some States, notably in New York, but have been held to be unconstitutional. The distribution of prizes or articles by the means of trading stamps does not ordinarily involve any element of chance. The transaction is not a lottery and does not appeal to the gambling instinct. The Legislature has no power to interfere with personal liberty, except to promote the public health, morals or welfare. That liberty means the right of every one to use his faculties in all lawful ways, to live and work where he will and to pursue any lawful trade or vocation. It cannot lawfully be interfered with, except for some public necessity or benefit. The Legislature cannot prevent a merchant from giving his customer, or "throwing in," some other article in addition to that sold, as an inducement to the purchase, or from selling an article at a reduced price for the same purpose, any more than it can prohibit him from advertising or using other legitimate means of increasing the sale of his goods. This is precisely what is indirectly done by the use of the trading stamp. Its use, so long as it is not converted into a lottery, can no more be abolished than bargain sales or cut prices, or other legitimate methods which modern competition has invented.

Promissory Note—Accommodation Indorsement.

QUESTION: A certain firm consisting of three members accepted a promissory note for $400 payable in three months to the order of a dealer from whom they purchased goods. One of the members was the president of a local corporation. The note at the time it was negotiated by the makers had been indorsed in blank by this corporation. It was not negotiated by the dealer but remained in his possession till maturity. The firm who made the note being insolvent, can he now hold the corporation?

REPLY: If the indorsement was for the accommodation of the makers, we think that he cannot. Business corporations ordinarily have no power to indorse or accept commercial paper for the accommodation of the makers or drawers thereof. They will be held liable, however, on their indorsement or acceptance, as the case may be, if the bill or note gets into the hands of a holder for value without notice. But in this case the person who discounted the note does not stand in the position of a bona fide holder. The mere fact that the maker of a promissory note procures it to be discounted for his own benefit, with an indorsement thereon, is, if unexplained, notice in the eyes of the law to the discounter that the indorsement is not in the usual course of business, but is for the accommodation of the maker. If the corporation had no power to indorse for the accommodation of the makers and the payee discounted the note with notice of that fact, it of course follows that he cannot recover against the corporation.

VERBAL SADING.

BRIGGS—Wilker must be very much in love. He goes 'way over to Jersey City to see a girl.

GRIGGS—That isn't love. That's compassion.—*Town Topics.*

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED APRIL 10, 1905.

380,735. WRENCH. W. L. Tobey, Boston, Mass.
380,747. WINDOW SCREEN. T. W. Dowling, Detroit, Mich.
380,811. CHISEL GAGE. C. L. Mead, New York, N. Y.
380,836. COMBINED OUTSIDE AND INSIDE CALIPERS. O. D. Warfield, Chicopee Falls, Mass.
380,859. WRENCH. M. E. Campfield, Pittsburgh, Pa.
381,006. SAD IRON. I. C. H. Gilmore and H. S. Stafford, Oskaloosa, Iowa.

PATENTS ISSUED APRIL 11, 1905.

786,802. BRUSH OR BROOM MOISTENER. W. A. Fuller, Marietta, Ohio.
786,818. WRENCH. A. Johnson, Chicago, Ill.
786,831. COMBINED PORTABLE DOOR LOCK AND CHECK. R. M. McMahon, New York, N. Y.
786,844. WRENCH. W. J. Sanders, Murfreesboro, Tenn.
786,842. KEYHOLE GUARD. R. I. Robeson, South Omaha, Neb.
786,865. COMBINED STRAINER AND HOLDER FOR COFFEE POTS. W. A. Wasserman, Baltimore, Md.
786,972. WEATHER STRIP. H. E. Kenny, Detroit, Mich.
786,992. PIPE WRENCH. A. E. Powell, Pen Argyl, Pa.
787,054. PLANE. E. A. Schade and A. F. Schade, New Britain, Conn.
787,055. FISHING POLE AND REEL. F. Schreidt, Mansfield, Ohio.
787,090. SKATE CLAMP. S. W. Finch, Washington, D. C.
787,230. MITER BOX. H. F. Stuebe, St. Louis, Mo.
787,317. AUTOMATIC FISHING REEL. J. H. Van Horn, Syracuse, N. Y.

PATENTS EXPIRED APRIL 17, 1905.

381,101. STOVE DOOR. W. F. Beecher, Cleveland, Ohio.
381,162. NIGHT LATCH. R. Muench, Chicago, Ill.
381,186. PLANE. R. T. Torkelson and Iver Johnson, Worcester, Mass.
381,293. LOCK. W. H. Taylor, Stamford, Conn.
381,389. BRACKET. H. P. Kochsmeier, Freeport, Ill.

PATENTS ISSUED APRIL 18, 1905.

787,359. WRENCH. J. Delancy, Bucyrus, Ohio.
787,403. FOOT WARMER. E. P. Sanders, Pana, Ill.
787,414. PLIERS. R. Watson, Cleveland, Ohio.
787,488. INSTRUMENT FOR REMOVING EYES FROM FRUIT OR VEGETABLES. F. G. Yawman, Rochester, N. Y.
787,523. COMBINED PIPE WRENCH AND PLIERS. G. M. Mason, Cambridge, Iowa.
787,587. WRENCH. K. G. Overland, Fertile, Minn.
787,664. BORING TOOL. M. D. Converse, Newark, N. J.
787,741. WRENCH. L. G. Egger, Buffalo, Iowa.
787,831. NUT WRENCH. F. G. Cornell, Louisville, Ky.

DONT'S FOR SALESMEN.

Don't limit yourself to ten minutes when talking to a prospective customer, but talk as long as you think there is a chance to do good, but be dead sure that you don't talk too much.

Don't be a quitter, or say: "I can't sell this man," before you have talked with him.

Don't assume to know more about your customer's business than he does himself, for you can't make him believe it.

Don't "put on" a civility or formal manner which is not natural to you, and never try to flatter a man; sincerity is as commendable in business as it is in religion.

Don't beg a man to look over your line, as that makes it appear that you are short on argument, but rather explain to him that you have something in your line that he will find to be a bargain.

Don't underestimate your difficulties, nor overestimate them.

Don't fail to let your customer talk if he is inclined to do so, as by listening to what he has to say you learn what his ideas are, and also, show the respect that is due him.

Don't dodge a question, but answer it fairly and squarely.

Don't forget that every man has his own peculiarities which should be met in different ways.

Don't make a mistake by talking to the wrong man, but be sure you have the name of the buyer correct, and that it is he you are addressing.—*Salesmanship.*

THE MINNESOTA RETAIL HARDWARE ASSOCIATION.

Notwithstanding the commanding position among Retail Associations at present held by the Minnesota Retail Hardware Association they do not let up the good work of bringing every Retail Hardware Dealer in the State within the fold, and make the efforts with truth and persistency to aid them. Although they have at present seven hundred members they see no reason why the high water mark of organization should not be placed at one thousand. In furtherance of that desire they go after the laggards with the following communications:

Minneapolis, April 15, 1905.

To the Minnesota Hardware Trade.

Gentlemen:—Following closely the conclusion of the various successful Retail Hardware Conventions, supplemented by that of the National Hardware Association lately held at Minneapolis, we wish to call your attention to the grand work done by these organizations and their vital importance to you as retail Hardwaremen. Only for their magnificent fight the Parcels Post Bill would long ago have become law and your customers would be getting eleven pound "Cat-house" packages by mail for a quarter. A number of new States have been enrolled and the membership of all the States has been increased, each of them adding from fifty to one hundred and fifty new names the past year, until now the total number of Hardware firms affiliated with the National Association, stands at 6,000. In fact, to-day, this is the strongest retail trade organization in the country, and its brilliant success has attracted the attention of manufacturers and jobbers generally throughout the United States. Do you realize what this means? It means that you are now in a position to get any reasonable thing you wish to claim. Furthermore, six hundred manufacturers and jobbers have pledged themselves to cut out the Catalogue Houses absolutely. Is not this worth while? With the customary large orders from such houses and ready cash in sight, such offers of business are very attractive and we hope the sacrifice is appreciated by our members. In return for this position, taken at considerable temporary inconvenience, something is due from the retailers. One of the most important resolutions passed at the late National Convention was as follows:

"*Resolved*, That it is the sense of this Convention that all Retail Hardware Dealers show their appreciation of the heavy support given our association by the jobbers, to the extent that we recommend that all Retail Hardware Dealers confine their purchases, to the fullest extent possible, to the legitimate jobber."

This resolution should be seconded by every dealer in the State. Now, gentlemen, what will you do for the cause? If you are a member, how is it with your competitor and can you not get him in? To non-members, we are sending a blank application. A membership costs nothing, and yearly dues, both State and National, are but three dollars, while the "National Bulletin," also included in this price, should be on the desk of every Hardware dealer in the country. We ask every Hardwareman in Minnesota to assist in making 1905 the banner year in our history. We now have seven hundred members—let's make it a thousand.

One word more. Have you insurance with the "Hardware Mutual" of Minnesota? This is a strong annex of our association and its benefits are for members only. Thirty-five per cent. is the saving this year, with bright promise for the future. When you cut the profit out of insurance, it's cheap.

Next annual convention will be held in Minneapolis. Make an agreement with yourself now that you will attend.

A. T. Stebbins, President. M. S. Mathews, Secretary.

♣

The Retail Hardware Dealers' Mutual Fire Insurance Company of Minnesota, of which M. S. Mathews is secretary, 323 Boston Block, Minneapolis, Minn., issues a postal in which a brief statement is given of the financial condition of the company for the quarter ending March 31, which is as follows, and tells its own story:

Premiums Written, 1905	$ 16,800.61
Insurance in Force	2,016,155.00
Cash on Hand and Premiums Due	51,559.77
Total Liabilities—(Re-Insurance Reserve)	18,334.00
Net Surplus	33,225.77
Increase in Assets, 1905	3,525.04
Increase in Surplus, 1905	1,406.42
Losses, 1905	7,467.51
Return Premiums to Policy Holders (net saving) month of March	1,959.83
Return Premium for 1905, 35 per cent	1,959.83

CONVENTION BUTTONS.

Secretary C. B. Carter, when forwarding the official invitations to the Fifteenth Annual Convention of the Southern Hardware Jobbers' Association to be held at Hot Springs, Va., on June 6 to 9, took occasion to announce:

"The plan adopted at previous conventions of our association of numbering and indexing all who attend, in advance of their arrival, has proven so satisfactory and acceptable to all interested, that our Executive Officers have decided to continue the arrangement upon the same basis this year, which is as follows: Each delegate and visitor will be given a number, and from these numbers an index will be prepared, copies of which will be printed and distributed to all who attend the convention. The object of this being, that there may be no occasion for any one in attendance at the meeting being unacquainted with the name, address and occupation of any one present. To accomplish this result special button badges will be prepared, numbering consecutively from one to one thousand—the index, of course, being similarly numbered and also alphabetically arranged. These buttons and indexes will be delivered to you upon arrival in Hot Springs. Kindly, therefore, advise us at the earliest moment possible the name of the person or persons who will represent you at the convention, in order that we can prepare numerical buttons and incorporate the name or names in the index pamphlet."

THE GLIDDEN VARNISH CO. AND THEIR ADVERTISING.

The advertising campaign of the Glidden Varnish Company, Cleveland, Ohio, in the interest of their great specialty Jap-a-lac is creating the greatest publicity among the big advertisers this Spring, surpassing as it does, in volume of expenditure any advertising done within the same time by any other manufacturer. Referring to what was paid the Butterick trio, one Reverend Gentleman in a recent sermon tried to point out the development in civilization as manifested by its advance in all branches during the last fifty years, and said in language something like this: "What would be the use of an engine of fifty years ago trying to pull the Twentieth Century limited to New York on stated time? What would the merchant prince of fifty years ago say if he were called upon and given adequate reason for spending $15,000 in one advertisement with one publisher?" As has been said by one of our exchanges, "The advertisement is the application and culmination of all that has generally been recognized up to the present as true of advertising as a salesman, and it has been made profitable by the way in which it has been closely interwoven into the sales department work of the firm so that before its appearance it has practically insured the profitableness of the investment to the advertiser; that is to say, the indications for this year's business as compared with last, based upon the plan of advertising for the purpose of increasing sales, would indicate that this expenditure has been amply warranted by the results manifested up to date." That the expenditure was a wise one the results will show in a remarkable manner, proving it to have been a wise thing to do, a wise time to do it, and a wise method to adopt in their advertising of this world-wide specialty.

NATIONAL ASSOCIATION OF MANUFACTURERS.

The Tenth Annual Convention of the National Association of Manufacturers will be held at Atlanta, Ga., on May 16, 17 and 18.

The Executive Committee's Sub-Committee on Programme has outlined, with the approval of the Executive Committee, the following programme, which will be adhered to as nearly as the necessities of business at the various sessions, the convenience of Committee Chairmen and speakers, and the perfect freedom of discussion and of action by members which has always characterized the conventions of the association will permit:

First Session.

Addresses of Welcome by Governor Terrell and others.

President's, Treasurer's and Secretary's Reports.

Report by Interstate Commerce Committee.

Address by Mr. Ludwig Nissen on Governmental Relation to Public Franchises.

Address by Samuel Spencer, President, the Southern Railway.

Second Session.

Report by Committee on Tariff and Reciprocity.

Address by Eugene N. Foss on Canadian Reciprocity.

Report by Committee on Industrial Education.

Address opposing the repeal of the National Bankruptcy Law.

Third Session.

Report by Fire Insurance Committee.

Address by Edward Atkinson on Fire Protection.

Address by D. A. Tompkins on the Present and Future of Cotton from the Plantation to the Loom.

Fourth Session.

Report by Strike Insurance Committee.

Address by James A. Emery of San Francisco.

Address by Daniel Davenport on the Necessity of Organization, National and Local, by the Manufacturers and the People.

Report by Committee on Patents and Patent Laws.

Fifth Session.

Report by Committee on National Incorporation.

Nomination of Officers and all miscellaneous business.

OUR BRITISH LETTER.

(From Our Special Correspondent.)

London, April 15th, 1905.

CONFERENCE AT BRISTOL IN MAY.

British ironmongers are looking forward with great pleasure to the Annual Conference of the I. F. A., which is to be held May 3d, 4th and 5th at Bristol—the "Queen of the West." It is anticipated that many Hardwaremen from all parts of the country will take the opportunity of visiting that historic city, which once ranked first among the commercial ports of the United Kingdom. When Good Queen Bess reigned in Great Britain her merchantmen sailed to all parts of the world from Bristol port, and carried with them British Hardware and other products into distant lands. Times have changed and Bristol is no longer the best known shipping port in this country. Nevertheless, there are many interesting features connected with Bristol trade, and several well-known firms in the Hardware world have their headquarters in the neighborhood. In my next letter I hope to report to your readers the Conference debates and the proceedings of that interesting gathering, which will, however, be somewhat overclouded by the illness of W. J. Bacon, the esteemed and venerable president of the I. F. A., who is at the moment hovering between life and death at his home at Poole, in Dorset, of which old-world spot he is Mayor this year.

ASSISTANTS QUALIFY FOR BETTER POSITIONS.

The results of the ironmongers' assistants' examinations, which took place in March at Ironmongers' Hall, London, have now been made known. Several competitors came off with honors, the first place with honors and gold medal being awarded to George H. Saywell, of Sheffield, a silver medal and other prizes being secured by R. Haward, of Tunbridge Wells. A good number of competitors satisfied the examiners and will duly receive the coveted certificates. The competition in the optional subjects was very satisfactory, many assistants showing themselves well qualified to take special situations in which a thorough technical knowledge of such subjects as gas-fitting, sanitary plumbing, rain-water goods, guns and ammunition, and agricultural appliances, is needed. A special prize of a "Premier" bicycle was awarded to Ernest G. W. Tyson, who proved himself specially proficient in practical and technical knowledge of cycles and accessories, in addition to being considered by the examiners a well-qualified ironmonger's assistant. The introduction of examinations for ironmongers' assistants has proved a wise step, and already has shown that there is a tendency on the part of assistants to improve their knowledge of the trade in which they are now engaged. On the other hand, ironmongers are gradually realizing their responsibilities and finding out that it is incumbent upon them to take more than ordinary measures in the instruction of their apprentices in order to create a better stamp of assistants, and so indirectly improve the status of the ironmongers of the future. It must always be recognized that the majority of British Hardwaremen have first served as apprentices and assistants, and members of associations are thus learning to regard their assistants as their future successors. The old-fashioned idea of keeping apprentices and assistants in the dark as far as possible in reference to buying goods and the general details of management of a Hardwareman's establishment is fast dying out, and greater freedom is allowed and more opportunities given whereby the assistants of the present day can grasp the many difficulties attendant in the conduct of a Hardware business, and also become proficient in those up-to-date methods which alone can lead to permanent success.

EFFORTS TO PROMOTE SPRING TRADE.

Spring trade has opened up well and ironmongers all over the country are making excellent displays of garden furniture and Spring horticultural specialties. Much of this business is secured by introduction and indirect advertising. In addition to making good shows in shop windows, ironmongers find it profitable to freely distribute manufacturers' lists and circulars, and many of the enterprising ironmongers of the present day prepare catalogues, obtaining the loan of cuts from manufacturers, and so making their seasonable circulars and booklets interesting to their readers, as well as profitable to themselves. More than one ironmonger has adopted the idea of introducing chatty descriptions of the goods he sells, and also pointing out the uses in culinary articles and domestic accessories, frequently adding valuable recipes and other useful information, which cannot fail to be appreciated by housewives and others who are buyers of such novelties.

THE DISTRIBUTION OF AGRICULTURAL IMPLEMENTS.

The agricultural implement trade is worked in this country by two distinct classes of dealers. One class consists of implement agents pure and simple, who devote the whole of their time to attending markets and fairs, local agricultural shows and other gathering places where farmers meet, and so introducing the goods for which they hold agencies. Many of this class of traders are farmers' sons or men who have been intimately connected with the agricultural world, and so are enabled to talk with freedom to agriculturists, and they oftentimes give practical demonstrations of the utility of the different implements and machines they offer. The other class of traders in implements and machines consists of ironmongers, who have large establishments in which they sell general ironmongery, and who, owing to the suitable locality in which they dwell, have opened up implement showrooms, and from time to time make seasonable window displays and outside shows of the goods they handle. A large portion of the trade of a country ironmonger is, not only indirectly, but directly, connected with the farmers in his locality, and, as the backbone of his trade in general Hardware is done with this class of buyer, he naturally is in a position to sell implements and machines. Many manufacturers, both American and English, prefer to distribute their appliances through accredited agents and men of well-known standing, such as Hardwaremen. Therefore it frequently happens that many of the best agencies are in the hands of ironmongers. The 1905 season's trade is now commencing; the opening event of the show season is located in the Sister Isle, and will take place at the end of the present month at Ball's Bridge, Dublin. The Spring Show of the Royal Dublin Society is always an event looked forward to with interest, not only by Irish agriculturists, but by English manufactutrers of implements, so many of whom have stands at this show.

AMERICAN BUSINESS PROMPTITUDE.

The businesslike manner in which American manufacturers are always ready to interview commercial travelers has formed the subject of comment in more than one of the British trade journals during the past few weeks. Those commercial men who are in the habit of interviewing not only American firms, who have direct representation in Great Britain, under the management of men who have had experience in the States, but English manufacturers and retailers, tell many stories of the contrast they experience in their reception by the two classes. They speak very highly of the freedom of access granted by Americans, and how they are at once promptly, if abruptly, dealt with, and, although an American wastes little time on superfluous conversation, he comes to the point at once and quickly decides a business transaction, either handling an order without delay, or courteously but firmly declining the negotiation. On the other hand, the valuable time of commercial men is frequently wasted by British manufacturers and retailers owing to the habit, which has been acquired during many past years, of putting off and delaying the settlement of any weighty business. The contrast is so marked that efforts are now being made to induce Englishmen to improve their ways of conducting business, and not a few, realizing the advantages to be gained by adopting the American methods, are modernizing the conduct of their establishments and bringing them more in line with those Hardware establishments in the United States, which are so well conducted.

LEATHER GOODS—A POPULAR SIDE LINE.

Among the different side lines which ironmongers are now taking up very strongly may be mentioned leather goods, to which great prominence is being given. At this special season the sale of traveling requisites forms an important branch of British retailers' businesses and it is pleasing to note that many ironmongers who have only stocked dress baskets and traveling appointments are introducing sundry goods connected with the leather trade, which have hitherto been almost entirely in the hands of fancy goods dealers, stationers and others. There is also a growing tendency to introduce popular side lines, and British ironmongers' shops are gradually assuming more attractive appearance, many of the articles offered being quick-selling lines, which at one time were considered quite outside the scope of an ironmonger's business. The introduction of these specialties leads to increased sales, not only in the articles themselves but in other goods, it being now a recognized fact that the greater number of departments the greater the bulk of business done, inasmuch as one section acts as an advertising medium to the other.

(Concluded on page 33.)

RECENT TRADE PUBLICATIONS.

The Stanley Rule & Level Co., New Britain, Conn., have sent us a copy of their No. 34 catalogue for 1905. It is described as being a mechanic's reference book illustrative and descriptive of their U. S. Standard Rules, plumbs and levels, iron and wood planes, try squares and bevels, bit braces, mitre boxes, screw drivers and miscellaneous improved wood workers' tools of which they are the manufacturers, and presents to the users of tools a hand book giving specifications, information and prices of certain of their tools most generally used. All of their tools are guaranteed. It any Stanley tool which has passed the rigid inspection given it at their factory before shipment, should show any defect due to the fault of the manufacturers, they state such tool, if brought to their notice, will be replaced without any cost to the owner. They call special attention to their new goods, among which are several numbers of bit braces, screw drivers, mitre boxes, chute boards, razor edge spoke shaves and planes. Write to-day for a copy of catalogue No. 34.

J. Stevens Arms & Tool Co., Chicopee Falls, Mass., have issued a catalogue of the "Stevens-Pope" specialties, manufactured by them, which includes Stevens-Pope barrels, muzzle loading outfit, rear wind gauge and elevating sight, lubricating pump, loading flask, palm rest, rifles, etc. They state "The advantages of the Stevens-Pope system are briefly summed up as follows: Accuracy, light labor, seating the bullet centrally without deforming the base, and fitting it perfectly to the bore, the shape of the grooves holding bullet centrally on upset, non-burning on qualities of the gain twist, perfect workmanship, ability to load from either breech or muzzle, and to clean and inspect from the breach, the ability to shoot any charge desired by inserting shell first and loading both powder and bullet from the muzzle." Their book is in pamphlet form, contains 31 pages and is illustrated throughout. A copy will be forwarded upon request. Write at once.

National Cutlery Co., Detroit, Mich., are the authors of an attractive catalogue exploiting the "S & S" knives of which they are the manufacturers. They state that ordinary crucible steel, shear or double shear steel, will not stand the tempering they give their knives and razors, but their Special Formula Steel, hand forged by skilled workmen, tempered by their special process in chemically treated oil, makes the S & S knives and razors that will hold an edge and are absolutely even in temper; hard and soft spots being an impossibility. Besides knives and razors the National Cutlery Company make hatchets, scythes, bush hooks, etc. All of their products are fully warranted and pass three tests during the process of their manufacture. The book above referred to will be found of real value, and may be had for the asking.

The Root Brothers Company, Plymouth, Ohio, manufacturers of Hardware Specialties, have distributed a new catalogue, No. 12, exploiting their product. It is a pamphlet catalogue containing 39 pages embracing all tools for general boot, shoe, rubber, harness and tinware repairing. They make an outfit which they style the "Plymouth Rock" combination outfit which contains 42 articles of superior quality, packed in a strong dovetailed box with hinged cover. They claim it is the most complete, most practical, largest and best outfit of its kind on the market and includes a Plymouth Rock riveting machine. They also make a number of smaller outfits than the above, but all up to the same high standard of quality. Send for a catalogue for further particulars.

The Stover Manufacturing Co., Freeport, Ill., manufacturers of Builders' and Shelf Hardware, Hardware Specialties and Grey Iron, Brass and Aluminum Castings, Etc., also Windmills for pumping and power purposes, Grinding Mills (sweep and belt power), Corn Shellers, Wood Saws, Etc., have issued a 1905 illustrated catalogue exploiting their "Ideal" Hardware. Some of their lines have been increased and others added since their last catalogue was issued—done, they state, to both favor the trade and increase their output. They are glad at any time to furnish estimates on small grey iron, brass, bronze and aluminum castings; brass patterns, also on galvanizing, tinning, japanning, etc. They have recently added to their plant another large factory equipped with the latest improved machinery. Send for their 1905 catalogue for description of their various goods.

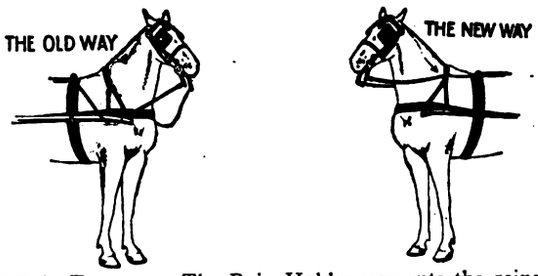
Bevin Brothers Manufacturing Co., East Hampton, Conn., are the authors of an exceptionally neat envelope size catalogue of 55 pages of bicycle bells and specialties for season of 1905. They also manufacture bells of all kinds which are embraced in their catalogue No. 83 which they will be glad to send upon request. The bicycle bell catalogue is No. 85 and these goods they guarantee to be well made and neatly and substantially packed, and they are willing at any time to make good anything that proves defective in workmanship. The Bevin Company have facilities for turning out specialties in the bicycle sundry line, and invite correspondence from any who desire work of this nature done. They sell only to manufacturers and jobbers; all inquiries received from retailers being referred to the nearest jobber handling their goods. If interested, write for catalogue mentioning the goods wanted.

The Toledo Rubber Co., Toledo, Ohio, are submitting to the trade a descriptive list in the form of an attractive pamphlet of envelope size, on their line of Lawn Hose. Their stock comprises a full and complete line of nozzles, sprinklers, quick hose connectors, reels and all up-to-date appliances that are used in connection with lawn and other hose. They state: "If you take a knife and examine a piece of ordinary bursted hose you will find that nine out of every ten is due to faulty seams." This is not possible with theirs as it is a no-seam hose, and cannot be penetrated by water. Send for one of their pamphlets which fully describes and illustrates all styles of hose, etc.

Silver & Company, 304-314 Hewes Street and 432 Broadway, Brooklyn, also 18 Warren Street, New York City, have placed in the hands of their patrons and friends, catalogue No. 14 describing and illustrating their extensive line of Brooklyn Blue Flame Oil Stoves, Gas Stoves, Etc. Besides the stoves, they make ovens, broilers, triple tin sauce pans (which are a combination of three pans occupying only one space), bread toasters, and the Sir Humphrey Davy Broiler and Toaster which is made with a wire gauze preventing any flame from passing through its surface, and having the property of diffusing and equalizing the heat all over its surface, and by so doing, toasting and broiling evenly without danger of burning. For description of stoves, prices, etc., write for catalogue.

Ira F. White & Son, 114 Walnut Street, Newark, N. J., have issued a number of circulars, one being devoted to each of the following articles of their manufacture: Cleavers, can openers, putty knives, carving set, shears, special carving sets and kitchen outfits, paring knives, household cutlery and combination can-opener knife. For any of the above circulars which are descriptive and illustrative, also prices, write to manufacturers as above.

J. P. Eustis Manufacturing Co., 92-94 North Street, Boston, Mass., "Brasscrafters," have sent us a copy of their 1905 catalogue "G" which supercedes all others. They request the trade to order by their new numbers which are given in the 1905 catalogue, together with the old numbers which are shown in brackets. The above concern are manufacturers of metal frame French plate mirrors, portable and fixed shower baths, staple bath room accessories and special metal work. Their catalogue is finely printed on heavy coated paper, and is handsomely illustrated. They state they are prepared to estimate on and manufacture metal articles. Their experience is such that they may be able to perfect a non-commercial article and make it valuable. They solicit an opportunity to serve you and would consider propositions to manufacture and market articles of merit. Write for catalogue "G."



H. D. Smith & Company, Plantsville, Conn., have sent us a copy of their 1905 catalogue embracing Vehicle and Special Drop Forgings and Drop Forge Fine Tools in which all obsolete items of previous catalogues have been omitted. Attention is called to their line of tools, which, for them, is a somewhat new departure. This line they will extend, and state they purpose to have it distinctive of high grade and salably priced. Care has been exercised throughout the book to state of what the various goods illustrated and described therein are made. The book is in pamphlet form and contains 138 pages, and is bound with a stiff linen cover. If you are interested in their line, write for a catalogue.

NEW GOODS AND SPECIALTIES.

READ'S REIN HOLDER AND FASTENER.

O. B. Read Manufacturing Co., Troy, N. Y., who are the manufacturers of Read's Rein Specialties, are using every effort to market those desirable and ready selling articles, the Rein Hold-

er and Rein Fastener. The Rein Holder prevents the reins from getting under the ends of the shafts and thereby causing untold accidents; a simple movement of the wrists will place the reins where they are secure, the device being readily applied to the

harness. The Rein Fastener is made of metal, heavily nickeled over copper, or it may be had in imitation rubber. The device is attached to the side of the dash board, and as one steps from the vehicle the reins can be instantly put in the Fastener. Any thickness of reins can be used. The device is adjustable and can be put on in a moment's time, even to the top of sash if desired. Many thousands of these specialties are constantly being disposed of, and the Hardwareman should have them in unfailing supply; the manufacturers supplying upon request a sufficiency of circulars and other stationery to foster their sale.

THE S. & S. "PACKING HOUSE SPECIAL" KNIVES.

The National Cutlery Company, Detroit, Mich., have achieved a notable success by manufacturing a line of goods to which they apply the brand "S. & S.", being manufactured from a special

formula steel that is used in all S. & S. products, and realizing that crucible steel, shear or double shear steel will not stand the temperature which is required by the tempering process given the knives and razors bearing the S. & S. trade mark. As no expense is spared to produce this important feature, quality, it is referred to by the company as permitting a better margin of profit to the Hardware dealer than that afforded by any other line of cutlery. S. & S. knives are constructed to fit the hand without cramping the fingers; they invariably hold their edge, one of their most important claims being that they "can be kept on

S. & S. PACKING HOUSE KNIFE.

the meat instead of on the steel." We present herewith an illustration of the No. 2 Packing House Special. This knife is very largely used by the leading packing and dealers' supply houses throughout the country. It is one of the most popular knives of the National Cutlery Co.'s production. The manufacturers have just completed an especially attractive catalogue showing their entire line of production, and we are advised that they will be glad to mail a copy to any Hardware dealer who requests the same.

GATE CITY NATURAL STONE FILTER.

The Gate City Filter Company, 15 East Fourteenth Street, New York, N. Y., is engaged in bringing before the Hardware and house furnishing goods trades the good qualities of the Gate City Natural Stone Filter, by the aid of which it is claimed all deleterious matter is eliminated from drinking water which may

GATE CITY NATURAL STONE FILTER.

be passed through this filter and leave no trace of bacteria than can be discovered with a microscopic lens. There is but one Gate City Natural Stone Mine from which the filtering stone is taken, and cut into filtering discs, for use only in this filter, which it is claimed will last for daily use about four years, and then can be replaced at a small expense, making the filter in every respect as good as new. Its perfect filtration, ease of cleansing and moderate cost, has combined to give it a popularity that enables it to show a record of nearly a half million in use. The reason for its perfect efficiency is found in the disc of natural stone which is the filtering medium, and which arrests all impurities of whatever kind on its surface, from which the accumulation can be easily removed by the user without taking the filter apart. It is made in six sizes from fine glazed stoneware and in four sizes of 3, 5, 7 and 9 gallons, respectively, in plain or decorated porcelain, particulars concerning which may be obtained on application to the company at the foregoing address.

"NEVER FAIL" OIL AND GASOLINE CAN.

J. A. Harps Manufacturing Co., Greenfield, Ohio, Morill M. Hough, 107 Chambers Street, New York, Selling Agents in New York and vicinity, are the manufacturers of the "Never Fail"

Digitized by Google

Oil and Gasoline Can of which we present an illustration. The "Never Fail" is a five gallon can made of "Apollo" 27 gauge galvanized iron, and calculated for the use of gasoline, kerosene or all other light oils and liquids; it possesses a number of advantages that has made it a popular article wherever intro-

"NEVER FAIL" OIL AND GASOLINE CAN.

duced. Enumerating these several advantages there will be found: no oil valves, or piston or sucker to wear out; no faucet to leak or drip and no funnels or measures need be used. The can is a pneumatic, air tight can, allowing no evaporation or waste; is neatly striped and labeled, and the tops of can are nicely painted. It is especially recommended for house use, druggists, store keepers and autoists for safely carrying gasoline. They are thoroughly tested and inspected on leaving the factory, and the company is ready at all times to replace any cans that may be found defective.

THE F. W. ALARM CLOCK.

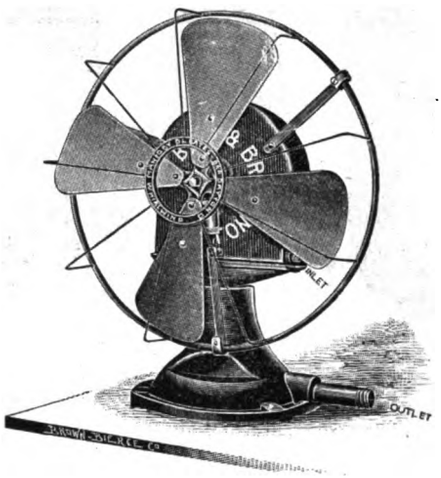
The Western Clock Manufacturing Co., La Salle, Ill., with New York branch at 51 Maiden Lane, are placing on the market through the Hardware and House Furnishing Goods trades the F. W. Alarm Clock, which we illustrate. It is substantially con-

THE F. W. ALARM CLOCK.

structed, put up in a heavy ornamented cast iron case, attractively finished in oxydized copper and ornamented in relief. The weight of the case makes it almost impossible to upset, and the clock is, on that account protected. Among the new features, the alarm is placed underneath and out of sight and rings long and loud lasting a whole minute; a brass shut-off permits of checking it whenever desired. If properly taken care of and cleaned at reasonable intervals, this clock will last indefinitely; while notwithstanding its numerous advantages it is sold at a low price in comparison with the ordinary nickel alarms on the market.

D. L. BATES & BROTHER CO. VENTILATING FANS.

D. L. Bates & Brother Co., Dayton, Ohio, are the manufacturers of Ventilating Fans in large variety for water motor and direct current; among which is the Movable Desk and Counter Fan shown in Fig. 1 which can be arranged to sit on counter,



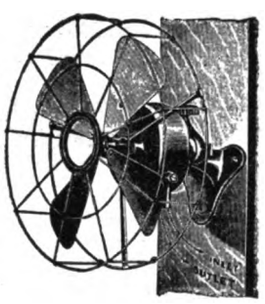


FIG. 1. MOVABLE DESK AND COUNTER FAN.

connections to be made with rubber hose, or it can be set permanently on a shelf. They give a speed to a 12 inch fan of 1600 revolutions at 65 pounds pressure, 1-16 inch jet, and to a 16 inch fan, 1100 revolutions, at same pressure and jet. Fig. 2 shows the wall bracket fan, with adjustable ball and socket, so mo-

WALL BRACKET FAN.

tor may be adjusted to throw air in any direction. Each fan is provided at the inlet with a threaded brass fitting, to which may be screwed the ordinary rubber hose coupling, or a permanent connection can be made at small expense. They are nicely finished in a combination of japan, oxidized copper and polished brass. In Fig. 3 is shown the Electric Four Blade Ceiling Fan wound for direct current only. They are perfectly noiseless, run in

CEILING FAN.

self-oiling bearings requiring oil but once a season. They can be run from any direct incandescent electric light current or street railway circuit. They keep in stock, fans for 110, 167, 220, 250 and 500 volts, with four blades. The 167 and 250 volt fans are to be connected in series of three or two respectively on a 500 volt circuit. They can furnish them in nickel, oxidized copper or polished brass. All fans are furnished in oxidized copper unless otherwise ordered.

✤

The Lawrence Manufacturing Co., Toledo, Ohio, is the maker of the "Frost King" Cream Separator, which is one of the most simple in construction and perfect in working now on the market. It is provided with a reversible strainer, cover and aerator, a removable milk compartment and concave bottom. Manufactured from the best material possible, it has no ground joints to get out of order. It is also cleansed easily and quickly, and deserves the large sales that comes with its popularity.

JAP-A-LAC

REGISTERED TRADE MARK

"WEARS LIKE IRON"

DON'T DELAY

HAVE you seen our double-page advertisement appearing in the Ladies' Home Journal, April issue? If not, we would advise you to take a look at it. This double-page advertisement cost us EIGHT THOUSAND DOLLARS. We did not spend this money entirely from philanthropic motives. We expect to get big returns, but if we do, the dealer who sells it to the consumer must get them first.

You are certain to have a great many calls for JAP-A-LAC, this Spring. This big, double-page advertisement is only the first gun fired. The enormous advertising, which we will do during the three months following, will surely storm and capture the citadel.

The great American public is influenced by good advertising. Ours is so overwhelming this season, that it is absolutely certain to largely increase the business of every dealer handling JAP-A-LAC.

We are forcing the merits of JAP-A-LAC into the minds of the American people, and there is not a town in the country where JAP-A-LAC advertisements will not be read.

We have one of the most complete systems for following up inquiries, that could possibly be devised. The readers of the magazines who inquire about JAP-A-LAC are given a great deal of information, and suggestions are made to them of how to use JAP-A-LAC in various ways.

JAP-A-LAC can be used almost as generally as soap. It beautifies the home and makes it sanitary and cleanly. There are uses suggested in our booklet which cannot but increase the consumption of JAP-A-LAC and your community is no different from any other. People are alike the world over, and every home should keep a can of JAP-A-LAC constantly at hand.

In pushing JAP-A-LAC, we do it with the honest conviction that we are furnishing to your customers the very best thing of the kind made. There is nothing in the market which can be substituted satisfactorily for it. You can sell JAP-A-LAC profitably, no matter what make of paint or varnish you are handling. Add it to your list. It *spells profit* in the most simple and convincing way; *profit to the dealer* in every letter.

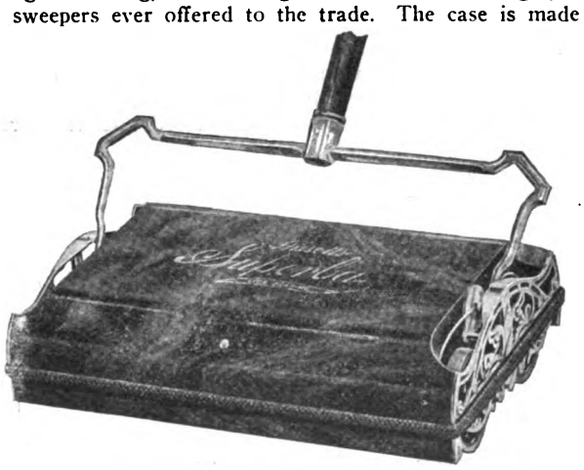
No groceryman would think of handling one kind of soap only. Why should you confine yourself to unadvertised articles claimed to be similar to JAP-A-LAC when you can sell more of them by also stocking JAP-A-LAC?

If a customer inquires for JAP-A-LAC, and you say you do not keep it, you may not only lose a sale, you may lose a customer. Save your customer.

We believe you have already had some calls for JAP-A-LAC, and we know you will have a great many more, soon. If you are now handling JAP-A-LAC and have a sufficient supply of it for a window display, be sure to get the free display matter. It will cost you nothing and we want your assistance.

Let us hear from you at once. DON'T DELAY.

THE GLIDDEN VARNISH COMPANY,



MAKERS OF HIGH-GRADE VARNISHES FOR ALL PURPOSES

641 WILLIAMSON BUILDING,

CLEVELAND, OHIO

BISSELL'S LATEST AND FINEST.

Bissell's "Superba," the latest thing in the Bissell line, is the finest sweeper in points of mechanical construction and finish, ever introduced on the market. The case though artistic in design, is built along perfectly smooth lines, entirely free of paneling or carving, thus making it one of the most highly sanitary sweepers ever offered to the trade. The case is made of

BISSELL'S "SUPERIOR" CARPET SWEEPER.

one piece of selected crotch mahogany, no joints or nail holes appearing, and given the finest piano polish; all the metal parts are distinctive and artistic in design, and the sweeping qualities of the "Superba" cannot be excelled. Just as a fine piece of furniture shows its value over the ordinary kind, so the "Superba" shows its value over the ordinary sweeper. With the growing tendency of the public to buy the best in every line, the "Superba" is bound to have a liberal sale. One of these sweepers will be found included in the Bissell Carpet Sweeper Co.'s Easter announcement, copy of which can be had on application to the Grand Rapids office of the Bissell Company.

BARNES' IMPROVED THREE-WHEEL PIPE CUTTER.

Barnes Tool Company, New Haven, Conn., are the manufacturers of the Genuine Three-Wheel Pipe Cutters, which are made in eight sizes, cutting pipe from ⅛ to 12 inches in diameter. The cut below is an illustration of the No. 1 and 2, which are used for the various sizes of pipe up to 2 inches in diameter, and the larger cut shows the style of that which cuts the other sizes up to 12 inches. They are claimed to be the first three-wheel pipe cutters that ever worked successfully, or were made to cut pipe over four inches in diameter. The cutter wheels

BARNES' 3 WHEEL PIPE CUTTER, NO. 1. THE CUTTER.

BARNES' 3 WHEEL PIPE CUTTER, NO. 3.

on these tools are drop forged from Jessop best tool steel. The manufacturers refer to the fact that although they could be made from American steel at less expense, they have experimented with various kinds, but found that while Jessop's costs more, it makes a wheel that stands a severe test if hardened properly. There being a limited demand for single wheel pipe cutters for special work, they can offer the genuine Barnes in all sizes made with one wheel and two rolls at the same prices as for regular three-wheel goods.

REVIEW OF THE MARKETS.

WIRE NAILS: There is a steady business being had in this important staple, while the volume of shipments does not reach phenomenal proportions, the tone of the market is a firm one. The following are the quotations: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in ten days:

Carload lots to jobbers.....$1.80
Carload lots to retailers..... 1.85

New York. A moderate demand still characterized the local trade, but the city trade has scarcely reached its natural volume. The market is a firm one at the following quotations:

Single carloads $1.99
Small lots from store..... 2.05

CUT NAILS: There is a more moderate demand for Cut Nails than the manufacturers could wish for, and rumors of slight concessions being made of 5 or 10 cents a keg according to the distance of mill, are occasionally heard from. The following, however, are the official quotations:

Carload lots $1.80
Less than carload lots to jobbers..... 1.85
Less than carload lots to retailers..... 1.95

f.o.b. Pittsburgh. Iron Cut Nails for delivery at Pittsburgh, Buffalo and all points west of these cities 10 cents advance per keg on Steel Cut Nails.

New York. The business being done has been of such moderate dimensions that a few holders are offering a small concession in order to move stock. The New York quotations are still quoted officially as follows:

Carloads on dock.....$1.94
Less than carloads on dock..... 1.99
Small lots from store.....$2.00 to 2.05

BARB WIRE: Throughout the Western trade the mills are doing business that indicates the movement from jobbers as very large. The business East, while not so large, is still regarded as good for the section. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers carload lots	$1.95	$2.25
Retailers carload lots	2.00	2.30
Retailers less than carload lots	2.10	2.40

SMOOTH FENCE WIRE: The general line shows a fair demand for Galvanized Wire in the leading sizes is sold more largely. The market is a firm one. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

Jobbers, carload lots.....$1.65
Retailers, carload lots..... 1.70

The above prices are for base numbers, 6 to 9. The other numbers of plain and galvanized wire take the usual advances.

L. & I. J. WHITE COMPANY: Under date of April 13 the L. & I. J. White Company, Buffalo, N. Y., announces revised and somewhat higher list prices on Applewood Levelers, No. 127, and Coopers' Jointers, No. 133.

ROPE: The following prices may be said to represent the market:

	Cents per pound.
Pure Manila, 7-16 and larger	12¼ to 12½
No. 2 Manila	10
Pure Sisal, 7-16 and larger	10
No. 2 Sisal, 7-16 and larger	8¼

Less ¼ cent to the large trade.

BINDER TWINE: General market quotations f.o.b. Eastern factories, may be given as follows:

White Sisal (500 feet to the pound)..... 9¾
Standard (500 feet to the pound)..... 9¾
Standard Manila (550 feet to the pound).....10¾
Manila (600 feet to the pound).....11¾
Pure Manila (650 feet to the pound).....12¾

Less than carload lots quarter of a cent extra.

LINSEED OIL: Under date of April 21 the following advanced quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....49 cents per gallon.
In lots of 5 barrels or more.....48 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil.....60 cents per gallon.

THE CLEVELAND TRADE.

April business has improved compared with March, and there is yet no reason for complaint about prices for manufactured goods, as they are low compared with the price of raw material. The conservative spirit among manufacturers is commendable. A decline in pig iron would not materially affect the price of manufactured Hardware. The same influence has prevented a break in the price of cotton goods. If cotton goods had been advanced in proportion to the price of raw material that business would have been seriously affected by the late decline in cotton. Everything American is so full of the strenuous spirit that guarding against it is commendable. The crop outlook augers well for Fall trade, and we should be content with what in any other country would be considered good times.

The Lockwood-Taylor Hardware Co.

THE PITTSBURGH TRADE.

We have had a touch of Winter weather for the middle of April, which is not at all welcome, reminds us too forcibly of the long months of snow and ice which we had hoped were past and gone. Developments in the larger interests continue from month to month. Increased capacity in coke ovens and furnaces not keeping up with the demands of the mills for finished products. Improvements by the U. S. Steel Co., which were deferred during the depression a year ago, are now going forward. The tube works at McKeesport will be practically rebuilt when their plans are fully carried out, while there are quite important additions at several other points. The demand for goods is quite active, as it should be at this season, but hardly up to expectations of the amount that would be indicated by manufacturing activity. We look for a steadily increasing trade throughout the year, especially should the present favorable crop reports throughout the country be realized.

Logan-Gregg Hardware Co.

THE PHILADELPHIA TRADE.

It now seems possible to affirm without hesitation that Spring is here and if the thermometer in the seventies did not re-affirm the fact, the recent drop in the mercury and the orders coming in for poultry netting, wire cloth, ice cream freezers, refrigerators, hammocks and similar goods would of themselves be sufficient evidence. It seems remarkable that after such an unusually severe Winter that we should be favored with an early Spring, but such is now the case and apparently we are not to jump at once from Winter into Summer as has been the case for several years. Seasonable weather is always beneficial to trade, and this Spring is no exception to the rule. The country is awakening from its lethargy, and from all sides we hear most encouraging reports of a heavy demand for goods and bright prospects in the building line, so that tools and building Hardware should be in good demand. The market continues strong and there is much complaint from manufacturers whose goods are lying near the raw material that the heavy advance in the costs of material will not allow prices to remain at present figures, and it is claimed that further advances on such lines must be announced in the near future. The large iron and steel corporations are at present in a state of great activity and the advance recently made in wages by the U. S. Steel Corporation is most gratifying, and goes far towards producing a feeling of security to-day and confidence in the future. It is to be hoped that collections will now show signs of improvement. During the Winter and early part of this year they have been unusually slow but with the large volume of trade now moving freely a decided improvement may be shortly expected in this department also. While the outlook is most favorable, and while indications do not appear to point towards a heavy boom there seems to be every reason why we should enjoy a period of a large and healthful business.

Biddle Hardware Co.

Digitized by Google

THE DAVENPORT TRADE.

In addition to the many annoyances and discomforts of men engaged in the Hardware trade comes the great and growing evil of manufacturers everlastingly, eternally and infernally making changes in their price list. The increased cost of labor alone connected with the senseless idiotic practice would, in time pay off the national debt; however, if it cannot be stopped in any other way congress should pass a law with penalty of fine and imprisonment against making these changes oftener than once in a hundred years. If manufacturers wish to make net prices, all well and good, and change them as often as is necessary to meet the market requirements; but, if they propose to sell goods from established price lists, they should be compelled to meet the requirements of the market in the change of discounts. Will Hardware shake up the manufacturers who seem to make these changes for no known reason except to annoy their patrons.

Sickels, Preston & Nutting Co.

THE NEW ORLEANS TRADE.

A remarkable continuation of boom conditions has marked the further passage of the Spring—and the Hardware world has taken full part in this. The wonder continues to grow that such conditions should continue to exist after the January and late December that seemed to foreshadow only gloom. The specific phases of the present situation of particular moment are to be found in the vigorous campaign for the Spanish-American trade that has never hitherto been sought with much earnestness by the merchants of New Orleans or the immediately adjacent country. According to the most conservative estimates of the reliable Hardware and machinery men of the section, the general volume of trade is running about 10 per cent. ahead of that current at the same period last year.

Some lines are behind; others are ahead; but the total foots easily to the figure mentioned. Some sections are buying more than others; some less; but here again the total averages well past the consumption of last season. Credits are remarkably good; and the recent readjustments of values on some lines of goods have not in any way affected the purchasing spirit of the trade.

There has been keen interest manifested in the reported Southern iron merger; and again in the announced community of interest between the Jones and Laughlin Steel Company, and the Lukens Iron Works—in so far as these consolidations will affect the prices or the facilities for obtaining Hardware and other basic goods that are included in them.

However, the keenest interest has been shown in the workings of the special Panama Committee of the New Orleans Board of Trade, and the efforts being made by that body to have the transportation facilities to Panama increased, and the trade between New Orleans and the Spanish-American countries adjoining the Isthmus fostered.

BATTLE FOR TRADE.

In this movement the Hardwaremen of the section are most deeply concerned; and the leading Hardware houses of the city are nearly all represented in the movement.

Some weeks ago the jobbers and wholesale merchants in the Board of Trade met in executive session, and appointed the following committee: Col. B. F. Eshleman, of Stauffer-Eshleman & Co., chairman; Thomas Sloo, of Whitney-Sloo; Pearl Wight, of Woodward-Wight & Co., and Gus Lehman, Jr., of the big wholesale clothing store bearing his father's name, and James W. Porch, local manager for the Lukens Iron Works. After two weeks of activity, and several conferences yesterday with J. L. Bristow, the United States especial commissioner on Panama trade conditions, the committee left New Orleans for a conference to be held Thursday with the Panama Canal Commission.

The purposes of the committee are to see that New Orleans has an equal chance for all the business of the Panama Canal Commission; and to guarantee to the Panama Canal Commission that all goods for the Isthmus shall have as good facilities out of New Orleans as elsewhere—offering the further guarantee that if the United States shall herself divert from New York to New Orleans a portion of the Panama-New York steamship fleet, that sufficient tonnage shall be shipped therein to make the enterprise at least not a money loser.

The Hardwaremen were particularly interested in this movement because it has been on Hardware, interior fittings and similar articles, that the discrimination against the Gulf and for New York has been most evident. The committee will return Saturday, and it is believed that decided and definite arrangements will be made that will divert a considerable Hardware business from the Eastern to Southern ports.

LOCAL CONDITIONS.

In New Orleans, the fever of boom conditions exists. Real estate has doubled in six months. Business properties purchased some years ago for $10,000 and $15,000, have been sold within the week for $40,000; $50,000. While the current amount of building and other improvements for each year has ranged during recent years between $2,500,000 and $4,500,000, there will be spent in building houses, business establishments, and railroad terminals during the next eight months, fully $12,000,000.

In consequence the retail Hardware stores, and the jobbers who sell to the big contractors, are already guaranteed the best business in builders' supplies, mechanics and carpenters' Hardware, building fittings, Hardware, etc., that they have ever witnessed or experienced.

The big lumber activity connected with the reported Goodyear combination, has increased the demand for mill supplies, and the increase has steadily progressed through the past ten days. Despite denials and refutations all local mill operators insist that the combination is practically an accomplished fact.

Meantime, the country districts, the cotton and the rice and the sugar sections, are buying in varying proportions. The cotton planters are purchasing liberally; the sugar planters extravagantly, and the rice farmers not at all.

Building and Builders' Hardware are the leading lines. Implements are going well, chiefly to the sugar planters, but in quantities greater than was anticipated to the cotton planters as well.

PERSONAL AND LOCAL NOTES.

The Moline Plow Company, of Moline, Ill., has removed its New Orleans headquarters from its old location, 211-13 Decatur Street, to the Gasquet Building, Magazine Street and Gravier. The work of removal is being conducted under charge of M. A. Steel, director of the Southern branch and by Victor Loisel, local agent. The company will enlarge its storage room, and will increase greatly its facilities for business here.

Just prior to his departure for Washington with the Board of Trade Panama Committee, James W. Porch, local manager for Lukens Iron Works, announced here that the Jones and Laughlin Steel Company would have a joint agency here with the Lukens Iron Works, and that the storage and warehouse capacity here would be greatly enlarged, and the business sought in a larger field and with a larger force.

Col. S. F. B. Morse, intimately associated with "Hoadley of International Power," in the latter's efforts for the Southern Iron merger, said in New Orleans a few days ago, that the success of that undertaking was assured, and was already practically completed.

THE SAN FRANCISCO TRADE.

Since expansion in the general trade of the country during the first quarter of the year, compared with the corresponding quarter in 1904, has been so pronounced that commercial statisticans have interested themselves in ascertaining about how much it was, good feeling San Francisco merchants in Hardware lines are not only in their glad remarks anent the whole country's expansion trade reports unconsciously exhibiting a strain of American loyalty, but likewise show a commendable hearthstone pride by suggesting that this letter make mention of the Pacific Coast trade expansion. "For example," they say, "the exports from San Francisco last month were $6,833,700, compared with $3,615,600 in March, 1904, and $4,056,000 in March, 1903, while those for the first quarter of 1905 were $13,844 000, against $10,283,000 for the first quarter of 1904. The Pacific Coast, indeed, has been sending in the best reports of any section of the country for some years, hardly halting even when trade returns fell off from time to time in the East. And let it be added that these continued excellent reports are attracting to the coast a good deal of unemployed Eastern capital and thousands of houseseekers from the Middle West, and are proving the best advertisements of our prosperity. Pacific Coast crops last year were generally very good and passed out of the farmers' hands with remarkable rapidity and at most excellent prices, hence we find ourselves approaching another abundant harvest with no old stock on hand to keep prices down. This is already shown by the reception given the new spring clip of wool, which is going into consumption as fast as it is shown, and at a high plane of quotations; also by a steady demand for the coming crop of hops and dried fruit, sales of some kinds of the latter having already been made to New York for July delivery at remunerative quotations. Insofar as the present outlook for 1905 is concerned, California and the other Pacific Coast States have certainly nothing to complain of. "And here's a good April commencement for the second quarter's expansion showing in Pacific Coast export trade," said a jobber in Hardware, implements and machinery. "Make a note of it that four hundred carloads of freight, consisting chiefly of machinery, have already arrived overland for shipment to the Orient on the steamship Minnesota to sail April 29th. The invoice of this shipment embraces forty narrow-gauge locomotives, made in Pennsylvania

and New York. These locomotives have been knocked down for facility in handling. The boilers will be shipped ready for putting into place, while all the other parts have been fitted. They are of about the same weight as those used on American lines fifteen years ago, but they have modern improvements. Practically all the Minnesota cargo for this month's shipment is for Japan. It includes also large dynamos, shafting, steel plates and lathes, showing that the immense order placed in Japan last December has been executed. A large part of this machinery will be used in the Government shipyards for rebuilding and repairing the injured Japanese and captured Russian war vessels." INDUSTRIAL PRESS ASSOCIATION.

THE MINNEAPOLIS TRADE.

Business is good, better than last year, and with excellent prospects for building, not only in the city, but in the country. We think without doubt there will be more building done in Minneapolis than ever before. Seeding—We quote from circular issued by one of the largest grain commission firms here, with offices throughout the principal cities in the North and Middle West. They state: "Wheat seeding is practically completed in Southern Minnesota and South Dakota; in North Dakota about 75 per cent. of the wheat land south of the Northern Pacific line has been seeded and about 40 to 50 per cent. has been completed in the Northern counties of North Dakota and in the Northwestern territory, and about 25 per cent. in Manitoba. The weather has been very favorable for seeding, though the ground has frozen every night and the seeders could not run more than half or three-quarters of the day. Increase in wheat acreage in this district will probably be about 10 to 15 per cent., with conditions generally favorable." The country tributary to Minneapolis is in good condition generally from the financial standpoint, and should there be no special disturbance occasioned by unusual dry or wet weather or from labor troubles, we can safely count on having exceedingly good business up to the first of July, any way. W. K. MORISON & CO.

TRADING STAMP COMPANY BANKRUPT.

The following from the New York *Sun* of April 21, needs no comment from the editor:

"A petition in bankruptcy was filed yesterday against the Benedict & Macfarlane Company, blue trading stamps, of 156 West Twenty-third Street, and of Chicago, by the following creditors: New York Desk and Dining-Room Furniture Company, $187; Herrmann Furniture and Plumbers' Cabinet Works, $31, and Lange & West, $472. It was alleged that the company is insolvent and admitted in writing on April 19 in a letter signed by Albert G. Thorne, secretary, its willingness to be adjudged bankrupt. Judge Holt, of the United States District Court, appointed Frederick A. Burlingame receiver with a bond of $10,000.

"It was stated in the petition that the business of the company partly consists in the redemption of trading stamps, large numbers of which are outstanding. It has a stock of goods from which the stamps have been redeemed, and if the redemption is permitted to continue a large part of the goods will be disposed of in favor of the stampholders, to the exclusion of the merchandise creditors, many of whom furnished the goods comprising the stock in the store at 156 West Twenty-third Street. The lease of this store runs out on May 8, the goods must be removed before that date, and the petitioning creditors believe that it will be to their interests to have the goods sold there at auction.

"The company was incorporated under the laws of this State on August 24, 1903, with a capital stock of $1,000,000. Harry L. Benedict became president and Francis H. Macfarlane vice-president. The company established agencies in Baltimore, Boston, Syracuse, Chicago, St. Louis, Denver, Milwaukee, Brooklyn and other cities, and made contracts with some of the large department stores. One of its large contracts with a store in this city terminated a few days ago and the news of this precipitated a run on the company's store in Twenty-third street on Wednesday for the redemption of stamps. In the trade it is said that the company's income in the past year has not kept pace with the extra expenditures made to increase its distributing connections. The liabilities are reported to be over $30,000.

"This is the second trading stamp company which has been petitioned into bankruptcy in this city."

OUR BRITISH LETTER.

(Continued from page 26.)

ELECTRICAL EXHIBITIONS.

Several electrical exhibitions are now being held in different parts of London, chiefly inaugurated by metropolitan councils. At these exhibitions demonstrations are being given of the advantages of electrical apparatus, and many manufacturers and others interested in the business are pointing out to consumers the numerous electrical appliances now on the market, by which domestic economy can be effected, and comfort and convenience of the household assured. Retail traders and manufacturers are also being educated to the employment of electric motor power. There are many uses for electric motors, some of which British ironmongers are recognizing. Motors are useful in an ironmonger's workshop where lathes and tin-working machines can be operated by a small motor. An electric motor is also a valuable accessory in or near an ironmonger's window, where it can be utilized to give motion to the numerous working models and mechanical devices by which smart advertising can be effected and business increased. An important electrical exhibition is to be held during the closing months of the year at Olympia, London, when it is expected that demonstrations of electrical appliances on a large scale will be made.

A NEW CEMETERY ENTRANCE.

The accompanying cut shows one of a number of new designs of Cemetery entrances built by the Enterprise Foundry and Fence Co., Indianapolis, Ind. The design shown herewith is constructed of wrought and cast iron. Arch is cast iron and the standards, scrolls and gate frames are made of wrought iron. Eight heavy cast iron anchors placed in concrete at a depth of 38 inches supplemented by individual brace rods constitute the foundation for

A NEW CEMETERY ENTRANCE.

this Arch. The wire shown in gates is made of two strands of No. 11 galvanized wire twisted together and woven into a fabric of attractive and artistic design. Dealers will find it to their interest to send for the handsome, new catalogue just issued by this firm as they are one of the few fence manufacturers who protect and assist the Hardwareman.

BOX STRAPS FOR THE HARDWARE TRADE.

The Standard Metal Strap Co., 336-342 East 38th Street, New York City, manufacture a line of box straps which have met with much favor, and we present on this page engravings of two styles which are especially suitable for the Hardware trade. These box straps are manufactured of iron or steel and are used for binding and strengthening, and at the same time effectively sealing cases, crates, barrels, etc. They are quickly applied by nailing and the security assured where they are used is worth many times their cost. The "Eclipse" box strap is made of soft

FIG. 1. "ECLIPSE" BOX STRAP.

steel and in one continuous length without rivets. The absence of rivets is a strong point in favor of this strapping. The embossing lends additional strength and protects the heads of the nails at the same time. Beside this, it centers the nails and prevents them from slipping while being hammered home. It is worthy of notice that the embossing does not in any way in-

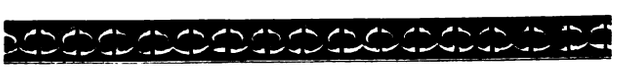

FIG. 2. "PREMIER" BOX STRAP.

terfere with the flexibility of the strap. The "Premier" Box Strap is another favorite with the Hardware trade and is largely called for where a very strong strapping is desired. It is a flat wire strap with holes at intervals of 4 inches, and lies close to the case. It is furnished in continuous lengths of 5,000 to 6,000 feet, in three different widths, or in cut lengths from four to twelve feet. The holes in the "Premier" Box Strap differ from others in that they are made by removing a small portion of the metal, which makes an opening that is uniformly clean cut and no longer than is absolutely necessary. The Standard Metal Strap Co. have a large factory and warerooms at their New York address, with agencies in San Francisco, Cal., and London, England.

A. J. Reach Company, Philadelphia, Pa., are offering to the trade for the season of 1905 their Trade Prices in a book designated "Spring and Summer Sports." This includes Baseball Accessories of every description. They carry in stock a complete line of everything listed in the catalogue, and can give you an assortment on a very small investment and show you a satisfactory profit. To further their sale, they will imprint with your name a quantity of above booklets, also furnish you with any electrotype free of charge, if you will carry a stock of the Reach goods, on all of which they make a very broad guarantee. The Reach Company also make an extensive line of goods for Fall and Winter Sports such as boxing gloves, striking bags and sundries, footballs and sundries, basketballs, medicine balls, hand balls and gloves, indoor baseballs and fencing goods. Send for catalogues.

Gifford-Wood Company, with shops at Arlington, Mass., and Hudson, N. Y., have recently distributed a catalogue of Summer Tools and Machinery, Wood's Ice Tools, Gifford's Ice Elevating —Conveying—Lowering Machinery, which they make. They also issue a complete Elevator and Ice Tool catalogue which they state will be mailed upon application. The catalogue of Summer tools includes such goods as hand plows, chisels, ice tongs from the family size to the largest ones for loading vessels, ice axes, chippers, picks, cleavers, saws, ice hooks, pocket ice apron, Crescent ice saw, Creaser ice breakers, scales, runs and skids, automatic air pressure and endless chain, lowering machines, etc. On the Creaser Ice Breakers they issue a special catalogue which they will be glad to send interested parties.

AMERICAN HOUSEKEEPING MACHINES AND FIXTURES IN GERMANY.

(From United States Consul-General Mason, Berlin, Germany.)

The attention of American manufacturers of improved house and hotel-keeping machines and appliances, such as meat cutters, carpet sweepers, egg beaters, etc., is invited to the fact that articles of this class are now very largely sold in Germany by department stores, of which there are three in Berlin and one or more in every large German city. It is fully recognized that in respect to these improved appliances, which go so far toward lightening the labor of housekeeping, Americans hold easily the first place for both the ingenuity and the number of their creations. Hitherto this class of goods has been principally imported into Germany by one or two large Hardware houses located at a German seaport and distributed thence to retailers; but the department stores have become such colossal concerns, with aggregate annual sales running into many millions of marks, that they feel entitled to derive their supplies of imported as well as domestic goods first hand. It is therefore suggested that American exporters of all housekeeping fixtures, as well as dried and preserved American fruits, would do well to send competent German-speaking salesmen with samples and catalogues, in which weights, dimensions, and values are given in metric and German units, to make a round of the German cities with special reference to supplying department and other large retail stores at first hand. This suggestion is made at the request of parties who are not only directly interested in the subject, but are thoroughly informed concerning it.

It should be borne in mind, however, that whenever possible every original and improved fixture of this kind should be protected by patent or trade-mark before being sold in Germany, or, indeed, in any foreign market, since Europeans have become very clever and prompt in imitating improvements from the United States, and the imitations are often sold as American-made goods.

RECENT TRADE PUBLICATIONS.

The Sill Pneumatic Horse Collar Co., 313-315 East Front Street, Bloomington, Ill., have recently issued a pamphlet catalogue, illustrating and describing their desirable Pneumatic Horse Collar, which is built on strictly humane principles and will adjust itself to any shoulder and any tender shouldered colt or horse can wear it without the possibility of a bruise or gall. The rubber tube is covered with a water-proof canvas bag which takes all the strain from the rubber and leather and gives the rubber double protection against any foreign substance that might deteriorate or shorten its life. The air tube is continuous and forms a cushion on top of neck same as on the side. The metal side of the collar is made of high grade sheet steel properly tempered, and is fastened with a heavy invisible spring at the bottom. This collar is very simple in its construction, and can be taken apart and put together in a few minutes. For illustrations, prices, etc., send for catalogue.

The Gendron Wheel Co., Toledo, Ohio, are distributing an attractive pamphlet catalogue exploiting the easy running Gendron and Reliance bicycles, which they illustrate and list. They state: "With the very best equipment in the way of tires, saddle, pedals and chain, our bicycles are sold under the Gendron name-plate; with the cheaper equipment, under the Reliance name-plate. Recognizing the universal popularity of the Kelly handle bar we are this year furnishing it regular on the Reliance bicycles as well as on the Gendron. Our line of saddles will meet every possible demand. In the matter of tires, in addition to giving an option on the leading brands, we will continue to furnish a tire made especially for us under our own brand, the "Reliance" tire, which has given us the best of satisfaction for the past four seasons. As to pedals, we are using what we know to be right from past experience. We will continue to use the Diamond chain, the world's best." For information regarding construction, etc., also the "Pioneer" line of children's vehicles, write for catalogue.

TRADE NOTES.

Pullman, Wash.—C. E. Clure has purchased the interest of W. D. Outman in the Stewart-Outman Hardware Co.

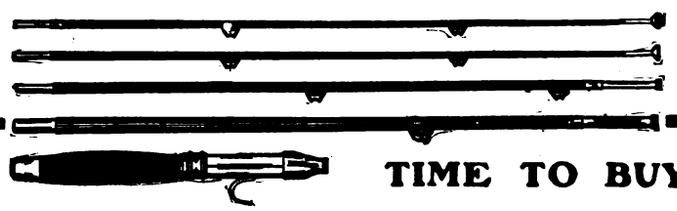
Ravenna, Neb.—O. L. Miller has purchased the Hardware and furniture business of A. Wilke.

Reece, Kan.—John Thapp has purchased the Hardware business of W. T. Coast.

Salem, Mass.—The Dane-Smith Co. has bought the Woodward & Ober Hardware stock at Beverly. It will sell the stock and fixtures at the Woodward & Ober store, Cabot Street, Beverly, as soon as the goods can be marked.

Sparta, Tenn.—Thomas H. Mason has purchased the Hardware business of R. P. Biles.

Spencer, Okla.—Lee Thomas has purchased the Hardware and implement stock of J. H. Stoptaugh.



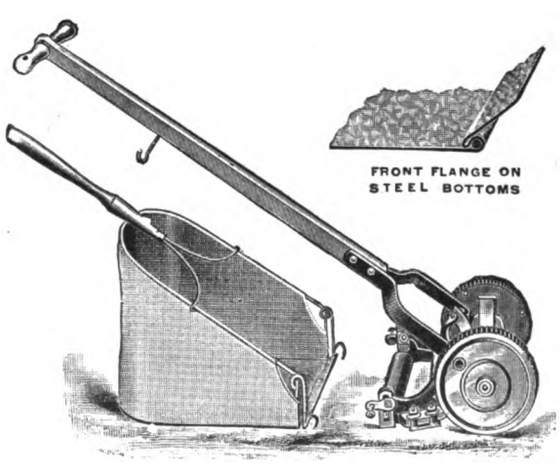
Terrell, Tex.—J. H. Klutts has sold his stock of Hardware to S. C. Clyette and Henry Anderson, who will continue the business under the firm name of Clyette & Anderson.

Troy, Texas.—Winfroe Bros. have purchased the Hardware business of J. Q. Thompson.

Washington, Ill.—The Hardware store of S. C. Zinser & Co., has been sold to Peter Strubbar and Henry Bishop of that place. Mr. Zinser has been in the business over thirty-five years.

Logansport, Ind.—The stock of the Miskimen Furnace Co. has been purchased by Ferd Graas and Fred Drompp and will be run under the name of the Logansport Furnace Co., and will be put in shape at once. Henry Grah, assisted by his son, Otto, will manage the new concern.

Minatown, Ohio.—The Delk Handle Factory has been shut down for some time for the purpose of putting in new machinery. The company owning the plant will make long handles for forks and shovels in addition to those now manufactured, and will also make hatchet and hammer handles.



TIME TO BUY

FISHING TACKLE

is right now. We are manufacturers and know the kinds used in different parts of the country—we can help the Dealer in deciding on the right goods for his trade, and furthermore we can save the d aler money.

Chicago, Ill.—Tyble Bros. & Co. has been incorporated to deal in sporting goods. Incorporators: Edward Weltman, G. A. Bruck, F. J. Noonan; capital, $10,000.

Corning, N. Y.—The Shepherd, Rose & Conover Co. has been incorporated. The company is to do a gas fitting and general sporting goods business. Its capital stock is $1,200. The directors named are: John J. Shepherd, Luman S. Conover and Charles E. Rose, all of Corning. The Shepherd, Rose & Conover Co. has been established and doing business in Corning for some months. Its store is located at 109 Bridge Street. The stock carried is far above that of its capitalization. The company was incorporated to facilitate the business arrangement of the partners.

Detroit, Mich.—The Detroit Rifle Co. has been incorporated for the manufacture and sale of firearms and air rifles, as well as metal and wood novelties. The capital stock is $30,000. The incorporators are: F. C. Trowbridge, J. H. Coe, both of Detroit, and N. F. and W. C. Stevens, of Ann Arbor.

Elmira, N. Y.—The Daggett-Woodside Co. has been incorporated to manufacture pictures, frames, photo supplies, etc.; capital, $10,000. Incorporators: Herbert M. Daggett, Samuel C. Woodside, Elmira; Allen F. DeCamp, Northport.

Hartford, Conn.—The Harris Parker Co. has been incorporated. The company is organized with an authorized capital stock of $25,000. Its purposes are to deal in, make and repair toys, sporting goods and novelties, also machine products and merchandise of every description. The incorporators are: Harris Parker, of New Rochelle, N. Y.; Lucius F. Robinson and Ralph O. Wells, of this city.

Indianapolis, Ind.—L. M. Wainwright, E. C. Dunmeyer, H. B. Hibben, C. E. Coffin and O. B. Jamison, all of Indianapolis, Ind., have incorporated the Diamond Chain and Manufacturing Co., with $400,000 stock, to take over the chain factory which was formerly one of the six plants of the Federal Manufacturing Co. The management will be in the hands of Mr. Wainwright, the president, who has for the past five years operated the plant for the trust.

Melrose Highlands, Mass.—John Spear; new store.

Melrose, Mass.—United States Cartridge Co. has been incorporated to deal in gunpowder, etc.; capital, $400,000 President, Frank L. Washburn, Melrose, Mass.; treasurer and clerk, Paul Butler, Lowell, Mass.

Merrimac, Conn.—Alec. Frazer has opened a Bicycle and repair shop on Main Street for the Summer season.

Morristown, N. J.—W. H. Dutton & Co., incorporated; capital, $20,000.

Milford, Conn.—Dr. J. H. Barnes has opened up a complete line of sporting goods.

Painesville, Ohio.—George T. Searle will be at the head of the Sporting Goods department of the new firm of Searle & Grank. The stock will comprise a full line of all sporting goods.

Paterson, N. J.—Andrew Kinloch; new store at 272 Straight Street.

South Bend, Ind.—Shidler Bros., owning one of the largest and most complete Hardware stores in Indiana and long identified with the sporting goods trade of South Bend, have associated themselves with the Worden Buck Tail Bait Co., of that city. Articles of incorporation have been filed and the concern is to be known as the Worden Buck Tail Manufacturing Co.; capital stock, $5,000, fully paid. F. G. Worden is president, and J. W. Shidler secretary-treasurer. A. N. Shidler, president of the Indiana State Hardware Dealers' Association, is a director, as is also M. T. Worden. The company will manufacture the Worden buck tail baits, weedless hooks, wooden minnows, etc., and will not sell to catalogue premium houses.

South Hanover, Mass.—M. E. Morse; new store.

Sterling, Ill.—M. H. Flock will enter the automobile and launch business on an extensive scale in the near future and is now making plans for it. He has secured the agency of several of the best makes of automobiles and launches. In addition to the above he will carry a full line of sporting goods and supplies.

St. Louis, Mo.—Seydel Gun Co. has been incorporated; capital stock, $5,000, full paid. Incorporators: Martin C. Seydel, George A. Meyer, Oscar J. Grundhofer.

Changes.

Akron, Ohio.—The Swinehart Clincher Tire and Rubber Co. has taken possession of its new building on North Howard Street, recently purchased from the owners of the Rubber Specialty Co., for $40,000. At the outset the company expects to employ from 100 to 200 men and increase that number as the demand increases.

Baltimore, Md.—A five-story pressed brick warehouse, 69x80 feet ground space, is building in Baltimore, Md., for occupancy by the United States Rubber Co.

Bartow, Fla.—D. C. Clement, who conducted a Bicycle shop at Tiger Bay, has sold out and has removed to this town.

Burlington, Iowa.—John Sheagren; removed to 622 Jefferson Street.

Corning, N. Y.—C. A. Burdette has consolidated his bicycle business with the sporting goods stock he recently purchased of William F. Rewalt.

Fall River, Mass.—W. D. Wilmot, dealer in Sporting Goods and Talking Machines, has opened a branch store in Flint Village, at the corner of Flint and Pleasant Streets.

Gloucester, Mass.—Perkins & Corliss have removed to the Wonson Building, on Central Street.

Goshen, N. Y.—S. C. Wood; removed to Weed Building.

Lawrence, Mass.—L. J. Tepper; removed to 314 Common Street.

Leominster, Mass.—The Pentucket Bicycle Co., reopened store.

Mariette, Ohio.—Anderson Brothers, dealers in Automobiles and Bicycles, on lower Front Street, have recently installed in their shops a complete electric charging plant consisting of a 10-horse power motor and dynamo to be used in charging electric motor cars and manufacturing their own electricity.

Middletown, Conn.—Briggs & Treadwell (not William Briggs); new store at 122 College Street.

New York, N. Y.—It is announced that Schoverling & Welles are negotiating for a site for an ammunition manufacturing plant at Newport, Va.

Toronto, Ont.—The shareholders of the Canada Cycle and Motor Co. have approved of a by-law providing for the reorganization of the company and the reduction of the capital to $800,000.

Walla Walla, Wash.—George Burnison has purchased the bankrupt Sporting Goods and Bicycle stock of H. O. Peck and will continue the business.

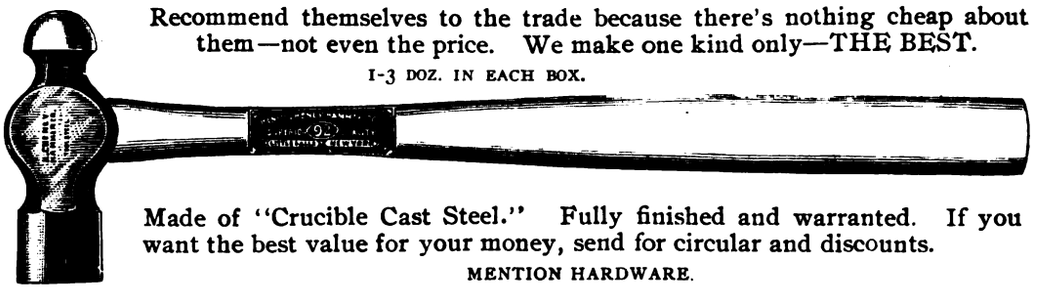
Weston, Mass.—Sidney & Leon Bolster; opened repair shop.

Williamsport, Pa.—W. R. Watson, removed from 506 Fifth Avenue to 335 Williams Street.

Woonsocket, R. I.—Charles A. Proulx, reopening store and repair shop in the American Block.

Miscellaneous.

Hartford, Conn.—At the annual meeting of the Colt's Patent Firearms Manufacturing Co. on April 1st the following officers and directors were chosen: Directors: W. C. Skinner, C. A. Morris, F. A. Schirmer, C. F. A. Clark and L. C. Grover. President, L. C. Grover; vice-president, W. C. Skinner; treasurer, F. A. Schirmer; secretary, A. L. Ulrich.



Norwich, Conn.—At the recent annual meeting of the Davenport Arms Co., M. M. Whittemore, of New Haven, was chosen president; Gardiner Hall, Jr., South Willinton, vice-president; H. H. Gallup, Norwich, treasurer, and W. C. Davenport, secretary and manager.

New York, N. Y.—Landers, Frary & Clark, of New Britain, Conn., whose local offices and showrooms have been in 82 Chambers Street for a number of years, have leased an entire floor in the Vincent Building, corner Broadway and Duane Street, two blocks from their present location, and will remove there about May 1.

Princeton, Ill.—Theodore Starks, formerly trade manager for the Moline Plow Co., and later connected with the Racine-Sattley Co., of Racine, Wis., and Springfield, Ill., has purchased an interest in the Evans-Coppins Manufacturing Co., manufacturers of ball-bearing axles and quick-shifting shaft couplers at Princeton, Ill. An application has been made for permission to change the name of the corporation to the Evans, Coppins & Stark Co.

TRADE NOTES.

Grand Rapids, Mich.—The Lumbermen's Tool Co. has increased its capital stock from $50,000 to $75,000.

Hartford, Conn.—The Hartford Machine Screw Co.'s business and plants in Hartford, Conn., and in Elyria, Ohio, have been sold to the Standard Screw Co., of Detroit, Mich. The Hartford concern is capitalized at $500,000, and it is understood that the sale price approaches $1,000,000.

Hutchinson, Kan.—Nelson Bros., the Hardware and steel tank men, have started on the construction of a building 62x150 feet in size, on First avenue. It will extend from First avenue almost to the right-of-way of the Santa Fe road and a side track will be built in for handling car-load lots of Hardware and steel tanks.

Monessen, Pa.—Additions to the Page Wire Fence Co. have been started. The addition will be a steel and brick structure, 63 feet wide and 170 feet long, and will be three stories high. The company has just completed a new office and storeroom building. The addition now ordered will be for the establishment of an entirely new business. It will be the manufacture of wire rope, spring steel and wire cables. Some time ago the company bought a small plant near Chicago which manufactured these products. This plant and 150 workmen employed in it are being moved to Monessen for the purpose of concentrating the business.

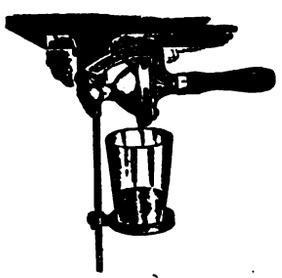
Morgantown, W. Va.—The plant and assets of the Morgantown Tin Plate Co. were sold at public auction under a decree of the bankruptcy court to John G. Frazer, Pittsburg, for $154,100.

Montezuma, Iowa.—C. W. Laing, of the firm of Laing & Pierce, has purchased his partners interest in the Hardware business. Mr. Laing will continue the business.

Muscatine, Iowa.—Geo. B. Fisch has sold his business to the Muscatine Hardware Company.

Muskegon, Mich.—Alexander Van Zauten has purchased the Hardware business of Derk Vanderstelt on McKinney Avenue, at Muskegon Heights.

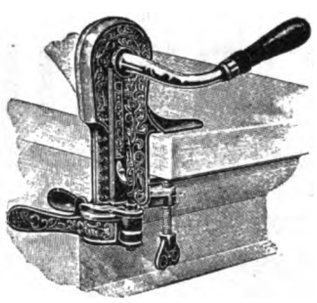
Ozark, Mo.—Seymour Chapman has sold his interest in the Garrison Hardware Co. to Jesse Garrison.



Paradise, Mo.—C. L. Douglas has sold his Hardware business to J. L. Benson.

Philadelphia, Pa.—Howard E. Coleman has withdrawn from the firm of Matlack, Coleman & Co., Hardware dealers, at 203 Market Street. The firm's name has been changed to Matlack, Kern & Co. It will continue business at the same address. Paul Matlack and Augustus M. Kern are the present firm members.

REACH OUT



DON'T be satisfied with your trade as it stands to-day. No matter how extensive it may be there is always more business within your reach, which can be developed by proper cultivation.

PRICES CURRENT

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

DEALERS

Throw your line among fishermen and you'll get a **strike**—with a rush for the goods—if it's the general line of

Pflueger's Fine Fishing Tackle

made only by the

ENTERPRISE MFG. CO.

Twenty-five years' experience, combined with the largest manufacturing facilities in this country, enable us to produce a superior line of fishing tackle that fishermen insist on having.

Hooks, Flies, Trolls, Spinners, Phantoms, Reels, Furnished Lines, everything in fishing tackle, packed for effective display—best selling line you can carry.

PFLUEGER'S PATENTED "REVERSIBLE HINGE" INSURES FREE SPINNING AND PREVENTS BENDING OR BREAKING

NOTICE

Free to any dealer in SPORTING GOODS, sent express prepaid, 155 page illustrated catalogue No. F23, Metal Fish Sign and Window Transparency in eight color lithograph.

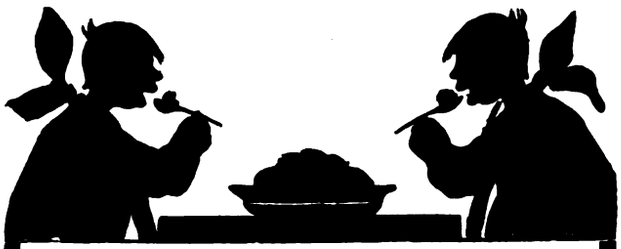
The ENTERPRISE MFG. CO.

Akron, Ohio, U. S. A.

A Better Location Than Yours

would be in Virginia, the Carolinas, Georgia, Florida or Alabama, and the special Southern edition of the Seaboard Air Line Magazine will convince you. It contains specific opportunities, and lists of orange groves, pine apple plantations, farm, fruit and truck lands.

"Picturesque Florida" containing over a hundred full page photogravures illustrating typical scenes, but containing no reading matter or advertising, together with other literature sent on receipt of ten cents to pay postage.



J. W. WHITE,

General Industrial Agent,

Seaboard Air Line Railway,

Portsmouth, Virginia.

We have a good location for your plant.

"The Proof of the Pudding Is the Eating"

That's exactly the case with

L & G 800 Butcher Knives

They are made of special steel, carefully hammered and finely tempered.

Every Blade Warranted

We've made them ever since 1837.

Sixty Eight Years On the Market

Our Butcher Knives, like the rest of our line of

Fine Table Cutlery

have "improved with age." There's nothing like them on the market. They can't be beat in quality nor price.

Get a copy of our catalog— Make up a sample order and we feel confident you will send us many duplicate orders.

Don't delay— Write to-day.

Lamson & Goodnow Mfg. Co.

TRADE "NONE BETTER" MARK

McKINNEY MANUFACTURING CO.,
ALLEGHENY, PA.

Manufacturers of the Well Known Brand of

STRAP, T and BUTT HINGES,
BARN DOOR HANGERS and TRACK.

OUR **Wire Straightening and Cutting Machinery** and **Riveters** are the original and standard machines improved, and are guaranteed in every respect. Design and workmanship the best; quantity and quality of production unequaled.

Special Automatic Machinery

We have large and varied experience in designing and building special automatic machinery. All our construction is substantial, combining speed and simplicity, securing the minimum expense for operation and repairs.

We have innumerable drawings and patterns, some of which might be adapted to your needs.

APPLE PARERS

Our experience of more than forty years in the manufacture and sale of Parers, has taught us that no machine, that is not durable, that is not easy of operation and does not do good work, is satisfactory to the public.

We believe the **TURN TABLE PARER** is the most durable machine of its class, is the easiest and lightest running parer made, and does as good work as any higher priced machine on earth. The arrangement for pushing off the apple is perfect.

For these substantial reasons, orders are solicited.

CHATILLON SPRING SCALES.

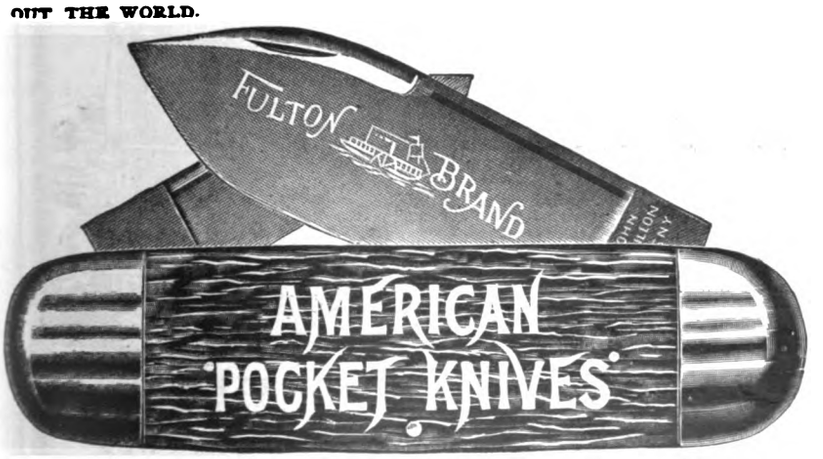
OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York. U.S.A.

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.



These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. DO YOU WANT A NEW PARTNER?

Warren's TWELVE Silent Salesmen. Required TWELVE Years to Perfect. Will Work TWELVE Hours Every Day. For TWELVE Years to Come. After First TWELVE Months—for Nothing.

THIS IS ONE OF THEM.

No. 3042—Combination (see cut) consists of 3 Warren Cabinets and Bases forming a length of 25 ft. 6 in., height 7 ft. 1½ in., Cabinets, 15⅛ in. deep; Bases 30 in. deep from front to back. Approximate weight 3,210 lbs.

Shipped to all parts of the world as safely and at as reasonable rates as other lines.

That we might learn the opinion of customers using our fixtures, we sent a circular letter to every firm having purchased them since the beginning, reaching stores in large cities, county seats and sequestered communities, the average of all replies gave the following very gratifying results:

Increased Sales.....25 per cent. Goods Saved from being Misplaced and Lost Track of.....30 per cent. Customers Preferring it to the Old Way...99 per cent.
Less Capital Required.....25 " Time Saved in Serving Customers.....35 " Number of Months in Which Its Advantages Will Pay for Itself.....11 7-12 months.
Goods Saved From Injury.....33 "

Many firms have said "We firmly believe the actual cost of the Warren Shelving bought was only the interest on the amount of the Invoice for one year and nominal cost of freight and installing." *Write at once for No. 120-b, illustrating the twelve.*

HARDWARE

Surpless, Dunn & Co., owing to the great increase of business with which they have been continually favored during recent years, have been compelled to secure more commodious quarters. On May 1st they removed to 74-76 Murray Street, largely increasing their facilities for doing business. Their Western branch is located at 68-70 South Canal Street, Chicago, Ill.

♣

J. C. Paul & Co., 79 Dearborn Street, Chicago, Ill., Eastern office, Paul N. Friedlander, 320 Pearl Street, New York, are the sole manufacturers of a Metal Polish Compound which is being marketed under the name of the "Auto Shine." It is a quick and lasting polish, with none of the usual faults connected with such compounds; the makers state it does not contain naphtha or gasoline, no inflammable oils or dangerous and ill-smelling ingredients. It is put up in convenient form, which includes half-pint, one pint, one quart and one gallon cans, and will be sold f.o.b. Chicago or New York.

♣

The firm of Poundstone-Refior Hardware Co., having dissolved partnership on the first day of May, 1905, by mutual consent, David Refior, who for nine years has been a member of the said firm of Poundstone-Refior Hardware Co., and Jacob Barr, Jr., have formed a partnership to carry on the business of Hardware, farm machinery, stoves, ranges, and, in general, a business similar to that heretofore conducted by Poundstone-Refior Hardware Co., under the firm name of Refior-Barr Co., at 117 W. Main Street and 116 Mill Street, Ottawa, Ill.

♣

The annual meeting of the Texas Hardware Jobbers Association adjourned April 21st after having elected the following officers for the ensuing year: James Moroney, President; R. H. Brooks, first vice-president; A. C. Goethe, second vice-president; P. F. Bell, secretary and treasurer. Executive Committee: Ed. S. Hughes, chairman; Charles Nash, F. A. Heitman, J. L. Taylor. The next place of holding the annual meeting was left with the executive committee. The meeting was well attended and considerable interest manifested by those who were present.

♣

Merchant & Evans Co., 517 Arch Street, Philadelphia, Pa., Manufacturers, Importers and Jobbers of Tin and Terne Plates and domestic and foreign metals generally, announced that it has purchased from Merchant & Company, Inc., all its property and assets, and assumed all its debts and liabilities. Powell Evans, who was vice-president for a number of years, and president for the past year of Merchant & Co., Inc., with full knowledge of its business and methods, is president of the new company, and solicits a continuation of all present associations for the new company, giving his assurance of prompt and efficient service in all future transactions. The old organization and personnel remain with the new company unchanged.

♣

Frederick Pfeifer, manufacturers' agent, 88 Chambers Street, New York, has removed to new quarters at 101 Reade Street. Mr. Pfeifer is agent for, and deals largely in the special lines of the Payson Manufacturing Company, Chicago, among which are Signal Sash Locks, Transom Lifters, Casters and Spring Hinges. He has also bought the stock and patent rights of the Johnston Pipe Wrench, formerly owned by W. B. Volger. This wrench is now used by a number of the leading trunk line railroads having terminals in New York.

♣

R. Christensen, who for over twenty years has successfully dealt in Cabinet and Upholsterers' Hardware, the greater part of the time at 88-90 Chambers Street, New York, will on or about May 1st remove from his old quarters to a new location at 54 Warren Street, where he has secured the entire store floor 25x100 feet, formerly occupied by the American Whip Export Co.

M. HARTLEY CO. DISCONTINUES DOMESTIC JOBBING.

M. Hartley Company, 313-315 Broadway, New York, announce under date of May 1, that it has discontinued the general jobbing business (domestic) in firearms, ammunition and sporting goods; confining themselves entirely to its export business in above lines. They will continue to act as the sole representatives and selling agent of the Union Metallic Cartridge Company, Bridgeport, Conn., the Remington Arms Company of Ilion, N. Y., and the Bridgeport Gun Implement Company of Bridgeport, Conn.

DIXON CRUCIBLE MEETING.

Old Board of Directors and Officers Re-elected.

At the annual meeting of the stockholders of the Joseph Dixon Crucible Company the old board, consisting of Edward F. C. Young, John A. Walker, Edward L. Young, William Murray, George T. Smith, Joseph D. Bedle and George E. Long, was unanimously re-elected. The board of directors re-elected the former officers, namely, Edward F. C. Young, president; John A. Walker, vice-president and treasurer; George E. Long, secretary. Judge Joseph D. Bedle was also re-elected as counsel. The stockholders present expressed themselves as thoroughly satisfied with the management of the company by its officers.

Of the total number, 7,345 shares, there were represented 7,145 shares.

A FERTILE INVENTOR OF PUMPS AND ACCESSORIES.

During the existence of the Patent Office, many thousands of patents have been granted to busy inventors all over the country. Many of these have been of immeasurable value to the general public, and have brought the fortunate inventors fame and riches. Pumps and kindred appliances have been a prolific field for the inventor. P. A. Myers, of F. E. Myers & Bro., Ashland, Ohio, manufacturers of the Myers pumps and hay tools, has been notified by the Patent Office of the granting of patent, No. 787,462, under date of April 18th, 1905, for an improvement in Pump Jacks. This patent covers an attachment for use in connection with the ordinary pump, such as is usually operated by hand and windmill. In most sections of the country reliance is placed upon the windmill as a motive power but at certain seasons of the year extended periods of calm occur, making this power unavailable. This invention provides for the operation of the pump during such periods by gasoline engine, horse power, etc. The Pump Jack devised by Mr. Myers is one that can readily be attached to any windmill pump and power transmitted to it by means of belt, etc. The device thus permits of the operation of the pump by hand, windmill or belt power. The Pump Jack is comparatively inexpensive and meets the requirements of the general consumer.

HELPING THE DEALER.

In the matter of assisting the retail Hardware Dealer to sell goods, the J. Stevens Arms & Tool Company, Chicopee Falls, Mass., is particularly well known. One of their latest novelties is the "Stevens Part Envelope," which are furnished free to retail dealers, imprinted with their firm name and address, and with some cleverly written "Steven's" advertising. The envelopes are made of a durable Manilla paper, good stock, open at the upper end, with gummed flaps. They are useful for sending out small parts, etc. The Stevens abridged catalogue is also of much assistance to the retail merchant. This can be ordered in lots of 250, 500 or 1,000, with the dealer's name printed on the front cover, the only cost to the Hardwareman being the transportation. This catalogue consists of 24 pages and cover, in two colors and first quality of white paper. It is in size 6x3½ inches, making them convenient for enclosing in mail, and also handy for individual distribution among customers who call at the store. The advertising department of the Stevens Company also assists the dealer with specimen advertisements, circular matter, electrotypes, signs, etc.

CAUTION TO PURCHASERS OF SAVAGE RIFLES.

We find a few Savage rifles are being offered by certain catalogue houses who are not customers of ours, at prices, which at a glance, seem cheaper than our regular schedule, but investigation shows that the rifles they are delivering have been altered since leaving the factory, including changing or obliterating the serial numbers, which are stamped on every genuine Savage rifle. As it is impossible for us to ascertain to what extent these rifles have been used or altered and probably injured, we take this opportunity of advising the public that we assume no responsibility whatsoever for any rifles on which the serial number has been obliterated or changed in any way. For your own protection refuse to accept rifles tendered you as above described. Your dealer can give you lowest prices on genuine Savage rifles which carry with them an honest guarantee. If your dealer won't accommodate you, write us direct.

MAY 10, 1905.

Editorial Trade Review

Trade continues evenly promising in volume, so much so, that when comparison is made with the Spring of 1904, when the high tide of business was especially memorable, it does not suffer at all by the comparison, but shows the most encouraging results. There are few lines in which this trend in trade is not developed, and a wide assortment is everywhere apparent in the wants of the dealers, showing the presence of enterprise in the general extension of the business interests to be catered to.

Especially is this true of Builders' Hardware. Business prospects in this line are largely on the increase, as are shown by the statistics regarding the amount of building already planned and promoted; with a promise that will make this year, with ordinary attention, show as great an element of prosperity in this respect as would naturally raise the sanguine hopes of the projectors.

The conditions surrounding this branch of the business do not suffer in the least by apprehension of labor troubles retarding the successful movement, such as we have had in the few years back when strikes and misunderstandings affected the whole industry, and for months the largest buildings in course of construction stood at a standstill, and ruffled the serenity of the immediate future, so that one could not figure a month ahead. Any general disturbance of sufficient magnitude is not anticipated, as it would require too much of an effort to get it up. The workmen are fortunately blessed with vivid recollections of past disturbances, that were hopelessly filled with bitter experience.

Manufacturers' raw materials have been held at a stiff market, with quotations ruling at prices firm and unyielding; this, with a labor market that has held up firmly for promised advances which, in many lines, have been made, has had a general effect upon other forms of manufacturing. Advances in prices would have taken place more generally were it not the manufacturers have heaped up more of a surplus stock, and are able to supply their goods more promptly than has been customary during the last year or two. They would rather suffer from a slightly diminished scale of profits than unsettle the markets on some staple line of goods, that would serve only to cut down the orders, which have been excellent. Values on the average, as affecting a general stock, are suffering no deterioration by comparison. Price cutting for the present season has so far had no necessity confronting the trade, and is less frequently resorted to than usual. The month of April will stand out for the year 1905 as having been a record breaker for the volume of goods disposed of.

The collections are reported as not having been quite up to standard so far as heard from this season; but, as that is noticeable only after the long Winter we had, in which the activity of a collecting movement was not paid particular attention to, greater hopefulness prevails, especially as the retail trade is now realizing on the proceeds of a Spring production, which promises generous proportions.

GOING TO HOT SPRINGS?

Applications for space in HARDWARE'S Special Train to Hot Springs are coming in at a rate that indicates the party will be a large one and made up of congenial people.

Those who intend making the trip and who have not asked for space in the train should get on the list as early as possible, as, of course, reservations will be made in the order of their arrival at this office.

The manager of HARDWARE will be glad to furnish any information desired concerning the trip of the convention.

THE NIMBLE PENNY.

Quite a common error with the small retailer, particularly the young retailer, is taking too liberal advantage of quantity prices. The extra discount on a big order in one line is a big temptation, but it is the nimble penny that catches the money. Many a store and many a business is loaded down with these same large orders, bought at a big discount and kept at a great expense of tied-up capital while they are being unloaded. It costs less freight, but the interest on the money invested is more than enough to cover the extra freight. Freight only has to be paid once, while interest is a constant expense, whether it applies to tied-up or to borrowed capital. How many men have seen opportunities of some special nature escape that they would most gladly have embraced if they had felt able to afford it; opportunities that only required perhaps a small part of the idle capital represented by many an unwise purchase!

One fact, like the beggars, we have always with us; that some unwise purchases will surely be made. The best of buyers have often to regret their liberality in some direction; seldom is any buyer worthy of the name called on to seriously regret his parsimony. Big discounts are a fine thing for those who can afford them, but let the little fellow rather aim to keep his capital rolling over so actively that it will earn him greater interest than the discounts represent. It can be done. Why not do it?

DEATH OF VIRGIL P. HUMASON.

Virgil P. Humason, treasurer of the Humason & Beckley Manufacturing Co., New Britain, Conn., died at Yonkers, N. Y., Saturday, May 6th, of heart failure. He was born on February 14th, 1847, at Simsbury, Conn. He was the son of William L. Humason, Sr., the founder of the business, which through several changes was incorporated in 1863 as the Humason & Beckley Manufacturing Co., their product consisting of Builders' and Miscellaneous Hardware, such as hammers, wrought iron and bright wire goods, bolts, corkscrews and the balance of pocket cutlery, the manufacture of which was commenced soon after the formation of the company in 1863. The reputation of these goods has long been established, and is well known. In 1866 Virgil P. Humason was made treasurer of the company, and on January 1st, 1871, took charge of the New York office. He was a graduate from the New Britain High school in 1863, and from the Eagleswood Military Academy in 1866, where he was the valedictorian of his class. In 1875 while still in business he commenced the study of law, devoting his leisure time to it, and in 1878 graduated with honors at the Law School of the University of the City of New York, and was admitted to the bar as attorney and counsellor-at-law on May 15th, 1878. Mr. Humason was well and favorably known to the Hardware trade from his long connection with the company. He was a man of generous impulses and steadfast convictions which endeared him to his many friends, who will mourn his loss while yet apparently in his robust manhood.

TALKS WITH RETAILERS

By AMOS

The old adage to the effect that what is food for one man is poison for another seems to be true in the handling of Catalogue House Competition in the Hardware trade. In the following are given the plans of two firms, one in Indiana, the other in Wisconsin; both are within easy reach of the two largest Catalogue Houses, and it would seem that in both cases the same conditions would obtain. However, experience seems to prove the opposite, as both concerns have succeeded in materially reducing the business of Catalogue Houses in their localities by working entirely different plans. One concern goes on a still hunt with special brands, the other goes at it hammer and tongs style with plenty of printers ink.

The Indiana firm writes:

"We have your favor in regard to what we are doing to counteract Catalogue House Competition in our section. We thank you for an opportunity to express ourselves along this line and if we say anything that will be of benefit to a brother dealer who wants to care for his interests along this line we will certainly be glad of it.

"The Catalogue House Competition in our particular section and in the particular locality from which we draw our trade is very strong. We hear from the Catalogue House almost daily and have many times wondered what we could do to stop the business they were getting from us. We read the trade papers carefully and did not find a plan that would do us much good. The ones suggested by other dealers in different parts of the country may have suited their needs and may have been successful, but they would not work for us. We are now glad to say that the Catalogue House Competition is growing weaker and we feel that we are coming out on top and we believe that our victory is the result of a 'still fight.'

"Early in the game we saw that it did no good to fight these fellows too hard and that every time we spoke of the Mail Order Houses it only served to increase their business and advertise them that much. It would give the customer the idea that the Mail Order people had us on the run and that we were fearful of them.

"After studying over the different plans we decided to try one that we had never heard of and one that we thought would do some good. Whenever we got out of goods that were listed in the catalogues of the mail order houses we never rebought, but got a substitute under a special brand. We talked these goods, advertised them, guaranteed them and in every way talked our goods and let the Catalogue House blow their own horns for we had concluded that if 'you would give the calf plenty of rope that it would break it's own neck.' To-day we do not have on our shelves many of the old time brands of cutlery and mechanic's tools, but we are handling a special brand of tools and cutlery and with them we are meeting success.

WE HAVE BUILT UP A GOOD TRADE.—

even better than we had before—and we do not have the prices put on them by our customers or by the Catalogue Houses.

"We feel that a good many dealers have a wrong idea about the Catalogue House question. We feel that it is not a question for the dealers to decide, but it is a question for the manufacturers and jobbers to handle and settle for the dealers. So long as the manufacturers and jobbers supply these houses, and at a lower price than they do the retailers, just that long will they harrass the Hardware dealer. If the dealers will positively refuse to handle lines that are handled by the Catalogue Houses it will not be long until we will see the various lines of dependable goods which can be obtained from them begin to disappear from their catalogues. This may not be true of any other locality or of any other dealers, but as we said in the beginning we are giving our experience and we are telling what we have done and what has been good for us. Different localities like different individuals need different medicine and different directions for taking it. About the only thing we can say to the Hardware trade as a whole is to keep cool, use good judgment and let local conditions govern actions."

* * *

The Wisconsin firm states its case in the following:

"Replying to yours of the 14th ult. would say that in order to compete successfully with the Catalogue Houses, the dealer must advertise. It will not suffice for a dealer to rely on sympathy or harping on his wrongs to his customers who as a rule lend him but an unwilling ear, and really have a better opinion of the price making power of the Catalogue House. We have in our ads. always laid great stress on our claim of being able to meet Catalogue House prices. We enclose a copy of one of our ads., which speaks for itself. Another thing very important is for the dealer to keep his stock up and well assorted, when as a rule with prices right and a good assortment, he has the 'long suit' over a store in a distant city. In many small towns the consumer is compelled to send away for a great many articles which ought to be found on the local dealers shelves, who loses the chance to earn many a profit that is otherwise lost and relies for his living on the profit—derived from selling grindstones, nails, etc., goods that the catalogue houses are not anxious to sell."

We reproduce herewith a portion of one of this firm's newspaper advertisements. It speaks right out from the shoulder and while it no doubt advertises the competition in a certain measure it does it in a way that should bring the business into the local store.

In the following letter from a Michigan Hardwareman, is a suggestion that manufacturers give more attention to supplying the retail dealers with good advertising matter for distribution among customers. The Michigan letter reads as follows:

"You ask 'What are we doing to counteract catalogue house competition.' We will put up our hands and plead guilty. We have read many good arguments brought out in trade papers concerning this subject and feel that those interested are doing a lot of good work.

"We have kept the latest catalogues of the two leading catalogue houses, and have always endeavored not to let any business go to them if in our power to prevent. Otherwise we have remained silent.

"Through a very liberal offer from the Michigan Stove Co., we are placed in a position to get a little magazine, "Home Enterprise." Its arguments cannot help but convince most of people that it is greatly for their interest to confine their purchases with their home dealers.

"We are taking the matter up with the Retail Grocers' Association, of this place, and expect to place one of these magazines in every home in this vicinity. The expense to each dealer will be nominal, and if dealers in every town and city in the United States would take up the same work, the results would be wonderful."

* * *

The writer of the following (a manufacturer) desires his name withheld, to our regret:

"We were requested by some of the large jobbing trade and a great many of the retailers to place ourselves on record as to

OUR ATTITUDE TO THE CATALOGUE HOUSES.

We had been selling them some goods. However we decided to discontinue selling them any goods whatever and advised not only the jobbers but the retailers to this effect. From the agitation that was raised on this question by both the jobber and retailer we took it for granted that the agitation was in good faith and that these jobbers and retailers would act with the manufacturers to act with them, but we have been very much disappointed in this. We supposed of course that if these dealers expected the manufacturers to discontinue the sale of their goods to the catalogue houses that they must of course expect themselves to discontinue handling those goods which were openly sold by the manufacturer to the catalogue houses, but we find that this is not the case. We find that some of the jobbers and retailers who made the biggest fuss regarding the manufacturer selling catalogue houses are themselves purchasing goods from the manufacturers, which goods are being sold openly to the catalogue houses without any attempt at deception of the trade whatever, without any stipulation regarding the price at which the catalogue house shall sell the goods, and goods which are sold to the catalogue houses probably to a larger extent than to any other users.

"This certainly seems inconsistent to us and we must believe from this that these jobbers and retailers who talked the loudest regarding selling the goods to the catalogue houses by the manufacturers were not talking in good faith. We do not know what can be done regarding this, but there should be some way of exposing these jobbers and retailers who have acted with the manufacturers in such poor faith."

* * *

According to the following the troubles of the Hardwareman are not solely from mail order competition. It seems to me that the jobber mentioned in this St. Paul, Minn., letter was a little too anxious to get the business. The letter reads as follows:

"In reply to your letter of March 22nd will say that I have read the article on Maintaining Prices with much interest. It appears to me that something must be done to protect the retail dealer. The manufacturer must sell his goods only to legitimate dealers and the jobbers must stop selling at retail and to those that are not regular Hardware dealers. Not long ago it came to my observation that a jobbing house in our territory sold a lot of milk cans, cream separators, fence wire, to a farmer through a sash and door factory, and at a lower price than he would sell them to a regular Hardware dealer. One New York State dealer says we must hustle while we wait. I think the Hardware dealer would have to wait a long while until business came to him under these conditions."

* * *

An Iowa manufacturer gives it as his opinion that:

"Catalogue Houses are in fact retail dealers. If all jobbers and factories declined to sell to them at better prices than to the rest of the retail trade the question would be solved. Would they start a great factory? Doubtful, because the output of the factory would have to be limited to the demand of trade, and maintained at great expense, where they now buy of 1,000 jobbers and factories employing thousands of men who can keep pushing their products in all lines of trade and are thus enabled to continue. Organize and decline to treat one retail dealer any better than another giving all a fair deal."

* * *

The following, under the heading "How to Gain the Farmers' Confidence" appeared recently in *Judicious Advertising*, and was intended as advice to mail order houses. However, it fits the retail Hardwareman exactly and for this reason we reprint it.

"There has been a notable advance in the methods of conducting mail order business on the part of concerns selling to the farmers. Although the business is carried on at long range, mail order houses are learning to be just as careful to make these transactions satisfactory, and are just as anxious to please the customer as though he came direct to the store or factory to make the purchase.

One of the important questions for the advertiser to solve is how best to establish a basis of confidence, so that the consumer's chief concern will be adaptability of the goods to his requirements.

Some of the most successful advertisers have overcome the objections to long distance merchandising by the adoption of lines of business policy that give the buyer every opportunity to

PROTECT HIMSELF FROM IMPOSITION,

the most liberal proposition being shipment of the goods "on trial," for a certain definite period.

In many cases this guaranty of good faith is supplemented by an actual written guaranty for a given length of time.

Although the advertiser generally calls for a deposit on the goods shipped on a free trial proposition, yet this deposit is made with the bank or express company, and the buyer has the assurance of its return if the goods are unsatisfactory.

The offer of some measure of protection to the buyer is having wholesome effect on advertising results. The advertiser of a "free trial" proposition is much more careful not to misrepresent his wares, for over-statement simply acts as a boomerang, causing him no end of trouble.

It seldom occurs that goods ordered "on trial" are returned if they are found to be as advertised.

In selling an article that runs into a considerable sum of money, the offer to sell on deferred payments has been found a means of largely increasing sales.

Make your selling plan as attractive as possible. It happens in a great many cases that a farmer who was influenced to answer an advertisement because the goods were sold on time, will be quick to take advantage of the discount for cash when he learns that such reduction is allowed.

There are many advantages in selling by mail to farmers. They are a stationary class, generally responsible and risks may be taken in dealing with them that would be disastrous with a transient class.

In advertising for farmers' trade it pays to be frank and fair. Adequate presentation of the "reason why" your goods are best, pays far better than indulgence in high sounding phrases and extravagant claims."

How much easier it is for the dealer "on the spot" to carry out the suggestions given above. He has the advantage, first of, in most cases, being acquainted with the prospective purchaser; second, of having a local reputation for reliability, and third, of being able to show the goods and explain their points of merit.

PRICE MAINTENANCE.

By C. F. M.

It seems strange, but is nevertheless true, that jobbers are unable to obtain a profit on well known factory brands, unless the manufacturers establish a fixed selling price thereon and maintain the same.

Furthermore, if a manufacturer requests that the jobber sell at a certain price, the jobber's salesmen will immediately report it is necessary to cut the price, or give rebates in order to get the business, and the old threadbare excuse is offered, "had to do it to meet competition," hence to keep the jobbers interested in goods that are demanded under factory brands, it is necessary for the manufacturer to name the selling price and demand the maintenance of the same; even then some headstrong salesman will cut the price and the jobber will try to defend him by stating it was a mistake, etc., etc.

Manufacturers often get thoroughly disgusted trying

TO HELP THE JOBBERS OBTAIN A LEGITIMATE PROFIT

on goods and feel like writing the jobber, who states it is necessary to cut prices to sell goods, that he evidently has no salesmen, simply order-takers, as A. D. T. boys can take orders for staple goods at cut prices.

The jobber, thinking he can more easily hold his salesmen in line, begins to add private brands, on which his salesmen can offer no excuse for cutting prices, and in order to under sell high grade

Digitized by Google

factory brands and make a satisfactory profit, begins to "shop" for prices and must necessarily settle on goods of an inferior quality. It would be much easier for jobbers and less expensive to handle factory brands, if they would assist and co-operate with the manufacturer in price maintenance, and how much more satisfactory it would be, not only for manufacturer and jobber, but retailer and consumer as well.

After years of experience in naming a selling price for the jobber, I can but conclude, if manufacturers having a distinctive production, would establish fixed prices at which their goods should be sold, allowing the jobber a satisfactory profit thereon, possibly holding their entire profits three or six months, and if prices had not been violated during the period, send a draft for the amount earned, the manufacturers would sell more trademark goods, and have less demand made upon them for lower prices.

WHEN GOODS ARE SOLD "OPEN"

many jobbers will sell at flat factory cost and others who aim to sell everything at a profit demand a lower price to meet this competition at a profit to themselves, and cannot be convinced their competitors are selling at cost, but feel positive a lower factory price is made that they do not enjoy.

Price maintenance means eternal vigilance on the part of the manufacturer and positive letters to some jobbers and the cutting off of the supply of others, but if they find you mean absolutely no deviation, they will soon fall in line, but before all acquiesce they will adopt methods that "try men's souls."

Recently a line more generally handled by the retailer than any other in the Hardware line, was cut in price quite generally by the jobber, each jobber who cut prices claiming "the other fellow" started it and it was for him to meet the cut or lose volumes of business on other lines.

At the close of the season many rebates were forfeited and an inquiry was sent out to all jobbers, requesting an immediate reply, as to their pleasure for the coming year, if they preferred "open' or restricted prices, stating if restricted prices were continued absolutely no deviation would be permitted and ninety-nine per cent. of the replies favored price maintenance.

If more manufacturers would adopt restricted selling prices, it would be decidedly easier for those selling under this plan to maintain the same for the "cutter" would soon find his source of supply cut off, not only on one line but several and jobbers in general would get accustomed to selling "no deviation" goods and pay more attention to the same. Of course some would object, as they would to any plan, even gold dollars at ninety cents, some would ask for a freight allowance and an extra 5 per cent.

If I read the signs of the times aright, unless some decided step is taken the jobbers will increase their lines of private brands and force the manufacturers of trademark goods or well-known factory brands to solicit the trade of the retail merchant and even go direct to the consumer. The manufacturer cannot afford to and will not lose his identity. Some have expressed themselves most positively in regard to their hard earned reputation for high grade factory brands, calling them their birthright, which they do not propose to trade, as did Esau for a mess of pottage.

THE TRADE PAPER.

If the Hardware dealer could only flirt from store to store among his fellow-dealers how many valuable hints and suggestions he would get in the course of the day's travels. There is where his Hardware trade paper comes in, twice a month, loaded with the suggestions gleaned by an experienced traveler from the brightest minds connected with the trade. It's like a big convention, in which the paper gathering has some advantages over the real thing, though, of course, not all of them.

But if the modern trade paper represents a trade convention in its text, it is nothing short of an exposition in its advertising pages. Here may be found illustrated models of the newest goods. Here claim may be compared with claim and use with use. Here frequently price may also be compared with price, and, in any event, one has a much fuller understanding of the commercial side of his own trade than he will ever get in any other way. It is the cheapest and, in some respects, one of the most valuable expositions one can possibly attend; and then we have the value of those semi-monthly convention talks thrown in for good measure.

THE ASSOCIATION SPIRIT IN CHICAGO.

From Frank A. Bare, the secretary of the Ohio Hardware Association, we receive the following encouraging bit of news; it is a good thing to know that the secretary does not relax his efforts with the adjournment of the convention, but follows it up to good purpose:

"The association spirit is developing and spreading rapidly in the great State of Ohio. Members are taking an active interest in the work. A large number of new members have been secured since the Dayton Convention. This splendid increase in membership comes not only from the energetic work of our own members, but also from the persistent and intelligent support of the traveling man. All over the State traveling men are telling non-members about associations in general, and the advantages of membership in our organization. Another practical and attractive feature is our insurance company. Ohio Hardware merchants realize that our Mutual Insurance Co., under its splendid management, is rapidly developing into a strong organization, and that it not only saves money for members to-day, but will save them more money as our association grows. As a special offer, we are giving a receipt in full for dues to new members to February, 1907, for the payment of only $4.00. The convention in Canton, in 1906, will be the biggest and best in all our history."

INCANDESCENT GAS AND ELECTRICITY.

Mr. Newbigging, chief engineer of the Manchester municipally owned gas works, in a paper read recently before an association of students of civil engineering, said that the introduction of the incandescent gas burner had given a new lease of life to gas undertakings, and had placed gas in the front position as the cheapest illuminant, says United States Consul Halstead of Birmingham, Eng. While he did not deny that, for decorative effects, electricity had advantages over gas, he thought the recent introduction of the inverted incandescent gas burner bade fair to rival the present incandescent electric light.

At this meeting of the Gas Light and Coke Company the governor performed an experiment to show how gas burners can now be manipulated as easily as electric lights. The *Gas World* reports that "he pressed a button on his desk and two incandescent gas burners high up on the wall of the room were lighted up, he pressed the button again and the lights were extinguished. Sir William liked the experiment so much that he repeated it, and his audience emitted a dignified murmur of approval."

I saw this device in use here in Birmingham the other day. It is a Swiss invention, and a Birmingham firm, manufacturing chandeliers, electroliers, and gas and electric fittings generally, received an order from the English owner of the patent for 10,000 of them, deliveries to begin this week. It is a simple device. With an incandescent burner there is a "pilot light," that is a tiny light through a bypath, so that when the gas is turned full it will be lighted. Where the key on a gas burner would ordinarily be a little piston is placed, this piston having an opening corresponding to the openings in the fixture and the burner. When the piston is forward the gas has communication with the burner and is lighted by the pilot light, and when the piston is in the other position the gas is shut off, with the exception of a small quantity for the pilot light. The piston is operated pneumatically, a small copper tube about the size of a telegraph wire running from the gas fixture, say, to a point near the door of a room, so a person entering the room can press in the plunger, which is at the end of the tube, thus compressing the air and driving the piston at the fixture into the gas-opening position.

WOOD MEASURING MACHINE.

A description of a machine for accurately registering the cubic contents and linear measure of lumber or logs at the saw will be, I think, of interest to those connected with the lumber industries in the United States, says United States Consul Creevey, of Glauchau, Germany. It can be applied to either circular or gang saws, and a test I witnessed last Saturday proved the machine to be more accurate than the recognized standard tables for computing the cubic contents of lumber in a log. The mechanical principles involved are so simple that all present could not but wonder that it had not been thought out before.

The machine was attached to the side and upper part of the gang saw frame, was operated by a chain belt from the feed roller gear, and so geared that the length of the log is registered as it is drawn into the saws. By the attachment of a small roller placed between the feed roller and the saws and fastened to the feed roller, the irregularities of the log's surface, by the rising and lowering of the feed roller, are communicated to the indicator, which in turn controls the numerators registering the cubic contents.

After the log has passed through, the feed roller, carrying with it the roller, lowers, thereby disengaging a small ratchet, throwing the indicating machine out of action.

The indicator is first set at a point indicating the average diameter of the logs to be sawed, and the supplementary roller, which is attached to and working in harmony with the feed roller, causes the pointer to indicate the exact diameter of the log, which in turn regulates the speed of the gear wheel operating the cubic numerals.

The machine is compact, strongly made with interchangeable parts, and should wear indefinitely. A millwright or machinist would readily understand the principles involved and be able to attach the apparatus without difficulty. The American rights are for sale, and at the desire of the inventor interested parties are requested to address all communications to this consulate.

ANTIQUE WARMERS.

By F. A. G.

"Aint much afraid of Jack Frost even though he is going to be mighty powerful this Winter, be ye" said the retired salesman as he nestled his four score old bones close by the steam heater of the Hardwareman's office. "I calculate that you're a little more comfortable than I used to be in my day, but you don't seem to be much livelier, or much happier."

"Well, human nature is hard to satisfy, Uncle Joe," returned the Hardwareman, "I suppose you've seen some mighty cold weather in your times."

"Just a little! Just a little," returned the old man. "About fifty years ago I was traveling in Maine one winter and the sample shears got frozen in my grip, and if we didn't have a fast pacer in the shafts our runners would have frozen to the snow. About all the mercury thermometers went out of business during that cold spell, and trade in them was mighty brisk for a while afterwards."

"That was out-of-doors cold," went on the old man, cautiously eyeing the busy Hardwareman to see how his yarn was taken, "and, as for indoor cold, why I've seen many a man sitting at his desk as you are now, and he would have to stop casting up figures so as to melt the ice on his pen. It's an actual fact, my friend, and if you don't believe me why you may look at Cotton Mather's diary, or Judge Sewell's autobiography, and these two were pillars of honesty in old Massachusetts."

"You know, in my day steam heaters wasn't known much more than radium is to-day. We got the heat right from the wood, burned it in the open fire place, and thought we was getting all the caloric there was in it except what went up chimney. We burned peat, too, and a nice hot fire it made. Those of us who had a coal stove thought we were mighty comfortable and well off in the world, and wondered how our grandaddies got along.

"I can't say as I understand myself how they got along, unless they had cast iron lungs, and brass noses. I've been looking into heating history a bit, and I tell you the old timers were much ahead of Father Adam on keeping the thermometers at sixty-eight degrees. Why the first houses in New England were built of wood and mud, and had fireplaces and chimneys plastered up with mud. The children could crawl into the corner of the fireplaces and watch the sparks shoot up chimney towards the stars. My goodness, it is a wonder that the infant country didn't get frozen up. But wood was plenty in those days.

"The first stoves were invented in this country in 1652 by John Clark, and he was regarded as such a public benefactor that the General Court of Massachusetts awarded him ten shillings for every family who used his stove for a period of three years, and his invention proving satisfactory, this grant was continued for his life time. Cash was mighty scarce in those days, and treating Clark in that way was as good as a general's pension is to-day.

"But the Puritans were stern and hard people, as I suppose they had to be to stand the cold. They wouldn't have stoves in churches. Stoves were 'Sinful lures of ye wily Satan,' according to the proprietors of the first church of Salem, Mass., and they cast out stoves as a wicked and ennervating luxury, and breated in God's words and air in frigid unadulterated draughts.

"The men kicked their heels against the pews to keep warm, and sometimes so great was the clamor that the minister patiently paused until the circulation in benumbed toes had been stirred up to warming point. But the women—well, it was the daughters of Eve who ensnared the sons of Adam into accepting the 'Sinful lure of ye wily Satan,' and 'Ennervating luxury,' just as the first lady of Eden caused its master to fall. The women folks took their stoves to church, or had their lusty sons take them.

"These portable stoves consisted of heavy tin boxes, about a foot square, and the sizes and tops were punctured with many holes. These boxes rested in a wooden framework. Just before church time, the good dame filled her stove with glowing embers from the hearth, and sent her son running ahead with it to the family pew. She followed more sedately, and when she arrived she toasted her toes on her little stove. These stoves were also used for keeping the feet warm during carriage drives. Of course, a few of the stern Puritans yielded to the temptation of borrowing their wife's stove for a few minutes, and then they fell from grace, and quietly voted to have stoves put into the meeting house, though not until after many years of suffering from the cold.

"Andirons were popular before stoves came in. Of course, you know the history of these. They were used long before my day," continued the old man, slyly laughing at his own thoughts." They spitted the fatted calf over the andirons, and Ulysses probably used a form of andirons when he built his funeral pyre. "Andirons got to be a work of art during the middle ages, and Shakespeare describes the andirons in the Hampton court of King Henry VIII., as "two winking Cupids of silver each on one foot standing nicely, depending upon their brands."

"Andirons were made of iron, copper and brass in olden times, and there is a tradition in Boston that a pair of gold ones, taken from the court of Louis XVI., of France, was smuggled into that town by one of its rich traders. The old time Yankees had a humorous streak in them, and during the Revolutionary War they made andirons in the form of Hessian soldiers, and had the pleasure of roasting the hated troopers in effigy.

"Fine antique andirons are in use to-day, and if you have a pair or two up in the attic, I advise you to mark them up to $50 or a $100 and sell them as genuine colonial to some individual who is trying to unload his burden of money for culture.

"The ancients had stoves, as we do know, for it was just as cold before the days of thermometers as it is now. In your Bible you will read in Exodus. "His firepans and all the vessels thereof thou shalt make of brass." And if you visit the ruins of Pompeii, or other cities of ancient Rome or Greece, you'll find relics of little braziers of brass or other metal, with which these first exponents of European civilization burned charcoal and kept their brains and muscles active. The Japanese to-day use such braziers."

The old timer paused a moment to get a little closer to the heater, and to collect his thoughts.

"I suppose," he went on, "that you admire the statesmanship of Ben Franklin, but there's one thing for which we Hardwaremen ought to doubly bless him, and that is for inventing the Franklin stove, in which both coal and wood could be burned and a great deal of heat was saved. Coal, or 'iron stone' was known in this country as early as 1637, but no good way of burning it was brought about until Ben Franklin devoted his genius to the problem. The German Dutch of Pennsylvania had a sort of a stove, a big box of sheet iron, whose door was outside the house, possibly with the idea that it was easier to toss the wood directly from the woodpile into the stove, than to bring it into the house. Some of these stoves had a hot air drum which extended to the upper second story, and it was probably this method of circulating heat that gave Franklin his idea of his stove. These Franklin stoves were first cast by James Byres & Co., in Springfield, Mass., in 1787.

"So we Hardwaremen may bless Franklin for the fact that to-day we are dealing in coal saving, heat producing stoves and ranges, and not in andirons, fire backs, warming pans, and other primitive heat producers. And also that we are able to reckon up our profits in warm and comfortable offices, without having the ink freeze on our pens. Oh, yes, young man, times have changed and if I should make another trip down in Maine this Winter I don't think I need take a gas stove along to melt out my stock.

"Yes, I must be going now. Folks will be wondering where I am at. Oh! yes. Surely, I'll come around some other time and tell you more about those early days.

CAN WE AFFORD IT?

In the midst of all this talk about the catalogue house evil, we are sometimes led to wonder just how much one can afford to attack the methods of others; how much time we may devote to our competitors.

As a matter of fact, the greater part of all this outcry ends exactly where it begins—in talk. Does it pay? Isn't there room enough for all, or, rather, so long as the Hardware man leaves so much of his own territory still unworked himself, isn't an occasional intruder about what he can expect?

We are inclined to think if all the energy wasted in these fruitless criticisms were expended in working our own field a little more thoroughly, if all the gray matter expended in working out ingenious methods to circumvent the ways of certain other people, were used in the improvement of our own, it would be better for us, even if it did not restrain our enemies. One thing is certain, no one can be in two entirely different fights at once and devote his whole energies to either one. These trade wars look first rate in print, but it is awful hard to growl and bite at the same time, and it is well for us to be sure that while we are doing our little act of working the growler some other dog may not be chewing up the bone.

Exchanging Confidences.

First Stenographer—My employer is in financial trouble of some sort. He says he doesn't know which way to turn.

Second Stenographer—Mine hasn't that to bother him. He's a crank.—*Detroit Free Press.*

THE NEW TRADE-MARK ACT.

By Davis & Davis, Patent Lawyers, New York and Washington.

So large a proportion of the goods handled by the trades are protected by trade-mark that it is highly important that manufacturers should keep informed concerning the legal aspects of trade-marks. The basis of trade-mark rights is found in common law, under which a certain degree of protection is accorded to the owners of trade-marks in common with other kinds of personal property. The protection afforded under the common law, however, seems hardly adequate, and for that reason laws have been passed from time to time by the United States and the several States providing that when duly registered, by the owner, trade-marks will be given a greater degree of protection than is afforded under common law usage. The United States Trade-mark Act of 1881, amended in 1882, which has been in force up to the present time, has been defective in several particulars. An effort to amend these defects has been made in the act approved February 20, and which went into effect on April 1.

In the first place it must be borne in mind that this act does not in any respect abrogate or diminish the protection afforded trade-marks under the common law, or those registered under the act of 1881. It merely accords to trade-marks registered under the new act some additional right and privileges which could not be extended to trade-marks registered under the act of 1881, unless those trade-marks are re-registered under the new act. Holders of trade-marks have been unnecessarily alarmed by designing persons who have endeavored to convey the impression that a general re-registration is required by the act of 1905. As a matter of fact, this is far from being the case. On the other hand, however, the advantages offered by the new act are so marked as to make it well worth while for the owners of valuable trade-marks to re-register them under the new act. The principal changes effected by the act of 1905 may be summarized as follows:

The new act permits the registration of trade-marks used in domestic commerce between the States; the act of 1881 afforded protection only where trade-marks were used in commerce with foreign countries or with the Indian Tribes. Formerly applicants were required to specify certain features as being the essential features of their trade-marks, and to file drawings in accordance with these specifications, the drawings rarely resembling the trade-marks as actually used; now the trade-mark as actually used is filed. Formerly final decisions as to trade-mark matters rested with the Commissioner of Patents; now a right of appeal to the Court of Appeals of the District of Columbia is given.

The new fee is $10; the old fee was $25. Damages may now be collected from infringers to three times the amount of actual damage proved, in addition to costs. Formerly, under the common law, or the act of 1881, only the amount of damages proven could be recovered. The new act provides for the destruction of infringing labels, cartoons, etc. The new act provides for service of suit anywhere in the United States. The new act provides that even geographical and descriptive names may be registered as they have been in use for ten years immediately preceding February 20, 1905. It further provides that pending applications may be amended so as to come within the act, and certificates of registration are issued without the imposition of an additional fee. This clause is a very important one, as it will permit all applicants who have at any time applied for registration and been refused to again apply without the payment of additional fee. Finally, the life of the registration is put at 20 years instead of 30 years as under the present act, but owners of trade-marks are permitted to re-register for another 20 years on payment of another registration fee of $10.

Besides these main features of the bill, there are a number of minor changes from the act of 1881, bearing upon the methods of court procedure, which tend to simplify the bringing of suits and the recovery of damages.

On the whole, the measure is an excellent one, affording increased protection to trade-mark owners without being unduly harsh. A synopsis of the leading features of the Law.

1. Requires that the mark used in foreign or interstate commerce.

2. Term, 20 years; renewable indefinitely.

3. Fee, $10 for each 20-year term.

4. Registration throws burden of proof upon others to disprove title.

5. By publication in *Official Gazette*, provides for notification to the world of adoption. This avoids subsequent litigation with others who might otherwise innocently adopt the mark.

6. Empowers the court to destroy all infringing labels. This penalty is in addition to whatever damages are awarded complaintants.

7. Provides for enforcing injunctions in all parts of the United States and Territories, and thereby prevents an infringer escaping the consequence of an infringement by moving into another circuit. This is probably the only instance of an injunction being enforced outside of the circuit in which it is granted.

8. Empowers court to award three times the actual damage the complaintant proves.

9. Gives jurisdiction to the United States Courts irrespective of residence of parties and the amount in controversy, thus making it possible to avoid the necessity of suing in local or State courts which are often prejudiced.

10. Marks are not registerable which are merely descriptive or geographical or which contain immoral matter or flags or other insigna of nations, States and municipalities.

11. Even descriptive and geographical marks are registerable if they have been in use since February 20, 1895.

12. Requires that notice of registration be on each mark in following words: Reg. U. S. Patent Office.

STUDY YOUR OPPORTUNITIES.

There are certain principles which work in the same manner in all branches of business. A business prospers, trade is increased, the field is widened or the business is at a standstill, then becomes smaller and finally dies or rots out. In order to make a business go it must grow. Large concerns are becoming larger, true in Hardware as in dry goods, and just as true in the wholesale as in retail business.

Now, if this is true, the merchant who is in business to stay must realize that it becomes necessary to enlarge his trade. He realizes also that each year sees his profits cut down in some lines—competition from catalogue houses—from department stores—and from other sources—constantly are encroaching upon his field. New lines must therefore be looked into and added to the Hardware stock. Those lines should be most carefully considered that come the nearest to Hardware. Dry goods stores may successfully sell some kinds of Hardware, but it would be a difficult matter for any Hardware store to successfully handle dry goods.

Sporting goods is one of the lines which would come most easily to the Hardware store—the business can be obtained by the Hardwareman with very little effort.

There is a town in central New York of about 1,800 population, where two Hardware stores have the trade, about evenly divided. Both these merchants are constantly kicking about outside competition—the catalogue houses are shipping goods to that town every day—one jewelry store and a drug store handle fishing tackle. A bicycle shop is doing a successful business in bicycle goods and sporting goods. Why? Because neither Hardware merchant is alive to the opportunities of his business. One of these merchants is extremely unpopular—does not cater to his customers—and both dealers have joined together as to prices, which are considerably higher than the prices at which the same goods are retailed in neighboring towns, and, of course, on many items much above catalogue house prices. Thus much of the business goes out of town. Both of these dealers are in a rut—new goods are seldom stocked, are ordered from catalogue—and this much business is lost entirely. The town is in the midst of a good fishing country, but the only complete stock in this line is carried by the druggist. The Baseball and Sporting Goods trade goes to the bicycle shop and to the book store—again because the Hardware stores carry only a very limited line of these goods. A small, exclusive plumbing and furnace dealer has built up a good business in these lines, in five years, although both Hardware stores make some pretense of carrying plumbing and heating goods.

Now, this well illustrates the trouble with many Hardware merchants; if these two dealers looked more closely after the trade they, between them, could handle all the business in sporting goods, and do the plumbing and heating trade of this village. Having this business, which pays a good profit, would enable them to handle some of the other business on a closer margin and thus shut out the competition from catalogue houses. By so doing each of these dealers would be enabled to almost double their trade, and, by increasing the volume of business, they would be able to buy at lower prices, and would soon be drawing business from the surrounding country that would still more add to the profits.

All these lines come naturally in the Hardware store, and many Hardware dealers are making the same mistake as are these dealers above noted by carrying too small a variety and not making more of a bid for the business. By pursuing this policy they are not only losing good profits to be made on the lines in question, but also gradually letting other trade in Hardware get away from them.

POPULAR TALKS ON LAW.

Copyrighted 1905, by William C. Sprague, President, The Sprague Correspondence School of Law.

THE LAW RELATING TO LANDLORD AND TENANT.

Few landlords, and, perhaps, fewer tenants, realize the extent of their rights and obligations, even where they have agreed to the terms of a lease and affixed their signature thereto. Perhaps a still smaller number of tenants who occupy leased premises on verbal terms, or upon practically no expressed conditions, understand the law governing the relation existing between them and their landlords.

Nearly every one is either a landlord or a tenant; this, together with the fact that the questions arising between the two are many and various, makes some plain talk on the subject desirable.

There are two terms usually found in leases that perhaps need simple definitions before proceeding to use them. These terms are "appurtenance" and "easement." An appurtenance is that which belongs to something else; something accessory to something else. It is always something of less importance than that to which it appertains or belongs, as, trees are appurtenant to the soil. An easement is a right or privilege which one has in the estate of another, distinct from the ownership of the soil, as where one owns a right of way over land of another, or where one has the right of fishing in another man's stream.

Now, we will be understood when we say that whatever is appurtenant to leased land goes with it; so that, if one rents a piece of ground, and nothing is stated to the contrary in the lease, everything appertaining to the soil goes with the soil, as houses, barns, fences, trees, shrubbery, etc.; but not things of a temporary nature, not belonging to the soil, as agricultural implements, domestic animals, etc. Then, too, this is so in the case of a sale or a lease, whether the lease or deed so states or not. A mere verbal lease, not specifying the appurtenances, will be sufficient to entitle the lessee to their possession and use. Under no circumstances may the lessor, after the lessee has taken possession, enter to remove appurtenances, and his attempt to do so makes him a trespasser and lays him liable to an action for trespass. Where one has leased premises to another and fails to give him possession of all the premises leased, including the appurtenances, the lessee is under no obligation to accept a part, but may abandon all without liability for damages.

The cases that have arisen have grown out of the difficulty in determining what is appurtenant and what is not appurtenant to the soil. For instance: A man leased a mill. There was no approach to it from the highway, excepting over other property belonging to the lessor. The courts held that an approach to the mill from the highway being necessary to the use of the mill, such right of way, or easement, passed with the mill. In another case, where a mill was leased and the lessor owned other property adjoining through which the water passed by which the mill was run, it was held that the lessee of the mill had, as an appurtenance to the mill, the right to a sufficient head of water in the dam upon the adjoining land belonging to his lessor.

The tenant is entitled to natural accretions to the premises as where, by a change in the course of a river, ground was added to leased premises which fronted on a river.

Where one leases a house, he is entitled to the lot, outhouses, fences, trees and things of a like nature, appurtenant thereto. Where one leased a portion of a tenement house, it was held that he was entitled, unless he had cut himself off by an agreement from claiming them, to the conveniences of the house, such as the use of the front door and doorbell, the customary place for drying clothes, the water closets, etc.

The question has arisen as to the right of one renting premises in a business block to use the outer walls for signs, and the cases have held that where he has not restricted his right by agreement, he is entitled to such use of the walls.

Many landlords are not aware that, unless the provisions of the lease be broken by the tenant, they have no more right to enter the premises of their tenants than have strangers. A landlord who enters and attempts to remove a plant or make alterations, even though the alterations are to his mind beneficial to the premises, or to put up signs, is guilty of a trespass where under like circumstances a stranger would be guilty.

If the tenant abandons the premises before the expiration of his term the landlord has a right to re-enter it. But where the landlord claims there has been forfeiture for the non-payment of rent, he must, before a re-entry, be sure to comply with all the formalities of the law, as, by making a demand for the amount of rent due, on the last day, on the premises, and at a convenient time before sunset. If the tenant has agreed to pay taxes and has not done so, before the landlord can re-enter he must demand the payment of the taxes within the period required by law. In other words, the landlord, before re-entry for a breach of contract, must be careful to comply with the statutory and common law requirements in his State. The landlord may enter to make repairs when he has agreed in his lease to make them, or he may enter to demand rent that is due. In a Kansas case it was held that if after the tenant had refused to pay the rent and had begun to move, the landlord moved out the rest of the tenant's things and took possession, the tenant had no cause for action.

Where one has given a lease to another without excepting any rights or privileges to himself other than the payment of the rent, he has practically sold and conveyed the premises to the tenant for the time stated in the lease, and he has no more right to interfere during the term of the lease with the tenant's peaceable enjoyment of the premises than he would have to enter the premises of one to whom he has given a deed.

In our next we shall discuss the tenant's right to make alterations, and the matter of his use of the premises for purposes other than those agreed upon.

(To be Continued.)

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Subpoena Compelling Attendance of Witnesses in Another State.

QUESTION: Is there any way in which a witness who is at present in the State of New York can be compelled to go to another State for the purpose of giving evidence in a criminal proceeding?

ANSWER: Section 618a of our Code of Criminal Procedure provides for the issuance of a subpoena directing a witness found in the State of New York to appear and testify in criminal actions pending in the courts of other States. This section was intended to provide a means of compelling the attendance of material witnesses in other States. But it is void because unconstitutional. The Legislature and courts of this State have no jurisdiction to compel one of its citizens to go into a locality over which they have no authority and thus in effect banish him under form of law. It follows that there is no way in which the attendance of such a witness can be procured, except by his voluntary act.

Goods Guaranteed by Vendor—Purchaser's Remedies.

QUESTION: I entered into a contract with a manufacturer whereby he was to construct a refrigerator. He guaranteed that this refrigerator would do certain work prescribed and agreed that if it would not do so he would remove it and refund my money. The refrigerator is unsatisfactory, but the manufacturer refuses to remove it. What can I do?

REPLY: We think that for a breach of the guaranty and contract you have two remedies. First, you can require the manufacturer to remove the refrigerator and refund the money, as he has agreed to do by the express terms of his contract. Upon his refusal to comply with this request you can remove the refrigerator yourself and sue for the money which has been paid. Or, second, you can retain the refrigerator as your own property and sue for damages for the breach of the guaranty and contract.

Mortgage Foreclosure.

QUESTION: Suppose a real estate mortgage is foreclosed and when the property is sold at foreclosure the sum realized does not reach the full amount of the mortgage, is the mortgagor liable for the additional amount necessary to satisfy the mortgagee's full claim, that is, can any other property of the mortgagor be attached to satisfy such claim?

REPLY: Yes, he is personally liable for the debt evidenced by the bond or note which the mortgage is given to secure. This is the rule so far as concerns the original mortgagor or one who has assumed the mortgage. But one who simply purchases the premises subject to the mortgage incurs no personal liability beyond their value.

G. & H. BARNETT CO., (Black Diamond File Works), Philadelphia, Pa., have just completed a second revised 1905 edition of their catalogue of which they have forwarded us a copy. The book is entirely devoted to files and rasps and will be sent free to any interested file user upon application. They illustrate such a variety of shape and cut as would seem to make the book a requisite in the store of a Hardwareman; while to the mechanic, often in search of some special shape or cut of file for his particular purpose, these illustrations will prove of no less value. Their brand, they state, is the highest priced in the market, due to the extra cost of manufacture with regard to the superiority of their goods. They have just made additions to their plant which enables them to increase their output to 1500 dozen files a day. Send for their catalogue.

RECENT TRADE PUBLICATIONS.

Joseph Dixon Crucible Co., Jersey City, N. J., have recently sent to us a group of circulars which they have also sent to a large number of those interested in matters of Marine Engineering, and to all dealers in ship chandlery and supplies. The circulars cover the following subjects: Pipe Joint Compound for steam and gas pipes, flanges, gaskets, and equally useful for bolts, screws, etc.; Flake Graphite for Pipe Fitting; Flake Graphite as a Lubricant for Steam Cylinders; The Value of Flake Graphite as a General Lubricant; the Value of the Flake Form, and Grease Lubrication. Each of the above topics is treated scientifically and explanation in detail is given just why these products are best for the specified use. A set of the circulars may be obtained by writing to the Dixon Company.

The Elmore Manufacturing Co., Inc., Southington, Conn., have distributed to the trade a neat pamphlet catalogue embracing their line of tools for 1905. They are the manufacturers of the "Indestructible" Screw Driver, and they claim no amount of hammering on the head can injure the handle. A special brand of steel is used, the quality of which is unsurpassed for strength and durability. The steel extends from point of blade through the handle and forms a top for rough work. It is impossible to turn the handle on the steel. They make screw drivers of best quality for Machinists, carpenters, plumbers, electricians, cabinet-makers and all others who require a first-class tool. One of their catalogues will be sent upon request.

A. F. Meisselbach & Brother, 22-28 Prospect Street, Newark, N. J., are placing in the hands of the trade an attractive envelope-size pamphlet catalogue of fishing reels, net rings, rod holders, gaff hooks, etc. They call attention to the following merits of their reels: The perforated spool, allowing the line to dry on reel and preventing decay; the greater power obtainable combined with speed, the handle being fastened at the furtherest possible point from center of reel. They state "It is an acknowledged fact in all gearing that what is gained in speed is lost in power." These reels, being direct acting and having a large diameter of spool, overcome this fault of multiplying reels, while retaining their speed. Lightness, consistent with strength, is another merit claimed. All their reels are finely polished, heavy nickel plated, and well made. Very free running. A copy of their catalogue may be had upon application.

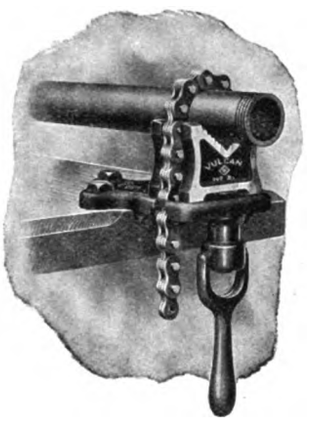
Gibford Manufacturing Company, Adrian, Mich., sole makers of the Red-E-For-Use Razor Strops, have issued an illustrated pamphlet catalogue exploiting the same. The book is a high-grade production, being finely printed on excellent paper. The illustrations are particularly good. In manufacture they state they use only the highest grade of horse hide and calf skin, which is tanned to specially suit their own process of producing a "Red-E-For-Use" strop. They use the horse hide strop for the coarse or sharpening strop because the animal is older, therefore the grain of the leather is much coarser and will cut faster. On the other hand, the calf skin is from a younger animal, the grain is much finer, and, after going through their process, the nice, even draw or pull, and soft, kind surface that puts the smooth, keen shaving side on the blade, so much desired. The Gibford Company also make a razor guard from German silver finely polished and nickel plated. It is adjustable to any width razor, or any thickness of back, can be adjusted to shave close or otherwise, as desired, also allows the draw cut same as Barbers use. They claim it is the neatest, lightest and most practical guard on the market, and particularly adapted to the use of the nervous man, the man in a hurry, and the youth just beginning to shave. Write for a catalogue.

The Grand Rapids Fixtures Company, Grand Rapids, Mich., are the authors of a catalogue which they designate "E," and which, in a very handsome manner, illustrates and describes the combination show cases which they manufacture. They state all of their cases are regularly made of white oak, thoroughly kiln-dried, the best cabinet construction being used. The bottoms of all cases are of three-ply veneer stock, which will not swell nor warp. They can furnish cases made in mahogany, birch, cherry, walnut or maple if sufficient time is given to get them out. They carry only oak in stock. Especial pride is taken in the finish of their cases and they are finished equally as well as high-grade furniture. All sundries, ribbon, notion and cigar cases are regularly glazed with ½-inch steep beveled polished plate glass tops, inlaid on felt. All counters with glass tops have plain plate tops (not beveled), inlaid on felt, the glass being flush with the top rail. All cases are regularly glazed with double strength "A" sheet glass in fronts, ends and doors. Their book gives explicit information regarding all of their products and may be had for the asking.

The Starr Brothers Bell Co., East Hampton, Conn., have sent us a copy of their catalogue of Starr Bicycle Bells. It is a neat book of envelope size in pamphlet form, and contains twenty-five pages. This firm confines its sales to manufacturers and jobbers, and refers all inquiries from retailers to the nearest jobber of their goods. Send for a copy of their catalogue which describes, illustrates and prices all of their bicycle bells.

S. P. Townsend & Co., Orange, N. J., have issued a little booklet containing a description of some of the principal Lawn Mowers which they make. This is the eighth season they have manufactured lawn mowers. In those eight years they have risen from the smallest concern in the business to one of the very largest, and they claim they now make more high grade mowers than any firm in the world. Their entire output is high grade. They make nothing but ball-bearing mowers and they believe that this healthy growth is attributable to the quality of their mowers. They make both hand and horse power mowers. Their little book is well gotten up, and their goods are explicitly described and graphically illustrated. Send at once for a copy.

Tobin Arms Manufacturing Co., Inc., Norwich, Conn., have issued an attractive pamphlet catalogue No. 104, exploiting the "Simplex" Hammerless Shot Guns, of which they are the manufacturers. They claim that the Simplex action contains fewer parts than are usually found in hammerless guns. The main spring performs the double function of spring and cocking lever, and is operated with a cam link at the fore-end connection when opening the gun in such a way that there is little or no friction at point of contact. With a gun of medium weight, the leverage of the barrels is sufficient to open the gun and cock the hammers. By a special process they are furnishing a machine "file-cut" flat rib that has an absolutely dead surface in line of sight. This new departure they draw particular attention to; it removes completely the glare that is noticed on the ordinary matted rib. All parts are interchangeable; are few and simple; can be removed from the gun with an ordinary screw driver. For illustrations, prices, and further details address manufacturers as above.



John Stortz & Son, 210-212 Vine Street, Philadelphia, Pa., have issued and sent us copies of five pamphlets. One is an illustrated catalogue and price list of Painters' and Paper Hangers' Tools which are first quality and fully guaranteed. The line embraces the most salable goods, and some new and very practical inventions. A second book exploits their line of Cement Workers', Paviors' and Contractors' Tools. They state the steel used in the Concrete Cutters and Knives is a shear steel of a very tough nature, made for the purpose. The bronze tools are made of fine phosphor bronze of a composition insuring the best wearing qualities and greatest toughness. The iron tools are made of the best quality of clear, hard grey iron. The catalogue devoted to Plumbers', Tinsmiths', Roofers' and Mechanics' Tools embraces in a comprehensive list the most salable and desirable articles in this line. To avoid confusion, they request that all former catalogues be discarded and that goods be ordered by numbers given in this one. Another book illustrates and describes their extensive line of ice tools for ice men, storage houses, confectioners, ice cream makers, hotel and household use. The last catalogue of the series of five is devoted to Oyster Knives and Oystermen's Tools, also box hooks, box and ship scrapers, crate hammers, tack claws, etc. They state they present this catalogue with the firm conviction that they submit the most complete and satisfactory line of oyster knives and tools on the market. Any of the above catalogues and price lists will be sent to those requesting same.

NEW GOODS AND SPECIALTIES.

VULCAN CHAIN PIPE VISE.

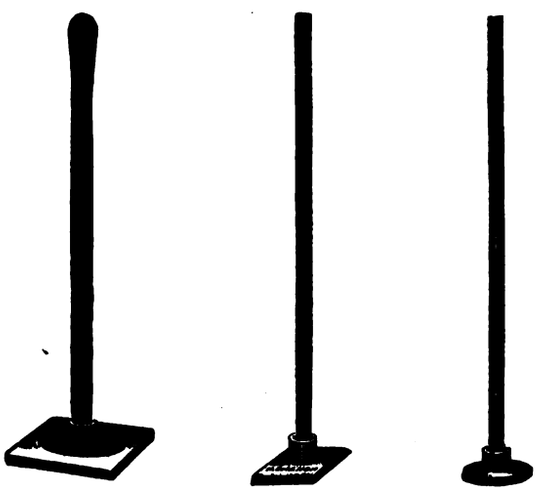
J. H. Williams & Co., 150 Hamilton Avenue, Brooklyn, N. Y., have recently added to their line the new Vulcan chain pipe vise, of which we give an illustration, which has a number of improved patented features. It will rigidly grip pipe or tubing from ⅛ to 2½-inch sizes, inclusive, without risk of crushing the pipe, the chain, which is of great strength, hugging the pipe or other material half-way round. The parts are fine examples of drop forging from wrought steel. If the teeth in the lower jaws be-

METHOD OF USING THE VULCAN CHAIN PIPE.

come dulled by constant use they can be quickly and easily renewed by filing. All parts are interchangeable and fully warranted. The vise base has three 11-16 inch holes for bolting it to the work bench. If needed away from the shop on a job it can be conveniently carried in a tool kit, as its extreme dimensions folded are but 6x8x8 inches, and its weight is but 10 pounds. At the right is a quick pitch screw ⅞ inch in diameter, with square, deep threads finely cut, to which is riveted a strong link chain with projecting pinions ¼x⅞ inch as far as usable. The swinging handle, or wrench, is 6½ inches long over all, increasing to 1 inch in diameter at the widest part of the grip. In operation the chain is thrown over the pipe, and by means of the projecting pivots is caught securely in the chain pockets, when a turn of the handle draws downward the threaded bolt, thus instantly and evenly gripping the tube. This feature of the vise readily accommodates itself to any diameter through the use of a hardened and tempered ball-and-socket-like joint on the under side of the vise base, thus providing a novel, reliable and speedy adjustment. Both jaws are ⅝ inch thick and saw tempered. Attention is drawn by the manufacturers to the following advantages: A ¼ inch of the chain drop, or a quarter turn of the screw, with but slight exercise of strength is all that is required to hold securely any article within limits. It is unbreakable, compact, quick in action, of positive grip, a great time saver and so simple as to give no trouble.

THE LEADER GLASS CUTTER.

Fletcher, Terry & Co., Forestville, Conn., are placing before the Hardware trade the "Leader" Glass Cutter which we illustrate.. It is nickel plated, highly finished, with either Rosewood or Cocobola handles. It is made with a perfect holding device



THE LEADER GLASS CUTTER.

and magazine that enables it to hold twelve extra cutters. To operate, take cutter and place it on a pivot; hold between thumb and finger and drop pivot into slot; push end of pivot flush with straight edge side of holder, and fasten down screw. When cutter is dull or worn out, insert new cutter. It is claimed that with care the holder should last indefinitely and would prove a money saver, as cutters can be bought at a trifling cost. The cutters run on hardened pins or axles, and the extra cutters in magazine are kept separated on the axle and not dumped in promiscuously, which is a common fault of magazine cutters. They are put up in four ways, from the style without extra cutters, to those put up respectively with 3, 6 or 12 cutters, and if not specified, those with 12 cutters are sent.

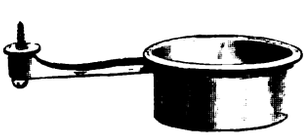
SAND RAMMERS OR TAMPERS.

The Union Elevator & Machine Company, 144 Ontario Street, Chicago, Ill., are the manufacturers of the line of Sand Rammers or Tampers which we illustrate. The Tampers are made from a superior quality of gray iron and steel and are fitted with

STYLE 1. STYLE 2. STYLE 3.

SAND RAMMERS OR TAMPERS.

handles made of hickory or of wrought piping. They are referred to as being of correct design and made with extreme care. Style 1 comes in three sizes, the smallest of which has a base

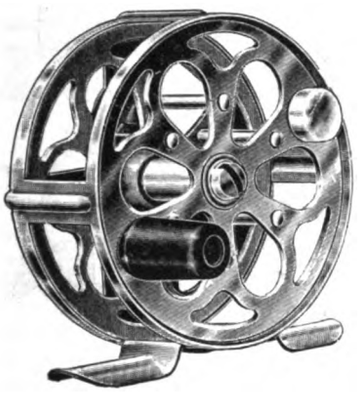


COMBINATION CURB.

8 by 8 inches and weighs 13 pounds, with wood handle, and 15 pounds with pipe handle. Style 2 is made in six sizes and Style 3 in one size. The Combination Curb is made in four sizes.

SEARLS CIGAR ASH RECEIVER.

The Searls Manufacturing Co., Newark, N. J., are placing upon the market something new in a Cigar Ash Receiver, which is made to go under the side of a card table or broad chair arm. We illustrate it by a cut. It is made in copper finish, which is

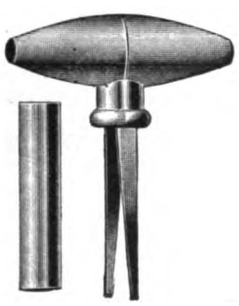


SEARLS CIGAR ASH RECEIVER.

generally the most suitable to look in harmony with all furniture, but if wanted nickled on brass or polished brass, they will be furnished at same price. Inside diameter of cup is 2¾ inches with a depth of 1¼ inches. The cup sets loosely in the ring, so that it may be removed for emptying. When in use the ash receiver should be screwed to table or chair arm with the metal washer next the wood. The cup or tray may be swung out to receive ashes and then conveniently backed out of sight.

Digitized by Google

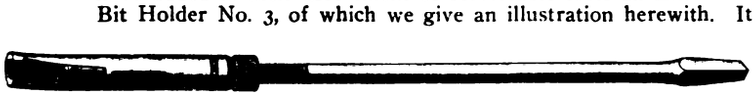
THE "FEATHERLIGHT" REEL.



A. F. Meisselbach & Brother, Newark, N. J., are the manufacturers of the Featherlight Reel, recently patented, which possesses many meritorious features which are useful in facilitating its sale. The reel weighs less than three ounces. The frame and reel seat are made in one piece, having absolutely no screws to jar loose and become lost. It has a removable spool, and back sliding double pointed steel click and steel spindle. The click is made of hardened steel and is claimed by the maker to be equalled only in the most expensive reels. It is finely finished in nickel or bronze.

THE "FEATHERLIGHT" REEL.

"QUICK AS A WINK" CORK PULLER.



C. D. Hawley, 11 Chambers Street, New York, is placing upon the market a novelty in the way of a cork puller, which is designed to supercede the corkscrew in the pulling of corks, which it does in a way that saves the corks and doesn't damage them in the least. Will pull large or small corks with equal facility. It doesn't have to be used like the old-style corkscrew, but in a manner where main strength is not a prerequisite. It takes a motion of rocking to you, and from you, rocking the tines alternately. In opening a bottle of Guiness' Stout, rock the puller down the entire length of the tines, so as to be sure the bottle is vented; then take all friction off the cork by turning puller, cork and all around and around, and the cork will ride up and out, and drop from the puller. A number of positive advantages are connected with this puller, among which may be mentioned: A tight cork can as readily be drawn as any other. There is no unscrewing the cork from the corkscrew; it drops from the puller. No matter how poor the cork is, it comes out whole. The contents of the bottle is not shaken, lessening the danger. It doesn't push the cork into the bottle, but pulls it out every time. It can also be used as a corker, which it will do easily. It makes no damaging hole in the cork, which can be used over and over again. With a shield it can be carried in the pocket as easily as a jackknife.

"QUICK AS A WINK" CORK PULLER.

EXTENSION BIT HOLDER.

The Millers Falls Company, 28 Warren Street, New York, have added to their assortment of serviceable tools an Extension Bit Holder No. 3, of which we give an illustration herewith. It is composed of four parts, or separate pieces. First, a shell with an inside shoulder so shaped as to adjust itself to the shoulders of Auger Bits of varying sizes and shapes. Second, a socket with a square taper hole into which the square shanks of bits are to be inserted. Third, a knurled nut attached to the shell in such a manner as to draw its shoulders down against the shoulder of the bit, holding it very securely in the socket. Fourth, a shank or rod to which the square socket is soldered and pinned. The extreme outside diameter of the shell is something under ⅝ of an inch, so the entire tool will follow a ⅝ or larger bit into a hole. The tool is strong and durable and will be found very useful for plumbers, electricians and others. They are made in 12, 15, 18, 21 and 24 inch lengths, polished and nickel plated and packed snugly in a paper box.

EXTENSION BIT HOLDER.

THE HAYDEN HOUSEHOLD SPECIALTIES.

The Hayden Implement Company, 46 Duane Street, New York, are placing on the market through the Hardware and House Furnishing Goods trades several specialties of a household character which deserve a wide distribution. Fig. 1 represents the Hayden Easy Floor Cleaner, the cleansing part of which is formed from compressed sponge, which is securely attached to a sheet rubber backing about ⅛ of an inch thick, which in turn is firmly attached to a wood block as indicated in illustration. The cleaner has a handle 52 inches long, detachable, which the company recommends for use in the kitchen, bath room and hall floors. Fig. 2 represents the Hayden Felt Brush and Duster, which is designed for sweeping polished, stained, painted or marble floors; the cleansing material is on a 7x1½-inch block, and the felt, cut in strips, is 4¾-inch, extreme length. The brush has a 5-foot handle, with socket and wing nut, the handle being easily detached if needed for dusting furniture. By the aid of this useful appliance, which is recommended for physicians, hospitals and health department work generally, surfaces under chairs, beds and tables are conveniently reached, an important feature in this work being, the dust and germs are not scattered, but are held until shaken out by hand or otherwise. It will remove dust on walls and ceilings, cornices, picture mouldings and frames and similar surfaces. Fig. 3 represents the Hayden B. B. Brush, suitable for polishing shoes, stoves, furniture, metals and silverware. It may also be used for effectually cleaning a blackboard. The bottom consists of six thicknesses of polishing felt, securely fastened to a neat block of wood, varnished over a natural finish. It is soft and does not scratch.

WALSH'S PORTABLE MANGER.

Walsh Sons & Co., 264 Washington Street, Newark, N. J., are the inventors and manufacturers of a Portable Manger—which is the name they give to a meritorious article in the way of horse feeding supplies—which is possessed of a number of advantages over the ordinary article of nose bags to warrant a

WALSH'S PORTABLE MANGER.

rapid substitution wherever introduced. We present herewith an illustration of the same. It is made with a light steel frame and canvas body, which is open so as to admit air freely, not clogging up the nostrils of the horse, for the feed can be reached whether the bag is full or nearly empty; cannot be upset by a tossing of the head, and is free from the mass of decomposed

THE PORTABLE MANGER IN USE.

matter that gathers in the bottom of an ordinary feed bag. It is claimed by the manufacturers to be a humane, sanitary, economical and durable article and one that will outwear three feed bags of any other kind, and in the way of feeding a horse properly is a step in the right direction.

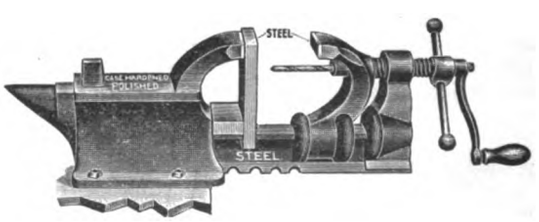
RICHARDS CYCLE BEARING STEEL FRAME GRINDSTONE.

The Richards Manufacturing Co., Aurora, Ill., are placing upon the market the Ball-bearing Steel Frame Grindstone No. 300, represented in the accompanying illustration, a patent on which is already pending. It is a mounted grindstone built on up-to-date mechanical principles. The front legs are formed from one piece of heavy angle steel, matching in construction

STEEL FRAME MOUNTED GRINDSTONE.

the rear legs, which are made of the same material; the upper frame is constructed to form a complete brace for the legs, making it the most rigid frame for the purpose imaginable. The stone is of superior Berea grit, 19 to 22 inches in diameter, and 2 to 2½ inches thick. The entire outfit weighs 85 pounds.

"DOUBLE" SCREW DRIVER BITS.



The H. D. Smith & Co., Plantsville, Conn., are introducing to the Hardware trade one of their original ideas in the way of a tool, which they have denominated the "Double" Screw Driver Bit, and of which they make two sizes: No. 1, small end, ¼ inch wide, for Nos. 6 to 8 screws; large end, 5-16 inch wide, for

Nos. 8 to 12 screws; No. 2, 5-16 inch wide, for No. 8 to 12 screws; ⅜ inch wide, for Nos. 12 to 16 screws. The idea being that while other screw driver bits have a blank square end to go into the brace chuck, and one screw driver end, this "double" screw driver bit is so arranged that either end can be put in the brace and either end used as a screw driver. We present a cut showing full size of No. 2.

CHAMPION VISE ANVIL DRILL AND HARDY.

The Bloomfield Manufacturing Co., Bloomfield, Ind., are the manufacturers of the latest idea in the way of a combination of Vise, Anvil Drill and Hardy, which the company calls the New Banner Tool Combination. Its dimensions are 8½ inches in height, width of jaw 3½ inches, jaws open 6 inches and the depth of throat 5½ inches. The jaws are faced with steel and polished. The top of anvil is case hardened and polished; anvil is

COMBINED VISE, ANVIL, DRILL AND HARDY.

provided with a good steel cut off or hardy; the drill stock will take any common sized square shank drill bits; drills ½-inch holes readily and is capable of drilling both larger and smaller holes. It is easily and quickly manipulated and can be converted from vise to drill instantly and by merely removing the drill bit. The draw bar is made of steel 5-rail and there are no screws or bolts to take out. The draw bar can be taken out and by sliding the loose jaw off and reversing it, it can be used as a portable drill. The tool is guaranteed for one year.

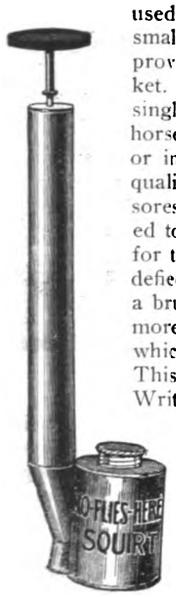
STEVENS CRACKSHOT SHOTGUN.

J. Stevens Arms & Tool Co., Chicopee Falls, Mass., call attention to the fact that they will have ready for the market shortly their new "Crackshot Shotgun" No. 16½, which we show in the accompanying illustration. This is similar to the "Crackshot Rifle" except that it is smooth bore for shot cartridges, and the price will be the same as the rifle. They will make this gun

STEVENS CRACKSHOT SHOTGUN.



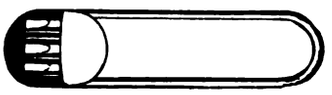
in .32 calibre only. This is referred to as forming an excellent addition to their line of small bore shot guns for shot cartridges, especially as there is a much heavier demand for shotguns of this kind in the Spring and early Summer than at any other season of the year because of birds that destroy fruit and annoy gardeners, as well as rats and squirrels for which these guns are especially designed and which has stimulated the demand for this new gun.

NO-FLIES-HERE.

Under the above name which has been adopted as a trade-mark, the Preservaline Manufacturing Company, No. 41 & 43 Warren Street, New York, are manufacturing a Fly Repeller which is,

"NO-FLIES-HERE."

under any and all circumstances, unsurpassed. It is used to great advantage on horses, mules, cattle and smaller live stock; is absolutely harmless, and has proved itself to be the best fly repellent on the market. Fly nets on horses may be discarded, for a single application, sprayed on, instantly relieves horses or mules of all annoyances from flies, gnats or insects of every description. Its great antiseptic qualities make it a soothing and healing remedy for sores caused by the chafing of harness. It is claimed to be the only successful repellent ever introduced for the dreaded horn fly, a pest which has heretofore defied all efforts to eradicate. It can be applied with a brush, sponge or piece of cloth, but it is easier and more economical to use the Squirt Can or Sprayer, which the company supply with "No-Flies-Here." This gives a uniform coating and obviates all waste. Write to the company for their illustrated booklet giving full information and directions for use. It is an article which should be in every Hardware store and on every farm, in every blacksmith's and livery stable. The great boon "No-Flies-Here" is to high bred horses, makes it alone a necessary adjunct in a livery stable.



KENYON'S HARDWARE NOVELTIES.

J. C. Kenyon, Owego, N. Y., are making for advertising novelties for druggists and others, a number of useful and handy articles which will meet with a ready sale among the side lines

MANICURE FILE.

of a Hardware stock at a good profit. They consist of a Nail File, Fig. 1, which is a bright, finely cut steel nail file in metal

TOOTH PICK.

bound leather case, which, sold in quantities as an advertising souvenir, admit of an advertisement being placed upon it. Fig. 2 is a Tooth Pick Case, with a case similar to No. 1, protects some turned maple tooth picks and keeps them clean for use.

FOUNTAIN PEN HOLDER.

Fig. 3 is a leather Pencil or Fountain Pen Holder for the vest pocket, where it may be fastened for use. These novelties are all susceptible to the advertising feature and should prove attractive.

STEWART IRON WORKS.

We present herewith an illustration of one of the popular styles of Iron Fence manufactured by the Stewart Iron Works Company of Cincinnati, Ohio, and accompany it with a cut

FIG. 1.

showing their new style of Channel Fence Rail, see Fig. 2, with which they have entirely superceded the old style. The new style, which is a three ribbed channel rail in its use retains full strength of picket and rail, with the increased metal holding

FIG. 2.

FIG. 3.

the picket more securely, as well as making a more substantial fence without costing any more than for the old style. We also present in Fig. 3 an illustration showing the Stewart "R" Line Post, which has all the necessary adjustments in setting a fence and making a substantial line post, and has the additional advantage of being largely made up in advance for orders that if specified, enable it to be shipped promptly on receipt of order.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C.,

PATENTS EXPIRED APRIL 24, 1905.

381,533. Soldering Iron. C. R. Danielson, Rockford, Ill.
381,544. Soldering Pliers. O. F. Garvey, Pawtucket, R. I.
381,572. Sad Iron. W. H. Hull, Lawrence Kan.

PATENTS ISSUED APRIL 25, 1905.

787,890. Combined Mop Head and Wringer. C. R. Carpenter, Racine, Wis.
787,996. Combination Door Knob, Door Bell and Burglar Alarm. E. Stewart, Kansas City, Mo.
788,141. Wrench. H. J. Pawling, New Columbia, Pa.
786,157. Broom. F. R. Lay, Indianapolis, Ind.
788,156. Pipe Wrench. J. W. King, Galesburg, Ill.
788,300. Adjustable Wrench. M. C. Wilson, Oil City, Pa.
788,383. Wrench. P. C. Thayer, Oroville, Cal.

PATENTS EXPIRED MAY 1, 1905.

382,025. Machine for Setting Staples. W. J. Brown, Jr., Philadelphia, Pa.
382,027. Device for Sharpening Razors. P. J. Ceasar, Rothsay, Minn.
382,034. Bolt Cutter.—W. L. Dutcher, Paterson, N. J.
382,060. Fork Guard. C. H. Steigleder, Northampton, Mass.
382,090. Fire Pot for Stoves. W. J. Keep, Detroit, Mich.
382,099. Hose Nozzle. I. W. McCaffey, Chicago, Ill.
382,138. Wrench. J. H. Coes and F. L. Coes, Worcester, Mass.
382,194. Lifting Jack. S. Z. Schwenk, Pottstown, Pa.
382,283. Door Check. C. Thomas, Baltimore, Md.

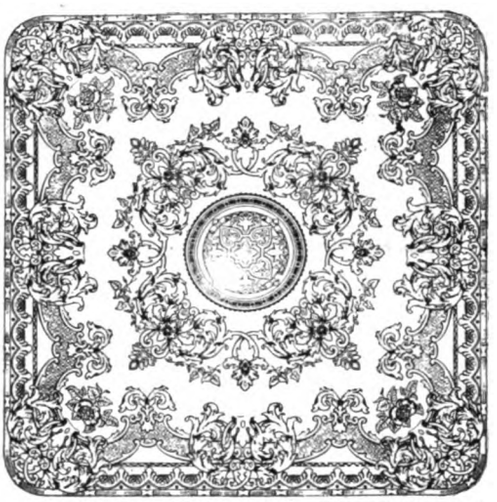
PATENTS ISSUED MAY 2, 1905.

788,575. Nippers, Pliers or Similar Tool. William A. Bernard, New Haven, Conn.
788,599. Nut Cracker. D. L. R. Rochlitz, Hamburg, Germany.
788,600. Hose Coupling. T. C. Rogers, Sistersville, W. Va.
788,603. Shut Off and Carrying Device for Hose. G. D. Rowell, Appleton, Wis.
788,604. Bench Vise. R. J. Schlosser, Warren, Pa.
788,642. Cover for Tea Kettles. H. L. Happer, Minneapolis Minn.
788,680. Popcorn Popper. J. Spray, Bloomingdale, Ind.
788,697. Shield for Sad Irons. C. A. Barrow, Chicago, Ill.

IDOL FACTORY IN NEW YORK.

Though idols are not generally used in this country, New York City is yet the principal manufacturing centre of the world of these curiously wrought and fashioned gods. The supply is amazingly large and varied.

The largest idol factory has its main office in East Ninety-sixth Street, but the manufacture of idols is carried on in several different parts of the city. The plaster department is in East Twenty-third Street, near the ferry slip; the aluminum department is in the metal-spinners' district in Grand Street, and the papier mache work is done in Eighth Avenue. An artist is employed in the house to supply new and attractive designs for idols.

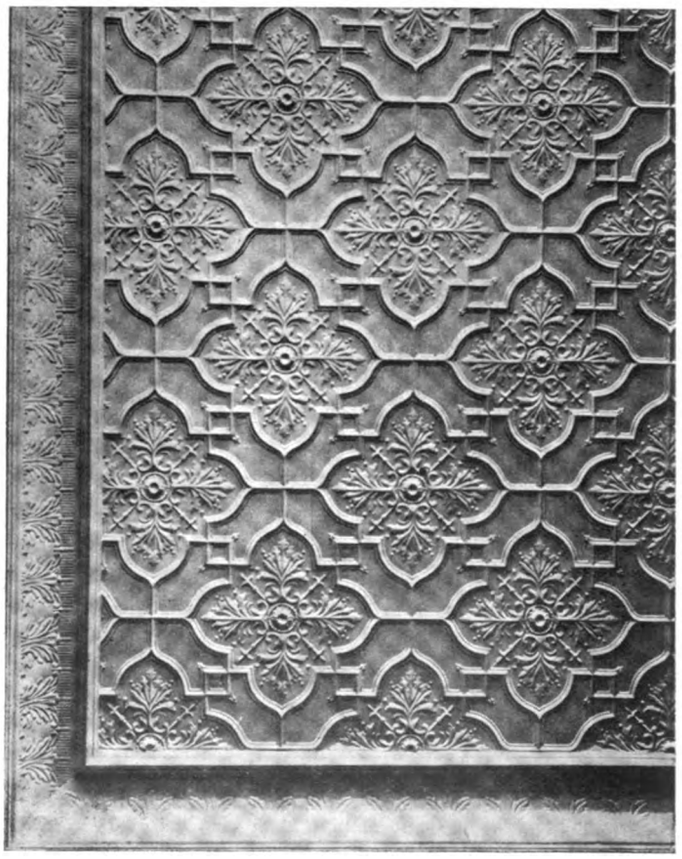


Every idol sent to India, China and Japan, for instance, is made strictly in accord with the figures that belong to the religions of these people. When an aluminum idol, for example, has been completed and is placed beside a bronze and bejeweled Buddha original it requires an expert in metals to discern the difference between the original and the copy. At one time a firm in Glasgow, Scotland, had some small traffic in idols, but it has been found that the American manufacturer of idols can supply the god at a price so much lower that it is not worth the Scotchman's while to make images.

There are more idols shipped to India than to any other country, because in India to-day there is a greater demand for gods than in Japan and China. In every home there is a favorite god; if the family is one of moderate circumstances each member of the family has his little god, and when the god is made of plaster there are many broken and these are immediately replaced. Thus the trade in idols is ever flourishing.

However, no matter how many idols are turned out at the factory per day, there are three figures that are never made there. These are the figures belonging to the Trinity. Never are these figures made in other metal than bronze, and that in India, for so sacred are they to the people that foreign workmanship defiles and insults each. But without these three figures there are so many wonderful, big, queer-looking dolls in this factory's different departments that one believes himself to be in a waxworks rather than an idol factory. That such a vast number of idols as line the shelves around the rooms can be made, shipped and sold to foreign countries is almost beyond belief. The average shipment of idols to various countries is from three to nine hundred figures a month.—*China, Glass & Pottery Review.*

COOPER & McKEE'S STOVE BOARDS.



Cooper & McKee, 113 to 119 Lorimer Street, Brooklyn, N. Y., are preparing for next Winter's trade already by taking time by the forelock and making up a stock of stoveboards in ample season for early deliveries. They are manufacturing for 1905 a

full assortment of Zinc embossed, paper lined: Tin embossed or crystalized, wood lined or paper lined in all their handsome patterns, one of which is illustrated herewith. Send for their new catalogue for 1905.

ARTISTIC METAL CEILING AND WALLS.

Northrop, Coburn & Dodge Co., 40 Cherry Street, New York, are the manufacturers of the fine, artistic, high-grade Metal Ceilings and Walls suitable for all classes of buildings, and indicated by the design which is shown herewith from their new Catalogue No. 8. They state in this connection that "they would be pleased to advise you regarding the pattern best adapted for your ceilings or the cost of the same when a diagram of the room is

ARTISTIC METAL CEILING.

sent, showing its size at ceiling line, mentioning its use, height and size of cornice desired, also size and location of girders, if any. When these particulars are received, a blue print copy of the ceiling plan will be sent the customer, showing the arrangement of the pattern, the spacing of furring strips, sections of cornice and list of items for each room." The ceilings have all the improvements in construction and refinement of design that long experience has proven desirable. The design we illustrate is their No. 233,

THE HOT SPRINGS CONVENTIONS

Arrangements are being rapidly perfected for the joint conventions of the Southern Hardware Jobbers' Association and the American Hardware Manufacturers' Association, which will be held at Hot Springs, Va., on the 6th to 9th of June. Secretary-Treasurer C. B. Carter of Knoxville, Tenn., advises that hotel reservations have already been made for upwards of 500 and that he estimates the additional reservations—including those who will go without making reservations in advance—will bring the total attendance up to at least 700, this of course including the jobbers, manufacturers, their traveling men and the ladies. There will be a larger representation of the fair sex than at any previous convention. When one considers the attractions and beauties of Hot Springs, Va., the comfort and conveniences of the Homestead Hotel and the unexcelled cuisine arrangements and elaborate variety of table fare, is it to be wondered why so many are going to the convention this year? The most hospitable reception and treatment accorded the manufacturers, their traveling men and their ladies, by the members of the Southern Hardware Jobbers' Association, would almost insure the attendance of as many as do now attend, were the convention called to meet in some uninhabited island in mid-ocean or even in some of our native or foreign deserts. Therefore, how very much more attractive is an attendance at the conventions when they are held in such ideal locations and under such favorable auspices as Hot Springs, Va., and the Homestead Hotel.

A partial outline of the programme of the convention has been announced, a copy of which is given herewith. Inasmuch as the jobbers' part of the programme could not be completed until the manufacturers had made their arrangements, there will be a little longer delay than usual in getting the official programme printed, however, they will be issued in ample time.

The railroads have granted a rate of one fare for the round trip from all points south of the Ohio and east of the Mississippi Rivers. From all other sections, the rate will be one and one-third fare for the round trip upon the certificate plan reduction.

Those who are going to attend the conventions and who have not already notified Secretary C. B. Carter, should do so at once, in order that their names may be placed in the Attendance Book and proper badges provided. This date is also desired in order that special Pullman cars may be provided at convenient points.

PROGRAMME.

Morning Session.

TUESDAY, JUNE 6, 1905, 9.30 A. M.

Executive—for Jobbers only, in the Breakfast Room of the New Homestead Hotel.
Reading of Minutes of 1904 Convention.
Annual report of the President.
Report of the Secretary-Treasurer.
Report of Transportation Committee.
Report of Press Committee.
Report of Grievance Committee.
Report of Manufacturers' Committee.
Report of Membership Committee.
Report of Supply Committee.
Report of Metal Committee.
Report of Special Committee.
Report of Executive Committee.
Read by O. B. Barker, Lynchburg, Va.
Appointment of Special Committees.
Communications.
Miscellaneous Business.
Discussion of Executive Committee's report. Each speaker limited to five minutes.
Opening of Question Box.
General Discussion.

10.00 A. M.

Meeting of the Executive Committee of the American Hardware Manufacturers' Association.

TUESDAY AFTERNOON SESSION.

Convention Hall—New Homestead Ball Room.

Delegates and visitors will please assemble promptly at 2:30 P. M. The manufacturers, their representatives and the ladies are cordially invited to this session. Meeting called to order by the President of the American Hardware Manufacturers' Association.
Prayer—Rev. Dr. J. S. Scott, Hot Springs, Va.
Roll Call.
Chorus—"America."
Address of Welcome by the President—W. M. Crumley.
"Welcome to Hot Springs"—J. T. McAllister, Hot Springs.
Response—By a member of the American Hardware Manufacturers' Association.
Address of Welcome to the Manufacturers—By a member of the Southern Hardware Jobbers' Association.
Response—By a member of the American Hardware Manufacturers' Association.
Report of Reception Committee, Irby Bennett, Chairman.
Introduction of New Members, Visitors and Guests.
Impromptu Addresses.
Informal Reception of Manufacturers, Jobbers and their Representatives. (During this reception each person is requested to register in the Association's Official Register, at which time the Sergeant-at-Arms will distribute, one to each person, the badge for those in attendance at the Convention.)

TUESDAY EVENING.

Entertainment Features to be supplied by Reception Committee.

WEDNESDAY MORNING SESSION.

Executive—For Jobbers Only.

Breakfast Room of the New Homestead, 9:30 A. M.
Restricted Prices—W. W. Webber, Webber-Ayers Hardware Company, Fort Smith, Ark.
Open Discussion. Each speaker limited to five minutes.
"Increasing Expenses vs. Decreasing Profits."—R. M. Dudley.
Open Discussion. Each speaker limited to five minutes.
Opening of Question Box.
General Discussion.

EXECUTIVE SESSION MANUFACTURERS.

10.00 A. M.

(Strictly executive, and open only to members of the American Hardware Manufacturers' Association and their accredited representatives.)
Reports of Committees and Discussions.

WEDNESDAY AFTERNOON SESSION.

Joint Session of Jobbers, Manufacturers and their Representatives, the Southern Hardware Jobbers' Association being the guests of the American Hardware Manufacturers' Association.
Convention Hall, New Homestead, Ball Room, at 2:30 P. M.
"Freight Matters of Interest to Manufacturers and Jobbers."—E. B. Pike, Pike Manufacturing Co., Pike, N. H.
Open Discussion. Each speaker limited to five minutes.
"Restricted Prices."
General Discussion—By both Manufacturers and Jobbers.

WEDNESDAY EVENING.

Entertainment Features to be supplied by Reception Committee.

THURSDAY MORNING SESSION.

Executive—For Jobbers Only.

Breakfast Room of the New Homestead Hotel, 9:30 A. M.
Discussion on Committee Reports.
"How to Enforce Uniform Terms."
Discussion opened by a member of the Southern Hardware Jobbers' Association.
Open Discussion. Each speaker limited to five minutes.
Mutual Fire Insurance in the Southern Hardware Jobbers' Association.
Open Discussion. Each speaker limited to five minutes.
Opening of Question Box.
General Discussion.

EXECUTIVE SESSION MANUFACTURERS.

10.00 A. M.

(Strictly executive, and open only to accredited members of the American Hardware Manufacturers' Association and their direct representatives.)
Communications.
Unfinished Business.
New Business.
Adjournment.

THURSDAY AFTERNOON SESSION.

General Session.

Convention Hall, Ball Room, New Homestead Hotel, at 2:30 P. M.
"Where Are We At?"—W. P. Smith, of Mead & Smith, Rogersville, Tenn.
"Advantages and Opportunities Afforded by the South for Manufacturing."
Discussion opened by Harry Wise, "Tradesman," Chattanooga, Tenn.

Digitized by Google

"Observation of a Traveling Salesman."—By a representative.
Opening of Question Box.
General Discussion.

THURSDAY EVENING.

Entertainment Features to be supplied by Reception Committee.

FRIDAY MORNING SESSION.

EXECUTIVE—For Jobbers Only.

Breakfast Room of the New Homestead Hotel, 9:30 A. M.
Miscellaneous Business.
General Discussion.
Report of Special Committees.
Election of Officers.

FRIDAY AFTERNOON AND EVENING.

Entertainment Features to be supplied by Reception Committee.

THEY DID IT IN ONE DAY.

Quite a novelty in stock taking was introduced by the King Hardware Company, at Atlanta, Ga.—the parent house. This is the only house in the South carrying the immense stock that the King people do that have ever adopted this feature. They call in all traveling men, close the doors and everybody gets down to toil, and in one day's work a perfect inventory has been made of the entire stock. Just twelve months ago the King people inaugurated this system, and it proved so satisfactory that they again used it this year, only adding a few extras, such as having a regular banquet dinner served right in the store for over fifty employees.

This is quite an original feature introduced by an "up-to-date," progressive business house, and is but one of the many things that plainly demonstrate progression and business strides fairly up, and even ahead, of twentieth century methods, but that is the only way the King Hardware Company are now content to do business. They are determined to be thoroughly metropolitan every day in the year. That is what the public wants, and that is just what the public will get if they do business with these people.

BUILDING BOOMS IN MANY CITIES.

Tabulated statistics in the American *Contractor* reveal that despite the fact that last year was considered exceptional in the increase of building operations in the United States, official reports for March, 1905, show an enormous volume of business in nearly every section of the country.

In comparative figures the following table shows the value of building operations for the same period of this and last year:

	March, 1905, Cost,	March, 1904, Cost,	P. C. Gain	P. C. Loss
Buffalo, N. Y.	$ 422,683	$ 564,271	—	25
Chicago	6,116,655	2,037,830	200	—
Cleveland, Ohio	858,065	501,365	71	—
Cincinnati, Ohio	1,274,225	752,340	69	—

BUILDING PROSPECTS OF 1905.

All signs have favored the expectation that the present year will witness great if not record-breaking activity in building construction. Special reports to Bradstreet's from 108 cities and towns of varying size in the United States point to an expenditure for new buildings, whether State, municipal or private, during the year 1905, aggregating $455,000,000, a gain of 15.7 per cent. over the, as near as can be ascertained, actual value of the buildings erected, repaired or enlarged during 1904 at the identical cities.

It might be observed that the greatest expansion shown is that reported in the West. The gain there indicated is 24 per cent., as against a gain of 17 per cent. in the Southern States, 11 per cent. in the Middle Atlantic States and 9 per cent. in New England. The immense expenditure here indicated may be variously regarded. If, for instance, the grand aggregate at 108 cities is to be taken to indicate a country-wide development, some interesting reflections on the total probable expenditure this year for building are possible. If the aggregate of $455,000,000 is taken to cover, say, three-fourths of the country's total expenditure, a grand aggregate of about $600,000,000 for building is here foreshadowed. A fair estimate of the cost of an average building is probably 40 per cent. for material and 60 per cent. for labor; but if half is allowed to each of these items, a total of $300,000,000 for material, such as lumber, brick, stone, iron, Hardware and paint, is possible, and a like sum must be credited to labor.—*Bradstreet's.*

VENTILATION.

Ventilation, says Robert Bennett in the *Canadian Architect,* is a term applied to the method by which a due supply of fresh air is maintained in buildings and other confined places. The word was invented about 200 years ago by Dr. Desaguliers, a well-known scientific man of that time, who devoted a great deal of time and money and skill toward improving the sanitary conditions of buildings, which at that time were considered very bad. He invented a "fanning wheel," or, in other words, an "air propellor," which was worked by manual power, and the man who worked it was called the "ventilator." The word has since been divorced from its original meaning, and is now used to signify an opening in a building through which air may, or may not, pass, according to circumstances.

Everybody knows that a fresh supply of air is necessary for all living things, even for plants and vegetation. To cover the head with a cloth for a short time produces a sense of oppression, and on its removal a feeling of relief is experienced. The heat of the person's breath causes oppression. People often say of a crowded building "it is too hot," whereas the discomfort is caused chiefly from the impurity of the atmosphere.

Dwelling houses, too, suffer from lack of proper ventilation. It has often been remarked that we are apt to prize but lightly what we possess in abundance, and it is a fact that cannot be denied that the two most important foods on which human life depends—viz., pure air and pure water, are by the great majority of us least esteemed. These two foods, more especially the former, are so abundant that we need pay very little attention to obtain them. We should recognize the importance then of supplying every building and habitual dwelling with proper ventilation. In thousands of houses in our great cities the most elementary principles of ventilation are systematically ignored.

People who would take the greatest care not to drink polluted water are yet careless of breathing impure air, and seem to forget that one may be quite as dangerous as the other—personally I am of the opinion that impure air is really more dangerous than impure water, since the air is taken directly into the lungs and comes in contact with the blood more speedily than water which enters the stomach. I do not propose to write with medical authority at all, but simply from a little observation of my own. I believe that ventilation is an exact science, admitting of exact results, and everybody should be induced to believe the fact that bad air is detrimental to health.

Negligence—Accident—Machinery.

The Supreme Court of Indiana held, in the recent case of The Buchner Chair Company vs. Feulner, that the mere fact that the plaintiff, a boy fifteen years old, continued to operate an ungarded piece of machinery in the manner he had been instructed to use it, and that such use obviously threatened an injury which could yet be avoided by care, and finally resulted in injury to him from his sleeve catching in the machinery, did not establish contributory negligence on his part as matter of law.

SAFETY RAZOR DISPLAY CASES FREE.

Kampfe Bros., 8 Reade Street, New York, by their recent proposition give a fine opportunity to their customers to obtain one of these following beautiful Show Cases, free of all charge for the same, by following the plan of ordering a limited assortment of Kampfe's "Star" Safety Razors and Supplies. The first assortment, "A," is comprised in the following:

6 only—No. 1 Star Safety Razors, complete.
3 " No. 2 Star Safety Razor Blades.
2 " No. 3 Stropping Machines.
2 " No. 25 Star Stroppers.
2 " No. 26B Diagonal Strops.
1 " No. 4 Jewel Case, one blade.
1 " No. 5 Star Case, two blades.
1 " No. 6 Star Case, three blades.
1 " No. 7 Star Case, four blades.
1 " No. 9 Traveling Case, two blades.
1 " No. 24 Combination Outfit.
2 Tin Signs, 1 Counter Mat and Catalogues.

DISPLAY CASE, ASSORTMENT "A."

and Show Case free. The second assortment, "B," gives a much more elaborate display, and a much larger case. The assortment of goods displayed gives an idea of the entire line and fa

2 " " 40/2 Tourist Case.
2 " Signs.
2 " Mats.
50 " Catalogues, and Show Case, free.

GINGER TALKS OF A SALES MANAGER TO HIS MEN.

The chief quality of a successful salesman is earnestness. The reason you are not selling more goods to merchants is that you haven't all sold yourselves yet. You've got to believe in your product yourself before you can make anyone else believe in it. It's no use to try to start a flame of enthusiasm in somebody else if your own mind is full of icy doubts.

Why did that man over on the avenue turn you down yesterday morning? Because he could tell by the look in your eye that you half expected him to do so. And the fellow you called on in the afternoon sized you up in the same way. You didn't get anywhere near him. He listened to what you said—but it was with a cold and fishy eye. True, he nodded his head in assent as you talked—but two minutes after you started his mind was wandering. And when you came to put your finger on him at the end to get the order signed, he was like the Dutchman's famous flea—he wasn't there.

You had lost him. You hadn't impressed him. Why? Because you hadn't been impressed yourself. And he knew it. You couldn't fool him. He didn't feel any electric sparks of enthusiasm jumping the space from your mind to his. Nothing but a live wire could give him a sensation, and you were trying to magnetize him with words of wood.

You put up a smooth-enough line of talk, yes—but there wasn't any conviction back of it. It takes belief, earnestness, enthusiasm, warm human personality, to sell goods. If it didn't we'd discharge all our salesmen and enlist a force of phonographs, or a troop of wooden Indians.

Now here's our word to you: Don't you try to sell any more goods to business men. You go off around a corner somewhere, where you can be alone, and sell yourself a line of the article we make. Think over it's value; realize it; burn it into your mind. Enumerate it's good qualities, one after the other; get a realizing sense of each one. Consider what our product will do for a business man, the money it will make for him, the saving it will effect. Sweep out of your mind, like so many cobwebs, any apologetic feeling regarding it. You are not trying to persuade the business man to waste money. You are not trying to trick or cajole him into doing something that he cannot afford to do. You are selling him something that he needs. You are helping him to increase his profits. You are doing him as great a favor as he does you. Say these things over to yourself. Think them in your heart; realize them—they're all true. Light the flame of your enthusiasm and fan it into a good brisk blaze. Then, when you've sold yourself—when you believe in your own proposition, heart and soul—go back and tackle that same man a second time. Greet him quietly and courteously. Tell him that you don't believe you made your proposition quite clear when you saw him before—and begin again. You are in earnest this time. He'll feel the change. There'll be an atmosphere about you that will carry respect. He'll listen to you. His mind won't wander any more than the mariner's needle wanders from the pole.

Make your arguments actual and personal. Bring them home to him. Stab every point into his mind so that he can't miss it or forget it. Make him feel each one.

There's as much difference between understanding a thing theoretically and having a practical sense of it as there is between a boxer's love-tap and a prize fighter's deadly punch in the solar plexus. And it takes solar plexus punches to sell goods these days. Merchants are hard-headed and thick-skinned, and they're all in training against you salesmen. You can hit as smilingly and as gracefully as you please, but you've got to hit hard to get inside an up-to-date business man's guard.

You haven't half made your point with your man if when you get through he looks upon our product merely as something he would do well to use in his business. Make him feel that he can't get along without it. Make him see that he's losing valuable time and labor in his place of business—that real dollars are slipping through his fingers every day he is without it. Many a man who won't reach out very hard for an extra dollar will grab hold mighty hard of the dollar he already has, and holler murder if anyone tries to take it away from him.

If you can once show a man that he is actually losing money, and that you can stop the loss, you won't need to supply him with any enthusiasm—he will take fire himself like a lace curtain in a gas jet. But you will have to be in earnest in making these facts plain to him. Enthusiasm—conviction—earnestness—these are the qualities that sell goods, and do everything else worth doing. "Nothing great was ever done without enthusiasm."—Worthington C. Holman in System.

THE STERLING CARPET SWEEPER.

The Streator Metal Stamping Co., Streator, Ill., are placing upon the market an entirely new line of Carpet Sweepers, which are a complete novelty in the line of sweeper construction. Owing to the method of construction, they claim to be able to correct many of the faults contained in sweepers now on the market, and to give many advantages over every other sweeper made. The Sterling Carpet Sweeper here illustrated is made entirely of cold drawn sheet metal which is so formed under dies as to produce the lightest, stiffest and neatest possible form for a carpet sweeper case. The entire top of the case is made of one piece of sheet steel, riveted solid and covered with handsome nickel plated trimmings, displaying no joints. The case is so formed and reinforced as to make it very rigid so that it will withstand any service. The wheels are drawn out of one piece of metal and made so as to run perfectly true. They have a solid center which is heavily nickel plated. It is therefore always clean, having no place for dust or dirt to lodge as in the ordinary cast wheels with arms of other sweepers. The bearings are of the roller type constructed of a sheet steel drawn

FIG. 1. "STERLING" CARPET SWEEPER, MODEL "A."

case enclosing a bronze tube into which are inserted the steel roller pins, is perfectly dust proof and need never be oiled. The broom action is constructed so as to do away entirely with axles passing through the case. The wheels are carried on short studs, which are riveted solid into a flat place which is connected directly to a steel wire spring which gives the spring to the broom action and which also gives the closing spring to the dust pans. Among the improvements is the anti-raveler. This consists of a sheet steel drawn cap which entirely covers the end of the Brush Roller and bearing, completely enclosing all movement of the brush roll at the bearing point, thereby entirely doing away with any motion which will pick up threads and wind them about the axle or bearing. The cap snaps, with light ac-

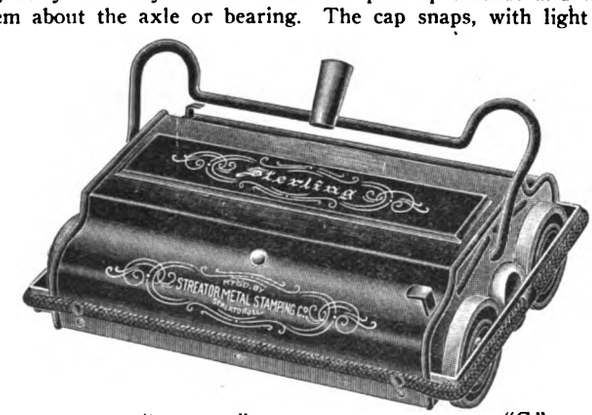

FIG. 2. "STERLING" CARPET SWEEPER, MODEL "C."

tion, between the case and the end band, and is locked securely into the brush opening in end of case, allowing the easy removal of brush, if desired. The Anti-Tipping device prevents all tipping of the sweeper when drawn back quickly, or when sweeper comes in contact with a wrinkle in the carpet. It is constructed by embossing the ends of the case so that when the bail of the sweeper is in sweeping position it frictions against the embossed portion of ends. The protecting band which encircles the sweeper, lies in a groove formed in the side of the case (on which has been granted letters patent), and is held firmly by projections formed in the end band, which insures against its displacement at any time. The band is attached securely to the case, but can be easily removed. It fully protects the furniture from being marred by the sweeper. Figure 1 shows the Sterling, Model "A" which is beautifully finished in high-class colored enamels, handsomely decorated in gold with heavily nickel-plated trimmings, including wheels. It contains all improvements, such as roller bearing, broom action (doing away with axles through case), anti-raveler, anti-tipping device, and other improvements. Figure 2 shows the Sterling, Model "C" which is claimed to be the very best that can be produced for the price asked, the sweeping qualities being equal to the very best sweepers made. It is nicely finished in colored enamels and decorated in gold, with fine nickel-plated bail and trimmings. It contains the special features such as anti-tipping device, solid steel wheels with parallel bearings and several other important

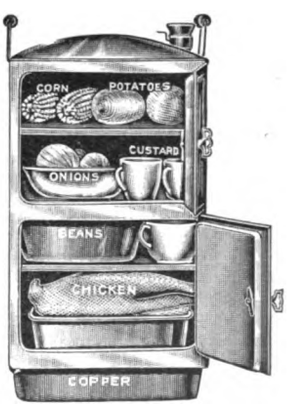

FIG. 3. DISPLAY STAND, NO. 4.

improvements new in sweeper construction. Figure 3 shows the display stand No. 4. This stand is made entirely of steel nicely finished in black Japan, with a handsome nickel-plated sign hanging in a frame over sweepers. It will hold four sweepers, is self-supporting and requires but little space. When requested, the manufacturers will include this stand gratis with the first order for one dozen Sterling Sweepers assorted, but to be shipped at one time.

IDEAL SQUARE STEAM COOKER.

The Toledo Cooker Co., Toledo, Ohio, is introducing to the Hardware and House Furnishing Goods trades the Ideal Square Steam Cooker, of which we present an illustration. Economy

IDEAL SQUARE STEAM COOKER.

of space is important in all flats and these difficulties warrant the use of an Ideal Cooker. All kinds of cooking can be accomplished at the same time. It cooks a whole meal over one burner on gasoline, oil, gas or ordinary cook stove, or the partitions can all be removed and used as one large vessel which is a great advantage when a large turkey or ham is to be cooked. The cooker is made of the finest grade of one and two cross charcoal tin plate, with drawn seamless copper bottom. It is provided with a whistle which obviates entirely the necessity of watching it to see that the water does not run low. It has a pressed seamless dome top so constructed that the condensed steam will immediately run to the sides and down the bottom into the water. By sending for their latest catalogue you will find a large variety is made in shapes and sizes to supply every want.

AMERICAN WOMEN INVENTORS.

The American woman has done much in the way of invention and has shown her ingenuity in a thousand ways, as the records of the United States Patent Office show. The hospital bed and the reaping machine are the better for her work, and the question of irrigation, as applied to the great plains of the West, is of no less interest to her than the hygienic feeding bottle. Up to ten years ago it was the exception to find a woman's name in the patent books, and previous to that time the few patents applied for by women were, in some degree, expressions of vanity.

The first patent granted to a woman in America was dated in 1809 and was for a process of weaving straw. It was issued in the name of Mary Keis, but whether it was ever put upon the market or was otherwise used is not known. Six years later came Mary Brush with an application for a patent for a corset, and the application was granted. It may be added that there has been no one article so often patented by women as the corset, although the number has been somewhat lessened since the "straight front" came in.

After these first small efforts the American woman developed a wider interest in life and matters of fashion gave way to diet, and patents were issued to women for baking powders, ice-cream freezers and cooking utensils. With the success of these first patents women were encouraged and patents were taken out for rocking chairs, hospital bandages, for reaping and mowing machines, for conveyors of smoke and cinders, for dam and reservoir construction, for safety pins and hammocks.

The most important and profitable patents that have been issued to women were not intended to reform the human race or make either great fortune or fame, but were the outgrowth of need and experience and ability to cope with it. The woman clerk in the New York store who invented a profitable delivery system had felt the need of one, and knew all the practical details. That is why the invention was a success and why she made a fortune. The same is true of the woman who invented the flat-bottomed paper bag that is now used almost exclusively in American stores.

Most of the patents haven't cost overmuch capital, brain or time. They just make one little detail in life run smoother and are consequently of value. Of such conveniences may be mentioned glove buttoners, waist supporters and perforated hat-bands. But it is not only the housewife and the clerk in the store who has shown inventive ability. In many factories, if a woman has an idea in the way of an invention that will improve the work or lessen the cost of production, she will receive royalties for the use of her patent.

A large number of the most profitable inventions that have been put on the market in recent years have been patented by women, not women of great genius and wide scientific knowledge, but mainly clever working girls or women who are employed in stores or shops or are interested in agriculture. Each profession in which women have succeeded has brought to light a score of inventions to lessen labor and increase profits. Women school teachers have invented blackboards, erasers, desks, chairs, book-rests, school-bags and the like; women nurses and physicians have patented folding tents, hospital beds, facilities for improved sanitation and all manner of conveniences for invalids, and busy housewives have designed washing and ironing conveniences, fire-kindling compositions, butter workers and knives and forks and spoons for swift, easy work, besides measuring cups, churns and apple parers.

It is easy to discover the reason why an American woman should invent dress systems, improved methods of cutting patterns, helps in housefurnishings, novelties in the finishing of gowns and the dressing of hair, but it is likely to astonish even those who know her well to learn that the American woman has patented a complicated combination lock, a hammer-guard for firearms, a system of barrel-topping, a street-cleaning truck and various machines used in mining. But all these things have been invented by her and the story is found in the records of the American Patent Office where it may be read of all men.—*American Exporter.*

SIMMONS HARDWARE COMPANY.

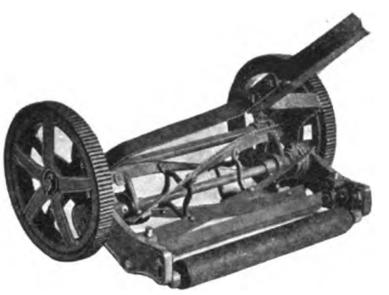
Organizes Loan Association for Operatives From Which They May Borrow When in Need.

To protect its employes from money lenders, the Simmons Hardware Company has established a loan association through which the employes, who are members, may borrow funds at a low rate of interest. They also may deposit their savings with the association and receive 6 per cent. interest.

After the association was started by George W. Simmons, general manager of the company, it was turned over to the employes who elected officers and a Board of Directors. None of the officers of the Hardware company is now connected with the organization, except that the company stands responsible for the association.

"Because our company has shown itself ready at all times to protect its employes from money lenders," said Mr. Simmons, "they refuse to make loans to those employed by our company.

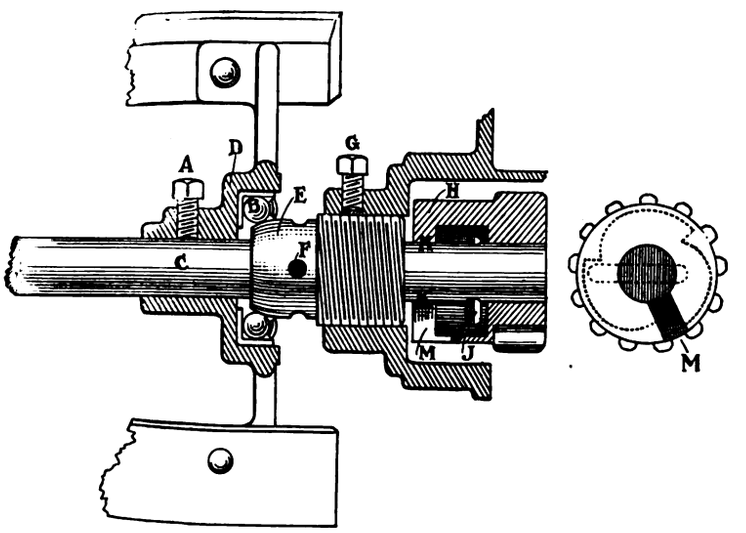
"By our action we have saved many of our men from financial, and, in some cases, consequent moral ruin. The association as now conducted by the employes was organized under the direction of Mr. Haslam, our counsel.



"Employes may become members by depositing a small amount each month. The money deposited will draw 6 per cent. interest, with the company's guarantee. Members have the privilege of borrowing from the association at a low rate of interest. Members may withdraw their savings at any time with due notice.

"While the company is ready to do what it can to promote interest in the organization, it lets the employes act entirely free in the matter and manage the association in their own way."

At present the association has more than 100 members and a considerable amount in its treasury.



GLOBE LAWN MOWER & MFG. CO.

The Globe Lawn Mower & Mfg. Co., of Reading, Pa., are manufacturing an improved lawn mower having certain distinctive improvements not to be found in any other lawn mower on

GLOBE LAWN MOWER.

the market. Among these is an improved pinion clutch, cone and handle bar fastening, for which patents are pending. A patented improved cutter bar adjustment is the main feature in their lawn mower, whereby the cutter bar can be adjusted to the reel blades by a differential screw device, so simple that any person can adjust the same with very little trouble. The pinion is acknowledged by experts as being another great improvement. The cut above shows a double bearing pinion clutch H, and the adjustable case hardened ball point steel cones (E) and the steel balls (B). By the use of the ball point cones in the Globe machines, whether the side frames be in perfect align or not, the cones will always have a perfect bearing, because the ball point gives a perfect bearing to the balls, as they must ride in a circle as on a sphere, while on a flat or concave surface the cones not being in perfect alignment the balls would naturally ride on an ellipse instead of a true circle, and thus cause increased friction. The handle bar cross piece fastener of this machine is certainly a great improvement over the old-style tenon, which is generally inserted in cross piece. The fasteners are so arranged that the cross piece and handle bar are rigidly held in position and can be very easily tightened in the event of their becoming loose. This fastening arrangement is very simple, ornamental and durable.

JAP-A-LAC

REGISTERED TRADE MARK

"WEARS LIKE IRON"

"THE JAP-A-LAC HUSBAND

WILL HAVE A STRING AROUND HIS FINGER THIS SPRING—YOU TAKE IT OFF."

A FEW POINTS WORTH REMEMBERING

We have told you a good many things about JAP-A-LAC, and trust you have very carefully digested what we have said.

We want particularly to impress upon you the profit producing possibilities of this commodity, and wish to point out in a few words why JAP-A-LAC is a more profitable article than any other similar commodity on the market.

JAP-A-LAC is the original advertised colored varnish. It made its appearance about five years ago, and, realizing its merit, we commenced advertising it at once. We know there is nothing equal to it in merit, and the advertising we have given JAP-A-LAC during the last five years has placed it before the American people in the strongest possible way.

Millions of people throughout the country use JAP-A-LAC, and there are a great many more who would use it, if they could get it in their local stores. We have new calls direct from consumers every day, and they are constantly increasing in number.

JAP-A-LAC has back of it over $100,000 in advertising, and we are spending $60,000 during the Spring months. This amount of money, taken in connection with what has already been spent, is sure to put JAP-A-LAC on a different plane from anything else.

If you are handling some other colored varnish, don't hesitate to put in JAP-A-LAC. You will sell JAP-A-LAC anyway, and also sell more of your other goods. Every customer who comes into your store for JAP-A-LAC is a possible buyer of something you handle, and customers are the life of your business.

If you take hold of JAP-A-LAC in the proper way, you can use it for obtaining new customers. The JAP-A-LAC dealers look upon it as a customer getter; it is. Every customer we send into your store for JAP-A-LAC may pay you a great many dollars in profit during the term of his business relation with you.

It is up to you to use our advertising if you want its benefits. Don't forget JAP-A-LAC *spells profit.*

The money which we spend in advertising is spent for the dealer. Did you ever think of it in this light?

THE GLIDDEN VARNISH COMPANY,

MAKERS OF HIGH-GRADE VARNISHES FOR ALL PURPOSES

ADDRESS: 641 WILLIAMSON BUILDING,

CLEVELAND, OHIO

JOSEPH BRECK & SONS NEW CATALOGUE.

Joseph Breck & Sons, 47 to 54 North Market Street, Boston, Mass., have recently issued the fourth edition of their illustrated catalogue of Agricultural Implements, Machines, Hardware and Wooden Ware. The catalogue is a pretentious one, covering 368 pages 8x11 inches, and embracing a wide assortment of goods suitable to the complete stock carried by them, and with which they are thoroughly identified. The index alone fills 28 columns. The business has been established ever since 1822 with warerooms and store houses which cover at this time nearly four acres of floor space. The seed part of their business is described in a separate catalogue.

TRADE SCHOOLS THE POOR BOY'S COLLEGE.

No one will deny the importance, says the Gloucester (Mass.) *Times,* of properly conducted trade schools, schools that will take their raw material of greenhorns of sufficient natural intelligence and turn out as a finished product capable, skilled workmen. It is the crying need of the industrial world everywhere to-day. The practical education gained in a trade school is an asset that will show tangible results as long as its possessor has his allotted years of active usefulness. The average college graduate, unless he has fitted for some special line of educational endeavor, is hardly more than a $5 a week man during the period of his novitiate in the commercial or industrial world. His fellow worker, to whom a college education is a closed book, is his equal, if not superior, as a wage earner. Could the college man also go to a trade school, he would speedily find himself splendidly equipped to take up his life work in the ranks of skilled labor. The trade school is the poor boy's college.

✤

Instead of tightening a belt by cutting out a piece certain up to date shops now apply a belt which is originally a foot or 15 inches too short and insert in the gap a short section of the same width. In the toolroom are kept a variety of lengths of each width of belt used in the shop, and when a belt becomes slack a shorter fill-in piece is substituted, this being repeated as often as may be necessary. The removed sections may be used in other belts.

WOMEN IN INDUSTRY HERE AND IN ENGLAND; MAKING CORES AND CHAINS AND WORKING AT THE LATHE.

In addition to the lighter forms of industrial work in which the employment of women is an established custom, they are now becoming associated with more exacting occupations. At a brass factory in Detroit they are reported to have made a success of the lighter kinds of drilling, the adjusting of washers and screws on various devices. The shaping from loose sand of cores for hollow brass tubes and other processes requiring quickness rather than strength. Their regularity of attendance as compared with that of young men formerly engaged on the same work has led to their receiving in some cases higher wages.

At Cradley Heath, near Birmingham, England, women make the lighter descriptions of chains, working in some instances by the day and in others by the piece. Some are even independent makers, renting their workshops and selling the chains to dealers, who in some cases have provided the stock. The labor involved has been described as not as much as an old-fashioned washing board involves.

According to the Hardwareman, of Birmingham, the increased use of automatic machinery and the standardization of patterns, have simplified the details of bicycle making to such an extent that much of the skilled labor formerly employed is dispensed with by Coventry makers. Girls earning 15 shillings ($3.75) a week are working at small capstan lathes and doing quite as good work as men at double the wages. Price cutting in the manufactured article has necessitated economies in the cost of production.

✤

Under date of February 9, 1905, United States Consul-General W. R. Holloway, Halifax, Nova Scotia, reports: It is stated that Mr. Church and Charles Cleveland of Chester, Nova Scotia, have discovered the long lost and much sought for process of hardening copper. A sample of their hardened copper has been received here which seems to be as hard as steel, a penknife failing to make any impression on it.

Suspicious.

The Friend—So this is one of your jokes. Ha! ha! ha!

The Humorist—Well, what are you laughing at? Isn't it a good one?—*Brooklyn Life.*

REVIEW OF THE MARKETS.

WIRE NAILS: There is only a moderate demand on the mills from business for immediate wants, the jobbers having been largely supplied for this season of the year, by orders already on the books that are being drawn upon. If trade were less active we should hear of a greater degree of price cutting than now prevails. The official quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in ten days:

Carload lots to jobbers.....$1.80
Carload lots to retailers..... 1.85

New York. There is a fair demand from the outlying territory, who get their supplies of the city. The market is firm, and quotations are as follows:

Single carloads $1.99
Small lots from store..... 2.05

CUT NAILS: At the last meeting of the Cut Nail Association, the prices were reaffirmed for the month of May, although the irregular prices that obtained during the past month it was hoped, would be eliminated when the fullness of the demand was reached. Quotations are as follows:

Carload lots $1.80
Less than carload lots to jobbers..... 1.85
Less than carload lots to retailers..... 1.95

f.o.b. Pittsburgh. Iron Cut Nails for delivery at Pittsburgh, Buffalo and all points west of these cities 10 cents advance per keg on Steel Cut Nails.

New York. At the recent meeting of the Cut Nail Association, it was urged that on account of the small amount of Cut Nails to be had in the markets, jobbers and others should refrain from selling at less than association prices. It was hoped to have a good effect. New York quotations are as follows:

Carload on dock $1.94
Less than Carloads on dock..... 1.99
Small lots from store.....$2.00 to 2.05

BARB WIRE: There is a less busy demand for Barb Wire all along the line, especially among the farmers who are kept so busy preparing for Spring activity they have devoted but little time to fence building. Quotations remain the same, as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in ten days:

	Painted.	Galv.
Jobbers carload lots	$1.95	$2.25
Retailers carload lots	2.00	2.30
Retailers less than carload lots	2.10	2.40

SMOOTH FENCE WIRE: There is still considerable activity among the jobbers while the mills are busy enough in supplying on contracts. The condition of affairs will prevail for some time to come. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

Jobbers, carload lots.....$1.65
Retailers, carload lots..... 1.70

The above prices are for base numbers, 6 to 9. The other numbers of plain and galvanized wire take the usual advances.

COVERT MFG. COMPANY: We give below the latest revised discounts made by the Covert Mfg. Company, Troy, N. Y., on the extensive line of Snaps, Chains, Halters, Ties, Etc., which form their entire production:

Derby Open Eye Snaps	30 and 2%
Derby Swivel Snaps	45%
Yankee Snaps	30 and 2%
Derby Snaps	30 and 2%
Jockey Snaps	35%
Covert Patent Snaps	45%

Jute Horse Ties	50%
Sisal Horse Ties	30 and 10%
Cotton Cattle Leaders	45%
Hemp Cattle Leaders	45%
Jute Cattle Leaders	50%
Sisal Cattle Leaders	30 and 10%

ROPE: The following prices may be said to represent the market:

	Cents per pound.
Pure Manila, 7-16 and larger	12¼ to 12½
No. 2 Manila	10
Pure Sisal, 7-16 and larger	10
No. 2 Sisal, 7-16 and larger	8¼

Less ¼ cent to the large trade.

BINDER TWINE: General market quotations f.o.b. Eastern factories, may be given as follows:

White Sisal (500 feet to the pound)..... 9¾
Standard (500 feet to the pound)..... 9¾
Standard Manila (550 feet to the pound).....10¾
Manila (600 feet to the pound).....11¾
Pure Manila (650 feet to the pound).....12¾
Less than carload lots quarter of a cent extra.

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....49 cents per gallon.
In lots of 5 barrels or more.....48 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil.....60 cents per gallon.

THE PHILADELPHIA TRADE.

The Hardware market is noticeable to-day by its steadiness, changes in price either way being comparatively few, and traceable more to equalization of prices than to any distinct advance or decline in values. It cannot be said that the present market on some lines is altogether satisfactory to manufacturers, as both material and labor are as a rule costing more money than a year ago, and it is claimed that advances would be justified, but there is fortunately a wise conservatism prevailing and a strong disinclination on the part of manufacturers to make any changes in prices, so that values are stationary and stocks are

RASPS

worth as much if not more than they were six months ago. Under such conditions, trade continues even, and is about up to the high water mark of last Spring, when some of our jobbers showed the largest sales they had reached in the corresponding months for twenty years. Spring goods had been and are in great demand and renewal orders are now coming in for netting, cloth and similar goods. Reports from customers state that the farmers are now exceedingly busy, and with the bright building prospects there seems to be no reason why the present trade should not continue. The one weak spot has been collections, owing to the unusually severe winter jobbers have in many cases been carrying a large number of their customers which has made collections unusually slow, but now that the country trade will soon begin to realize on Spring products a favorable change in this situation may be early expected.

BIDDLE HARDWARE CO.

THE PITTSBURGH TRADE.

On May 15th, 16th and 17th, the Executive Committee of the National Hardware Association will meet in Pittsburgh. This meeting, half way in the year between the annual meetings of the association in November, is for the purpose of conference and planning the work of the association during the next six months. Most of this work is done quietly and does not get into the papers, but is none the less useful to the members, perhaps more so. We hope to see a full attendance of the membership of the committee. The outlook for business continues very favorable and all our manufacturers are fully employed. Building is fairly active, and large public works are to be pushed by both our City and National Government in this vicinity. The Greater Pittsburgh Bill was passed by the Legislature and signed by the government of Pennsylvania. It must now pass the scrutiny of the Supreme Court as to its constitutionality and then be submitted to a combined vote of the people of Allegheny and Pittsburgh. It is hoped this may all be accomplished within a year, and the greater city become a reality by that time.

LOGAN-GREGG HARDWARE CO.

FROM THE MANUFACTURERS' STANDPOINT.

Trade conditions with us are decidedly gratifying. The demand for Myers pumps, hay tools, etc., taxes our increased capacity to the extent of requiring night runs up to 9 o'clock. We have never seen the time when we have been so busy or so much embarrassed to know what additional capacity we can secure in the light of present and probable orders, notwithstanding we have run full force and full time, since August 1st. We are pleased with the articles that appear in your valued paper concerning the advance in material and the delay in securing same. This should certainly stimulate dealers into ordering in anticipation and giving the factories all the time they possibly can to furnish the goods, and also be conclusive evidence that there can be no reduction in prices.

F. E. MYERS & BRO.

THE CLEVELAND TRADE.

Trade events are rather quiet so that it is difficult to furnish copy. It is reported that a strike is pending in the ore mines. If it comes and continues sixty days, ore on the docks will be cleaned up and the immense business in iron and steel will be put on a waiting basis, for ore, pig iron and billets, and they will be converting coal, coke and ore into cash in a continuous process as rails are made, and if delays can be eliminated it will be a saving process, as much less capital will be invested in ore on the docks, the bottoms of the piles of which have not been seen in a generation, and on which an attempt has been made by the State to levy a tax. The owners claim that it is interstate commerce in transit. If the strike does not last over sixty days, there will be no trouble to keep furnaces supplied after that date, and stock enough ore for winter use. The injury caused by strikes is not always confined to the proprietors, and they sometimes prove a benefit. A little halt in the output of pig iron will delay the apprehension of over production and likely extend the demand, which would not be altogether an evil. A slight shortage would be preferable to a surplus for the business interest. Over-production has been the bane and terror in the iron and steel business as it results in the decrease of value of the stock of goods and the cutting of wages, if not in entire lack of employment. Trade was rather moderate in April, which is a disappointment to those who anticipated very active business. Raw material has been on the verge of a boom, creating a promise for a lively trade, which has not yet come and is not now likely to appear this side of July. The jobbers are prepared to serve their trade well as they expected a large April demand, but the last half of the year may find them not as well prepared. Trade for the first quarter of the year has been quite as good as last year, but our estimate of success has come to demand a continuous increase. Locally we are now occupied with a contest between the street railroad and the city. If the corruption of municipal politics is counted as part of the cost of our public utilities, a radical change is desirable.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE SAGINAW TRADE.

Since the opening of Spring, business has improved. The weather is warm and pleasant and vegetation seems to be as forward as last year. Collections for 1905 are as good as in 1904. There is considerable building in this vicinity, and building operations are quite active. We look for a good Spring business.

THE ST. PAUL TRADE.

We are glad to say that all over our territory the seeding of wheat is accomplished and under the most favorable conditions. We have had just the proper weather and proper conditions of the soil. So, having started right, we feel that the finish is sure to be a good crop. Prices on the whole are steady with an advance now and again to make the assurance of a steady market become impressed on the minds of both dealers and consumers. It seems to us as though the dealer who keeps a full stock is wise as in some lines there is a scarcity which will get worse as time advances. Altogether, it seems as though the good times would continue indefinitely.

HACKETT, WALTHER, GATES HARDWARE CO.

THE SAN FRANCISCO TRADE.

Hardwaremen who keep tab on agricultural conditions say "the crops of 1905 are looking well as a rule, and while some, such as several kinds of fruit, have lately deteriorated, the majority are in brilliant condition; that our export business, especially with the oriental countries, is growing larger and larger, and our domestic trade never was more active, splendid prices distinguish most commodities, and the people apparently have no end of money to spend, not only for the ordinary necessities of life, but in frivolities. Money is in the air. There is so much of it and so many agreeable ways of spending it that embezzlements and defalcations are multiplying on all sides. Since structural iron and steel dealers, and Builders' Hardware merchants generally are more or less interested in keeping in touch with the lumber trade conditions, the following special dispatch, received in San Francisco this first day of May from a reliable source in the State of Washington, is quoted:

"With the demand good in the markets of the East, California, South America and Australia, the Puget Sound lumber trade is experiencing a revival after a dull period of more than a year. The Spring demand from the Eastern States has opened well for both lumber and shingles. Throughout Western Washington the mills are being reopened after lying idle for weeks or months. Eight hundred sawmills and shingle mills are now in operation in the State of Washington."

HARDWARE'S motor vehicle and sporting goods department is always scanned with interest by California Hardware merchants whose lines embrace guns, fishing tackle and automobiles, and whenever a popular man of State-wide reputation gives public expression relating to California's recreative alurements, touching even in a most casual manner and without design anything even remotely suggestive in an advertising way of the trade lines mentioned, the sporting goods merchants are pleased to quote the sayings of such a man. California offers almost as many ways of enjoying a summer's outing as she offers variety of places in which to enjoy it. And bear in mind that fishing and hunting are almost everywhere to be enjoyed close at hand, pools in mountain streams where the trout leap and play and haunts of deer and fox and lion. INDUSTRIAL PRESS ASSOCIATION.

THE NEW ORLEANS TRADE.

There has been a slight lull in Hardware trade during the fortnight, due to the cessation of the implement demand, and the shutting down of some sawmills for repairs, and also to the fact that many of the heavier demands for Builders' Hardware have been filled, while a great many of the local contracts are yet to be let, and the demand incidental to them has not yet arisen. However, the season is running well ahead of what it was at the same time last year. Events of moment to the trade there have been few, although the jobbers and exporters are still deeply interested in the developments of the campaign for the trade of the Spanish-Americas.

The lines as they are running now, indicate largely what the summer situation will be. The implement market is perhaps the most interesting, as casting a light before.

The demand for planting implements having been filled, and the crops as yet not out of the ground, the jobbers through the small towns have about sold out their stocks of earlier implements to the cotton and rice dealers; while the sugar planters, who usually buy, at jobbers' rates, direct from the big wholesale men in New Orleans or elsewhere, have also obtained most of their requirements for the earlier stages of the crop year.

As said in the Hardware correspondence from New Orleans last number, the indications are that there has been little reduction of acreage in the cotton fields of the South, despite the estimates of reporters for the various textile and commercial journals. Just now, when the wholesale houses should begin to feel the demand for implements to handle the feed stuffs that were supposed to have been planted to take the place of cotton—that impetus is no greater, if so great, as in usual years.

Household Hardware in the city trade, is going excellently. The influx of new citizens continues; and new house furnishings and fittings are needed every day. Local building work is increasing constantly, and by mid-summer there will be the greatest demand for builders' supplies of all sorts for the local market. During the past two weeks, there have been a number of considerable contracts let, and the trade incidental to them will soon begin. Mill supplies have dropped off during the fortnight, due chiefly to the closing down of some of the sawmills in the timber belt, where the long runs have been brought to a close to allow machinery and hands much needed rest. This closing down, will, it is believed, increase the mill supply demand during the next ensuing fortnight, the materials being needed for repairs.

THAT PANAMA CAMPAIGN.

All the jobbers and exporters in the city are just now watching very keenly, the fight for Panama and Spanish-American trade generally being made by the Board of Trade Committee, whereon the Hardwaremen of the city predominate.

Col. B. F. Eshleman, of Stauffer-Eshleman Company, chairman of the committee, returned from Washington some days ago, more than a week after the others of the committee returned to tell of their success in obtaining from Chairman Sontz and Secretary Taft a guarantee that hereafter the Panama railway should accord to the steamship lines from other ports all the privileges now given to the Panama-New York line.

On his return, the committee met, and launched a plan for a conference of all the jobbers and wholesale exporters of the city, to be held during the ensuing week—this meeting to devise ways and means for a great commercial convention of all the business organizations of the Mississippi Valley, representing the manufacturing and distributing, as well as the producing interests; this convention to consider ways and means whereby to get the products of the Mississippi Valley to the markets of the Pacific at the smallest expenditure of time and money.

The purpose of the local jobbers, represented by Mr. Pearl Wight, of Woodward-Wight & Co., by Thomas Sloo, of Whitney and Sloo, and by Mr. James W. Porch, of the Lukens Iron Works, and the Jones-Laughlin Steel Company, and also of Col. Eshleman, representing the Hardware, steel, iron and machinery interests of the city, is to get the business organizations of the Mississippi Valley, through their representatives, to guarantee the subscription of proportionate sums toward a steamship line, capitalized at least at $5,000,000, to charter ships to ply first to Colon, pending the construction of ships to run to Colon, and then through the canal to the west coast of South America, and to the Pacific Orient.

This convention of jobbers will probably be held immediately—the business convention of the valley probably in the early autumn or the late summer.

EXPORT BUSINESS NOW.

Heavy shipments of farm and mill Hardware have recently been made to Cuba, this developing from the close relation of a number of the great sugar estates to the city. Some machinery shipments preceded the Hardware shipments, which the Morgan Line has been carrying for several weeks.

Purchasing agent Lupton, representing the Panama Canal Commission, has been receiving bids on practically all the published specifications published by him; and the United Fruit Company has doubled its Panama service within the fortnight, in expectation of increased tonnage, and in obedience to the demand of the Commission, that more adequate transportation facilities be guaranteed them for their materials.

LOCAL NOTES.

Stauffer-Eshleman & Company formally took possession of their new real estate adjoining their present quarters, during the week. This is immediately precedent to beginning work on the new building.

THE GRAPHITE TRADE.

As an index of industrial prosperity graphite seems quite reliable. It has responded to the general restoration of confidence and improvement of business in all lines. The first four months of 1905 show very great improvement over the corresponding months of 1904 and a healthy growth and even development over previous years. Better conditions in the building trades, and the consequent increased demand for structural steel is reflected in increased orders for graphite paint. Crucibles and Foundry Facings indicate restored conditions of activity in the metal manufacturing industries. The industry shows a remarkable evenness with little to indicate anything but an even development of trade along all lines and in all quarters. We have just completed a large four-story building to accommodate the growth of our brass and nickeling departments, have made an addition to our pencil works within the year and have just started the construction of a second boiler plant to meet increasing demands for power and steam. At our mines on Lake George extensive improvements are under way to enlarge the output. 1905 bids fair to establish a new high water mark of prosperity.

EVERYBODY--EVERYWHERE
IS CALLING FOR
"Ever-Ready" Safety Razors

The only $5.00 retail proposition on the market to-day that gives the customer a run for his money and allows the retailer a profit that is worth his while. **"Ever-Ready" sets contain twenty-four keen, perfect blades**--a dozen more than any other similar priced razor. "Ever-Ready" blades are as thin as paper and yet can be rehoned and resharpened at will—another incomparable feature.

Advertised at $5.00--
BIG PROFITS TO RETAILERS

Get in your order to-day—through your nearest jobber or direct to the makers. If you're unacquainted and want to see first—make a postal request for samples and we'll do the rest.

"EVER READY"-THE RAZOR WITH A YARD OF BLADES

Reichard & Scheuber Mfg. Co.
66 Duane St., New York City

Makers of Yankee Safety Razors—Yankee Sets—Stropping Machines and Radio Magno Razors.

The Portable Manger

HAS light steel frame and canvas body. Always open while horse is feeding. Cannot be upset.

Most humane, sanitary, economical, convenient.

Will outwear 3 ordinary feed bags.

A splendid seller.

We want every Hardware man to handle it.

Write us for circular and prices.

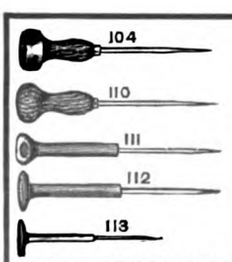
Walsh's Sons & Co.
260 Washington St., Newark, N. J.

Wilcox Manufacturing Co., Aurora, Ill., have recently issued a neat pamphlet catalogue of envelope size, finely printed on heavy coated paper exploiting the Wilcox Giant Fence Stretcher. With this simple device, weighing only eighteen pounds, they claim to be able to pull four tons. They state "The wonderful power of this little machine was shown when, in the presence of incredulous experts, a loaded freight car, weighing seventy thousand pounds was moved with ease, and with one hand twenty rods of fence pulled so tight it was easily mounted without posts. It held the full weight of a heavy man, while the experts marveled." It is neither clumsy nor heavy and they claim it is ten times as strong as any other stretcher. Send for one of their little booklets and learn more of this wonderful little invention.

ENGLISH NOTES.

THE ASSOCIATED CHAMBERS OF COMMERCE.

At a recent meeting of the Associations of Chambers of Commerce of the United Kingdom, Sir William Holland, M. P., the president, congratulated the meeting upon the fact that trade conditions are now distinctly more favorable on the whole than they have been for a long time past. He referred to the improvement in the pig iron, tin-plate, and iron and steel industries, as well as to the great revival in the shipbuilding trade. One of the most encouraging facts was the allusion in the King's speech at the opening of the present session of Parliament to the probable appointment of a Minister of Commerce. Resolutions were passed in favor of not only a Minister of Commerce, but a Ministry of Commerce, it being considered that the varying conditions under which manufacture and commerce were conducted in this country could not well be represented by a single minister, however competent he might be, but that an advisory board, consisting of representatives of all the different branches of commerce would be of the utmost value to the government, and would ultimately tend to promote and develop the commercial welfare of Great Britain, her colonies and dependencies.



MOTOR TRACTION.

During the past month there have been several important exhibits of motor cars and agricultural traction wagons and vehicles for commercial purposes. The first of the series was held a short time ago at Olympia, some particulars of which I gave in my last letter. From March 18-25 an important motor show was held at the Agricultural Hall, London. It was an exceptionally well-staged exhibition, and many of the leading manufacturers realized satisfactory results, some important orders for motor cars being booked. But the special feature of the Islington show consisted in the excellent selection of commercial vehicles, great attention having been paid to the production of agricultural tractors. Persons interested in motor cars in the provinces have also had opportunities of inspecting some excellent exhibitions shows having been held at Glasgow, Manchester and Birmingham, all capital centres, during the past month. British ironmongers are not largely interested in the sale of these more expensive vehicles, although they are gradually becoming agents for many of the best-known firms. The use of motor traction, both steam, petroleum and electric, is being freely employed, not only by manufacturers, but by retailers, and among those who have adopted this modern method of distribution of goods are many leading ironmongers and Hardwaremen. The up-keep of motors requires a constant supply of petrol and other sundry fittings in addition to the large sale of such accessories as lamps. This business is fast becoming a popular side line, and many British ironmongers are opening up entirely new departments wherein they can effect repairs to motor cars and supply the requisite accessories and sundries required in their up-keep.

IT MAY SURPRISE YOU TO KNOW THE TRUTH

Some of our customers who were most conservative at first now buy

Star Safety Razors And Supplies

at what they would have formerly considered "terribly reckless purchasing." They have learned the value of the "STAR" PROPOSITION.

THINK IT OVER

Our first year in business we manufactured and sold 1,600 STAR SAFETY RAZORS. We were the pioneers. It is always hard to convince the "other fellow." When Columbus said the world was round, people called him crazy. To introduce the STAR SAFETY RAZOR, we had to convince each purchaser of its merits and that it was not a novelty of no practical value. Each purchaser became a whirlwind of enthusiasm and an advertising medium for STAR SAFETY RAZORS. To-day over 7,000,000 STAR SAFETY RAZORS are in daily use. Our sales are larger than all other makes of safety razors combined, and we fully expect to sell 1,000,000 in 1905; that means an output each day of over double of what we sold in one year at the start.

Quality and Practicability have brought about this result.

Since the advent of the "STAR" over forty safety razors of various designs and patterns have been offered to the trade as a substitute for the ORIGINAL and MECHANICALLY PERFECT "STAR."

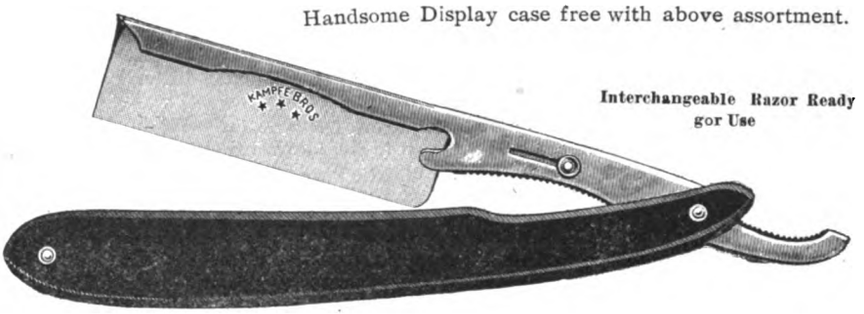
Did you purchase any of these various makes? Were they satisfactory?

Did they meet with the endorsement of the public? Can you conscientiously recommend them?

Have you any dead stock of safety razors on hand to-day and would you be glad to close them out at less than cost?

Do you think it is good business policy to carry in stock an inferior article because it is offered to you at a lower price?

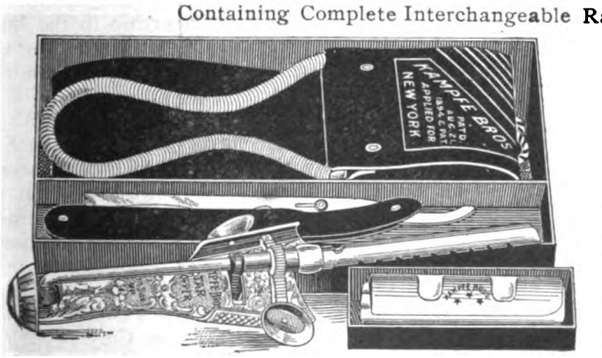
WE WANT EVERY DEALER to have one of our "STAR" Assortments "A"; it will swell your profits.



Assortment "A"

6 only—No. 1 Star Safety Razors, complete.
3 " —No. 2 Star Safety Razor Blades.
2 " —No. 3 Stropping Machines.
2 " —No. 25 Star Stroppers.
2 " —No. 26 Diagonal Strops.
1 " —No. 4 Jewel Case, one blade.
1 " —No. 5 Star Case, two blades.
1 " —No. 6 Star Case, three blades.
1 " —No. 7 Star Case, four blades.
1 " —No. 9 Traveling Case, two blades.
1 " —No. 24 Combination Outfit.
2 in Signs, 1 Counter Mat and Catalogues.

Handsome Display case free with above assortment.



Kampfe's Star Interchangeable Razor

Interchangeable Razor Ready for Use

Handsome Leatherette Covered Paste-Board Box.

Containing Complete Interchangeable Razor, one Blade, Star Stropper and Strop.

No. 99--One Blade Set.

Experience teaches us that about one man in twenty-five knows how to strop a razor properly. Many can and would prefer to use an old-style razor, but have found the proposition unsatisfactory for the reason that they are unable to keep their razor in condition for use. On account of such conditions existing many advertisements appear in the various publications: "*Razors requiring no honing or stropping; always ready for use; guaranteed to give satisfaction.*" THIS IS FALLACY. No razor can shave properly unless properly stropped, giving it the keen edge that cuts the beard and does not pull or scrape. Any practical cutler will bear us out in this statement. Our Interchangeable Razor overcomes all these difficulties. It is an improved old-style razor with interchangeable blades to be inserted in our new device (blade holder and handle). These blades can be stropped with our SPECIAL Star stropper (size larger than the stropper used to strop a safety blade). We offer them for sale in sets only, the razor and handle complete, including Star Stropper and Diagonal Strop. Also in sets containing two, three, four and seven blades.

We are catering to the thousands who wish to overcome the difficulty that they have had in properly stropping their razor, and for this reason we have decided to offer the New Interchangeable Razor in sets only, including the Star Stropper and Diagonal Strop.

"Star" Safety Corn Razor

Send for catalogue, circulars and wholesale quotations.

Simple, Safe and Sure. Gives immediate relief to sufferer from any corn, no matter how hard it may be. Impossible to cut the foot. Can be stropped or honed like any razor. With every initial order for 12 we send handsome display case. Leather pocket with each Razor.

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Aurora, Neb.—Albert Thompson has opened a new Hardware store.

Baker City, Ore.—M. E. Swan has opened a new Hardware store.

Bartlesville, I. T.—The Samuel Bros.' Hardware Company has been incorporated. Capital stock, $5,000.

Cullison, Kan.—Toevs & Worries have opened a new Hardware store.

Dawn, Mo.—T. L. Haymes has engaged in the Hardware business.

Dickson, Tenn.—Among the new business organizations for Dickson is a Hardware firm composed of Julius Morris, late of McEwen, and Hickman Tidwell of this place. The firm, it is understood, will open at once.

Edison, Wash.—Euger & Loup are engaging in the Hardware business.

Freehold, N. J.—Gilbert Combs Company has been incorporated; agent in charge, Anthony Deedmeyers; capital stock, $25,000. Incorporators, Gilbert Combs, Annie W. Crater, David S. Crater, Anthony Deedmeyers. The company is to take over the lumber and Hardware business of Gilbert Combs & Company.

Friendship, N. Y.—Philbrick Hardware Co. has been incorporated to deal in Hardware, farming implements, etc.; capital, $12,300. Incorporators: Charles A. Philbrick, V. Penny Carter, Roy Carter, Benjamin Philbrick, all of Friendship, N. Y.

Ft. Atkinson, Wis.—Haumerson Hardware Company has been incorporated; capital, $5,000; incorporators, W. F., T. F., and George F. Haumerson.

Govan, Wash.—A. J. Smith is erecting a new building and will open a Hardware store.

Haven, Kan.—The Haven Hardware & Implement Company has engaged in business.

Jacksonville, Texas.—J. E. Douglas has engaged in the Hardware business.

Jamestown, N. Y.—Joseph Eagan of Wyoming has opened a Hardware and mine supply store on South Main Street. The store will be a branch of Mr. Eagan's business in Wyoming. Robert McCormack of Upper Pittston will have charge of the new place.

Little Rock, Ark.—J. H. Trainor Company has been incorporated; capital stock, $25,000. The incorporators are J. H. Trainor, G. G. Wood, C. L. Kraft, L. Culbertson, C. R. Moore, L. P. Kraft and R. E. Wiley. The company will establish and maintain an implement store in this city.

Marshalltown, Iowa.—The Furbush Hardware Company has been incorporated. The incorporators are George A. C. Ogler, William Furbush and William B. Cunningham. Mr. Ogler and Mr. Furbush comprise the board of directors, and of the board, Mr. Ogler is president and Mr. Furbush secretary and treasurer. The capital stock of the company is $8,000.

Minneapolis, Minn.—Bovey Hardware Company has been incorporated; capital stock, $10,000. Incorporators, James A. Ferguson, C. E. Evedt, N. L. Leach and F. Provinske.

Minneapolis, Minn.—The Hurty-Simmons Hardware Company has been incorporated with a capital of $200,000. The incorporators are Wallace D. Simmons, of St. Louis; Frank W. Hurty and Edward Boquet of St. Paul, Thomas C. Montgomery of Minneapolis and Samuel F. Pryor of Ferguson, Mo.

Reading, Pa.—The new Fegley & Son Hardware store opened April 15th at High and Hanover Streets.

Schenectady, N. Y.—Stuart G. Spier & Son, of Albany, on May 1st opened a first class Hardware store on Wall Street. Mr. Spier, for the past twenty-five years has been manager of the Northern New York territory for the Remington Standard typewriter.

Toppenish, Wash.—Richey & Gilbert will open a Hardware store.

Woodruff, Kan.—P. C. Waggener & Co. have engaged in the Hardware and furniture business.

Worcester, Mass.—William Allen Sons' Company has been incorporated to deal in machinery, tools, etc.; capital, $20,000. William Allen, Worcester, treasurer and clerk, Walter B. Allen, Worcester, Mass.

Changes.

Ansley, Neb.—W. S. Mattly has purchased the interest of E. A. Butler in the Hardware and furniture store of E. A. Butler & Company.

Ashland, Ill.—W. S. Williams and Mylo Lee have purchased the Ashland Hardware & Furniture Company's stock.

Ashland, Kan.—E. B. Wright has succeeded to the Hardware business to Wright & Currier.

Auburn, N. Y.—Geo. B. Brooks has sold out his Hardware business on Court Street, to Charles F. Curtis and Walter H. Crossley. The new owners will assume proprietorship at once. The new firm will be known as Crossley & Curtis. They will remodel the store and make such changes as will bring them up-to-date.

Auburn, N. Y.—John H. Post and J. W. Dunican have purchased the Hardware business of Choate Brothers. This is one of the oldest concerns in Central New York, having been established in 1843 and conducted by the Choate Brothers, both of whom are now about 80 years old, since 1856.

Beaumont, Texas.—Clarence Taylor has bought out the stock of goods of the Saratoga Hardware Company and moved same into the Jourdan Building. He contemplates enlarging his stock.

Belgrade, Mont.—Rutledge & Schulte have purchased the Hardware business of Benepe & Owenhouse Co.

Berryville, Ark.—A. S. Bobo has sold his interest in the Berryville Hardware Co. to his partner E. T. Candle.

Binger, Okla.—N. A. Simmons has succeeded to the Hardware business of Yeoman & Simmons.

Boynton, I. T.—Powers & Olge have purchased the business of the Boynton Hardware Co.

Clatonia, Neb.—C. Seng has sold his Hardware business to Cruse & Chittendon.

Clyde, Kan.—A. M. Lavalle has been succeeded in the Hardware business by Lavalle & Calder.

Colon, Neb.—E. N. Elmelund has been succeeded in the Hardware business by Elmelund Bros.

Colorado, Texas.—Green & Crawford have succeeded to the Hardware business of Ernest and Crawford.

Des Moines, Iowa.—The Garver Hardware Company has recently purchased the lot at Nos. 709-711-713 Locust Street and will erect there a store building to cost in the neighborhood of $40,000. The new store building of brick and stone is to be put up in the immediate future. It will be five stories high and built according to the most modern plans. The Hardware company will occupy the three lower floors.

Edgar, Neb.—E. P. Eastman has sold his Hardware business to the Stoddard Hardware Company.

Elmira, N. Y.—G. A. Gridley & Son have purchased the stock of Griswold, Maloney & Company at 323 East Water Street.

Fabius, N. Y.—The firm of Rowley and Barnard has dissolved. Mr. Rowley retains the Hardware store and Mr. Barnard has opened a carriage and harness store.

Goldfield, Col.—The Clark Supply Co. has sold its Hardware business to the Rudgina Supply Co.

Grant City, Mo.—S. F. Sanders has purchased the Hardware and implement business of A. O. Mason.

Honesdale, Pa.—The Hardware firm of Dodge & Erk has dissolved partnership, Mr. Dodge retiring from the business. John Erk a former member of the firm and his brother George, of Seelyville, will conduct the business in the future.

Idaho Falls, Idaho.—The Griffith Hardware & Plumbing Co. is starting a branch store in Twin Falls, Idaho.

Idana, Kan.—Bert Ray has purchased the business of the Rice Hardware Co.

Iowa City, Iowa.—M. C. Parsons has succeeded to the Hardware business of Parsons & Stouffer.

Lincoln, Neb.—J. E. Jakway has been admitted to partnership in the business of Patterson & Co., and the firm name has been changed to The Patterson Hardware Company.

Lockport, N. Y.—Charles W. Webber, the Hardware dealer at 61 Main Street, has bought out the Hardware business of John E. Mack at the corner of Main and Pine Streets. Mr. Webber will continue the Mack store at its present location as well as his store at 61 Main Street.

Madill, I. T.—McMillan & Hedrick have been succeeded in business by the J. E. McMillan Hardware Co.

New Milford, N. Y.—A. C. Risley and C. M. Shelp, doing business under the firm name of New Milford Hardware Company, have dissolved partnership, Mr. Shelp retiring. Mr. Risley will continue the business.

Osceola, Wis.—L. P. Melbostad has sold his Hardware business to Frank A. Marsh, who has taken charge.

Oshkosh, Wis.—The Northern Hardware & Supply Company has purchased a site in the heart of the city, near the Chicago & Northwestern tracks and will erect one of the finest wholesale Hardware buildings in this section.

TANNING

Much depends on this first step in the process of making RED-E-FOR USE RAZOR STROPS. The leather is kept in the vats until every part is impregnated with the preserving liquid. This continued steeping insures great durability and eveness of texture so necessary to a good strop.

Each tiny fibre bears its portion of the work equally, giving the horse hide sharpening strop the requisite friction to give a keen cutting edge and a soft and kind surface to the finisher that tones the edge down to the smoothness so essential for a good shave.

Consider the care used in every step of the manufacture of RED-E-FOR USE RAZOR STROPS and you will readily understand why they prove such satisfactory trade producers. Can you afford to be without them? Not if you sell razors.

Ask your jobber for a sample doz.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Ansonia, Conn.—The New York Lock Corporation has been incorporated. The company will take over the works of the Bradford Lock Company, which was sold at auction some time ago for the benefit of the shareholders of the company. It is the intention of the new company to start the works again within a short time.

Atlanta, Ga.—The Mallory Plow Company has been incorporated by A. R. Mallory, S. A. Turnell and George Coates. The concern manufactures all kinds of plows and agricultural implements.

Bowling Green, Ohio.—The Leonard Stove & Range Company, capital $50,000, has been incorporated by Herbert E. Leonard, James E. Merry, Mary A. Leonard, Louisa Strigel and J. J. Leonard.

Buffalo, N. Y.—The American Automatic Roller Window Screen Company has been incorporated. The company is capitalized at $100,000 and will engage in the manufacture and sale of patent screens. The directors of the company are C. A. Strangmann, C. J. Weidemann, J. F. Nagel, John Reiman and William H. Brace, all of Buffalo.

Buffalo, N. Y.—The Buffalo Ladder Co. has been capitalized at $10,000. The directors are Henry W. Fox and Anna B. Fox of Buffalo, and William G. White of Niagara Falls.

Columbus Ohio.—The National Furnace Appliance Company has been incorporated; capital stock, $25,000. Its incorporators are M. S. Siebert, Edward S. Baldwin, L. P. Zimmerman, George F. Tinkham and Harry A. Clarke.

Columbus, Ohio.—The Owen Machine Tool Company, which was originally incorporated in West Virginia, has been incorporated in Columbus with a capital stock of $100,000, by I. Ward Frey, W. H. Owen, W. F. Hanna, David F. Snyder and W. S. Wilson.

Elyria, Ohio.—The Elyria Machine Parts Co., a new local corporation, proposes to build a factory here during the coming summer and employ about 300 men in the manufacture of screws and other specialties. The promoters are largely the late employes and officers of the Western Automatic Machine Screw Co., which has been absorbed by a large combination of manufacturers. The new concern is capitalized at $200,000.

Fall River, Mass.—The Insinger Co. has been incorporated to deal in dish-washing machines, etc.; capital, $40,000. President, Thomas McAuliffe, Fall River; treasurer, Alfred Insinger, Wayne Junction, Philadelphia; clerk, Fred. A. Ewell, No. 170 Summer Street, Boston.

Galesburg, Ill. — Pollock Automatic Wrench Company has been incorporated; capital, $25,000; manufacturing mechanical devices; incorporators, Charles V. Pollock, E. B. Hardy, J. J. Welsh.

Hartford, Conn.—The Fernside Screen Works has been incorporated. Incorporated by George W. Fernside, Herrman C. Marquardt and Ernest Walker Smith, all of this city. The authorized capital stock is $25,000 and business will begin with $7,000. The concern will make and deal in wire goods.

Hellam, Pa.—The Automatic Ice Cream Freezer Manufacturing Co. has been organized to make an improved ice cream freezer.

Indianapolis, Ind.—Crescent Machine & Tool Company has been incorporated; capital stock, $250,000. Directors, J. C. Pifer, G. L. McKay, W. S. Van Buskirk, W. H. Whitney and Joseph Kreis.

Kansas City, Mo.—J. A. Hulbert will build a factory for the manufacture of wooden handles for farm implements at Eighteenth Street and Miami Avenue, Armourdale. The factory and machinery will cost about $10,000. A lot for one building was purchased and work will begin on the building at once. Handles for spades, scythes, grass knives and similar implements will be made at the factory.

Lockport, N. Y.—The Niagara File & Rasp Co. has been incorporated to manufacture files, rasps, tools and machinery; capital, $30,000. Incorporators, William G. Ager, Clara L. Ager, Lockport, N. Y.; Charles Ashton, Minnie Ashton, Niagara Falls.

Marion, Ohio.—The Miller Manufacturing Company, with an authorized capital of $10,000, has been incorporated to manufacture and deal in machinery, implements, novelties, etc., by J. J. Schoenlaub, B. F. Waples, D. M. Hinamon, David Vestal and Thomas J. Schoenlaub.

Marion, Ohio.—The Superior Implement Company has been incorporated with $30,000 capital stock, by Henry True, Charles C. Fisher, Charles C. Schaffner, Wm. H. Schaffner and George D. Copeland.

Meriden, Conn.—The Curdok Manufacturing Co. has established a factory for the manufacture of Hardware. It is a new company, the proprietors being Henry Twardoks and Albert C. Curtis, both of Meriden. Screw drivers will be the specialty of its line for the present but it is planned to add chisels, gauges and other tools later on. A truing up tool for use in a lathe will be another product.

Minneapolis, Minn.—Thiem Manufacturing Company has been incorporated; capital, $100,000; manufacture of Hardware specialties; incorporators, E. A. Thiem, C. E. Thiem, Arthur Staples.

Montreal, Can.—The Royal Screw and Specialty Co. has been incorporated with a capital stock of $40,000.

New Haven, Conn.—The Barnes Tool Co. has been organized. The capital stock is $16,000. All of the organizers are of New Haven.

New Haven, Conn.—The Elmoler Manufacturing Co. has been incorporated by Matthias Mohr, president and manager and Richard Elliott, secretary and treasurer, Minnie Mohr and Rosamand Elliott. The firm will make dies, punches, screw drivers and other tools. It is located on Bristol Street.

New Rochelle, N. Y.—International Sanitary Manufacturing Co. has been incorporated (washing machine.) Capital $200,000, and directors: C. E. Rafferty, Mt. Vernon; Peter Cunneen, S. F. Swinburne, New Rochelle.

New York, N. Y.—Tinker Roller Bearing Axle Company has been incorporated; capital, $100,000. Directors: L. M. Preston, H. R. Roux and Leonard Gray, all of New York.

Niagara Falls, Mass.—The Gerner Freezer & Manufacturing Co. has equipped a factory with machinery and are now manufacturing the Gerner patent continuous ice cream freezer. The company will also make other ice cream and baking specialties under patents secured by it.

Peoria, Ill.—The Canton Farm Gate Co. has actively commenced work and several gates have been manufactured. In a short time salesmen will be sent out through the country.

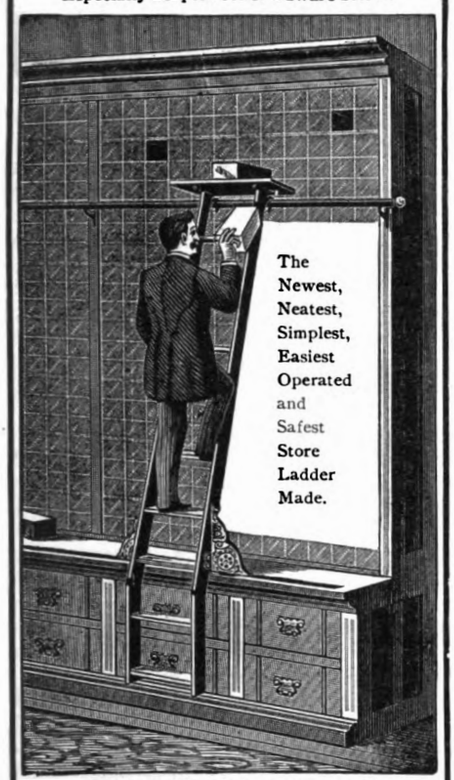
Petersburg, Va.—The Virginia Electric Tool and Manufacturing Company has been incorporated by Louis Paulero, President, Petersburg; A. P. Grappone, vice-president, Richmond; James J. Paulero, secretary and treasurer, Petersburg. Capital stock, $50,000.

Reading, Pa.—The Victor Stove Parts Company, recently organized in this city, is a new movement among stove men, and it is intended to prevent the pirating of parts of stoves by manufacturers. The directors are John R. McKnight, Daniel F. Printz, Edgar A. Amole, M. Brayton McKnight and T. D. Buckwalter. The new company is the owner of valuable patents covering parts of stoves. They consist of attachments to stove waterbacks and firebricks. The right will be sold to other stove manufacturers to make them and use them for product.

St. Louis, Mo.—The Briner-Pogue Manufacturing Company has been incorporated by C. J. Briner, F. E. Briner and George D. Pogue, to manufacture and deal in all kinds of machinery, tools, etc.; capital stock, full paid, $30,000.

Washington, D. C.—The Economic Grate Bar Company has been incorporated to manufacture, sell and install grate bars, furnaces and appliances, and patented articles. The capital stock is fixed at $3,000. The incorporators are George H. Harris, D. B. Street and H. W. Fuller.

York, Pa.—Fulton, Mehring & Hauser Company has been incorporated to deal in and make Hardware. Capital, $25,000.



Changes.

Akron, Ohio.—The Crown Drilling Machine Co. has increased its capital stock from $100,000 to $150,000.

Sargent's Gem Food Chopper

s sold by leading jobbers everywhere. You can get a stock quickly so as to supply the women of your vicinity who need the Gem in their kitchens.

The fact that the Gem is such a useful—yes, indispensable—household utensil is becoming known to thousands of women. We are advertising extensively to make its merits known and in all our advertising we state that the Gem is sold by hardware dealers. That is the story in brief, and it shows that there is

An Opportunity for Every Hardware Dealer

—an opportunity to increase profits by taking hold of this popular article and pushing its sale. It is easy to sell the Gem; housekeepers want it as soon as they learn of it through our advertising. It will help if you make use of some of the attractive advertising matter we furnish for local use—showcards, slips and electrotyped ads; also Cook Books, so that you can present one with each chopper sold.

SARGENT & CO., MANUFACTURERS,
NEW HAVEN, CONN. NEW YORK. CHICAGO. PHILADELPHIA. BOSTON.

BOX STRAPPING OF ALL KINDS
BOX CORNER FASTENERS, SEALS, ETC.
WRITE FOR SAMPLES, CATALOG AND DISCOUNTS.
STANDARD METAL STRAP CO., 336-342 E. 38 St., New York

In each keg we place a Tag, redeemable in cash, that saves the purchaser ½ cent per lb. on his lead bill.

This tag you see
Is what makes me
A leader of the Ad-el-Ites
Consumers all say
And they have their way
That I'm King of all Lead Whites

It's the TAG that **Gets** the business. It's the QUALITY of AD-EL-ITE WHITE LEAD that **Keeps** the business.

AD-EL-ITE WHITE LEAD SAVES MONEY FOR THE PURCHASER

Because It takes up more oil than other leads and therefore **yields more paint; Because It** does not act chemically upon the oil, and for this reason, wears longer than other leads; **Because It** works easily and does not crack or peel, but **leaves a good surface for repainting**; and **Because We** give the purchaser a **rebate of ½ cent a pound on his lead bill. THATS WHY HE WANTS IT.**

AD-EL-ITE WHITE LEAD MAKES MONEY FOR THE DEALER

Because the advantage in price, which the TAG gives, enables the dealer handling AD-EL-ITE WHITE LEAD, to sell more lead than his competitor and at just as great a percentage of profit as he could make on any other brand. **THAT'S WHY HE SHOULD WANT IT.**

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Addison, Mich.—Bostwick & Durkee is a new firm formed for the manufacture of baseball bats of the best quality.

Cumberland City, Tenn.—The Southern Powder Manufacturing Co. is a new concern organized for the production of gun powder. It will start operations at once.

Dallas, Texas.—The Trinity Boat Co. is a new concern with factory located at 498 Jackson Street. It is conducted by Jack and George M. Duncan, and is said to be the only one of its kind south of St. Louis. They will build all kinds of boats including gasoline launches, skiffs and canoes.

Denver, Col.—The Whitney Sporting Goods Company has been incorporated. Capital stock, $24,000. Incorporators: W. N. Vaile, J. E. O'Connor and F. S. Titsworth.

Durham, Eng.—Wilkinson's Stores, Ltd., is a new company formed with a capital of £1,000 in £1 shares to carry on business as gunsmiths and dealers.

Hartford, Conn.—The Motor & Accessory Corporation has been incorporated. The company is organized to promote the interests of makers of motor or motor parts to aid in the protection of members but shall be without power to engage in mercantile or manufacturing business.

Jersey City, N. J.—The Horton Bros.' Manufacturing Co. has been incorporated to manufacture games, card counters, etc. Capital, $150,000. Incorporators—J. N. Beckman, E. S. Caldwell and J. N. Davis.

London, S. W., Eng.—The Rexer Arms Co., Ltd., has been registered with a capital of £105,000 to acquire the patents in the Rexer automatic gun, etc., in Great Britain, certain European countries and the United States. The company will carry on business as gunmakers and dealers generally, and a prospectus offering £80,000 in shares has been issued. The registered office is at 10 Cockspur Street.

Lowell, Mass.—The United States Cartridge Co. has recently been incorporated with $400,000 capital stock.

Meriden, Conn.—The Meriden Firearms Company has just been incorporated under the laws of the State of Illinois with a capital of $175,000. Up to the incorporation of the new company the concern was doing its business under the name of the Andrew Fryberg Arms Company. The officers of the new company are: President, Fred. Biffar, Chicago; vice-president and general manager, A. J. Aubrey, Meriden; treasurer, F. A. Stephani, Meriden; secretary, A. H. Loeb, Chicago.

Milwaukee, Wis.—Dozier & Roberts is a new firm formed about two months ago for the manufacture of novelties in the line of fishing rod accessories, and are now in position to fill orders.

New York, N. Y.—Timken Roller Bearing Axle Co. has been incorporated to manufacture motor carriages and all other vehicles; capital, $100,000. Incorporators: L. M. Preston, No. 219 West 46th Street; Harry E. Roux, No. 314 18th Street; Leonard Gray, No. 6 West 66th Street, all of New York.

Plymouth, Eng.—Nichols & Co., Ltd., is a new company formed to carry on business at 150 Union Street, as sporting goods dealers. They will handle chiefly sports accessories.

Redditch, Eng.—H. F. Neuss & Co., Ltd., has been registered with capital of £1,500 to carry on business as fishing tackle and pin makers.

St. Cloud, Minn.—B. G. Raymond has opened a bicycle store on Seventh Avenue, North.

Taunton, Mass.—Edward McDonald has opened a new store.

Wheeling, W. Va.—The Monogravity Cycle is a new and novel amusement invented by W. H. Bernheisell, superintendent of the Wheeling Can Co. The amusement is intended for parks and summer resorts and may be installed in the local parks during the summer. The cycle is a one wheel concern, operated on a single track. In one immense wheel is arranged a carriage with three wheels. The machine goes down a slope over a stretch of track and the momentum carries it up an incline for some distance. The invention has the charm of novelty and safety.

Changes.

Halifax, N. S.—The firm of Cragg Bros.' Hardware, kitchen furnishings and sporting goods, with reference to which notice of dissolution was announced some time ago, is to be continued under the same name, Frank J. Cragg, the surviving partner having bought out the rights of his deceased brother, James R. Cragg.

Lowell, Mass.—George H. Batchelder has opened a branch bicycle store at 344 Westford Street.

Milwaukee, Wis.—The Gem Hammock & Fly Net Co. is planning a large factory to accommodate its own business and afford room to its two branch concerns, the Russian Tanning & Fur Co. and the Milwaukee Tanning & Clothing Co.

New Haven, Conn.—To accommodate its rapidly increasing business the Marlin Firearms Co., has planned the erection of an additional factory building, a three-story brick covering a ground space of 35 by 69 feet. The contract for construction has been awarded.

New York, N. Y.—On April 22 the Pope Manufacturing Co. vacated the large suite of offices in the Syndicate Building on Park Row which they have occupied ever since they bought out the old bicycle trust. They have moved their headquarters to Hartford and in the future will not maintain any general offices in New York.

New York, N. Y.—The New York Sporting Goods Co., previously located at 61 Nassau Street, has removed to new quarters at 17 Warren Street, the entire building being devoted to sporting, outing and automobile goods.

New York, N. Y.—W. Irving Snyder, fishing tackle and sporting goods dealer, who has occupied the store at 130 Nassau Street for many years, is moving further down the street to 100 Nassau, where he will have more room than in his present shop for the display of the goods he carries.

Philadelphia, Pa.—The Keim Saddlery Co. has added a complete and fully equipped sporting goods department and placed it in charge of J. E. Lancaster, who has had many years' experience in this line of trade and proposes making the Keim store a leader.

Providence, R. I.—April 15th marked the opening of the Dawson & Co.'s store at 181 Weybosset Street. For twenty years this firm has been a leader in sporting goods. The new store is very pleasantly located, with two large show windows on either side of the entrance, which exhibits one of the finest lines of sporting goods. The interior is finished in oak, with large show cases displaying every conceivable kind of fishing tackles and reels. In the rear of the store there is a separate department for bicycles. Dawson & Co. are the sole agents for Slazenger's golf and tennis goods in Rhode Island. In a short time another department, for the repair of gun locks and key fittings, will be added to the store.

Red Wing, Minn.—The Red Wing Boat Manufacturing Co. has recently acquired property here which will shortly be occupied by a $15,000 factory, employing a large number of men in the manufacture of small craft.

Springfield, Mass.—The Fisk Rubber Company have moved their store to Bridge Street where they carry a full line of tires manufactured at the company's plant in Chicopee. The store has the agency for the Firestone Side Wire (solid) tire.

Tiger Bay, Fla.—D. C. Cement has sold out his bicycle store and removed to Bartow, Fla.

Tilsonburg, Ont.—Mr. Burkholder has recently moved into his new factory, a substantial brick building centrally situated just back of the Main Street. When the factory is in proper running order Mr. Burkholder will turn his attention to the manufacture of automobiles, for which he believes there is a splendid opening.

Troy, N. Y.—E. H. Brunelle has purchased Lucey's interest in the bicycle and talking machine business and will take possession at once. Mr. Lucey will continue the automobile business exclusively in his new location, 22 Fourth Street.

Miscellaneous.

Chemnitz, Germany.—United States Consul J. F. Monaghan reports that the United Kingdom imported during the first eleven months of 1904, 6,142 auto and motor cycle machines, of a total value of £2,352,520 ($11,448,538.)

Philadelphia, Pa.—The Edward K. Tryon Co., manufacturer and dealer in firearms, fishing tackle and sporting goods, notes an exceptionally heavy demand for baseball goods during the past month, which taxed its capacity to meet. While the fishing tackle season has been somewhat deferred it has also been quite satisfactory as to the volume of business transacted.

Fires.

Gaylord, Mich.—Fire caught in the bicycle barnes shop of A. H. Vandoran on April 19th from some unknown cause and did $1,000 damage. The stock was valued at $5,000 with $2,000 insurance.

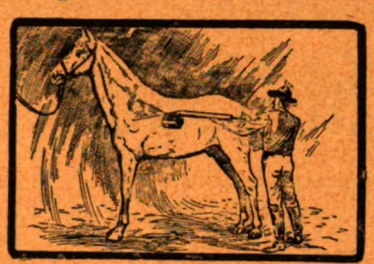
Get Ready For Fly-Time!

It is THE time when both the Farmer and his dairy do a lot of unnecessary "kicking"—the Farmer kicks because his cows kick—dirt into the milk while being milked, toss their heads, switch their tails—until the milk is positively unfit for use. Worse than that—it decreases 25 per cent. in quantity.

The cows kick—and rightly so—because they are bothered, beyond endurance, by swarms of flies, ticks, gnats or other insects, just because they are not sprayed with



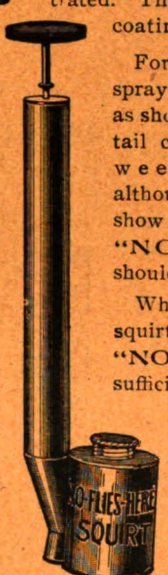
"No-Flies-Here"

(Trade Mark)

The only real Fly-Repeller and Insecticide ever introduced.

THINK OF IT!

A single application will last for a week. It will *positively keep away all flies, ticks, gnats or other insects* from cattle, horses dogs, poultry, etc., even in localities where these pests abound.



It gives the cows a chance to feed in peace. They give more and better milk, too.

Writes a Jersey Dairyman: **"Without the use of this perfect insecticide,** I would prefer not to own cows at all rather than see the dumb animals suffer during fly time. **but, with the use of "NO-FLIES-HERE"** it is not only a pleasure to enjoy the sight of them, but a great source of comfort, as well as profit, to the entire household."

It is healing and soothing, giving immediate and lasting relief without danger of injury to the stock.

There is nothing harmful or deleterious in it.

"An Ounce of Prevention."

"NO-FLIES-HERE" can be applied with a brush, sponge or piece of cloth, but it is easier, quicker, and more economical to use the **SQUIRT CAN OR SPRAY** here illustrated. This gives a thin uniform coating and obviates all waste.

For horses and cows simply spray the liquid on the animal, as shown, especially where the tail cannot reach. Twice a week is usually sufficient, although a little practice will show how much and how often "NO-FLIES-HERE" should be used.

When applied with a squirt can, one gallon of "NO-FLIES-HERE" is sufficient for five head of horses or cattle for an entire season. The same quantity is sufficient for one application to 400 head. *"NO-FLIES-HERE"* is so inexpensive that everybody can afford to use it.

Now is the time to lay in a stock of

"No-Flies-Here"

before fly time. It is a profitable article for enterprising dealers to push. Gallon can of "NO-FLIES-HERE" and Squirt Can (as illustrated) sent on receipt of $2.50.

SEND FOR INTERESTING BOOKLET OF DETAILS.

We supply this booklet in liberal quantities to jobbers with their names printed thereon.

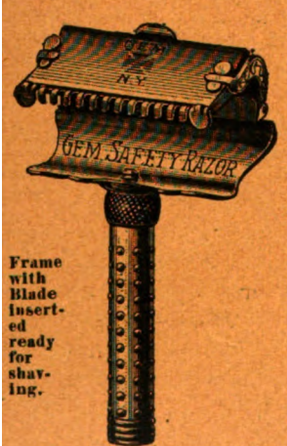
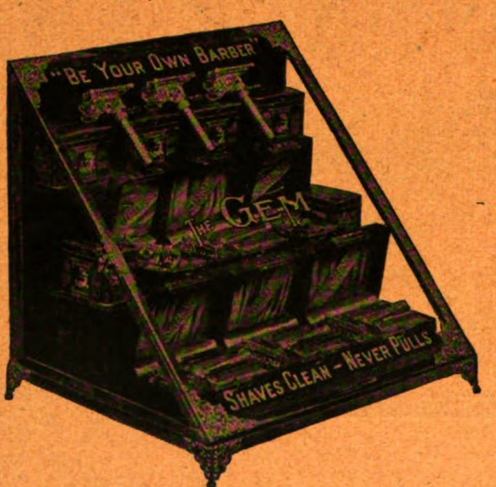
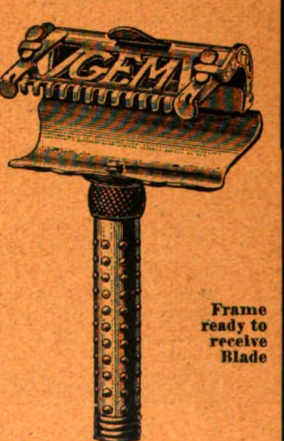
BIG PROFITS IN GEMS



"On the Right Track" to Profits?



If not,—if you are travelling a round-about way to the profits of, or are "side-tracked" by some inferior profitless safety razor,—try the Gem: It is the short-cut — the "Bee-Line" to Big Profits in the Razor business.



The Gem sells when other Safeties fail to sell. Display it,—explain its points of excellence,—the sale is made. More than that: One satisfied customer will bring you others. Millions of Gems are at work on all kinds of whiskers in all parts of the world.

Our New Silent Salesman

Frame with Blade inserted ready for shaving.

Frame ready to receive Blade

works for your pocket all the time. It's your's for the asking, with your first order for Gems.

Our New Gem RIGID MODEL Safety Razor

excels, without question, all other Safety Razors, in being the simplest, the most sightly, substantial and sanitary.

No better Safety Razor made than the Gem — at any price.

If you want to get ahead of the "other fellow" and get the "Lion's Share" of Safety Razor profits — handle the Gem.

Do you want our New Silent Salesman Display Case—or our Catalogue—or our Rock Bottom Prices—or all three—you only need ask. Mention HARDWARE.

PRICES CURRENT

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

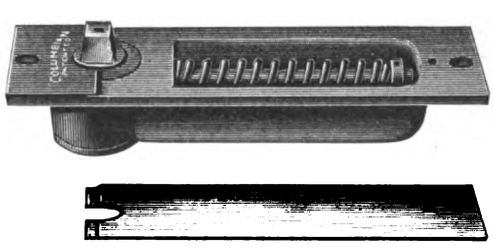
CAN YOU ANSWER

these questions about your line of floor spring hinges to your customers satisfaction?

ARE THEY SERVICEABLE?
ARE THEY LONG LIVED?
ARE THEY ADJUSTABLE?
ARE THEY COMPACT?
ARE THEY DUST PROOF?

"COLUMBIAN" FLOOR SPRING



hinges will stand such an essential cross examination successfully.

They are simple and compact yet efficient.

Good material and skilled workmanship make them reliable hinges, noiseless, and with accurately fitted parts absolutely dust proof.

The loose top pivot allows the door to be removed or put in place at an instant's notice by a single person and without any special tools.

A penny postal will bring Builder's Hardware Catalog No. 12 with further information. Send for it today.

The Columbian Hardware Co.
Cleveland, Ohio, U. S. A.

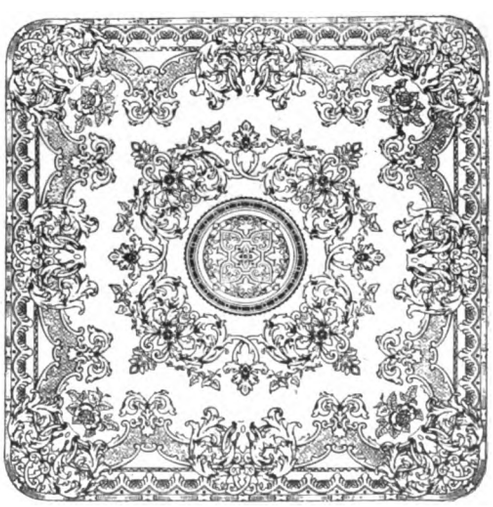
WHITE'S EDGE TOOLS

The feature that commends itself about White's Edge Tools is that they are easy going—they never cumber the shelves of a hardwareman.

Nearly Three-quarters of a Century on the Market

is the reason for this. They sell well because they are well made and because in all that time they have improved with age.



If you are looking for perfection in Edge Tools, look at White's. A single sample order will furnish conclusive proof.

Send for it to-day and be convinced.

PETERS

CARTRIDGES AND LOADED SHELLS

Bring Down the Dollars for the Hardware Dealer!

THE *unequaled quality* of Peters Ammunition, together with persistent advertising and wonderful records made with shot-gun, rifle and revolver, have created a greater demand for it this year than ever before.

We have the most complete line and the best goods in the country.

Are YOU Taking Advantage

of the business we are creating for you? If not, ask your jobber or write us direct.

THE PETERS CARTRIDGE CO.

CINCINNATI, O.

New York: T. H. Keller, Mgr., 98 Chambers St.

HARDWARE

Northrop's Metal Ceilings

The latest and the best designs in Metal Ceilings are finely illustrated in our new catalog. You ought to have a copy.

Name anything you wish in the way of metal ceilings or walls for rooms of any size, shape, kind or purpose, and you'll find that the original

Northrop Metal Ceilings

are still unequalled in sharpness of stamping, simplicity of construction and architectural fineness.

Every Hardwareman ought to handle Northrop's Metal Ceilings. Any mechanic can put them up.

Remember: If you'll send us the particulars about any room, we'll submit drawings and prices.

Northrop, Coburn & Dodge Co.

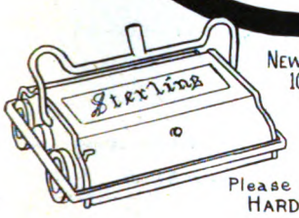
STERLING



STEEL CARPET SWEEPERS

In comparison with old style, wooden sweepers have as many points of superiority as the modern battleship over the frigate of 1812.

Let us tell you more of the Sterling's many advantages, and how we give this handsome display stand Free with Sterling Sweepers.

STREATOR METAL STAMPING CO.
STREATOR, ILL.

NEW YORK OFFICE

"Sterling"

Hack Saws and Blades

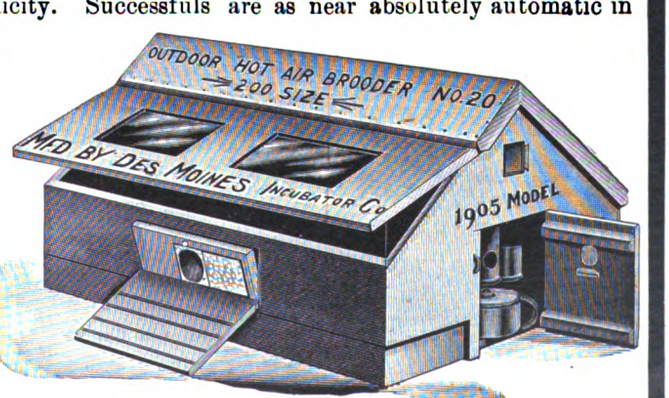
There is absolutely no difference between the Best Hack Saw or Hack Saw Blade and the "Sterling". The "Sterling" is the Best. It is never found wanting in quality, workmanship and durability.

An easy seller? That is the feature which commends itself about the "Sterling". It sells so easily because it is so good. When ordering of your Jobber specify

"Sterling"

Diamond Saw & Stamping Works,
Buffalo, N.Y., U.S.A.

Successful Incubators and Brooders.



The poultry raisers are an important part of every community—a good class of people to get on the good side of. You can do it with the Successful Incubators and Brooders.

Best Hatchers and Chick Mothers in the World.

Not only best, but best known. It requires no argument at this day to convince poultry raisers that Successful Incubators and Brooders hatch and brood more and better chicks with less expense and less attention than any other machines made. That's the record of years.

Poultry raisers want certainty and they want simplicity. Successfuls are as near absolutely automatic in all workings as it is possible to make them. Only the simplest rules to observe. The beginner gets the same good results with Successfuls as the expert.

Everything for Poultry.

In addition to Incubators and Brooders we manufacture a full line of Poultry Foods and Supplies. We can supply you any article your customers may call for. And we can supply your customers with high bred fowls, any breed, from our Thoroughbred Poultry Farm. If you are not handling a line of Incubators and Brooders don't fail to write for our 1905 Incubator, Supply and Poultry Catalogue with dealers' terms.

"PULLMAN" SASH SPRING BALANCES.

Used in the Finest New Buildings

Just as good for Old Buildings

If you have not a stock for Spring trade, ORDER NOW!

PULLMAN MFG. COMPANY,
ROCHESTER, N. Y., U. S. A.

DEALERS

should insist on their jobbers supplying them with **Pelouze Family Scales** having the **New Silver Finished Dials.**

Capacity 24 pounds by ounces.

The best and handsomest finished scales on the market. While superior in many ways to other makes, prices are as low.

Send for complete Catalogue G; 40 styles: Counter, Family, Market, Candy and Postal Scales, Ice Scales, Spring Balances, etc.

Order through your jobber.

Insist on **Pelouze Scales** with **Silver Finish Dial.**

PELOUZE SCALE & MFG. CO.,
118-133 W. Jackson Boul., CHICAGO.

No. 700 Silver dial, tin scoop.
No. 600 Silver dial, steel platform.

Received Highest Award at World's Fair, St. Louis.

The EXCELSIOR CARPET STRETCHER and TACK HAMMER Combined.

THE most complete machine for putting down carpet, either by Housekeeper or Expert, yet invented. Stretches smoothly and evenly; holds securely while operator detaching hammer, has both hands free to arrange and tack. Hammer being part saves hunting up, as with other Stretchers. Easy to operate, inexpensive. Each in a neat box. **"The Housekeeper's Friend."** Postal brings retailers Display Card free. Ask your jobber for the **"Excelsior"** or write

A Profitable Proposition FOR Every Hardwareman

Get in line—write us and be convinced.

Mention HARDWARE.

The National Sheet Metal Roofing Co.

239-245 GRAND ST., JERSEY CITY, N. J.

Polygon Conductor Pipes Won't Burst.

The twist in the corrugation checks the sudden fall of ice and water, thus protecting the joints. It stands hard knocks because it is corrugated. Again, it is much handsomer than plain pipe. Made in copper and galvanized iron.

Catalogue and information free.

Address Dept. H,

THE **American Steel Roofing Co.**

Middletown, O.

5 10 15 Cents Specialties

made by us are of such high quality that you will wonder how we can afford to sell them at that price. Take our

Dandy Ice Pick

for instance.

It's 11 inches long and weighs 8 ounces, head nickel-plated all over; handle of hickory, varnished and polished.

An excellent seller.

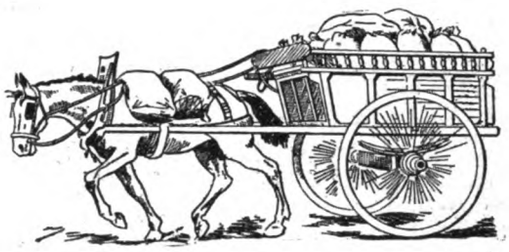
THERE'S A HEAP O' SATISFACTION



in a name—a name that stands for bestness—best quality.

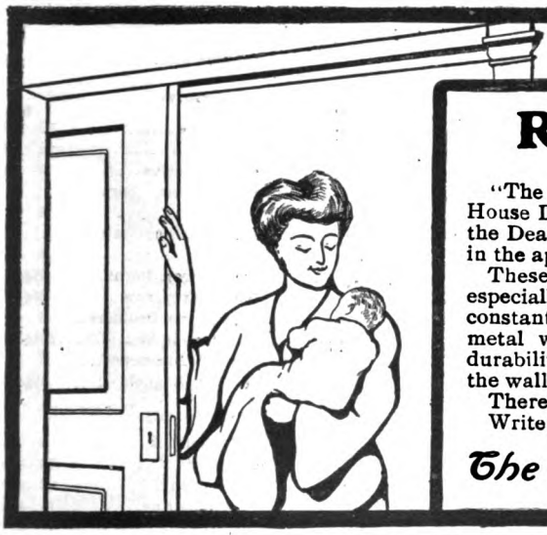
Take Axle Grease for instance: if there's any kind that gives all-a-round and lasting satisfaction, it's

FRAZER'S AXLE GREASE.

Its the Grease of quality; puts all the "just as good as" Frazer kind in the shade. Sells quickest; lasts longest. Sold in boxes, cans, pails, kegs, barrels. The question is: how much do you need?

FRAZER LUBRICATOR COMPANY,
85 Murray St., New York.

Only a Waste of Energy



To spend your money for a cheap Axle Grease when you very well know that your customers require the best.

If you have not yet, why not now

Try Snow Flake Axle Grease

Twenty-one years on the market—sold and used all over the world—unequalled in quality—sold at a price, profitable to you—need more be said to warrant your sending for a sample order? Send for it to-day.

SNOW FLAKE AXLE GREASE CO.
FITCHBURG, MASS.

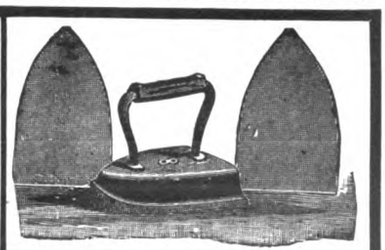
RICHARDS' ROYAL

"The Noiseless, Smooth Running" Ball Bearing Trolley House Door Hanger has been designed with special thought for the Dealer catering to the trade of the man who demands perfection in the appointments of his home.

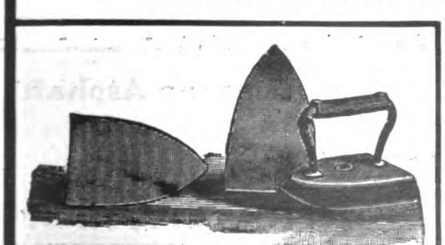
These hangers are *noiseless*—the wheels running on *hard maple*, a wood especially adapted for this use, as it retains an even, level surface under years of constant usage. There is a surplus of material for every strain, but no excess of metal where it is not needed, insuring a tight *non-rattling* hanger of great durability. The track may be removed or adjusted at any time without injuring the walls or plaster.

There's a Richards Door Hanger for every requirement of your customers.

Write for our book of Facts and Figures.



***The* Richards Mfg. Co., - Aurora, Ill.**



SAD IRONS . . .

Filler Supremacy

is conceded the "NICE" Brands. There are reasons—Lots of them. They are BEST for the PAINTER because they dry flat, work freely and do not show laps, which means economy in time and labor. They cover 800 square feet to the gallon, which means economy in material. They are BEST for the Architect, Builder and property owner because they are the greatest preservatives known,

NICE FILLERS

all of which means that they are unquestionably best for the DEALER.

"NICE"

HURWOOD TOOLS

We are so particular in the choice of the quality of steel for all our tools and exercise so great care in their making, that hardwaremen everywhere hold them in high esteem for these very reasons.

*

If you have never handled any of our Screw Drivers try our

Extension Screw Driver

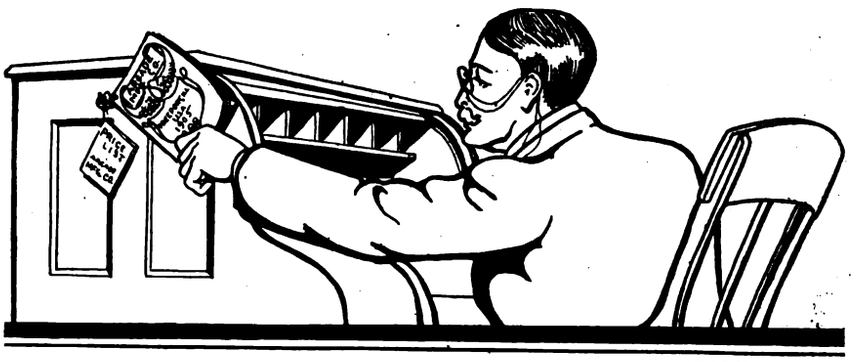
Electricians and piano manufacturers say it has no equal for their business.

*

It does double duty—is really two screw drivers in one.

*

You ought to see the rest of our line of Screw Drivers fully described in



Our Catalog!

You ought to have a copy on hand always. A postal will fetch it.

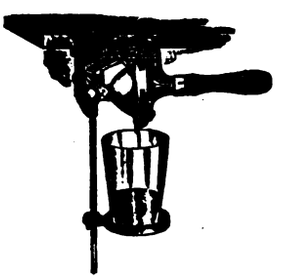
*

HURWOOD MFG. CO.,

Bridgeport, Conn., U. S. A.

REACH OUT

DON'T be satisfied with your trade as it stands to-day. No matter how extensive it may be there is always more business within your reach, which can be developed by proper cultivation.

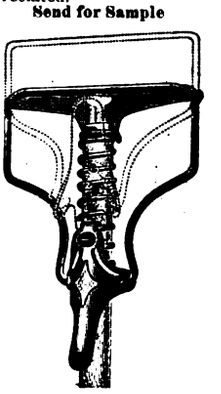


Crystal Coffee Mill

A one pound coffee mill with glass hopper. A leader in our big family of metal, wood and glass coffee mills.

Must be seen to be appreciated.

Send for Sample

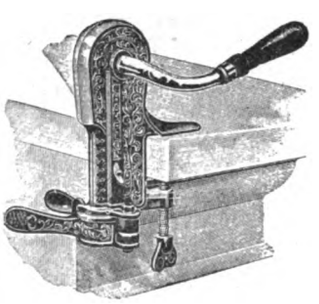


Perfect Lemon Squeezer

One of the 20 different styles we manufacture. Every one of them a rapid seller.

Send for Sample

The Arcade Catalog



is filled with the seeds of prosperous business—articles that bring the people and their dollars into your store. This catalog is as necessary to the proprietor of the largest Hardware store as it is to the young Dealer just building up his trade.

Gem Mop Head

One of our many style in this line.

Send for Sample

Champion Cork Puller

We make numerous other designs for use in the home or bar.

Send for Sample

Sent free on request. *Order your copy to-day.*

Arcade Mfg. Co. Freeport, Ill.

WIRE GOODS

NEVERMORE!

Once upon a workday dreary, while I scrubbed both weak and weary,
On a ladder, tall and flimsy, shaking to its very core—
Suddenly there came a snapping, as of brittle twigs a cracking—
"Tis a fall I'll soon be taking"—Then I landed on the floor.

And again my thoughts recurring, to the dealer's words assuring,
When I went to do the buying, "It's just as good, so why pay more?"
Now I vow if he would sell me such contraptions, he can fool me
Never, Nevermore!

Mr. Dealer, here's a lesson, worthy of your contemplation,
That it pays to sell UDELL goods, goods that build your reputation.
Put your trust in their fast selling, they will make you sales galore,
Rest assured the time is coming, when people buy them—
Evermore!

If there is one quality more characteristic of the articles we manufacture than any other—it is the strength of the lumber used in their construction. Only wood free from knots and other blemishes is used in

30 Warren St., New York

DEALERS

Throw your line among fishermen and you'll get a **strike**—with a rush for the goods—if it's the general line of

Pflueger's Fine Fishing Tackle

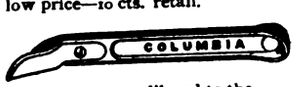
made only by the

ENTERPRISE MFG. CO.

Twenty-five years' experience, combined with the largest manufacturing facilities in this country, enable us to produce a superior line of fishing tackle that fishermen insist on having.

Hooks, Flies, Trolls, Spinners, Phantoms, Reels, Furnished Lines, everything in fishing tackle, packed for effective display—best selling line you can carry.

PFLUEGER'S PATENTED REVERSIBLE HINGE INSURES FREE SPINNING AND PREVENTS BENDING OR BREAKING



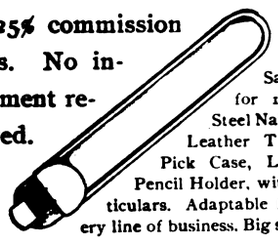
NOTICE

Free to any dealer in SPORTING GOODS, sent express prepaid, 155 page illustrated catalogue No. F23, Metal Fish Sign and Window Transparency in eight color lithograph.

The ENTERPRISE MFG. CO.
Akron, Ohio, U. S. A.

Columbia

It never slips nor tears. A high-grade can opener at a low price—10 cts. retail.



Discount most liberal to the trade. Send for it.

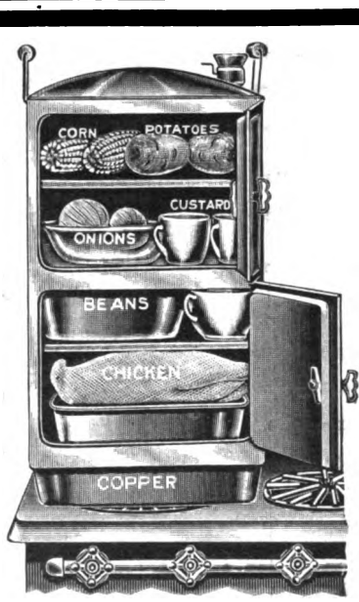
Can Opener



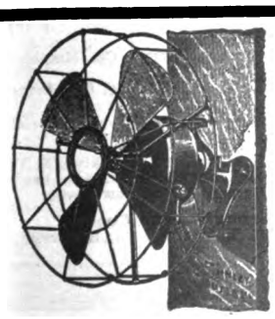
AGENTS WANTED
TO SELL ADVERTISING NOVELTIES

on 25% commission basis. No investment required.

Three Samples for 10 cts. Steel Nail File, Leather Tooth Pick Case, Leather Pencil Holder, with particulars. Adaptable for every line of business. Big sellers.

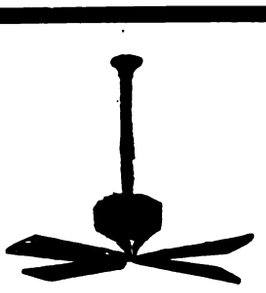
J. P. Kenyon, Mfr., Owego, N. Y.

Mr. Dealer



Do you know there's a demand for a **good** steam cooker which you should supply? The profit on goods you are "out of" will never come back. We prefer to sell a progressive dealer rather than direct.

IDEAL STEAM COOKERS



are advertised thoroughly in all the national publications from Ladies' Home Journal down. Get our proposition, it means profits—**Dollars**—to you. We are the largest manufacturers in the world. Our lines are complete. We make all good kinds; Square (with whistles), Round (with whistles) in all desirable sizes, at all prices.

36-PAGE BOOK FREE, write for it to-day, with confidential prices to dealers.

The Leader Lemon Squeezer

The most compact and rapid squeezer on the market.

Has no loose parts. Always ready for use.
Two styles: Nickel Plated and Japanned.

Mention HARDWARE when writing.

THE LEADER MFG. CO.
Hartford, Conn.

A Better Location Than Yours

would be in Virginia, the Carolinas, Georgia, Florida or Alabama, and the special Southern edition of the Seaboard Air Line Magazine will convince you. It contains specific opportunities, and lists of orange groves, pine apple plantations, farm, fruit and truck lands.

"Picturesque Florida" containing over a hundred full page photogravures illustrating typical scenes, but containing no reading matter or advertising, together with other literature sent on receipt of ten cents to pay postage.

J. W. WHITE,
General Industrial Agent,
Seaboard Air Line Railway,
Portsmouth, Virginia.
We have a good location for your plant.

Our Object

IS TO PLEASE YOU TWICE OVER

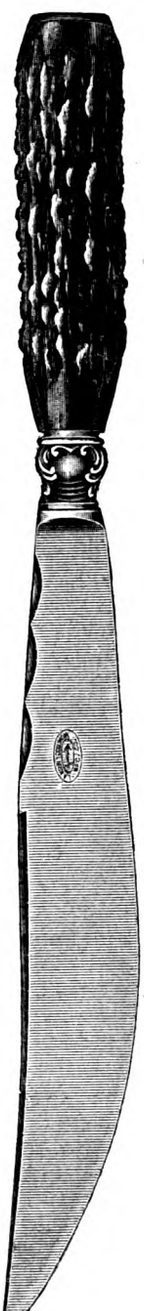
Name anything you wish in the line of

Fine Table Cutlery

in general—in particular

Stag Handle Carvers

with Silver Ferrules
and if with our twenty-five years' experience and down-to-date facilities we do not offer you



The Best Goods for Your Money

it will be a surprise to us and—to scores of old customers, who know them to be the best.

Our Catalog—Have You Got It?

You can't afford to be without it because it shows in detail, how complete and excellent our line of cutlery is.

Don't argue—don't wait—write to-day.

Mention HARDWARE

WE BELIEVE

It is always best to buy a No. 1 article, as it usually lasts longer, does better work and is so much better in every way. *You think so too*, and whenever you are induced to buy a cheap tool you are soon sorry you did so. Before buying a fire pot investigate the merits and advantages found in the No. 1, *then you will know that "The No. 1 is King of Fire Pots."* Try it. Your money back if you are not pleased.

THE MEN WHO KNOW

insist on having Richards' Royal Door Hangers, those that don't can be easily shown their exclusive features,

Say all the nice things about other door hangers, there yet remains one fact true only of the **RICHARDS ROYAL**

Ball Bearing Trolley House Door Hangers

They are the most reliable business builders for the dealer, because they insure the highest degree of satisfaction among consumers.

The remarkably smooth and noiseless action of the ROYAL is due to tightness of all parts and the fact that the wheels run on hard maple, the best wood for this purpose as it keeps a level and even surface and is not easily warped.

If you aren't selling Richards Hangers it will pay you to learn more about them. Write us for our book of Facts and Figures.

The High Speed
of the
WHITE LILY WASHER

(2¾ turns of the fly wheel to one turn and return of the dasher) makes it the fastest and cleanest washer on the market. This great speed creates a foamy, cleansing suds and sends the water swirling through the clothes, washing out every particle of dirt.

The 20-lb. fly wheel with the weight in the rim, makes fast washing easy.

Test any Washer on Your Floor

and see if it compares in any respect to the White Lily.

Write for "To Salesmen on the Floor." Its full of talking points.

310 Broadway, New York

If you're looking for a Washing Machine that is made for long, satisfactory service,—that has strong "talking points,"—and that can be sold at a fair price,—you should by all means, investigate

O. K. Washing Machines

They're made to please. There's nothing weak about the O. K.,—no springs to repair,—no cheap pins to rot or warp, no complicated gearing to break and cause annoyance.

O. K. Washing Machines are easy running, durable, reasonably priced, steam tight,—and there's a profit in them for the dealer.

Write for our booklet and prices.

THERE'S A HEAP O' SATISFACTION

in a name—a name that stands for bestness—best quality.

Take Axle Grease for instance: if there's any kind that gives all-a-round and lasting satisfaction, it's

FRAZER'S AXLE GREASE.

Its the Grease of quality; puts all the "just as good as" Frazer kind in the shade. Sells quickest; lasts longest. Sold in boxes, cans, pails, kegs, barrels. The question is: how mnch do you need?

FRAZER LUBRICATOR COMPANY,
85 Murray St., New York.

NEVERMORE!

Once upon a workday dreary, while I scrubbed both weak and weary,
On a ladder, tall and flimsy, shaking to its very core—
Suddenly there came a snapping, as of brittle twigs a cracking—
"Tis a fall I'll soon be taking"—Then I landed on the floor.

And again my thoughts recurring, to the dealer's words assuring,
When I went to do the buying, "It's just as good, so why pay more?"
Now I vow if he would sell me such contraptions, he can fool me
Never, Nevermore!

Mr. Dealer, here's a lesson, worthy of your contemplation,
That it pays to sell UDELL goods, goods that build your reputation.
Put your trust in their fast selling, they will make you sales galore,
Rest assured the time is coming, when people buy them—
Evermore!

If there is one quality more characteristic of the articles we manufacture than any other—it is the strength of the lumber used in their construction. Only wood free from knots and other blemishes is used in

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

NATIONAL CYCLE TRADE ASSOCIATION.

A. M. Scheffey, secretary of the association, announces that the fourth annual meeting of the National Cycle Trade Association will be held at its office in this city on July 25, 1905. They will endeavor to make this meeting the most successful in the history of the association. Be sure to arrange your vacation so as to attend. The entire manufacturing and jobbing trade of the United States is invited.

JOHN E. HUMASON SUCCEEDS HIS FATHER.

The Chapin-Stephens Company, manufacturers of Rules, Planes, Levels, Etc., with main office and factory at Pine Meadow, Conn., since the consolidation of said company in 1901, have conducted a New York store under the personal management of Virgil P. Humason, who was also a director and vice-president of this company. This store until recently was located at 80 Chambers Street. Prior to the sudden death of Virgil P. Humason on May 6th, the store was removed to 9-15 Murray Street, where much better opportunity is afforded for large commodious offices, together with sample and stock rooms. At the death of Mr. Humason, the Chapin-Stephens Company installed as their manager, John E. Humason, who has been associated with his father in his business during the past dozen years. John E. Humason will also look after his father's interests in the silverware business of William Rogers Manufacturing Co., manufacturers of silver plated table Flat Ware and West Silver Co., manufacturers of silver plated Hollow Ware, and other lines that he was handling at the time of his death.

ARKANSAS RETAIL HARDWARE DEALERS' ASSOCIATION.

The annual meeting of the Arkansas Retail Hardware Dealers' Association will be held on June 21, and two succeeding days, at Gleason's Hotel, Little Rock. Indications point to an exceptionally large attendance at the meeting, many jobbers and manufacturers are expected to be present, or will send their representatives. Important matters will be brought up for discussion, among which will be the advisability of organizing a mutual fire insurance company for the benefit of the members.

NATIONAL ASSOCIATION OF MANUFACTURERS.

The tenth annual convention of the National Association of Manufacturers was convened at Atlanta, Ga., on May 16th, for a three days' session. Three hundred delegates were present. An address of welcome was delivered by Gov. Terrell of Georgia, and speeches were made by Mayor Woodward of Atlanta and John T. Graves. William McCarroll of New York replied in behalf of the association. The convention was called to order by President David M. Parry. At the conclusion Ludwig Nissen of New York read a paper on "Governmental Relation to Public Franchises." D. A. Tompkins of Charlotte, N. C., then delivered some lucid remarks on "The Present and Future of Cotton, from the Plantation to the Loom." In the afternoon David Davenport of Bridgeport, Conn., commented upon "The Necessity for Organization, National and Local." On Wednesday Secretary Metcalfe of the U. S. Department of Commerce and Labor delivered an address, very interesting and edifying.

OUR PRESENT PLACE IN THE FAMILY OF NATIONS.

The underlying causes of the wonderful development of the United States during the past twenty-five years through which it has reached first place in manufacturing in the family of nations, are suggested by a compilation recently prepared by the Department of Commerce and Labor through its Bureau of Statistics, showing the production of the principal minerals at intervals from 1880 down to date in the United States and in the world as a whole. The commerce of the United States has increased from 1½ billions in 1880 to 2½ billions of dollars in 1904, while the commerce of the world meantime has increased from 15 billions to 22 billions, the relative increase made by the United States being thus greater than that of the other parts of the world.

The United States produces 37 per cent. of the world's coal, 39 per cent. of its pig iron, 51 per cent. of its copper, 25 per cent. of its zinc, and 51 per cent. of its petroleum. In the production of coal, pig iron, copper and petroleum the United States leads the world.

In the production of precious metals, the total of which increased from 192 million dollars in 1880 to 442 millions in 1904, gold has contributed a larger proportion than silver during the past twenty-five years, its share in the world's output having increased from 106 million dollars in 1880 to about 349 millions in 1904, the growth being 243 million dollars, while the commercial value of the world's silver product meantime grew from 85 2-3 million dollars in 1880 to about 93 millions in 1904, the increase being but about 7 million dollars. Meantime the production of gold in the United States increased from 36 million dollars in 1880 to 84½ millions in 1904, while the commercial value of the silver output of the United States decreased from 34¾ million dollars in 1880 to about 31 millions in 1904.

The following table shows the world's production of the principal minerals in 1880 and 1903, the unit of quantity in each case being tons of 2,240 pounds, except as relates to gold and silver, the commercial value of which is stated, and petroleum, of which the quantity is stated in barrels of 42 gallons each:

PRODUCT.	1880	1903
Coal .....tons..	329 833,732	866,071,428
Pig iron .....do...	18,290,306	46,257,232
Copper .....do...	153,944	613 129
Lead .....do...	233,294	*a* 887,337
Zinc .....do...	233,200	564,789
Petroleum .....bbls..	*b* 148,144.975	195 203 511
Gold	$106,436 800	*c* $349 300 000
Silver	85,640 600	*c* 93,000,000

a 1900. *b* 1890. *c* Preliminary estimates for the year 1904.

The following table shows the production of the same minerals in the United States, 1880 and 1903; the unit of quantity in each case being the same.

PRODUCT.	1880	1903
Coal .....tons..	67,998.164	319.068 228
Pig iron .....do...	3.835,191	18,009,252
Copper .....do...	27,000	311,627
Lead .....do...	87,339	250.000
Zinc .....do...	20.749	142,159
Petroleum .....bbls..	26.286.123	100,461.337
Gold	$36 000,000	*a* $84,551 300
Silver	34,720,000	*a* 31,089 700

a Preliminary estimates for the year 1904.

DEATH OF WILLIAM F. HYATT.

William F. Hyatt, president of the Brass Goods Manufacturing Co., Brooklyn, N. Y., died at his residence in that city, May 12, in his eighty-first year. Mr. Hyatt was born August 2nd, 1824, in what is now East Broadway, New York, his parents moving to Norwalk, Conn., a few years later, where he remained for some time. Returning to New York, he entered the employ of Charles Merrill & Son, 556 Grand Street, who were Hardware merchants of long standing. In 1847 Mr. Hyatt sought like many others to better his fortune in California, returning from which in 1851, he found a place with his old employer. A year later he was employed by J. B. Sargent, afterward Sargent & Co., then located at 24 Cliff Street, with whom he remained until 1855. The following year Mr. Hyatt became a partner in the Hardware business in Platt, near Pearl Street, the firm name being Sullivan, Scofield & Hyatt, later Sullivan & Hyatt, who were succeeded by Hyatt & Spencer, at 54 Beekman Street, the latter firm being dissolved in the seventies and Mr. Hyatt continuing alone until about 1876 at the Beekman Street address, and was succeeded in 1876 by Spencer & Underhill, which later became in 1884 Underhill, Clinch & Co. In 1876 Mr. Hyatt established the Brass Goods Manufacturing Co., the factory of which is located at 86-92 Third Street Brooklyn, N. Y., and of which he continued president until his death. Mr. Hyatt was a man of sterling integrity and beloved by all with whom he came in contact in a business or social way; he was conscientious to a fault and of moral rectitude that confirmed the high esteem in which he was held. Despite his extreme age, which one would hardly suppose from his daily habits, by living abstemiously and taking regular exercise, he was well preserved. He is survived by a widow, two daughters and two sons, one of whom, Herbert O. Hyatt, is treasurer and general manager of the Brass Goods Manufacturing Co., the other being connected with banking interests.

Editorial Trade Review

The continued prevalence of cool weather has made a Spring favorable to the trade that most Hardwaremen find in due season. The long Winter we had will seem to make the present season a very short one, concentrating the sale of legitimate Spring goods within a narrower compass than usual, and preparing the way for the sale of the usual Summer requirements which are gradually becoming important and thrusting their wants upon you early. The eager hustling has had its due effect, and the Spring sales have responded so well that the trade is felicitating itself that the volume of business has left but little to complain of. A good amount of traffic with less cutting of profits has been the rule instead of as usual the exception.

The prices have been maintained by the manufacturers in a very satisfactory manner. The advances that have taken place have all been discounted in anticipation, and when the advance has been announced it was met by the trade in a spirit that seemed to say "it had to come, and I wonder it didn't come before." The way was often made easy for a slight advance by anticipating its speedy arrival, as goods were too low.

Except in the price of nails, the cutting of which was caused by manufacturing enough of them to supply them too readily, and when once the cutting system was adopted it was difficult to stop it, even while a possible advance in price was figured on to help the trade. The "boys" always like to have something to cut, and to confine it to the Nail market is always politic, when possible. There may be less trouble in the immediate future, when a curtailed production may prevent a continuance of the objectionable tactics and prevent any farther demoralization.

Orders from the travelers, when sought among the Retailers, have been of good assortments and not of too sanguine quantities. There is no disposition to overstock, and the stocks are in good condition generally for an activity notably in progress among the consumers. The policy of overstocking among both classes of trade is no longer an element of uncertainty, and is not too frequently indulged in. The increasing manufacturing facilities in all leading plants, is too generally the fashion for the manufacturer to scare the Jobber into ordering too largely under the old-fashioned idea that inability to supply will be the natural result. The delays now arise more from the inability of the transportation companies to deliver, than they do from any inability of the producer who prepares himself by adding to his plant. The last few years have seen ample preparations of this character.

Builders' Hardware is still in good request, the amount of building going on in every direction is encouraging to a great degree in that important branch of industry. This is noticeable in all trades of the improved articles now made to cater for a business that is kept in advance of the wants of the country. The fine artistic patterns of our better grades especially, may always be relied upon to equal any demand upon them by the intelligent architect, whose labors need the proper expression of his art.

In the way of goods generally, several items need looking after. Refrigerators are reported as being scarce, the demand has been so great as to be unexpected. There is a wide diversity in styles in this industry, and the taste of the individual is met more than half way by the manufacturer. The demand for the high-grade articles, with all modern improvements, increases in a manifold ratio annually, and keeps pace with the prosperity of the consumer.

Lawn Mowers and similar goods are having a busy season. There is a demand for these useful articles that is calling for better goods among the Hardwaremen, leaving the cheaper lines to be handled by the Department store, where they may be sold without the prospect of any weakness causing vexation in the future.

A REPRESENTATIVE COMMITTEE WANTED.

At the conventions in Hot Springs, Virginia, of the Southern Hardware Jobbers' Association, and the American Hardware Manufacturers' Association, too much importance cannot be given to the one particular subject in which all are fully interested, and that is the question connected with Transportation. In the April 25th issue of HARDWARE we called attention to the fact that the interests of Hardware Jobbers and Manufacturers were identical in the matter, and something might be expected from a committee appointed by the three great bodies, the Jobbers and Manufacturers, and if possible, the National Retail Association, representing as they would, the facts and sentiments of the whole trade. Such a committee would have the prestige and force of expression to bring about the desired reforms.

The mass of evidence already obtained by the Freight Committee of the American Hardware Manufacturers' Association, of which E. B. Pike is chairman, would be found to possess great interest, and prove a ground work which the stronger committee would need to formulate plans and movements, presenting the view both of the shipper and receiver, that would command attention. Chairman Pike has gone into the matter in a thoroughly exhaustive manner, and obtained data as to facts that could be used intelligently and be found convincing. In one way or another the several bodies cannot be otherwise than familiar with the confusion resulting from the present unequal and unjust classification; the loss and annoyance resulting from the seemingly unwarrantable delays in transportation; the inability of receiving proper redress from this state of affairs, especially when seasonable goods are detained until long past a delivery date, and the stealings which have in the past been a large percentage of loss, remuneration for which it was difficult to obtain.

It is to be hoped that with an appointment of a committee so representative, more complete and comprehensive data could be had, the obtaining of which would be within its powers, and the important bearing which this would have, could be actively and energetically discussed, and succeed in effecting a reform that would prevent a recurrence of existing abuses. It would be a power for good that would arouse the Hardware trade to the part—the important part—they play in this desire for a peaceful and harmonious settlement of these problems of transportation.

SPECIAL BRANDS

By A. EUGENE BOLLES

It is hoped that at the coming Hot Springs Convention some definite action will be taken tending toward the elimination of the great and increasing evil of "Special Brands." It would seem that the time had come for the members of the Manufacturers' Association to lock themselves up in close executive session so that statements can be made freely; come to the definite conclusion that they will in the future run their own business under their own names and not continue to sell their birthrights for messes of pottage in the form of orders for goods under another firm's brand; then announce their decision and fight it out.

In the mind of the writer material success will never attend the fight against Catalogue Houses, the efforts being made towards Price Maintenance, or the attempts to reduce the evil of substitution as long as every Tom, Dick and Harry in the Hardware business is selling goods under his own brand. Furthermore no one seems to be in favor of the Special Brand Idea, save a few of those in the jobbing business, while it is practically an impossibility to find one of the nearly 30,000 retail Hardwaremen or of the several thousand manufacturers of Hardware, who is not of the opinion that the entire Hardware business would be better off were all goods made under manufacturers' brands. A few weeks ago I went through the shipping room of a factory in Ohio; on every hand were great piles of the factory's product ready for shipment and on every article the name of the firm was conspicuous for its absence; every article in the room—save those in a small pile in a corner—bore the private brand of the purchaser. The manufacturer told me of instance after instance where disagreeable complications had grown out of the making of "Special Brands." I asked him "Why don't you cut out the Special Brands and sail under your own colors?" He answered, with a shrug of the shoulders, "I suppose we ought to—but how?"

It is hardly straining the point to say that the average maker of Hardware is almost in a position akin to that of the habitual drunkard who has suddenly come to his senses sufficiently to realize that he is so thoroughly the slave to alcohol that reform is impossible. His only chance is the gold cure. There are thousands of men in the Hardware business to-day who will pour blessings without limit on the head of him who invents a "gold cure" for the Special Brand habit.

Of course it goes without saying that the jobbers—at least a large majority of them—will continue to put up a big fight to save their brands and perhaps were all Hardwaremen jobbers, they would do likewise. But even the efforts of the jobbers to continue Special Brands should act as an additional incentive to manufacturers to oppose them. If a brand is a valuable asset to the jobber who distributes the goods, it is still more valuable to the man who makes the goods and who is responsible for the material and workmanship in the goods. If the exploiting of Special Brands assists the distributor in gaining trade in the half dozen States that he covers, how much more of a help should be the maker's brand to the producer whose trade reaches to every corner of the globe. And more than this shall the Special Brand idea be continued because it is the will of ten per cent. of those in the trade, or shall the will of the ninety per cent., who prefer manufacturers' brands, prevail?

At previous conventions a great deal of time and oratorical effort has been spent on this subject, without, however, bringing about any material progress toward an abatement of the evil. Is there not among all the members of the American Hardware Manufacturers' Association some man, or group of men, who will take the lead at Hot Springs, in the attempting to discover and get together the necessary ingredients for the remedy—the "gold cure"—that is so much needed? The man who can bring this about, who can turn the coming meeting from a "talk-fest" into a "work-fest" will earn the undying gratitude of thousands of Hardwaremen.

* * *

The following, written by Charles Brown Griffin, and printed recently in Profitable Advertising, is well worth a careful perusal by those interested in the question of "Special Brands."

A mark, a hieroglyphic, a symbol in the beginning of their use had no other further meaning than ownership. They were used before the written name to denote proprietorship, and served as a notice to others that the article so marked was the exclusive property of the owner. In its broader application today, a registered trade-mark or brand carries within itself a legally protected right of exclusive use, and should bespeak a degree of merit for the goods so nominated. There was a time before the day of general publicity when certain lines of Hallmarks were clear evidence of the excellence of manufacture, and goods so stamped were accepted by the public as reliable and trustworthy. To-day, any manufacturer can lawfully register his mark without regard to the quality or worth of his product, and the consumer is left to give the final verdict of merit.

The relation of publicity to a trade-marked article is so vital, and advertising has so fully demonstrated the value of a brand in any line of commerce or trade, that it hardly seems possible that any manufacturer will still refuse to see the great advantages that come from the exploiting of a trade-mark that has behind it a good standard of make and of value. And yet, some most excellent products are known by their mark, though not advertised at all by the usual means, but by the best test of true and lasting worth—the publicity of a pleased consumer. However, the success of recent campaigns gives safe testimony to the fact that the value of an advertised trade-mark cannot be overestimated, and that its commercial earning power is limited only by the extent of the appropriation, the real worth of the goods, and the output of the manufacturer.

A manufacturer may make a superior line of goods and sell them freely and satisfactorily to jobber or to retailer, and consider his work well done, but this very excellence of production has little salable value as an asset in his business without the use of a trade-mark. Some of the most conservative firms today whose success in their various lines has blinded them to the power of publicity to create capital for a trade-mark article, are beginning to realize the great loss they have sustained by not branding their goods and advertising them. And it may be noted that a number of national advertisers would not part with their trade-marks for millions of dollars, in view of the great addition that advertising has made to this purchasable quantity in their assets.

The following is a simple tribute to the potency of trade-mark publicity. A sojourner in a distant city went to a store for his favorite shaving soap; it is a well-known brand, and is advertised nationally. The dealer did not have this particular brand in stock. He brought forth several soaps, possibly just as good—but the intending purchaser did not know them, had not seen their name in print, was not acquainted with their worth. Finally the dealer said "Colgate's," and immediately a sale was made. Why? Because "Colgate" for one hundred years has stood for good soap; and more, it has been advertised until the very name suggested the "Colgate" Dutch boy with his heavy head of hair, his quaint attire, and his wooden shoes. That is where advertising does its best work by creating an influence in favor of brands that are known through general publicity.

The distinctive value of a trade-mark lies in the ease with which the goods are known and handled by the trade, and the readiness of the public to adopt as their choice goods of merit that are so plainly marked for identification—it is a commercial convenience and a protection to the consumer. The proposition which now confronts us is to find the best way to successfully advertise a brand or trade-mark. We will consider an advertising manufacturer who sells his branded goods to the jobber only. He has the several forms of publicity at his command, and can succeed in increasing the sale of his goods just in so far as his campaign is judiciously managed and the size of his appropriation will allow. He can use the trade journals to interest the retailer for the benefit of the jobber, and he can employ the various other means of publicity, either with or without the co-operation of the dealer, to secure the patronage of the consumer; for the retailer, who in turn buys of the jobber, who is sold by the manufacturer. The manufacturer selling his goods to the retailer can pass by the jobber, pocket the profit saved, or expended as above stated for popularizing his goods in the various ways.

If the manufacturer sells direct to the consumer, he can use the usual forms of publicity with a degree of success commensurate with the necessity for the article, its cost and its merit. It has been found that for a manufacturer to advertise his branded goods to the retailer for the benefit of the jobber whom he sells, is a better paying proposition than for a manufacturer to advertise to the retailer for his own benefit alone; because more firms buy their goods from jobbers than from manufacturers. In fact, it has been estimated that a large proportion of the total

Digitized by Google

volume of business in most lines of trade is done by the smaller stores who usually patronize the jobber, and many bigger concerns are compelled to go to the jobber for some lines of goods.

The experience of one manufacturer in selling branded goods to the retailer is interesting. He spent a large sum annually in the several avenues of publicity to awaken general interest in his line of goods. He was a leader in his line, and sought to confine his goods to one store in each city. The advertising proved so large a success, and the demand from the public so great, that the competitors of his favored store in some towns bought his goods in other cities, and sold them under price so as to be able to supply the demand for the coveted article, and the war thus begun ended by many dealers dropping the brand because of the loss of profit, and his whole scheme of advertising was vitiated. The error he made could have been obviated only by selling the branded article under a price openly advertised to the consumer, and by an iron-clad contract with the dealer not to cut the price advertised. This is being very successfully done to-day by many manufacturers, and is the only safe way to advertise and market a branded article, as it precludes the possibility of destructive price-cutting, and insures a safe return for your advertising investment.

Over five thousand of the best retail merchants in this country were recently interviewed in regard to the rapid changes which publicity by the manufacturer is making in the retail trade, and all that gave answer agreed that the branded article for which a demand was created by advertising on the part of the maker would very soon almost supplant the unbranded and unknown lines. The moral is: Manufacture a good article, brand it, put retail price upon it, sell to any dealer who will contract with you to maintain the price, use every source of publicity that your given amount will allow, and you will succeed in pushing the sales of your product far beyond your fondest expectations and hopes. Every day is demonstrating anew the commercial value of an advertised trade-mark. It pays to brand your goods and advertise them.

LETTER FROM PRESIDENT CRUMLEY.

To the Members of the
SOUTHERN HARDWARE JOBBERS' ASSOCIATION.

Gentlemen:—

I desire to call your attention to the importance of your being represented at the convention at Hot Springs next month, also the necessity of being prepared to take a lively part in the discussion of the various subjects which have been outlined in copy of programme, which is being sent out by our secretary. We are very much gratified to learn that so large a number of our members have already signified their intention of attending the meeting and I sincerely hope that those who have not signified their intention of going will at once make arrangements to do so and will notify Mr. Carter at Knoxville as soon as possible in order that names of your representatives may be placed in the attendance book and proper buttons and badges provided.

You, of course, appreciate the fact that the more closely our association can work with the American Hardware Manufacturers' Association and the more harmonious our relations are, the greater will be the results from our efforts. The members of the Manufacturers' Association have a very high regard for the Southern Hardware Jobbers' Association and are willing and anxious to serve our interests in every way possible. If we have grievances, they are disposed to treat with us on the most liberal basis and in turn we should render them every assistance in our power in more firmly cementing the ties of friendship that now bind us together in order that our business relations may continue to be most pleasant.

There are two subjects which will be given very special attention at our convention by both the manufacturers and jobbers—namely, Restricted Prices and Freight Matters. As you will note from programme, the question of Restricted Prices will be taken up at an Executive Session and a consensus of opinion of our members will be arrived at in order that at a later session we may intelligently approach the manufacturers and explain to them our wishes. This subject is a very important one and if the jobbers hope to derive remunerative profits on many lines which are now sold below cost, it is to their interest to attend the convention and assist in securing such legislation as will accomplish the desired results.

I enclose herewith clipping from HARDWARE under date of April 25th, on the subject of "Freight Committee." You will notice from programme that Mr. E. B. Pike, of the Pike Manufacturing Co., Pike, N. H., will deliver an address at one of our joint sessions at Hot Springs on the subject "Freight Matters of Interest to Manufacturers and Jobbers." This is almost as important as the question of "Restricted Prices," and should receive the very careful consideration of both the manufacturers and the jobbers.

Looking forward with much pleasure to seeing a representative from your company at Hot Springs in June, and assuring you that every possible effort is being made to make the meeting a success in every particular, but which results cannot be obtained unless our members attend the meeting, I beg to remain,

Yours very truly,

(Signed) W. M. CRUMLEY, President.

THE RECEPTION COMMITTEE OF MANUFACTURERS.

The Reception Committee of the manufacturers, which is a large and imposing one and representative in the fullest sense, all well-known names are embraced in the following selection:

Irby Bennett, chairman, Winchester Repeating Arms Co.
John E. Avery, Union Metallic Cartridge Co.
Geo. F. Baker, American Screw Co.
R. N. Barber, Smith & Hemenway Co.
W. H. Bennett, Lawson Mfg. Co.
S. B. Bispham, Russell & Irwin Mfg. Co.
A. W. Bond, Goodell Cutlery Co.
R. P. Boyd, John H. Graham & Co.
A. W. Bowman, Atlantic Screw Co.
E. H. Brittan, Ohio Tool Co.
E. G. Buckwell, Cleveland Twist Drill Co.
R. D. Carver, Ala. Steel & Wire Co.
Frank I. Clark, Iver-Johnson's Arms & Cycle Works.
H. P. Chenoweth, Birmingham, Ala.
W. F. Comer, American Can Co.
W. A. Corry, J. C. McCarty & Co.
Geo. L. Corbin, Corbin Cabinet Lock Co.
W. A. Chenoweth, Birmingham, Ala.
W. W. Crandall, W. W. Crandall & Co.
Frank G. Drew, Winchester Repeating Arms Co.
W. H. Foege, American Steel & Wire Co.
F. H. Forman, Pittsburgh Steel Co.
L. C. Frazer, Birmingham, Ala.
J. S. French, Peters Cartridge Co.
Robert Garland, Garland Nut & Rivet Co.
T. W. Gathright, C. E. Jennings & Co.
John R. Gilfillan, Belfont Iron Works Co.
J. J. Gilmore, American Steel & Wire Co.
N. A. Gladding, E. C. Atkins & Co.
T. H. Gossett, Peck, Stow & Wilcox Co.
J. H. Grubb, Hussey, Binns & Co.
C. M. Griswald, Corbin Screw Co.
Frank Guildener, Sargent & Co.
D. P. Hale, Standard Wheel Co.
John E. Harbster, Reading Hardware Co.
Geo. H. Harper, National Enameling & Stamping Co.
Geo. L. Haven, P. & F. Corbin.
G. B. Hobson, Tredegar Iron Works.
John Hoen, Henry Keidel & Co.
Jos. M. Hottel, G. & H. Barnett Co.
T. B. Hendrickson, Reading Hardware Co.
Fred. M. Huggins, Landers, Frary & Clark.
Arthur S. Jones, Indiana Chain Works.
Tom J. Johnson, Pittsburgh Steel Co.
George W. Jeffords, Columbian Enameling & Stamping Co.
J. P. Kelly, Kelly Axe Mfg. Co.
Chas. P. King, American Iron & Steel Mfg. Co.
George L. Knight, Tubular Rivet & Stud Co.
A. C. Langston, Jenkins Bros.
H. J. McCue, American Steel & Wire Co.
O. C. Mead, Mead & Smith.
D. A. Merriman, American Steel & Wire Co.
Guy Mitchell, Beers & Mitchell.
V. A. Moore, Atlanta, Ga.
Frank Ouerbacker, O. K. Stove & Range Co.
J. B. Parrent, Yale & Towne Mfg. Co.
Geo. S. Parker, E. I. DuPont Co.
Thos. E. Parnell, Crucible Steel Co. of America.
E. R. Phillip, American Can Co.
E. Bertram Pike, Pike Mfg. Co.
Wallace L. Pond, Nicholson File Co.
James T. Powell, Stanley Rule & Level Co.
J. T. Quarles, Lamson & Goodnow Mfg. Co.
H. F. Reese, The Fairbanks Co.
H. G. Reinicker, Warren Edge Tool Co.
J. W. Ryan, P. & F. Corbin.
John S. Sanders, Union Metallic Cartridge Co.
A. R. Sisson, Russell & Erwin Mfg. Co.
W. P. Smith, Mead & Smith.
F. Herbert Smith, E. C. Atkins & Co.
W. K. Stone, F. I. Stone & Co.
Daniel X. Stucki, White Mountain Freezer Co.
J. P. Tabb, Ames Shovel Co.
Wm. Taylor, Pittsburgh Steel Co.
L. D. Vogel, Charter Oak Stove & Range Co.
F. C. Wheeler, Herman Boker & Co.
Chas. H. Wier, Wier & Wilson.
Geo. P. Wier, Wier Bros.
Robert E. Wier, Wier Bros.
John K. Wilson, Wier & Wilson.
C. K. Woodburn, Warren McArthur.
Clyde L. King, Atlanta Agricultural Works.
Sergeant-at-Arms, H. H. Beers, Beers & Mitchell.

THE COMING CONVENTIONS

The committee in charge of the entertainment features for the June conventions at Virginia Hot Springs, is to be congratulated on having secured a promise from Judge Taft, Secretary of War, that he will spend Tuesday, June 6th, at the convention. The banquet will be held Tuesday evening, and Judge Taft will be the principal speaker, and furthermore it is safe to prophesy that in the matter of service and food the Hot Springs banquet will be all that could be desired, differing materially in that respect from some Hardware banquets of previous years. The entertainment features for the other evenings of the week will be of a musical character.

The business programme will consist of several short sessions, two each day, beginning Tuesday morning and closing with an executive session of the jobbers Friday morning. The sessions will all be executive in character except the afternoon sessions of Tuesday and Thursday, which will be open to all present. During the meetings a number of subjects of great importance to the Hardware business will be discussed and it is expected that material results will be accomplished. The reports of several special committees, who have been doing a great deal of very thorough work during the past year, will be of much interest and their recommendations will tend toward the correction of numerous evils and annoyances now existing in the trade.

The principal features of the programme are as follows:

TUESDAY:—Executive session of jobbers in the forenoon at which reports of committees will be read. A meeting of the Manufacturers' Executive Committee will be held at ten o'clock. In the afternoon the General Opening Session will be held with the usual opening addresses. In the evening a banquet will be tendered to the jobbers by the manufacturers, with Secretary of War William H. Taft, Senator Carmack, of Tennessee, and Samuel Spencer, President of the Southern Railway, as principal speakers.

WEDNESDAY:—Executive session of the jobbers at 9.30 A. M. Principal subject under discussion "Restricted Prices." At 10 o'clock an Executive session of the manufacturers, at which will be given the reports of different committees. In the afternoon a joint session of jobbers and manufacturers will be held during which will be discussed "Freight Matters" and "Restricted Prices." Wednesday evening, an informal Reception tendered by the Reception Committee.

THURSDAY:—Morning session of the jobbers at 9.30, strictly Executive. During this session "Uniform Terms" and "Mutual Fire Insurance" will be discussed. The manufacturers will hold an Executive Session at 10 A. M. Thursday afternoon a general session will be held at 2.30 with addresses on The Catalogue House Question and several other matters of general interest. Thursday evening, Dance and Musicale.

FRIDAY:—The only session in the day will be an Executive Meeting of the jobbers at 9.30 for the winding up of convention business. The entertainment features of Friday afternoon and evening are to be supplied by the Reception Committee.

"HARDWARE'S" SPECIAL.

Within a very few days the cards will be made up for HARDWARE'S train, and all reservations for space made in the order in which they have been placed on the temporary list, and each person who has made a reservation will be notified as to the exact character and location of the space reserved for him.

Nearly enough requests have been received up to date to fill five cars, including those who will come aboard at Philadelphia, Baltimore and Washington, but it is hoped that two more can be filled before the date of departure. The cost of Pullman space from New York, each way, is as follows: Compartment (in compartment car) $7.00; section, $5.00; berth, $2.50. The transportation cost from all points south of the Ohio River is one fare for the round trip. From northern points a rate of one and one-third fares for the round trip will be charged, and the usual certificate plan will be used. HARDWARE'S party will leave Jersey City (Pennsylvania Station) Monday evening, June 5th, at 5 o'clock; West Philadelphia, 7.35 P. M.; Baltimore, 9.55 P. M.; Washington, 11.10 P. M. Arrangements for the return trip will be announced either before June 5 or during the trip South.

The train will run over the Chesapeake and Ohio Railway, a route of exceptional scenic beauty and the officials of that road promise the Hardwaremen the best of equipment and service.

Arrangements have been made with the management of the "Homestead" so that those in HARDWARE'S party who have reserved rooms in advance will be notified on board the train as to the number and location of their rooms, thus making it unnecessary to stand in line to register on arrival.

Although reservations for Pullman space that come in as late as June 5 can very likely be cared for, it is desired to complete the train arrangements as soon as possible and it is therefore hoped that all those who desire to make the trip on this train will send in their reservations at once. All requests for Pullman space should be addressed to A. Eugene Bolles, 309 Broadway, New York.

Those who, for business or other reasons, are prevented from attending the Virginia Hot Springs Convention will miss not only an important event in the history of Hardware, but as well a most enjoyable trip. Approaching the Springs, the traveller passes through the most rugged part of the Blue Ridge Mountains, winding through valleys beautiful in their wildness, with the mountains on either side rising almost to the clouds. At the upper end of a particularly wild glen, 2500 feet above sea level, the train stops at Hot Springs Station and the traveller finds he has been in a moment transported from the wilderness to a resort of fashion.

The entrance to the "Homestead" grounds is in front of the station, and a few moments walk past several springs, the bath house and golf club, brings one to the main entrance of this famous hotel. Inside is the magnificent lobby, one of the finest in the country, from either end of which extend the wings of the hotel. On the first floor are the parlors, dining rooms, ball room, cafe, billiard room, and a beautiful "sun parlor." On the second and third floors are the sleeping rooms, capable of accommodating seven hundred guests. The interior decorations are a glistening white, and the entire hotel is furnished with an eye to comfort and elegance. At one end of the hotel building are the bath houses, containing almost every variety of bathing machinery and an immense swimming pool; a stone's throw from the main entrance are the golf links with a playing distance of six thousand yards, while near by are several splendid tennis courts.

The drives around the Springs should not be missed. They include one of three miles to "Healing Springs," another of five miles to Warm Springs, a resort for one hundred and fifty years, and famous for the health giving springs and mint julips; and still another to Fassifern Farms, twelve miles to the north, noted for game dinners.

The manager of HARDWARE visited Hot Springs a few days ago and after a talk with the manager, Mr. Sterry and his able assistant, Mr. McLaughlin, does not hesitate to predict that all who attend the June convention will be well cared for. A large number of reservations have been booked but there is plenty of room for more.

The fact that this hotel is well patronized by health and pleasure seekers makes it impossible for the management to designate definitely certain rooms to those who have made reservations far in advance of the convention; at the same time the assurance is given that there will be plenty of room and that every effort will be made to please every one.

Judge Taft Coming.

Secretary Carter of the Southern Hardware Jobbers' Association is sending out the following:

"It is with much pleasure we have to announce that Secretary of War Taft has accepted invitation to attend the Virginia Hot Springs Convention. Invitation was tendered jointly by the American Hardware Manufacturers' Association and the Southern Hardware Jobbers' Association, but it was largely through the personal efforts of Henry B. Lupton that we will be accorded the pleasure of having Judge Taft with us. He will spend Tuesday at the convention and will deliver an address at the banquet, which will be given on Tuesday evening, and may possibly make a short address at Tuesday afternoon's Joint Session. This is of course earlier in the convention than we have ever held a banquet; however, this was the only date Secretary Taft could give us under the circumstances, and we shall be only too glad to make our arrangements accordingly."

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Real Estate—Power of Alienation.

QUESTION: A person wants to tie up his real estate as long as possible after his death so that it cannot be sold, the income to be paid to his children. For how long a time can this legally be done?

REPLY: By the rule of the common law the power or sale or alienation of real estate could not be suspended for a longer period than a life or lives in being and a period of minority afterwards. The property may be legally tied up for the longest of any number of designated lives and the term of twenty-one years thereafter. This is still the rule in England and in many of our States, such as Georgia, Illinois, Kentucky and New Jersey. But in other States, as in New York, the power of sale of real estate cannot be suspended for a longer period than during the continuance of the lives of two designated persons in being at the death of the testator and the period of a minority thereafter. An attempt to keep real estate out of the market for a longer period than this is regarded as contrary to public policy and is prohibited by statute. As this branch of the law abounds in technicalities and subtle distinctions, we should advise no one to attempt to suspend the power of sale of his property without competent legal advice.

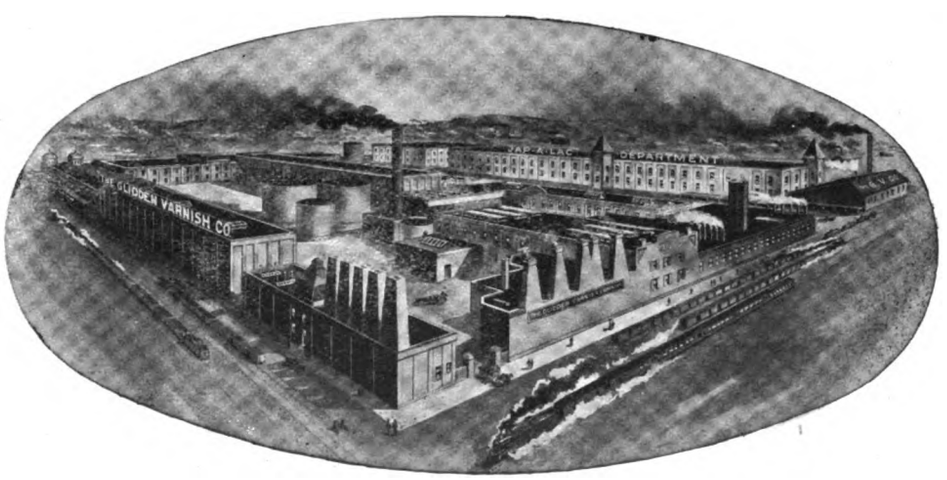
Marriage and Age.

QUESTION: Will you please answer through the columns of your valuable paper the following questions: First, does a woman become of age when she gets married in Illinois; second, if she has property coming to her from Illinois and was born in Illinois and she moves to Iowa and gets married before she becomes of age, does that entitle her to her share of her property immediately, or does she have to wait until she is eighteen years of age; third, does one have to sue immediately for malpractice or can one sue any time one sees fit, or is it outlawed after one year in Iowa?

REPLY: In reply to your first and second question, we know of no statute of Illinois which provides that a woman shall become entitled to property which she could not otherwise claim until she has attained her majority. Replying to your third question, actions for personal injuries must be brought within two years in Iowa or they will be barred by the statute of limitations.

THE HOME OF JAP-A-LAC.

The Largest and Most Complete Varnish Factory in the World.

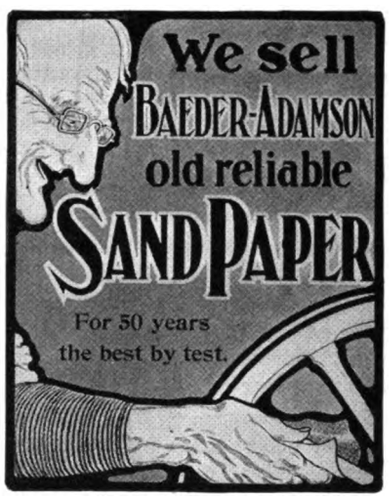


We illustrate herewith the plant of the Glidden Varnish Company, manufacturers of Jap-a-lac. The progress this company has made in pushing a specialty has been one of the most remarkable campaigns of advertising ever inaugurated. The faith and courage displayed by them is exemplified by the fact that they continued to advertise Jap-a-lac although for three years the balance was on the wrong side of the ledger.

We consider this season's Jap-a-lac campaign one of the best commentaries on the efficiency of persistent, organized advertising with which we are acquainted. Jap-a-lac was first put on the market late in the Fall of 1898, and the first general advertising, which appeared on it, was in the Spring of 1899. Since the insertion of their first advertisement, the manufacturers have manifested unbounded faith in its future, and through many vicissitudes have continued to advertise it most liberally.

The advertising which they expended this Spring alone, amounted to $60,000. This amount, we understand, is greater, by far, than that spent by all concerns put together on any similar product. The manufacturers report an overwhelming increase in sales as a result of their Spring campaign, and seem to feel very confident that the future of Jap-a-lac promises a corresponding increase.

The dealers throughout the country have evinced the utmost interest in Jap-a-lac. A great many have expressed themselves as satisfied that it is the finest product of the kind manufactured. The fact that Jap-a-lac has back of it such a large amount of money spent in advertising makes it a ready seller with the dealer. The field opened up for it is an entirely new one. It has forced itself into the home as a household article, and is looked upon by the housewife as one of the necessary adjuncts to the renewal of articles about the home.



Any further information about Jap-a-lac, we are informed, will be gladly furnished to such dealers who ask for it.

PLANT OF GLIDDEN VARNISH COMPANY, CLEVELAND, OHIO.

THE STANDARD MANUFACTURERS OF THEIR LINE.

Baeder, Adamson & Co., Philadelphia, Pa., in commemoration of fifty years devoted to the manufacture of Sand Paper by machinery, are distributing to the Hardware trade an attractive card hanger for store display of which the accompanying cut presents a fair illustration. The fact of the firm, ever since the commencement of the industry of manufacturing by machinery, have been the acknowledged standard of Sand and Emery Paper, is something preserving this half century of endorsement, which every user of sand paper is familiar with; and the display of this Card and the necessary stock to back it up, should make it easy to reap the benefit of dealing in the goods of this old and reputable house. They add the following paragraph as an impressive postscript to their action in distribution: "If your jobber is one of the very few who do not carry a full line of our Sand Paper, Emery Paper and Glue, write us. We will put you in touch with one who does."

✤

"A husband's jealousies, my dear, are the mushrooms on the beefsteak of matrimony!"

"We Americans have never learned to irrigate the alkali out of our humor!"

AUBURN TRADE.

Business Good in the Empire State.

General business conditions throughout New York State are good. Although both materials and labor are high, there is an unusual amount of new building taking place. This is especially true in the large cities and larger manufacturing centers. Jobbers report a good demand for all classes of Hardware from the country trade, plainly proving that business with the country merchant is also good. The weather has been favorable for farmers and prices for all dairy products are good. The general outlook is very satisfactory.

J. F. Murphy, of Woodruff & Murphy, large Hardware retailers, of Auburn, N. Y., in speaking of trade conditions said: "Here in Auburn business is very good. A large number of houses are being built and are rented as rapidly as completed; the building trade has been unusually active all the Spring. We notice a demand for better grades of Hardware, which speaks well for the prosperity of the people. Collections are also good, and the outlook has never been better at this season of the year." Mr. Murphy has been in the Hardware trade of Auburn about twenty years, forming the present firm of Woodruff & Murphy in 1903. The business was a success from the very start.

P. M. Herron Hardware Co.'s store, No. 34 and 36 Genessee Street, is one of Auburn's largest stores. This concern do both a wholesale and retail trade, working closely the territory adjacent to Auburn. The arrangement of the store is excellent, and stock is well displayed. A very large line of oil stoves was being shown and a good business was reported. Large windows are used to splendid advantage in displaying goods. In addition to general Hardware the Herron Hardware Co. carry an extensive line of manufacturers' supplies, which are found profitable.

Another Auburn concern carrying on both a wholesale and retail business is Smith & Pearson, occupying the large double store, No. 102 and 104 Genesee Street. Plumbing and heating supplies are carried and an extensive business is done in these goods, both at retail and wholesale.

The old Hardware firm of Choate & Bro., has been succeeded by Post & Duncan, at the same old stand, 88 Genesee Street. The old firm had been in business some fifty-five years and the new concern will continue the same agencies and carry the same up-to-date goods, pursuing the same policy of selling "honest goods at honest prices." Mr. Post of Post & Duncan was for many years in the employ of the old house, and understands well the local trade. House furnishing goods is one of the side lines pushed and other new lines will be added.

At 34 Market Street is located the store of H. W. Durnford, who makes a specialty of furnace work and jobbing. A very complete tin shop is maintained, and business was reported good.

The large double window of Everts Hardware Co. on lower Genesee Street, is always one of the best trimmed windows in Auburn. Special attention is given to this means of advertising and it is found to pay. A very effectual display was recently made of Spring goods, including house furnishing supplies.

Probably not another city of the size in the country has as many Hardware stores as Auburn, and all are prosperous; and all the Hardwaremen devote themselves pretty closely to regular lines. One such is Hiram J. Rich, whose store is at 116 Genesee Street. Confining himself almost exclusively to staple and shelf Hardware, Mr. Rich has succeeded in building up a large business.

A well arranged store is that of Pomeroy & Coe, at 137 Genesee Street. Plate glass cases are used to good advantage in showing tools and cutlery in which lines the firm have a fine trade.

Stoves and ranges are handled by some of the Hardwaremen, although there is one store selling this line exclusively. Wm. H. Laton, located at 29 State Street, does a profitable business in the line, in connection with an up-to-date tin shop.

The sporting goods trade of Auburn is left to three or four exclusive dealers, none of the Hardwaremen having ever taken up the line. It is closely identical to the Hardware trade, but because of the retail and because the sporting goods dealers carry such complete stocks, the trade is left to them. The sporting goods store of Whipple & Foreman is one of the best in New York State, and the trade of this concern is so well established it would be difficult for any one to enter the field successfully. A complete fishing tackle catalogue is issued by Whipple & Foreman and is found to bring considerable business from the country districts.

The Wright-Dana Hardware Co., of Utica, do a large local jobbing business, and yet pay much attention to their retail store. A special feature is made of the window displays which are always seasonable and attractive. Being often changed the goods in the window always look new and bright, which adds much to their attractiveness. Many Hardwaremen seem to feel that because their line is not dry goods that no effort need be made to keep windows up-to-date or attractive. The success of the retail business of Wright-Dana Co. proves conclusively that it pays to keep windows attractive.

Another Utica concern doing a large business is the Roberts Hardware Co. The business is largely wholesale, but an extensive retail trade is also done, the retail store of the Roberts Hardware Co. being one of the best furnished and appointed Hardware stores in the country. Spring business has been brisk and the outlook is good.

Closely identified to the Hardware trade is the business of Clark, Horrocks Co., the fishing rod and tackle manufacturers of Utica, N. Y. A large variety of fishing tackle is made by this concern, and trade has been very active all the Spring, taxing their factory to fullest capacity.

The Savage Arms Co., another Utica concern, is in close contact with the Hardware trade, and also reported good business. The line of Savage rifles is being constantly enlarged and in this way the company are expanding their trade.

HAMMERNAIL.

BISSELL'S FIRST PRIZE.

Of the thirty prizes distributed in their Holiday Contest for the best and most artistic advertisement in their interest, the decision has been reached, and L. J. A. Surveyor of Montreal, Quebec, was the lucky individual to carry off the first prize of one hundred dollars which he received for the advertisement as shown in cut herewith. The awards were made through the supervision of Lord & Thomas, Chicago, whose high standing as

well as experience and undoubted ability has satisfied all the contestants. The second and third prizes of $75 and $50 were won by French and Hitchcock, Wellington, Kansas, and J. LeCour & Sons, Kankakee, Ill., respectively. The Bissell Carpet Sweeper Company trust that all those who competed in this contest and failed to secure prizes will feel fully repaid for their efforts through the increased sale of Bissell Sweepers, resulting from the extra advertising done.

"COLONIAL" HARDWARE.

George N. Wood & Co. announce that they have purchased the stock, machinery, tools and good will of Enoch Robinson, manufacturer of "Colonial" and House and Furniture Trimmings, 39 Cornhill, Boston, Mass., and will continue the business at same address adding such new lines as prove desirable to place the business on an up-to-date footing. They retain the services of L. Stanton Hall, who is thoroughly familiar with the details of the business, having been with Mr. Robinson a number of years. The new firm solicit the continuance of the patronage formerly extended to Mr. Robinson, and they will endeavor to merit same by prompt and satisfactory service. Catalogues of manufacturers covering this special line are requested.

OUR BRITISH LETTER.

(From Our Special Correspondent.)

London, May 12, 1905.

ANNUAL CONFERENCE OF THE IRONMONGERS' FEDERATED ASSOCIATION.

The conference held at Bristol from May 3 to 5 was an interesting event and one which showed the way in which the claims of association work are fast taking hold of the Hardwaremen of this country. The Ironmongers' Federated Association which held its annual gathering is a representative body, and includes the different local associations which are federated. It is largely guided by a Central Board, the members of which elected on the nomination of the different local associations. It may therefore be taken that the deliberations of the delegates at Bristol were representative of the opinions held by Hardwaremen in Great Britain, and the subjects under discussion those which at the present time are held to be of paramount importance among British Hardwaremen. The conference met on May 3 for business, and received a hearty welcome from acting president Verity, who, at the request of the Central Board, took the position rendered vacant by the death of the late W. J. Bacon, tne president of the I. F. A., who died last month. After the usual formal business had been transacted and reports taken the election of officers for the ensuing year was proceeded with, Charles Parsons, of ? ? being elected president. On the evening of the same day a banquet was held in the Royal Hotel, Bristol, and was attended by a large number of delegates and members of local associations. The conference resuming on the 4th inst., opened with an address from the new president, in which Mr. Parsons drew attention to the principal matters which would be brought before the conference for discussion. Among the more important matters brought up were the following, a report of the recent examination held in London, a request to the Central Board to appoint a sub-committee to revise the "In Accord" list, and the questions of direct trading, collection of accounts, price maintenance, municipal trading, and the continuous importation of foreign goods. The continuance of the policy of price maintenance was strongly advocated; it was also thought that a firm front should be presented to those manufacturers who adopted price maintenance and yet supply co-operative societies who give away dividends or bonuses. British manufacturers of lawn mowers who have supported the Hardware trade in maintaining the prices of machines were thanked, and the opinion was generally expressed that all enquiries received by manufacturers who advertise lawn mowers should be handed on to some retailer in the district from which the enquiry emanates. In view of the immense quantity of manufactured articles now being imported into Great Britain the attention of Chambers of Commerce and mercantile associations was drawn to the question with a view of their realizing their proper responsibility and duties on this important subject. The members of the conference were entertained at lunch and at an "At Home" by several manufacturing firms. On the following day arrangements had been made enabling the delegates and Hardwaremen present to visit several of the most important works in the neighborhood. Undoubtedly the annual conference at Bristol was a thorough success, and showed plainly that the association movement is steadily gaining ground in England. It is also clear that by concerted action Hardwaremen have been enabled to effect many useful reforms in commercial matters, and that they will doubtless continue to make themselves heard when questions of dispute involving their welfare are raised either in municipal or commercial circles.

ANOTHER IRONMONGERS' ASSISTANTS' ASSOCIATION FORMED.

Ironmongers' assistants are gradually beginning to assert themselves and carve out careers based upon mutual co-operation. Some two years ago an association was formed in Liverpool among the ironmongers' assistants, which, although of considerable local value, has not yet led to the formation of similar societies in other parts of the country. There are, however, assistants' associations in both Dublin and Glasgow doing good work and helping on the interests of assistants; encouraging them, and rendering their work easier, by social intercourse and by the discussion of matters of common interest and promoting the welfare of the trade at large. For some time past there has been an association of ironmongers' assistants in Australia, with its head quarters at Melbourne. The most recent development of the movement has now come from South Africa where a hardware assistants' association has been formed on somewhat similar lines to the one existing in Australia. The headquarters of the new association will be in Johannesburg and arrangments have already been made for branch associations in other parts of the South African colonies.

THE RECENT FURNISHING TRADES' EXHIBITION IN LONDON.

The Furnishing Trades' Exhibition and Market which has recently been held at the Agricultural Hall, Islington, London, was well attended by ironmongers and others engaged in the different branches of the furnishing trades. The exhibition was a great success and the promoters are to be congratulated upon the excellent arrangement of the different stands, and upon the pleasing variety of furniture and furnishing accessories they had been enabled to get together. Not only were novelties in household furniture on view but many good Hardware lines, and a specially choice selection of side lines, which latter part of Hardware is being developed rapidly by the Hardwaremen of this country. Such goods as framed pictures and ornamental picture overmantels are quite commonly introduced into Hardwaremen's stocks. The sale of wicker goods is also an important feature, and some of these exhibited at the hall were beautiful examples of American cane and choice rattan and willow work. J. C. Plimpton & Co. of Liverpool and New York had an excellent choice of American roll-top desks and a good selection of office furniture, all of which goods, were much appreciated by visitors to the Exhibition.

ANOTHER TESTIMONY TO THE QUALITY OF AMERICAN PRINTING.

American manufacturers have long been noted for the quality of the printing used in their business catalogues and of the smart and attractive lists which they issue from time to time. One of the latest indications of advance in art is shown by the striking catalogue just issued by the Coldwell Lawn Mower Co. in this country. This enterprising firm have employed one of the best American artists in the production of the cover of their new catalogue. It is a work of art and is a reproduction of a cleverly modelled panel; the warbling of the bird, the spray of blossom and the joy of the cherub all announce the coming of Spring making a suitable introduction to the lawn mowers which are so largely used by horticulturists at this season. The Coldwell machines, invented by Thomas Coldwell, an English settler in the States, who claims to have been the first American inventor of lawn mowers, are very popular in this country, and the firm have wisely introduced an English type of machine, realizing that the conditions of gardening in this country are somewhat different from those in the United States. The great secret of American success in Great Britain appears to be their quick adaptability to the requirements of the people for whom they are producing their specialties, and to the intuitive knowledge they have of the right things to introduce at the right moment.

HARDWAREMEN IN AGRICULTURAL DISTRICTS.

As the summer advances English ironmongers are much occupied with their agricultural implement departments, especially those located in country districts, find this branch of business very profitable and one which leads to extension of trade in many directions. The English show season will shortly commence, the first event of any importance being the agricultural show to be held at Nottingham under the auspices of the Bath and West and Southern Counties' Society, which is considered to be the premier migratory society in this country. Already arrangements have been made on an extensive scale, and it is an open secret that many of the stands will be exceptionally good. As on former occasions American harvesting machinery will be well represented and during the last week of the present month many British agriculturists will have opportunities of inspecting the smart, clean and well-built implements manufactured in such large quantities in the United States. The implements and machines made by the International Harvester Company are very popular in Great Britain, and, although arrangements are now made by which the different branches of the Harvester Trust are independently handled in this country, there is every probability that a larger trade than ever will be done in these machines during the ensuing season.

TOO MANY AMERICAN GOODS.

Among the various discussions which took place at the recent conference of ironmongers at Bristol the one dealing with the increasing importation of American Hardware into Great Britain was of paramount importance to the manufacturers of the

POPULAR TALKS ON LAW.

Landlord and Tenant.

NO. 2. THE TENANT'S RIGHTS TO ALTER THE PREMISES.

Alteration means something more than repair. To alter is to change the form or nature—to make different. To repair is to retain the form and nature, but to make more perfect. The tenant has a right generally to make repairs; indeed, without anything in the lease to that effect, he is bound to hand the property over to his landlord at the expiration of his lease in the condition in which he took it, ordinary wear and tear excepted. But a tenant has not the right without his landlord's consent to make alterations, even if the alterations are improvements and admitted to be such by the landlord. When one rents premises he is presumed to be satisfied with them as they stand and the landlord has the right to expect them to remain as at the time the lease was given, subject to his right as against the tenant to have the premises kept up.

Where premises are rented for a particular purpose known to the landlord, the law will presume that the tenant has the right to make any alterations reasonably needed to fit the premises for the use. Where, however, the landlord does not know the purpose, he has a right to expect that they will be used for the purpose for which they are naturally fitted without alteration.

Where in the lease there is a clause stating that the premises are "to be used" for a particular purpose, naming it, the question sometimes arises whether this amounts to a restriction on the use so that, where the tenant uses the property for another purpose, he has broken his lease. There is an uncertainty on this point due to a variety of opinions expressed by the courts. There is no question, however, in a case where the restriction is made positive and definite, as where the lease reads that the premises shall be used only for some particular purpose, naming it. Where, therefore, the landlord desires to restrain the tenant from using the premises for any other than a particular purpose he should make the restriction positive.

Alterations, then, without permission of the landlord are in general not allowable. The tenant cannot cut a window through an outer or inner wall, nor open a fire place, nor erect a partition, nor cut a hole through the floor for pipes or wires or elevators; nor can he move a partition to change the shape or size of rooms, nor change the place of the staircase, nor move the out-buildings, nor destroy trees or flowering shrubs, nor change their location; nor can he move a fence, nor turn a grass plot into a garden.

Tenants may make such alterations as are not permanent in their nature where they may be removed at the expiration of the lease without injury to the property.

The ordinary remedy for the landlord where the tenant proposes to make an unauthorized alteration is a writ of injunction, though a suit for damages will afterwards lie against the tenant.

Reverting again to the matter of use it should be said that where there is no restriction as to use contained in the lease, yet the tenant may be restrained by the landlord from using the premises for a purpose or in a manner contrary to law.

In our next talk we shall consider the right of the tenant on leaving the leased premises to remove fixtures.

Copyrighted 1905, by William C. Sprague, President The Sprague Correspondence School of Law.

(To be continued.)

GRAY & DUDLEY CO.'S NEW INDUSTRY.

The following interesting announcement is made in Nashville, Tenn.:

"The Gray & Dudley Hardware Co. has secured a large tract of land at the corner of Clifton Street and Charlotte Turnpike and will begin in the very near future the erection of a manufacturing plant of a character new in the South.

"The company will manufacture quite a varied line of Hardware and cast iron goods, including anvils, hammers, hinges, butts, sash weights, stove hollowware, well wheels, grindstone fixtures, gate latches, blind hinges, hitching weights, hay fork pulleys and stoves. They eventually expect to make other lines that are more complicated, such as lawn mowers, ice cream freezers, Builders' Hardware, edged tools etc. The company has already been manufacturing quite a number of its lines for several years, including harness, saddlery, trunks, wood goods, etc., and have found it a profitable part of their business.

"The property purchased consists of about thirteen acres, and on it will be built the manufacturing plant and a large and thoroughly up-to-date three-story warehouse. Excellent railroad facilities are available at the location selected for the plant, both the Nashville, Chattanooga & St. Louis tracks and those of the Tennessee Central running by the site. The warehouse will take the place of the rented building in South Nashville now used by the company.

"It is announced by the management that William A. Griswold will be the manager of the new plant, and he will leave in a short while for an inspection trip through the northern and eastern territory, getting ideas from the best conducted plants of those sections. Between one hundred and one hundred and fifty men will be employed at the plant from the start. It is stated that the company has a sufficient surplus on hand for the erection of the plant, and no new issue of stock will be made.

"The Gray & Dudley Hardware Company are splendidly equipped to have a plant of this kind for the reason that they have already built up an enormous business and their facilities for distributing the product of their foundry and factory is unexcelled, as the company travels forty-two salesmen, covering every State in the South. They have beside their main house in this city a branch house at Birmingham and a warehouse at Memphis. In addition to the foundry and manufacturing plant the company will erect on this property at the western end a large warehouse for their wholesale department. This warehouse will cover possibly two acres of ground and will be three stories in height and will be well equipped for economical and rapid handling of freight. The company has been renting a warehouse in South Nashville which they will give up as soon as their new warehouse is completed, as they will have tracks from all the railroads passing through the warehouse as well as through the foundry yards.

NEED OF STUDYING FOREIGN TRADE CONDITIONS.

Combinations Among German Manufacturers.

Combinations in Germany in certain branches of manufacturing have been shown to be entirely feasible. The tendency to consolidate forms one of the conspicuous features of trade in the Empire; but it by no means affects all branches alike. German manufacturing extends into every village and along every stream. It enlists thousands of men of small capital who are content with modest earnings and who neither seek combinations nor are dismayed by threats of them on the part of others. This is especially true in the commoner branches, in which the work is, or can be, largely done by hand or inexpensive machinery. The number, size and distribution of these smaller concerns is often such as to give them considerable influence in manufacturing. This was true in the case in hand, and was doubtless one fact not fully reckoned upon. The relatively greater difficulty of embarking in a new enterprise tends to make the manufacturer slow to give up even an unprofitable business which may have been in the family for two or three generations.

German manufacturing is in no small degree influenced by the system under which practically all farmers live in the towns or villages, and thereby puts close to these village factories a large body of cheap labor of both sexes, which in the United States, for example, has no counterpart. This labor engages readily in the manufacture of the cheaper grades of cloth, paper, glassware, stoneware, matches, cheap jewelry, toys, leather, paper boxes, cigars, cheap agricultural implements, wrought-iron work, low-priced shoes, etc. The rapid introduction of better agricultural machinery is reducing the number of persons required in the fields and adding to the ranks of the manufacturing classes. Improved machinery, even in these smaller concerns, is increasing their productiveness and increasing their influence in the home and foreign markets.

MARKETS FOR AMERICAN MANUFACTURES.

It would be wholly incorrect to say that the two classes of factories—the larger ones in the cities and the smaller ones referred to—cover the whole field of manufacturing, leaving no place to the exporter to Germany and its neighboring States. On the contrary, a valuable market remains to the American manufacturer even in Germany, but it is limited in scope, and the tendency doubtless is toward further narrowing. The market is for excellent reasons open to a considerable list of manufactured articles widely sold throughout the Empire. It is barred to a long list of articles simply because the cost of making here excludes foreign competitors. The American manufacturer or exporter must determine to which list his wares belong. Two questions of importance confront him: What class of goods does a foreign market require? At what price does the native manufacturer make these goods, if at all, or at what price can he make them if a demand should be created?

As the great manufacturing nations prepare to supply their own demands and force trade into other fields where manufacturing is less developed, the importance of accurate knowledge of trade conditions in such fields will become more and more apparent.

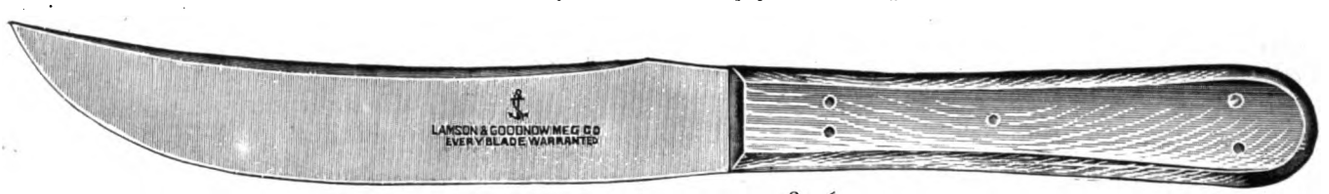
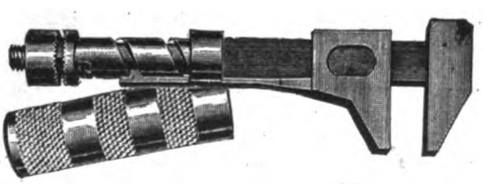
LAMSON & GOODNOW MFG. CO.'S CUTLERY.

Lamson & Goodnow Manufacturing Co., Shelburne Falls, Mass., and 45 Murray Street, New York, was one of the pioneers in the manufacture of cutlery in America, and its products of whatever description have always enjoyed the best of reputations for quality. Carving knives and forks and a full line of Druggists' and Painters' goods are specialties of this company.



GRAIN CELLULOID MEDIUM KNIFE NO. 845 C.

Attention is also paid to fine grade Butchers' tools. The goods made at Shelburne Falls have always enjoyed an excellent reputation, not only in this country, but in foreign countries from which there comes a firm and growing demand. The export trade steadily increases; Japan and other Oriental islands of the sea have used Lamson & Goodnow cutlery with increasing satisfaction. To enumerate all the different kinds of cutlery turned out at Shelburne Falls, would only increase the interest taken in the manufacture, but from the catalogue an idea can be gained of what is made there. In the matter of Carvers, there are pearl handles, stag, celluloid, rubber and ivory, to mention only a few. There are spatulas for druggists, spatulas for bakers' use, butter knives, butter spreaders, cheese knives and cheese scoops, cigar knives, hacking knives, pie knives, scrapers, and so on, and a long list numbering several hundreds of patterns of table cutlery. The company does not make pocket knives. Many of the Lamson & Goodnow employes have been in the employ of the company for long periods, some for half a century.



RUBBER HANDLE MEDIUM KNIFE NO. 545 C.

BOXWOOD HANDLE BUTCHER KNIFE NO. 080, 6-INCH.

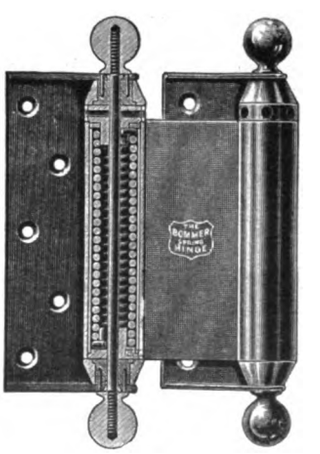
THE BOSTON TIME SAVING WRENCH.

The Richards Tool Company, 15 Court Square, Boston, Mass. are the manufacturers of the Boston Time Saving Wrench, of which we give an illustration, which acts instantaneously in adjustment to the work to be accomplished. On the extension of the sliding jaw is a stud engaging the worm which is of the desired pitch to operate readily. Within the lock nut is a spiral spring of sufficient tension to keep the two toothed surfaces apart when the handle is loosened. A thread on the end of the shank engages the handle. A half turn of the handle absolutely locks the wrench at the point where it has been set. A half turn in the opposite direction releases the jaws, and the sliding jaw moves freely back and forth until locked again. The wrench has accurate adjustment, the jaws being parallel. Once set the wrench cannot get out of adjustment, it is stated, by fall or other shock. The working parts are drop forged and the handle is of steel.

THE BOSTON TIME SAVING WRENCH.

Principal Difference.

Sarcastic Guest—You call this an omelet, do you? Would it have been any different if I had ordered scrambled eggs?



Waiter Girl—Yes, sir, there would have been a difference of 10 cents in the check.—*Chicago Tribune.*

HUMBUG ABOUT "NEVER ADVERTISING."

A certain firm of accountants, one of the concerns which is opposed to advertising in the trade papers or in any papers on the ground that it is unprofessional, recently sent out a card announcing its change of address. The card mentioned the different lines of work of the firm and also its office addresses in other cities than New York (which have not been changed.) The card was sent out broadcast not only to manufacturers and business men with which the firm was already doing business, but to almost everyone with whom there was any possibility of doing business. It takes a keen nose for professional etiquette to detect a difference of odor between an advertisement in a trade paper and such a card sent out to the people who read the trade paper.—*Exchange.*

BOMMER'S SPRING HINGES, IMPROVED.

Bommer Brothers, 255-271 Classon Avenue, Brooklyn, N. Y., have made several very important improvements in their well-known line of Bommer's Spring Butt Hinges, which are shown in the accompanying illustrations, making them more popular than ever with the architects. Formerly the ball tips were riveted to the pintles, making it necessary in order to take the hinge apart, to remove the rivet head by filing at the top or bottom ball tip, which, to say the least, was somewhat inconvenient. Through the recently patented improvements, this compulsory riveting is entirely obviated; a pintle with threaded ends is now provided, the thread of the ball tip forming the nut being of a different pitch from that of the ends of the pintle, so that a sufficiently rigid hold may be obtained to prevent the pintle and ball tip from unscrewing unless considerable force is used, without, however, injuring the threads, even after the hinge is taken apart several times. This will be found a great convenience to Hardware merchants when distant from the factory, as they are thereby enabled when in want of Bommer's Spring Hinges, and do not happen to have any in stock of the finish wanted, to take what they want from any finish in stock, have them taken apart and refinished by any local plater.

BOMMER'S SPRING HINGES, IMPROVED.

RECENT TRADE PUBLICATIONS.

The Globe Lawn Mower & Mfg. Co., Reading, Pa., in their latest catalogue present their line of Lawn Mowers, regarding which they state: "Our patented adjustment on the cutter bar, which makes the lawn mower of to-day a perfect mower, has been acknowledged by experts as the keystone to the situation. Its simplicity is such that it can easily be adjusted on the lawn and operated by any man, woman or child." Their book is illustrated, also shows sections of the principal parts. Their "Hawk" and "Sparrow," they claim, are the very best high-grade ball-bearing lawn mowers, constructed so as to cut with ease, grass seven to eight inches high, and can be adjusted to actually shave the earth. Send for pamphlet catalogue.

The Wire Goods Company, Worcester, Mass., have issued a new discount sheet No. 22, and request that all previous discount sheets be destroyed. No. 22 applies to their Catalogue No. 5, and is a supplement to it, illustrating articles added to their line since it was issued. If you have not a copy of their catalogue No. 5, let the Wire Goods people know and they will be pleased to send you a copy by express, charges prepaid, and they will quote you a line of prices that will interest you.

Streator Metal Stamping Co., Streator, Ill.; New York agent, J. C. McCarty & Co., 10 Warren Street, have distributed a neat pamphlet catalogue of long envelope size covering their line of "Sterling" Steel Carpet Sweepers, which are a distinct novelty in the line of sweeper construction. In presenting this line, they offer an article which in no particular departs from the accepted principles of standard sweepers, but which enables them to introduce many new novelties heretofore never attempted in the line of sweeper construction. The book gives a complete description of each of the principles involved in their sweepers, such as case construction, wheels, bearings, broom action, dumping of dust pans, bail, anti-raveler, anti-tipping device, protecting band, material, workmanship, etc., etc. The illustrations are given in the colors in which the goods are furnished. Send for their catalogue.

Stanley Rule & Level Co., New Britain, Conn., and New York office and Export Department at 107 Chambers Street, have distributed to their trade their 1905 catalogue No. 31, in which the prices and descriptions given take precedence over all previous list prices and descriptions. This catalogue covers their regular line of rules, planes, plumbs and levels, try and mitre squares, gauges, braces, screw drivers, mallets, awls, mitre boxes, etc. All of their goods which may show a defect in workmanship or material, due to the fault of the maker, will be exchanged for a new tool if brought to their attention. The above mentioned book is gotten up in large pamphlet form and contains 77 pages. A number of pages at the back of the book are devoted to a table of original packages, giving contents, weights and measurements of full cases, which will be found valuable to those ordering this way. Send for catalogue No. 31 if you have not already received a copy.

Saunders Automatic Sash Lock Co., 401 Keith and Perry Building, Kansas City, Mo., are placing in the hands of their patrons an envelope size pamphlet, exploiting their Automatic Sash Lock, with which, they claim, the window automatically locks itself, thus eliminating all possibility of loss by carelessness or forgetfulness. They state it is easy to put on, cannot get out of order, will replace any other sash lock, and is available for any window. Send for pamphlet which fully describes and illustrates it.

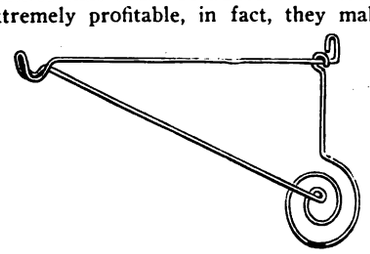
The Michigan Stove Co., Detroit and Chicago, manufacturers of the Garland Gas Ranges and Stoves, have sent us a copy of their 1905 catalogue. This firm claims to be the largest makers of stoves and ranges in the world. The book opens with an interesting conversation in story form between Mrs. Potter and Mrs. Garland, entitled "Mrs. Potter's Decision." It isn't hard to guess the "decision" after one studies over the merits of the Garland gas stoves and ranges. The book contains many testimonial letters from people who "ought to know," and who are in a position to know. The particular feature of the Garland gas range that wins universal approval is the high oven and broiler which are right on a level with your arms and shoulders where you can get at it in the easiest, quickest possible way and see what is going on without any stooping or bother. Their book is illustrated throughout and may be had for the asking.

Western Steel Gate Co., Two Rivers, Wis., have distributed among the trade a most excellent book of Western Gates and Fencing. The book is finely printed with brown ink on heavy coated paper, and is bound in brown, and is handsomely illustrated throughout. Altogether it has the appearance of an up-to-date catalogue. This concern have designed a special City Auto Gate, where the operating mechanism is placed under ground in water tight pipes. This does away with the entire superstructure. All that is visible are two ornamental lattice-steel hitching posts, which carry the operating levers. A push on the handle of the lever, conveniently placed in reach from an auto or carriage, swings the gate quickly open before it is reached. A push on the second lever in passing releases the gate, and it swings back and latches tight. Every part is guaranteed mechanically perfect, and on account of its careful construction, no attention is required to keep it in perfect working order for years. This gate adjusts to swing over the snow. Write for prices, giving exact dimensions required.

Barnes Tool Company, New Haven, Conn., manufacturers of Three Wheel Pipe Cutters, pipe wrenches, special tongs, bicycle wrenches, hand and foot power sawing machines, etc., have issued a new catalogue exploiting same. They claim to have made the first three wheel pipe cutter that worked successfully; the first pipe cutter that would cut pipe over four inches in diameter, and the first bicycle wrench ever put on the market. A specialty made by this company is their Johnston Pipe Wrench, which is a strictly high grade tool, drop-forged and warranted. They claim it is the strongest, simplest and best of its kind on the market; never jams; self-adjusting and self-releasing. It is made in three sizes; ten, sixteen and twenty-four inches, takes pipe from one-eighth to two and one-half inches. Write to manufacturers for a copy of their latest catalogue which fully describes and illustrates their entire line.

W. R. Ostrander & Co., 1433-1439 DeKalb Avenue, Brooklyn, N. Y., have sent us a copy of their extensive catalogue, fourteenth edition, containing 564 pages. It includes in its contents such lines of goods as speaking tubes and whistles, electric bells and batteries; electric burglar alarms, electric gas lighting material; watchman's clocks, electro-medical apparatus, line material and construction tools, electric lighting supplies, fan and power motors, arc and incandescent lamps, miniature lamps, novelties, electric heating specialties, telephones and telephone systems, telegraph instruments and lightning arresters. They also issue special catalogues describing fully all of their telephone instruments, "with directions for wiring the different systems," and electric fans. These will be sent free upon application.

The National Cement & Rubber Mfg. Co., 3053-59 Monroe Street, Toledo, Ohio, and New York office at 11 Warren Street, in their 1905 catalogue illustrate and describe their lines of bicycle and automobile sundries, electricians and cobblers' supplies, sewing machine oils, boot and shoe manufacturers' cement and Hardware supplies. The trade mark used on all of their goods is "High Pressure," which they state stands for highest quality. They take particular pains in the manufacture of their "High Pressure" goods, sparing neither labor nor expense. They aim to make them the very best on the market, and fully guarantee the entire line. Send for catalogue for further information.



Wiebusch & Hilger, Ltd., 9-15 Murray Street, New York, N. Y., manufacturers' agents and importers, are supplying their patrons with a copy of their 1905 illustrated catalogue and price list of American and Foreign Hardware and cutlery, chains, anvils, etc., which list cancels all former lists and quotations. The book is a neat and attractive one, bound in cloth, and containing 145 pages. Wiebusch & Hilger have the agency for the following American firms: Challenge Cutlery Corporation, American Shearer Manufacturing Co., Bridgeport Manufacturing Co. Clark & Parsons Co., Dunn Edge Tool Co., Henry T. Seymour Shear Co., Standard Horse Nail Co., Wm. Rose & Brothers, I. T. Henry Manufacturing Co., New York Stencil Works, Philadelphia Steel & Iron Co., Higgenum Hardware Co., Wm. Hjorth & Co., C. & A. Hoofman and T. J. Pope. They also have the following foreign agencies: Hilger & Sons, Remschied and Solingen, Germany; Burgon & Wilkinson, Ltd., Sheffield, England; Isaac Nash, Belbroughton, England; Peter Wright & Sons, John Harrison & Sons, Dronfield, England; Needham Brothers, Sheffield, England, and Wm. Hunt & Sons, Birmingham, England.

NEW GOODS AND SPECIALTIES.

J. R. DAWSON MFG. CO.'S HOUSEHOLD SPECIALTIES.

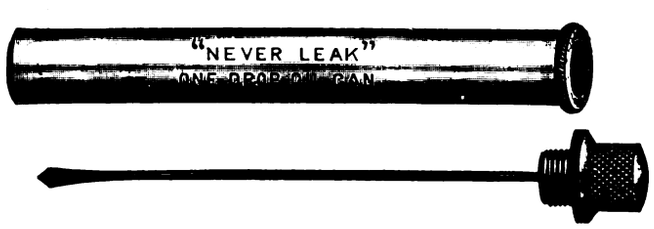
Among the number of household and office wire goods manufactured by J. R. Dawson Manufacturing Co., 1520 Palethorp Street, Philadelphia, Pa., there are an assortment of salable novelties and necessities that could be added to a stock of Hardware and prove extremely profitable, in fact, they make a large list

WIRE BIRD CAGE HOOK.

of articles of which this might be said, among which may be mentioned Wire Easels in great variety and of every possible shape, large and small, for plaques, bric-a-brac, cards or photographs.

WIRE FLESH FORK.

Numberless wire articles of domestic design, such as Towel holders, Toasting forks, Flesh forks, which we illustrate, and Bird cage hooks also shown, Corkscrews, Potato mashers and Toilet



WIRE ICE TONGS.

accessories. A low priced Ice tongs are among the kitche
necessities. They issue a catalogue that will suggest many
sale. Send for it.

THE "NEVER LEAK" ONE DROP OIL CAN.

A. F. Meisselbach & Bro., Newark, N. J., are the manufacturers of the "Never Leak" One Drop Oil Can, which from its condensed usefulness has become exceedingly popular. It is made of brass and nickel plated; the illustration which we give

THE "NEVER LEAK" ONE DROP OIL CAN.

of it is actual size of article; 3½ inches long by ⅜ inch in diameter. As its name indicates, it gives one drop only, and can be applied just where it is needed. It can be carried in pocket or case, without soiling other articles, as it will not leak, and there is no superfluous oil needed to be wiped off. The limited quantity of oil that can be supplied by its use, makes it extremely desirable for clock machinery, music boxes, phonographs, typewriters, sewing machines, fishing reels, guns, etc. It is furnished

MODE OF HANDLING.

attractively displayed on cards of one dozen, and at the moderate price at which it can be sold should prove very salable.

THE DIME SCREEN DOOR CHECK.

This is an article manufactured by the Caldwell Manufacturing Company, Rochester, N. Y., about the undoubted utility of which, and its moderate price, there can be no possible question. It is

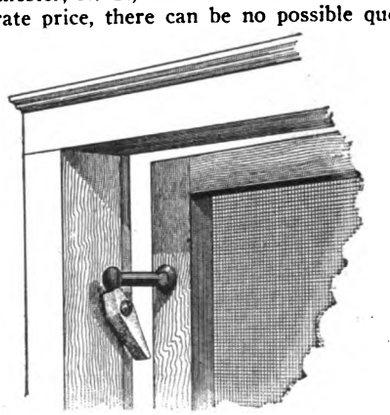


FIG. 1.

a Screen Door Check constructed in a novel manner to effect the object of closing the door, which is demonstrated in the illustrations presented herewith. The bumper is of moulded rubber,

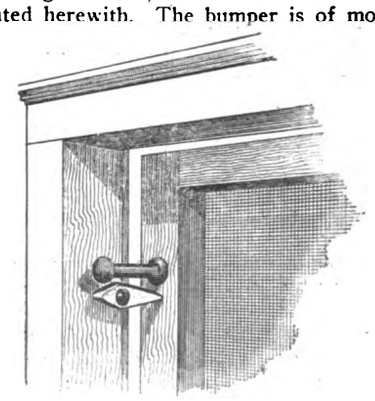

FIG. 2.

tapered to give the greatest amount of spring. The operation, not depending on the momentum of the door, must always work,

Digitized by Google

whether the door is opened wide or only partly opened. Fig. No. 1 illustrates the closing door, bringing the plunger on the

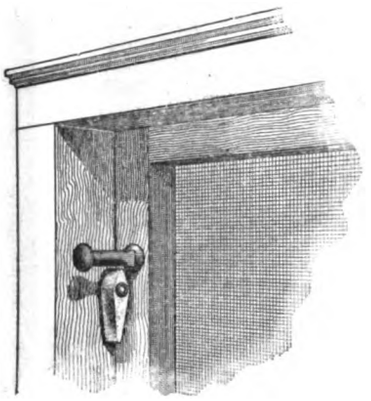

FIG. 3.

door in contact with the top of the rubber bumper, throwing it up to position as in Fig. No. 2. The door rebounds from the concussion and the rubber drops by gravity to position as shown in Fig. No. 3, allowing the door to close. It is packed for retailing in attractive display boxes. A card of directions exactly locating both screw holes, is packed with each check.

STEVENS NEW DOUBLE BARREL GUN NO. 225.

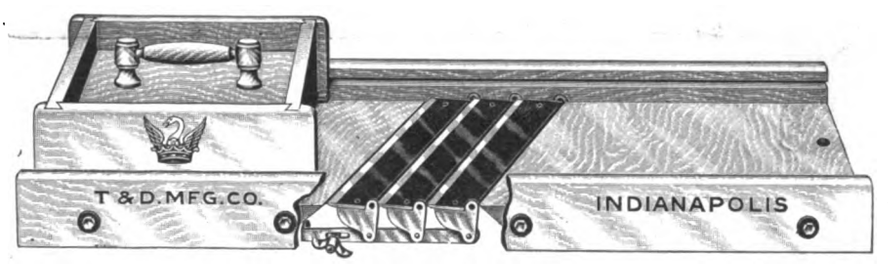
It is extremely doubtful if any gun manufacturer in this country has brought out as many new goods for the introduction, under proper auspices, by the trade, as the J. Stevens Arms & Tool Company, Chicopee Falls, Mass., in the same length of time.

STEVENS NEW DOUBLE BARREL GUN NO. 225.

Within four years they have added three new models of rifles, three models of double barrel shot guns, and six models of single barrel shot guns. They now present, in accompanying illustration, their latest production the Double Barrel Gun No. 225, which is now ready for the trade to handle, and of which they speak in the most interesting manner in the following description of its many meritorious features. "We believe it is the best value, in the way of a popular priced shot gun, that we have ever produced. It is of strong construction and especially designed for high pressure powders. The frame and action is a radical departure from anything on the market, mainsprings being spiral and working on the plungers, which are set in the frame directly in front of the hammer, thus insuring an easy and positive action. It has a check hook to take up all wear, top snap, low circular hammers, re-bounding locks, solid plungers, American walnut stock, pistol grip checkered, regular length and drop, patent snap fore-end and nitro steel barrels. Is made in 12-gauge 28, 30 and 32 inch barrels, 16-gauge 28 and 30 inch barrels and weighs from 7 to 8½ pounds. It lists at $15.00."

HAYDEN'S EXTENSION POLE GRIP.

The Hayden Implement Co., 46 Duane Street, New York, are the manufacturers of the Extension Pole Grip which we illustrate herewith. It is made of malleable iron and nickel plated, and without removing grip, the poles may be lengthened or shortened. It will be found an extremely useful appliance for reaching high or low walls, windows, cornices, decorated ceilings and chandeliers. Will fit any size pole, and obviate all weak ferrules, being a double grip there is no breaking of poles, as the manufacturers claim that two poles fastened together with this grip are stronger than a single long pole. It is also a very handy, useful and necessary article for joining two poles for the purpose of reaching high trees in pruning, picking fruit, or burning blighted branches when occasion requires.



MODE OF USE.

HAYDEN'S EXTENSION POLE GRIP.

IMPROVEMENT IN KRAUT CUTTERS.

The Tucker & Dorsey Manufacturing Co., Indianapolis, Ind., are placing on the market for the coming season a new line of Kraut Cutters showing material improvement in the manufacture of these goods and possessing features of much merit. The "Indianapolis" Cutter here illustrated is of heavy construction, and has highly finished tempered steel knives, adjusting easily in one operation with pull and locking device at both ends; side rails bolted to head blocks in which the grain of the wood is run cross-wise to prevent warping. The sliding box is furnished with a protecting lid, has mortised, dove-tailed corners and inserted runners working in polished grooves in the side rails. The knives are pivoted at the heel, so that the cutting edges are raised or lowered without changing the position at the back of the knife. And not a minor feature by any means is the fact that the metal attachment to the knives is tinned to prevent rusting. The "Indianapolis" Cutter is made in three sizes, with two, three and four knives. The woodwork is given a satin finish in the white.

IMPROVEMENT IN KRAUT CUTTERS.

JAP-A-LAC

REGISTERED TRADE MARK

"WEARS LIKE IRON"

IMPORTANT NOTICE TO ALL DEALERS

The List Prices of Jap-a-Lac Must be Maintained at all Times

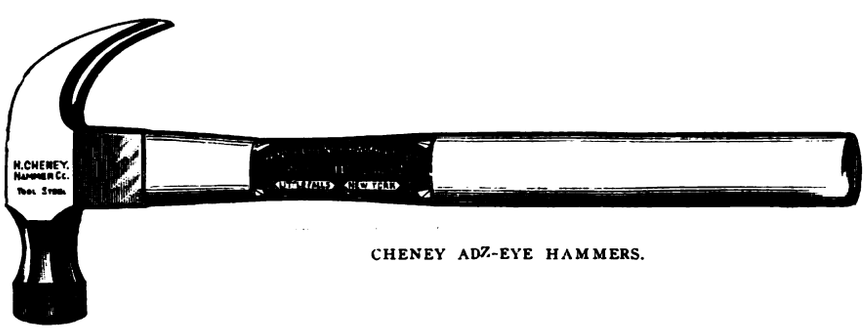
We are informed that some dealers handling JAP-A-LAC have been so unmindful of their profit that they have cut the retail prices as established by us through six years of constant advertising and at an expenditure of more than TWO HUNDRED THOUSAND DOLLARS.

We wish to announce to the trade that we do not sanction any cutting of the list prices and

WE SHALL POSITIVELY DECLINE TO SELL JAP-A-LAC TO ANY DEALER WHO DOES NOT AT ALL TIMES MAINTAIN THE PRINTED LIST PRICES ON ALL SALES TO THE CONSUMER.

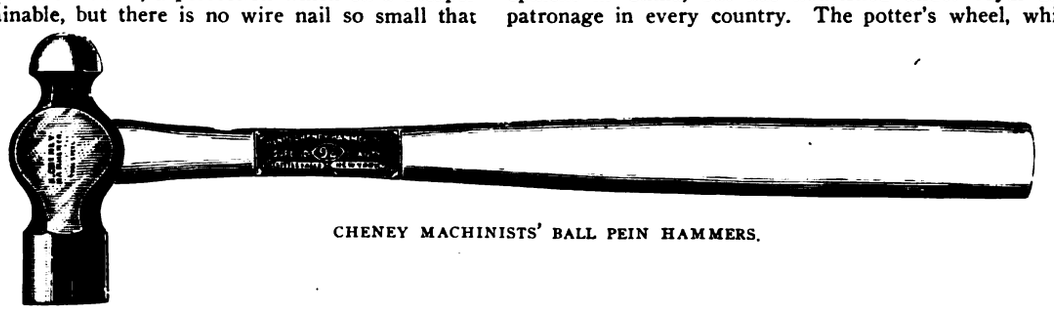
We shall be very glad to be promptly advised of any case where JAP-A-LAC is sold or advertised to be sold to consumers at less than the regular list prices. The co-operation of all the dealers and jobbers is earnestly requested that full protection may be afforded to dealers who are entitled to and shall receive every assistance from us to reap all the benefit of our extensive advertising.

THE GLIDDEN VARNISH COMPANY,



MAKERS OF HIGH-GRADE VARNISHES FOR ALL PURPOSES

ADDRESS: 641 WILLIAMSON BUILDING,



CLEVELAND, OHIO

CHENEY'S CRUCIBLE STEEL HAMMERS.

The Henry Cheney Hammer Company, Little Falls, N. Y., is engaged in making a line of hammers made of crucible cast steel that for years have sustained a reputation for quality, second to none. Their Adz-Eye and Bell Face Hammers (the latter of which are nickel plated) have a record that has made them known all over the world; and a "Cheney" Hammer is as well known in Australia as it is in New York. They are noted for the perfection of their claws, a perfection which on a cheaper hammer is unobtainable, but there is no wire nail so small that a Cheney Adz-Eye will not draw it from the wood. Their Machinists' Ball Pein Hammers appeal to a Hardware dealer as being of "Machinists' quality" fully finished and warranted. They cost a little more than when quality is not a consideration, but give the best value for your money. The dealer who handles these tools can always rely on three things: the quality, the finish and the perfection of form; they have never deteriorated in any respect and are the same as when they first established their reputation at a date too remote for even a Hardware Veteran to remember. Send for circular and discounts.

CHENEY ADZ-EYE HAMMERS.

CHENEY MACHINISTS' BALL PEIN HAMMERS.

PORCELAIN.

The art of potting porcelain had its origin and complete development in China, but has flourished under royal and princely patronage in every country. The potter's wheel, which is, perhaps, the most ancient of all mechanical contrivances, is still used in the shaping of porcelain in China and Japan, and that, too, in a simple form, which differs little from that employed 4,000 years ago in Egypt, and probably at an even earlier period.

REVIEW OF THE MARKETS.

WIRE NAILS: A meeting was held recently in Chicago by some of the leading independent manufacturers of wire products which was called in order to stop the cutting of standard prices on Wire Nails, especially by those not directly identified with the Hardware trade. To counterbalance the weakening tendency of the market, some of those present expressed a willingness to advance prices, but not being able to secure the co-operation of the American Steel & Wire Company, it was finally agreed by the independent companies to use every effort to prevent cutting of prices, in which the American Steel & Wire Company promised to aid them. They will also endeavor to curtail production during the dull months, should the market seem to require it. Quotations accordingly remain as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in ten days:

Carload lots to jobbers.....$1.80
Carload lots to retailers..... 1.85

New York.—A fair business is being done locally with territory adjacent to the city. Quotations are as follows: Single carload $1.99. Small lots from store $2.05.

CUT NAILS: The market was considerably strengthened by the action of the meeting held in Chicago by which it was effectually braced so that the demand was improved and less hesitation was manifested. Quotations are as follows:

Carload lots $1.80
Less than carload lots to jobbers..... 1.85
Less than carload lots to retailers..... 1.95

f.o.b. Pittsburgh. Iron Cut Nails for delivery at Pittsburgh, Buffalo and all points west of these cities 10 cents advance per keg on Steel Cut Nails.

New York.—The local market was favorably influenced by the action of the Chicago meeting, and New York will lend its assistance to strengthen the market. New York quotations are as follows:

Carload on dock.....$1.94
Less than carloads on dock..... 1.99
Small lots from store.....$2.co to 2.05

BARB WIRE: The demand is light as the trade is well supplied and better conditions influence the market caused by the meeting in Chicago to maintain prices. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in ten days:

	Painted.	Galv.
Jobbers, carload lots	$1.95	$2.25
Retailers, carload lots	2.00	2.30
Retailers, less than carload lots	2.10	2.40

SMOOTH FENCE WIRE: The demand shows some improvement, prices being firm and having the confidence of the buyer. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

Jobbers, carload lots.....$1.65
Retailers, carload lots..... 1.70

The above prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

SHEET ZINC: Under date of May 12 a reduction is announced in the price of Sheet Zinc, which is now quoted at $7.25 per 100 pounds in 600-pound casks, f.o.b. mills, subject to the usual discounts for cash and quantity.

BINDER TWINE: General market quotations f.o.b. Eastern factories, may be given as follows:

White Sisal (500 feet to the pound).....9½ @ 9¼
Standard (500 feet to the pound)..... 9½ @ 9¾
Standard Manila (550 feet to the pound)..10½ @ 10¾
Manila (600 feet to the pound).....11½ @ 11¾
Pure Manila (650 feet to the pound).....13 @ 13¼

Less than carload lots quarter of a cent extra.

ROPE: The following prices may be said to represent the market:

	Cents per pound.
Pure Manila, 7-16 and larger	12¼ to 12½
Pure Sisal, 7-16 and larger	10
No. 2 Sisal, 7-16 and larger	8¼

Less ¼ cent to the large trade.

LINSEED OIL: Under date of May 17th the following advanced quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....51 cents per gallon.
In lots of 5 barrels or more.....50 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil.....60 cents per gallon.

THE PHILADELPHIA TRADE.

The market to-day might be described as steady. Prices are without material change one way or the other, although it is noticeable that there seems to be a steady tendency to advance the price of all goods in which wood forms a leading part. This, of course, is largely due to the diminishing supply of this useful material. Our country, so far, has been too young and extravagant to realize the value of wood, and the time is no doubt coming when it will pay to adopt means for the cultivation and care of forests. The average American, however, wishes to see results in his own life time, and it is a difficult matter to induce him to take thought for future generation. Trade is fair, and it is somewhat difficult to supply the demand for certain seasonable goods. Much complaint is frequently made with the delay on shipments made direct from the factory, and we do not wonder that the dealers often feel aggrieved from this cause. Unfortunately, however, we see little or no remedy for this delay, as long as the present practice continues or shipping so many goods direct from factory in order to save the dealer a small amount of freight. Jobbers as a rule would be only too glad to carry ample stocks of seasonable goods so as to fill orders promptly, but the demand for the freight allowance is so great that the jobbers are compelled to send many orders to the factory for direct shipment. The inevitable fact is that the factories are swamped every year, and every season there comes the cry of woe from all parts of the country because shipments are delayed. We cannot but feel that these direct shipments are often times a real injury to the dealer, but we appreciate the fact that they seem inevitable. BIDDLE HARDWARE CO.

THE PITTSBURGH TRADE.

Within the past few days Pittsburgh has been the center of several important gatherings. First was the congressional committee on river improvement under the leadership of Mr. Burton. This committee made up of representatives from all parts of the country were shown some of Pittsburgh freight producers and then started down the Ohio on the steamer Queen City to make a thorough inspection of the river from Pittsburgh to Cairo. They see a stream capable of carrying the commerce of the world at its present stage of water and what it might be all through the year if improved with locks and dams. The towns and cities along the route are vieing with each other to make the trip of the committee a success. The next is the convention of railroad men lately assembled in Washington from all parts of the world. They visit our city to see the place that produces more freight than London and New York combined and whose products reach all parts of the world. They will visit the Westinghouse Air Brake shops, the Carnegie Armor Plate mills and other points of interest. We are also favored this week by the presence among us of the executive and advisory committees of the National Hardware Association. These gentlemen come from as far east as Boston, west as San Francisco, north as St. Paul and south as Birmingham. The local Hardware Association took them in automobiles through our residence and park district and showed what Pittsburgh is from the aesthetic side. It proved to be a revelation to men who had only known Pittsburgh as a city of manufactures. They were also entertained at a banquet by one of our manufacturing concerns and will be given further attention during the remainder of their stay. Important matters relating to the business of the association are being considered by the committee. Beautiful Spring weather has helped trade lately and a good amount of business is doing among the merchants. There is very little trouble with labor this season, the only strikes being in the builder trades and these are being gradually adjusted. LOGAN-GREGG HARDWARE CO.

Digitized by Google

THE CLEVELAND TRADE.

The building trade is extremely brisk, making an extra demand for material and labor. Labor in some cases is making demand for increased wages, and that may interfere with what might otherwise be an active season. Improvements in city and country are steadily going on. The people are being better housed and comfort and pleasure are being provided. Increased machinery is lessening the drudgery of farm life, and the country homes are adding pianos and carriages. Street railroads, telephones and mail delivery are making country life quite different from what it has been. No quarter of a century in our history has added so much pleasure to country living. The good road movement promises one of the most important improvements, and the country as well as the city should enthusiastically support it. Liberal provisions for good roads should be encouraged by both political parties, and both parties should find a place in their party platforms endorsing it. The agricultural department at Washmgton cannot afford to ignore the demand for such improvement. It is fast becoming a political question and appeals to a very large number of our citizens. If the voice of the people is not respected, the country fences of our law makers will need repairing soon. It is well to build docks and dredge rivers, provide for army and navy, but urban improvements must not be neglected. The Lockwood-Taylor Hardware Co.

THE COLUMBUS TRADE.

We wonder what would happen if human beings had control of the Jupiter Sprinkling Pot. Would we have too much, too little or just enough? It certainly looks as though we were getting too much now. It is too wet to plow, and those who could not get plowing done early are going to be very late in planting corn. The corn that was planted is coming along nicely, even with all the rain, while oats, wheat and grass are looking fine. If man had the say so, one would want it nice to-day, so he could go fishing, and the other fellow would want rain on his potato patch to-day and nice the next day, so he could go to the ball game. We fear such an arrangement would cause more trouble than the measles, so it is better as it is.

Trade has held up nicely, and April showed a nice increase over 1904. The wet weather is making an active demand for lawn mowers, but has temporarily checked the demand for builders' Hardware; but that must come later, as more new buildings and improvements are projected than last year, which was an exceptionally good year. Prices with manufacturers are holding pretty firm, but as jobbers are in business simply for pastime, they continue to do foolish things. Stove boards are an example. If we could only work in a little Beef Trust and Standard Oil Profits, we could go fishing oftener and see more ball games. There is no ban on tainted money for these amusements. Who ever heard of a Hardware man hunting a place to give his money away? No, no; they need it to buy bread and butter, and occasionally something on the side; but, as a rule, they are happy.

The Smith Bros. Hardware Co.

THE MINNEAPOLIS TRADE.

Of late we have had considerable dull weather, cold and rain, with some danger of floods in the Red River Valley, but as seeding was all completed before this weather set in, which was accomplished rather unusually early and under most favorable conditions, with such weather as we have from now on everything will get a good start. There is an unusually large amount of building in this city and St. Paul, and this is true in the country also. The only labor trouble we have been obliged to contend with so far is the plumbers, and that is practically settled now, by the places being filled to a large extent with new men, some of the old men going back, and all shops now being run as open shops. This seems to be the cry here, one of our largest and most successful contractors being forced to take that position last year, who has fought it out successfully and has in hand at the present time more work than any one else. We don't believe there will be any further disturbance in that direction here. We have a new jobbing house here now, the Simmons Hardware Co., of St. Louis, having purchased the stock of the Nelson, Bouquet, Holliday Hardware Co., and Mr. Hurty, formerly of Farwell, Ozmun, Kirk & Co., taking an interest in the business, which is being conducted as the Hurty-Simmons Hardware Co. They are getting matters in shape to do business on somewhat larger scale and are already looking about for larger quarters. There was undoubtedly an opening here for another house and it will probably be better for the trade as a whole to have them located here. The country tributary to the Twin Cities has been growing very rapidly and without doubt will continue to grow for years to come. We think the Retail Dealers as a whole are having satisfactory business and the Retail Association is doing good work. W. K. Morrison & Co.

THE SAN FRANCISCO TRADE.

This morning, May 18, the writer noticed in Powell Street, a half block away, several big trucks being loaded with Hardware stock. The trucks were at the front entrance to the store of Henry Gracey, secretary of the California State Retail Hardware Association. Investigation resulted in obtaining this trade news item: Mr. Gracey closed a deal yesterday as a cash buyer of the extensive stock of the ten years' old concern known as the Detroit Range Company, located at 1011 and 1013 Market Street, which place he also yesterday leased for a term of years. A few years ago Mr. Gracey bought the stock and good will of the Myers Stove Company, and now he is removing his stove department stock from the Powell Street store to his new six times larger store in Market Street. He will operate both stores, seven blocks apart.

The authorized committee of the California State Retail Hardware Association to put in the field an association promoter has selected for this work Mr. F. B. Dickson, who during the last nine years has served well as manager of the implement department of the wholesale Hardware house of Baker & Hamilton. Commissioned with the official title of "State Organizer," Mr. Dickson started for the interior the past week on his missionary work.

Following are trade news notes brought to San Francisco this month by travelers: In California Kirkham & Son have opened a Hardware store in South Berkeley. In the town of Gridley, R M. Beebe has been succeeded by Mayer & Ashley. In Visalia the Otto Hardware & Implement Company. Hardware firm in Selma, Griffin & Brown. In Fresno, Hardware; Gearhart-Favors Company. In San Jose, implements; San Jose Implement Company. In Merced a Hardware dissolution has occurred, whereby Mr. Olcese is the retiring member of Olcese & Garibaldi. The firm succeeding them is Garibaldi Bros. Cross Hardware & Implement Company in Visalia is the new trade name of O. R. Cross & Co. In Paso-Robles the Hardware stocks both of P. Doyle and the Paso-Robles Hardware Company have been purchased by the new proprietor, George F. Bell.

In Washington the Spokane Hardware Company has incorporated, $100,000, to continue business as heretofore, under the management of Thomas Coulan. In the town of Lind, the copartnership, Charles Labes & Son—Hardware and agricultural implements—are reported incorporating as Charles Labes & Company. G. J. Tompkins & Co., implements, have opened in Ferry, a branch of their main store, in Republic. The Hardware dealers in Columbia, Seldonridge & Campbell, are reported succeeded by E. A. Seldonridge. In North Yakima, the Hardware business of Fawcett Bros., has been bought by Hartung Hardware & Implement Company. H. A. Bier, Hardware and implements, Kennewick, has been succeeded by the Kennewick Hardware Company. Meagher & Mitchell have succeeded Meagher & Folsom in the Hardware business in Sprague. In Colfax the interest of W. J. Windus in the Davis Implement Company, has been bought by G. W. Howell. In Pullman, the Stewart-Outman Hardware Company is succeeded by Stewart-Clure Hardware Company. G. H. Adkins has bought the Hardware and general stock of O. H. Smaby in West Sound. In Hartline the implement business of G. R. Roberts has been bought by the Thompson Mercantile Company. A. J. Smith will have erected this month a new building in Govan, in which he will open a Hardware store. E. E. Plough has succeeded the Lyse Mercantile Company as Hardware merchant in Wilber. The Arlington Hardware and Plumbing Co. in Arlington, has just now been incorporated. In order to carry a great deal more stock the Davis Hardware Company is having built an additional warehouse 50 by 94 feet. J. D. Allen is reported buying out the Pullman Hardware store of Pullman. Vuger & Loop are about to start a Hardware store in Edison. In Oregon, in Baker City, a Hardware store is M. E. Swan's new business venture. E. H. Hutchinson is about to open in Madras in the agricultural implement business. Butler & Faulkner are starting an implement and wagon store in Independence. The Ashland Hardware Company, Ashland, has incorporated. W. Giesy has withdrawn from A. H. Giesy & Company, merchants in the trade in Aurora, and in Forest Grove a store in the trade is being opened by George Boos. In Idaho the Griffith Hardware & Plumbing Co., of Idano Falls, is starting a branch in Twin Falls, and in Genesee the general merchant, J. K. Bell, has sold his Hardware and harness stock to Timothy Driscoll, and his implement stock to Johann & Miller. Industrial Press Association.

OUR BRITISH LETTER.

(*Concluded from page 26.*)

United States. Mr. Stephens, who introduced the subject, proposed that in view of the immense quantity of American articles imported into this country the attention of the Chambers of Commerce and various mercantile associations should be drawn to the matter with a view to their realizing their proper responsibility and duties. Mr. Stephens contended that the chief reason why such goods as pressed steel butts, back flaps, and tee hinges of American make are being sold in preference to those of British origin is that American goods are up-to-date, whilst on the other hand many of the English goods are of the same patterns as those supplied a few generations ago. Whilst this statement is, to a certain extent, true, it is only fair to English makers to record the fact that some more advanced manufacturers have adopted new types and are closely following the popular demand. The discussion was interesting and should be encouraging to American makers, at the same time it should put them on their mettle, to maintain the good names they have won.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS ISSUED MAY 2, 1905.

788,754. DUST PAN. S. J. Corner, Burchad, and L. Corner, Stella, Neb.
788,772. WRENCH. I. F. Johnson, Sioux Falls, S. D.
788,899. CARPENTER'S BRACKET. J. G. W. Grieves and C. S. Grieves, Amesbury, Mass.
788,941. AUGER. A. Y. Pearl, West Lebanon, Me.
788,989. VEGETABLE OR FRUIT PARER AND SLICER. A. L. Allen, Pittsburgh, Pa.
789,103. COMBINATION TOOL. A. M. Parker, Mexico, Pa.

PATENTS EXPIRED MAY 15, 1905.

382,712. PLIERS. Wm. C. Marr, Onawa, Iowa.
382,718. FLAT IRON HEATER. A. Modery and A. Leukhardt, Indianapolis, Ind.
382,742. COFFEE MILL. J. M. Waddel, Greenfield, Ohio.
382,755. WASHING MACHINE. N. B. Clabaugh, Frederick, Md.
382,799. PIPE WRENCH. R. Copland, Eureka, Cal.
382,821. COMBINATION TOOL. J. D. Masters, Boston, Mass.
382,874. LASTING TOOL. C. H. Helms, Poughkeepsie, N. Y.
382,975. WRENCH. B. R. Hagar, Bradford, Pa.
383,049. WRENCH. A. F. M. Garrett and F. Frank, Dadeville, Ala.

PATENTS ISSUED MAY 16, 1905.

789,717. WRENCH. R. L. Combs, Arco, Okla.
789,797. WRENCH. F. G. Cornell, Louisville, Ky.
789,803. PRUNING IMPLEMENT. F. M. Garrison, Berrien Center, Mich.
789,850. IRONING BOARD. E. Q. Gatteys, Booneville, Miss.
789,880. MOP HEAD AND WRINGER. O. H. Rice, Sioux Falls, S. D.
789,927. SOLDERING IRON. M. Mossig, Berlin, Germany.
789,928. IRONING BOARD. J. W. McKinney, Tyrone, Pa.
789,930. MOUSE TRAP. J. F. O'Dell, Oil City, Pa.
789,938. COMBINATION LOCK. J. P. Rosendahl, Brooklyn, N. Y.
790,065. MILK PAIL. F. W. Lechner, Wenona, Ill.
790,084. WRENCH. M. A. Smith, Hatcher, Ala.
790,091. LOCK. R. A. Turner, Panther Creek, N. C.
790,092. LOCK AND LATCH. H. G. Voight, New Britain, Conn.
790,168. WRENCH. T. J. Baldwin, Beaumont, Texas.

CLARK-HORROCKS CO.

Clark-Horrocks Co., fishing rod manufacturers of Utica, N. Y., have purchased the fishing tackle manufacturing business of Gillette Bros., Auburn, N. Y. By this purchase the new owners will greatly increase their manufacturing line. Gillette Bros., three years ago, succeeded another concern that had been engaged fifteen years in making fishing tackle, trolling spoons, spoon bait, frog spears and other specialties in the tackle line. Clark-Horrocks Co. have now acquired this plant, machinery and good will, and are moving the business to Utica where it will be continued in connection with their fishing rod factory. The line will be somewhat enlarged, although at present there are something over 140 different styles of trolling spoons made by this concern. The same high standard will be maintained by the new purchasers, who will continue to cater to the large jobbing trade with whom Gillette Bros. have an extensive business. By the purchase of this well equipped plant Clark-Horrocks Co. have strengthened their line of fishing tackle. The company for some years have been making fishing rods, artificial flies and other specialties and does a large business through the country and abroad. The material used in the manufacture of rods, comes from a great distance; bamboo being imported from Japan and India; lancewood from Cuba and greenhart from Brazil, and the finished product finds its way to England and the Continent as well as Australia. The officers of the Clark-Horrocks Co. are: G. A. Clark, president; H. J. Horrocks, vice-president; J. H. Horrocks, treasurer; E. D. Idbotson, secretary.

WISCONSIN RETAIL HARDWARE ASSOCIATION.

The Hardware Dealers Mutual Insurance Company, under the auspices of the Wisconsin Retail Hardware Association, are sending to every Hardware dealer in the State a list of those who have taken insurance during the first year of their existence, and accompanying it the State Association stir up the dealers in the following fashion, giving it a thorough endorsement:

What are we doing?

We have enrolled 475 of the progressive Hardware dealers of the State working together for one common purpose, viz.: the bettering of the condition of the retailer. How?

By working in sympathy with the jobber and manufacturer.

By making common cause in any just reason for complaint.

By working with the National Association, which now comprises twenty-six States and 6,000 members.

By getting fire insurance at cost, and in many other ways that are public only in the records of the association. Wisconsin stands second in size of the twenty-six State Associations and with a little effort on your part can stand first.

Suppose you step in and see your competitor who is not a member and ask him to join, get his application and send it to the secretary. It is very little to do on your part and will do you good and help the association. Tell him that in the past we have secured the pledge of 600 manufacturers and jobbers not to sell their goods to catalogue houses.

That we have stopped the distribution of catalogues by railway companies' agents.

That a membership costing $2.00 is worth $5.00 as the $2,400 in the treasury belongs to the membership.

That it gives him the National Bulletin, a quarterly filled with good matter of interest to every live dealer.

That it enables him to secure insurance in our own company at actual cost, and the profits belong to us.

That the first eight months the insurance company saved $1,200 to the dealers who took advantage of its benefits, and if these arguments won't convince him you might add that he will be associated with 500 of the live, up-to-date dealers of the State, who are making money and have their rod up to make more.

Can't you do this much for the association? Of course you can. Will you? This is an urgent appeal and the cause is a good one and worthy of your attention.

Don't lay this aside and think the other fellow will attend to it.

Do it yourself and do it now and the association will watch to see what luck you have, and report at the next annual. One new member who attended his first association meeting in Milwaukee in February said he would not miss the next one if he had to lock up for two days to go.

Finally, are you one of the sixty-three who have their full limit of insurance with us. One firm last year saved $26.40. It is worth your while to get into the "band wagon" without waiting for the secretary to call on you.

The company is yours and the profits will rattle in your pocket if you say the word.

Prospects of a big dividend the present year were never brighter. Our expenses at this date are only 12 per cent. Compare that with the expenses of any old line company. Isn't this a pretty good appeal to you to work for the association and also for your own pocket.

The officers will do all in their power, but they can't do it all.

Suppose you make a mark to do something along this line to-day and we will do all we can to help you.

Insurance Company.—O. P. Schlaffer, president; C. A. Peck, secretary; H. L. McNamara, treasurer.

Association.—R. M. Burtis, president; C. A. Peck, secretary-treasurer.

GERMAN PATENT LAWS.

The following points of interest regarding the German patent laws are taken from a recent number of the bulletin published by the Chember of Commerce of Berlin.

An American patent to be valid in Germany must be filed simultaneously in the United States and in Germany. The filing of such patent or application must be made in writing on blanks furnished by the German patent office. Each application must be made out on a separate blank. The first part of such application shall form the petition and the second part the specification proper. Until such patent has been issued all alterations are admissible.

The application for the patent must first be submitted to a preliminary examination. If not found to conflict with any application previously made, it is grantable. On the publication of such patent in the official Government organ, the Reichsauzeiger, the patent acquires provisional validity. Such publication can, however, at the request of the patentee, be postponed for six months from the time of the decision reached by the preliminary examiners.

Should the application be rejected, the patentee is entitled to appeal within one month after being informed of such decision. Such right, of course, applies to any opponent or opponents of such patent. The costs of appeal entail the payment of $5, which if not made renders the appeal null and void.

The amount thus paid may be refunded to the interested party whose appeal is sustained. If after publication of the application for payment such application be refused, the yearly fee already paid shall be refunded to applicant. Applicants living abroad are required to give security for expenses of legal proceedings in case of appeal. Such security is fixed by the proper authorities arbitrarily. The patentee, on being summoned to appeal, must file his reply within one month from the date of issue of such summons. Appeal may also be made against the decision of the patent office authorities and carried to the Reichsgericht, in Leipzig, which appeal must be filed in writing at the patent office within six weeks after the decision of the patent office.

For a full patent to run fifteen years, the full or long term, an application fee of $25 must be paid on filing application. A power of attorney and duplicate specification in German, including drawings, are required; one set of drawings to be on bristol board and the other on tracing paper or cloth.

The patent, if granted, must be worked within three years from time of granting, when a fee of $28 is required. For assignment of a patent a fee of $10 is required. Patent designs run for three years. They can, however, be renewed once after first expiration. The fee for three years is $14.

The person first applying for a patent design obtains the same. In this respect persons living abroad should be particularly cautious. Power of attorney is also required, and drawings in duplicate, the same as for full patent. No working of patent design is required.

"LEST WE FORGET."

There was a time when tallow candles cost 10 cents each and gave less than one-twentieth of the illumination for a dollar that gas gives.

There was a time, and very recently, when gas, per unit of illumination (candle-power), cost the public double what it now does.

There was a time, still more recently, when there was no electric light turning night into day.

There was a time when we were satisfied to travel four miles an hour in an omnibus or horse car without light or heat, or transfers, and pay six or ten cents for what we now get for five cents with light and heat, and with speed doubled.

There was a time when we thought it was a great thing to be able to telephone to a friend for 15 cents, and yet we are not satisfied, * * * forgetting that "corporation" means "co-operation," and that through it this progress has been made.

The Socialist forgets that the waste of public ownership and operation exceeds corporate profit, and doesn't care whether it does or not so long as he gets something at somebody else's expense.—*The American Grocer.*

YOUR LETTER WENT ASTRAY.

Because you forgot to address it.

Because you forgot to stamp it.

Because you forgot to write the town or State on the envelope.

Because you didn't write the street and number plainly.

Because you used a once-canceled stamp.

Because you used internal revenue stamps instead of postage stamps.

Because you used a foreign stamp.

Because you wrote the address so badly that no one could read it.

Because you wrote the address on top of the envelope and it was obliterated by the postoffice dating, receiving and canceling stamps.

Because you put your letter in a blank envelope and sent it to the dead-letter office, where thousands upon thousands of valuable letters are daily destroyed because the people are either careless or ignorant of the postal laws.

Bank—Check—Bona-fide Holder.

The New Jersey Court of Errors and Appeals held, in the recent case of The National Bank of New Jersey vs. Berrall, that a bank which receives in the ordinary course of business a check drawn upon it presented by a bona-fide holder who is without notice that payment thereof has been stopped, and which pays the amount thereof to such holder, cannot afterwards recover back the money as paid by mistake on the ground that payment of the check had been countermanded by the drawer.

AMERICAN HARDWARE MFG. CO.

In illustration given below, is a Door Catch that is manufactured by the American Hardware Manufacturing Co., of Ottawa, Ill. It is made very strong, being stamped wrought steel, corrugated, and presents a very attractive appearance.

The illustration, Fig. 1, shows the mechanism of the catch,

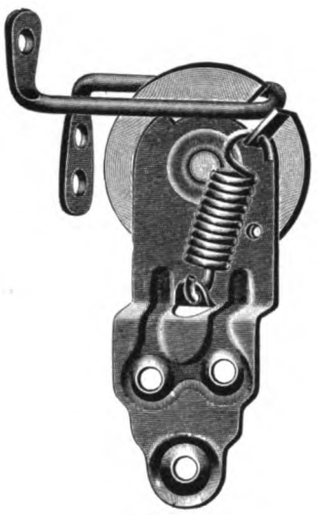

FIG. 1.

which is very simple, and as there is nothing to get out of order, it will last a life time. It can be used on any door, whether it swings right or left, in or out, and will hold any door, from a light cupboard door to a heavy storm door, but it is used almost exclusively for the screen door, as in Fig. 2.

When the Catch is attached, all that is necessary to open the door is simply a gentle push, and when the door is closed the Catch holds it automatically. It is an absolutely perfect Catch and requires no attention whatever, and no similar Catch on the market compares with this Catch in effective work or in price. It keeps the door closed, the flies out, prevents warping and works in a positive, silent manner. It works on any door that swings on hinges and does away with the old style latch.

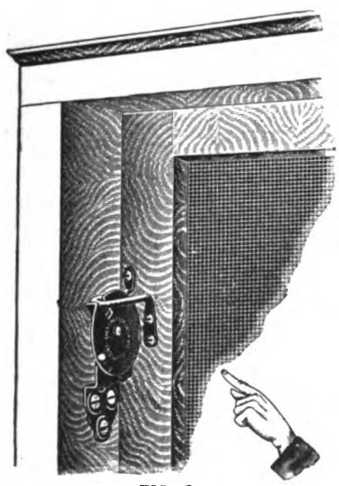

FIG. 2.

There is also a very unique way of placing this Catch on the market. The Catch, staple, screws and cardboard templet are all packed in a strong envelope and one dozen of these are packed in a strong carton with swing back cover and colored display cards, which makes it a show case article. The templet is also a very neat piece of work, with an outline of the Catch and staple, which is bent at right angles, showing the location of the holes in door and jamb, so that any one can attach the Catch and does not need to send for an expert.

The American Door Catch is meeting with a most unbounded success from the jobbers, dealers and consumers, and requires only to be seen to be appreciated. Have you seen it? If not the manufacturers will, upon request, send a sample Catch complete, prepaid, no charge, to any dealer. You can attach this Catch to any door in your store or home and therefore be able to judge the merits of this Catch.

Her Disease.

Madge—Did the doctor tell you that you had any pronounced disease?

Dolly—Yes, dear; but I couldn't pronounce it if I tried for a week.—*Town Topics.*

GUARDS BEATEN BY CIVILIANS.

Stevens Winning High Honors Abroad.

A match with miniature rifles of the smallest calibre took place recently between a team of twelve of the most doughty champions of the Scots Guards pitted against twelve civilian riflemen of Southfields Rifle Club, in which the Guards were severely beaten. This is a significant portent, not only in regard to the shooting powers of our paid national defenders, but equally significant of the inferiority of British-made rifles to those of the United States. The Guards, firing with rifles made by Greener of Birmingham, got an aggregate total of only 1,949 points, against an aggregate of 2,167 made by the civilian team, which fired with a rifle, the Stevens, produced in the United States. The crack shot of the Scots Guards, the instructor of musketry, to the battalion, made for his side the best score, as was to be expected, but it was absolutely eclipsed by a civilian, this competitor not being by any means the best shot in his club. The victorious civilian, Mr. Newitt, at the first of the two ranges scored every point possible but one out of the maximum of 100, making 99 points. To do this he had to put nine bullets within a circle of half an inch in diameter, the tenth being merely a hair's breadth out. This phenomenal performance by Mr. Newitt is not quite a record for the club, a fellow competitor who went through the Boer campaign as a member of the Mounted Sharpshooters, holding the club record of a perfect score, in which all ten shots were placed within the half-inch circle. This club champion is Mr. A. J. Comber, who won the Queen's Silver Medal at Bisley within a few days of his return from South Africa.

Lord Roberts had promised to attend this match, to show his interest in civilian rifle shooting, but failed to attend, sending a telegram instead, with a promise for some day after Easter.—*Reynolds Newspaper* (England.)

A Way They Have.

Patient—Doctor, it hurts me awfully to cough.

Dr. Snapper—Then I wouldn't do it; wouldn't do it.

Patient—But how can I help it?

Dr. Snapper—Ah, that's a question in physiology! You'll have to consult Dr. Groper. I confine myself to pathological cases.—*Boston Transcript.*

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Acton, Me.—John M. French Flexible Bit Company has been organized for the purpose of manufacturing and selling saddlery and all other kinds of Hardware, and in particular to manufacture the John M. French flexible bit, with $100,000 capital stock. The officers are: President, John H. Roberts of Acton; treasurer, Herbert McChase of Cambridge, Mass.

Austell, Ga.—The Austell Swing & Ladder Company, a new manufactory with ample capital, has commenced operations with a large force of hands. They are thoroughly equipped with modern machinery and appliances.

Bangor, Me.—N. H. Bragg Co. has been organized for the manufacture of Hardware. Capital stock, $100,000. President, C. F. Bragg; treasurer, F. E. Bragg, both of Bangor, Me.

Boston, Mass.—Union Tool Co. has been incorporated to manufacture wrenches, etc. Capital, $20,000. President, Wellington L. Haller, No. 310 Commercial Street, Boston; treasurer, Frank C. Allen, No. 100 Boylston Street, Boston; clerk, Joseph C. Hosher, No. 120 Liberty Street, New York.

Chicago, Ill.—Steel Products Company has been incorporated; capital, $2,500; manufacture cutlery; incorporators, Albert N. Eastman, Edward P. Eastman, Don E. Harris.

Detroit, Mich.—Crosby & Co. has been incorporated with a fully subscribed capital stock of $100,000 and will devote itself exclusively to the manufacture of "6-5-4 Stove Lufta," as its stove polish is named to the trade. The product is the only one of its kind known to the trade and consists of a paint which endures heat and shines without polishing. Charles F. Crosby of Detroit, A. Cunningham of Oakland, Cal., and George H. Hill of Worcester, Mass., hold all the capital stock. The company will erect a factory of its own and will start out with 50 hands. The business has for two years been in an experimental stage in Detroit.

Elmira, N. Y.—Fuhrman Hardware & Plumbing Co. has been incorporated. Objects, manufacturing Hardware and Hardware supplies; capital, $25,000. Incorporators: Harry K. Fuhrman, Burton Martin, W. W. Hervey, John C. Dyatt and Charles S. Garey, all of Elmira.

Freeport, Ill.—American Incubator Company has been incorporated; capital, $10,000; manufacture poultry implements. Incorporators, J. W. Miller, Oscar R. Zipf, S. C. Ridgway.

Hamilton, Ont.—The Smith Stacker and Feeder Company has been incorporated; capital, $40,000. It will manufacture agricultural implements, and carry on a general foundry business.

Hartford, Conn.—The Lovell Manufacturing Company has been incorporated to deal in wire, all kinds of chains, swivels, crossbars, doorknobs and all other articles of wire, iron and steel, appertaining to the Hardware, plumbing or steam fitting business. It is capitalized at $250,000 and the company proposes to commence with the full amount of stock subscribed. The incorporators are Albert K. Lovell, Herman Lanser, Frederick Schussler, Charles E. Graham and Pierrepont D. Foster.

Lockport, N. Y.—The Niagara File and Rasp Company has been incorporated to manufacture files, rasps, tools and machinery. The capital is $30,000, and the directors William G. Ayer and Clara L. Ayer, of Lockport, and Charles Ashton, of Niagara Falls.

Nashville, Tenn.—The Gray & Dudley Hardware Company has secured a large tract of land at the corner of Clifton Street and Charlotte Turnpike and will begin in the very near future the erection of a manufacturing plant of a character new in the South. The kind of goods manufactured will be principally Hardware staples and some of the cheaper grades of Builders' Hardware. Hammers and anvils will be manufactured besides a varied line of cast iron goods. Between twenty-five and 150 men will be employed at the plant from the start. It is stated that the company has a sufficient surplus on hand for the erection of the plant, and no new issue of stock will be made.

Newark, N. J.—The Paterson Handle Works has been incorporated; capital, $100,000. Incorporators: Joseph A. Hoage, Joseph C. Johnson and Harry R. De Mund.

Newark, N. J.—William Crabb & Company has been incorporated to manufacture and deal in wire goods. Capital, $200,000. Incorporators: Robert Crabb, Albert R. Crabb and George C. Haddow.

New York, N. Y.—Benjamin S. Alder Co. has been incorporated to manufacture Hardware, cutlery, etc.; capital, $20,000. Incorporators: Benjamin S. Alder, No. 1162 Pacific Street, Brooklyn; William W. Crowell, James Tongue, No. 37 Warren Street, New York.

North Amherst, Ohio.—The Keopke Nut & Bolt Co. has been incorporated. The concern now employs fifty men.

Pekin, Ill.—Phillips Brothers is a new concern organized for the manufacture of axe handles, shovel handles, rake handles and handles of all descriptions. They will also manufacture other wooden articles. They have employed fifteen men to start.

St. Paul, Minn.—The Metal Screen and Manufacturing Company has been incorporated. The capital stock is $50,000. Incorporators, Gen. M. D. Flower, George J. Grant, J. D. Roberts, W. T. Rich and others, all of St. Paul.

Syracuse, N. Y.—The G. & C. Manufacturing Company has been incorporated. The capital stock is $10,000 and the company will make Hardware specialties. The directors are M. C. Hammond, Charles E. De Good and W. W. Roe.

Trenton, N. J.—Romberger Nut Lock Co., No. 147 East State Street, has been incorporated to manufacture locks, bolts, fasteners, washers, rivets, etc.; capital, $100,000. Incorporators: L. E. McKain, James K. Neogley, Mark G. Hibbs, all of No. 147 East State Street, Trenton, N. J.

Chattanooga, Tenn.—Work has commenced in enlarging the building at the plant of the Harriman Hoe and Tool Company preparatory to putting in much additional machinery and increasing the output of hoes about 50 per cent. The working force will be increased by about 40 men when the additions are completed and with this the plant will gain the distinction of being the largest of its kind in America, if not in the world. It is the intention of the management to extend the trade of the concern to the Oriental markets, where it is said there is now a large demand for this class of goods.

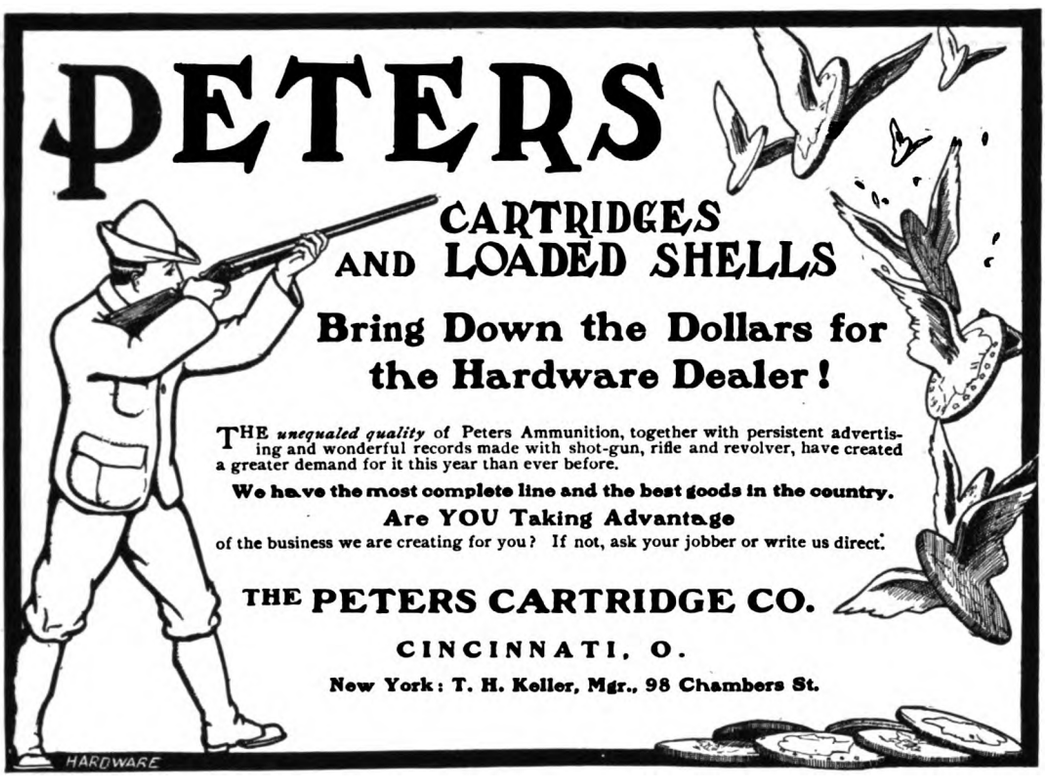
Cleveland, Ohio.—The Cleveland Hardware Company will erect a new factory on the site of one torn down to make room for improvements. The factory will be at Lake and Belden Streets and will cost $28,000.

Council Bluffs, Iowa.—The Walker Manufacturing Co., which was destroyed by fire recently expect within a few weeks to have a new plant ready, fully equipped with new machinery. The concern are manufacturers of novelties, fence and implements.

Fremont, Ohio.—The Conway Stove Co. has decided to locate here. They will immediately begin the erection of their building, 800x70 feet, and will employ between 300 and 400 men.

Hamilton, Ohio.—The Hamilton Machine Tool Company, Charles F. Hilker, president, has purchased the entire plant of the Belmer Machine Tool Company, of Cincinnati. The plant, with its equipment, will be moved to Hamilton and combined with the present shops in Lindenwald.

Hartford, Conn.—The Hartford Machine Screw Co., recently purchased by the Standard Screw Co., of Detroit, has been reorganized. W. B. Pearson, E. B. Cadwell and Philip B. Gale, all of Detroit, and John W. Murrell, Joseph Lamman, D. S. Morrell and E. B. Dolliver, all of Worcester, Mass., were chosen directors. Officers are: President, W. B. Pearson; vice-president and general manager, Philip B. Gale; secretary, John W. Morrell; treasurer, Joseph W. Lamman.



Walden, N. Y.—At a recent meeting of the stockholders of the Schrade Cutlery Co., it was voted to increase the capital stock from $25,000 to $45,000 and to increase their facilities to handle more business.

York City, Pa.—The Mt. Wolf Wire Cloth factory is completed and will be ready to begin work within a very short time. Several people have been placed at work installing the machinery, which is one of the latest improved pattern. About fifty persons will be employed in the factory.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Boston, Mass.—Consolidated Rubber Tire Company has been incorporated, to deal in rubber tires; capital, $5,000. President, James A. Dodd, No. 39 Pierce Street, New York; treasurer, Frederick A. Seaman, Madison, N. J.; clerk, Stanley F. Hall, No. 11 Hawkins Street, Boston.

Branford, Conn.—Mr. Doherty has opened a shop on Main Street, where he will repair automobiles, bicycles, etc.

Buffalo, N. Y.—Eastern Gun Company has been incorporated; capital, $30,000. Directors: H. J. Hopkins, W. C. Paul, G. C. Pickhardt, Buffalo.

Chicago, Ill.—C. N. Michels Company has been incorporated; capital, $30,000; Hardware, machinery, automobiles, electrical supplies. Incorporators, Christian N. Michels, Joseph R. Oliver, William C. Wieland.

Chicago, Ill.—Morgan & Wright will remove from Chicago to Detroit, and have placed contracts for the erection of the eight buildings that will comprise the Detroit plant. Morgan & Wright have filed articles of incorporation under the laws of Michigan. The capitalization is placed at $1,500,000, divided into 15,000 shares of $100 par value each. The amount of capital stock subscribed is $750,000. The stockholders are as follows: Charles H. Dale, Larchmont, N. Y.; Charles T. Butler, Chicago; Charles A. Hunter, New Durham, N. J.; Ernest Hopkinson, East Orange, N. J.; Herbert Bowen, Detroit.

Chicopee, Mass.—A. G. Spaulding & Bros. Manufacturing Company has been incorporated (athletic goods); capital, $100,000. President, William T. Brown; treasurer, Horace Brown; director, J. W. Curtiss.

Moundsville, W. Va.—The Three Barrel Gun Company has been incorporated with a capital of $50,000, to manufacture guns and firearms. The incorporators are all local men, namely, M. N. Cecil, C. A. House, John B. Garden, C. W. Welty and D. O. Smith. The purpose of the company is to take over the Hollenbeck Gun Company, whose plant is now in operation in the Mound city. It is the intention of the new company to continue to manufacture the same products that are now being manufactured and the only changes that will be made will be in the policy of the company and the directorship. The plant is equipped with the finest machinery and is far more valuable than the amount of incorporation of the new company. The product that they manufacture is a three barreled gun, two shot and one ball.

New York, N. Y.—Post Manufacturing Company has been incorporated (tire protectors); capital, $50,000. Directors: T. W. Post, New York; T. L. Thomas, Germantown, Penn., and R. F. Murray, Plainfield, N. J.

New York, N. Y.—William F. Mayo Co. has been incorporated (rubber goods). Capital, $5,000, and directors: G. H. Mayo, W. H. Mayo, Boston; J. H. Kirkland, New York.

Owensboro, Ky.—Albert Guenther has opened a new bicycle store.

Changes.

Lawrence, Mass.—Berry Bros., bicycle dealers, have purchased the stock and good will of the Higgins Bicycle Company of 307 Common Street. Berry Bros. for the past eight years have been engaged in the bicycle business in this city. James D. Berry, Jr., manager for the firm, is one of the old long distance riders and is well known by all the riders and racing men of this city.

Lawrence, Mass.—L. J. Tepper has removed his bicycle business from his former location to 308 Common Street.

Seneca Falls, N. Y.—Elmer C. Davis, who conducts a bicycle repair shop in Fall Street, has purchased the vacant lot adjoining his present quarters on the East and will erect thereon a handsome building. This building will be three stories on the Water Street side and two on the Fall Street side, each story having a floor space of 32 by 42 feet. The lower floor, on Water Street, will be fitted up as a machine shop, being equipped with all the latest machinery for the repairs of bicycles and automobiles; the second or main floor is an automobile garage and salesroom for all kinds of sporting goods and supplies for automobiles and bicycles.

Embarrassments.

Rochester, N. Y.—Frank H. Smith, a wholesale dealer in gloves, bicycles and sporting goods, has filed a petition of voluntary bankruptcy. Liabilities, $3,170.73, and his assets are $1,207.28.

Miscellaneous.

In 1904 Belgium imported 5,417 bicycles, valued at $75,600, of which but 172 came from America, Germany supplying the lion's share—3,784. The year before this country sent into Belgium 107 machines to Germany's 2,678. The Belgium import of cycle parts and accessories in 1904 attained a value of $213,910, as against $181,720 the year previous. America's share was, respectively, $11,010 and $14,260—a shrinkage—while Germany's jumped from $72,000 to $104,000, and England's from $65,700 to $67,700.

Springfield, Mass.—At the recent annual meeting of the Standard Fishing Rod Company, the following officers were elected: President, Frank E. Stacy, of this city; vice-president, Joseph G. Hastings, of Warren; treasurer, John M. Newell, of this city; secretary, W. S. T. Fitz, of West Brookfield. The company is doing a much larger business than last year and is in an excellent condition financially.

Wilkes Barre, Pa.—The list of casualties every Fourth of July, due to explosion of toy cannons or severe powder burns which they cause, has inspired Professor William Stoddard Franklin, head of the Physics Department at Lehigh University, to invent a toy cannon, which, while it makes a report and a flash, will neither explode or burn and will shoot nothing more harmful than a cork. The harmless cannon is operated on the principle of the gas engine, an electric spark ignites the gas and air, causing a loud explosion, hurls the cork shell and emits a flame which is of such a low temperature that it does not even scorch tissue paper. Professor Franklin says also that the cost of 5,000 shots is not more than five cents.

MANUFACTURERS' RECORD.

(Continued.)

Changes.

Los Angeles, Cal.—The Union Hardware and Metal Co. will erect a new warehouse on First Street to be 233x316 feet. This building will be equipped with electric elevators and carriers, and an immense traveling crane for handling heavy material. The entire building will be occupied by the firm and will enable them to group their various departments, which at present are conducted in different localities. The business offices and sample rooms will be an important feature of the new building.

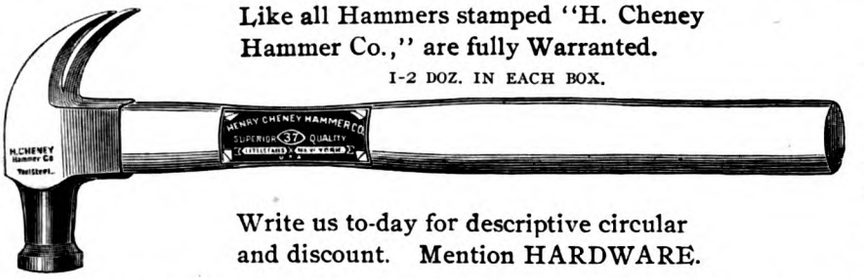
Mannington, W. Va.—The Mannington Forged Tool Co., which was organized last month with a capital stock of $25,000, has purchased the plant known as the New Eggendinger Tool Co.

New Castle, Pa.—A $75,000 bond issue has been authorized by the directors of the New Castle Forge and Bolt Co. to provide funds for enlarging the plant. The plant employs 300 men and this number will be increased to 450.

New York, N. Y.—The Prentiss Tool & Supply Co., of 115 Liberty Street, has just opened an additional branch, which will be located in Syracuse, N. Y. A suite of offices has been engaged at 535 University Block, and the branch will be in charge of L. H. Stone, who was connected with the Buffalo office of the company. The latter office will continue in charge of Mr. Crane.

Steubenville, Ohio.—A deal has been closed whereby the Jewett Stamping and Enamel Co., of Jewett, Ohio, becomes the property of a company composed exclusively of Bellaire capital, with William Landkrohn at the head. It is understood the new company will continue to operate the plant on the same basis as heretofore and will manufacture an exclusive line of enamelware.

Trenton, N. J.—The Standard Screw Co. has increased its capital stock from $1,500,000 to $4,500,000. Albert W. Gifford is president and George Thrall secretary of the company.



Worcester, Mass.—The Eddy Manufacturing Co., manufacturers of razors and razor strops, has leased two large rooms adjoining those already occupied by the company. As soon as new machinery and apparatus have been installed the company will have nearly double its present capacity.

Greenville, Ohio.—The Royal Stove and Range Co. has increased its capital stock from $50,000 to $100,000. John H. Morton is the president.

A Message from The President of the Pike Mfg. Co.

Pike, New Hampshire

to the Retail Merchant

Mr. Retail Merchant:

I have spent the greater part of the three score years of my life in developing the sharpening stone business, ever having in mind the need of our friends, the retail merchants. Pike's Assorted Oilstone and Scythestone Boxes are the development of an idea of my own. They are conveniently and attractively arranged, and the goods well displayed. They enable the dealer to have an assortment of guaranteed sharpening stones in compact form; to save time in making sales; to better be able to induce sales on sharpening stones; in fact it is not hard for the wide awake merchant to comprehend the many advantages of buying and offering for sale sharpening stones in these assortments.

Oilstone Box No. 1 19x13x10½" Weight 90 lbs.

Scythestone Box No. A 13½ x 11½ x 10¾" Weight 70 lbs.

Oilstone Box No. 1 contains 79 salable sharpening stones, which list at $34.20. Merchants' price is $20.00. Notice the display tray.

Scythestone Box No. A contains 80 salable scythestones, which list at $12.20. Merchants' price is $6.00.

These Assortments leave the merchant a handsome profit. May I ask you to give this matter your consideration.

E. B. Pike

P. S.--We guarantee the sale of these assortments.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

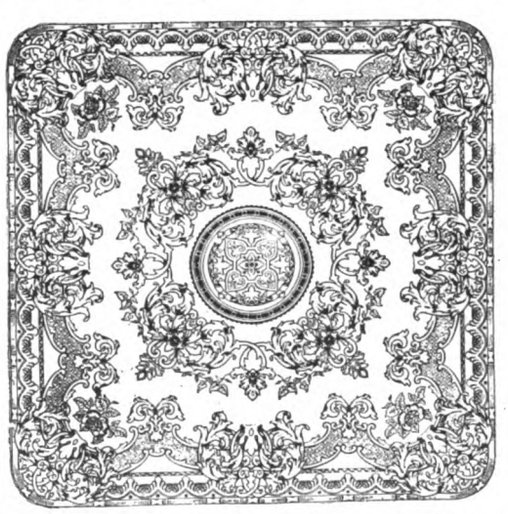
THE VITAL PART

of any razor strop is the quality of the leather fibre. If too coarse it will give the finest razor a saw edge and draw its temper—if too loose and open grained it will mat down to a glassy uneven surface that rounds the edge.



GIBFORD'S
RED—E—FOR USE
RAZOR STROPS

are made of the finest horse hide and calf skin for the sharpening and finishing strops and they must pass a rigid examination as to grain and strength of the leather fibre before they are sent to the factory where they are put through the patented process of treatment, which brings out that quality that gives the smooth, keen shaving edge to a razor.

Your razor counter isn't complete without RED-E-FOR USE razor strops. Try a sample dozen. Your jobber sells them.

"The Proof of the Pudding Is the Eating"

That's exactly the case with

L & G 800 Butcher Knives

They are made of special steel carefully hammered and finely tempered.

Every Blade Warranted

We've made them ever since 1837.

Sixty Eight Years On the Market

Our Butcher Knives, like the rest of our line of

Fine Table Cutlery

have "improved with age." There's nothing like them on the market. They can't be beat in quality nor price.

Get a copy of our catalog— Make up a sample order and we feel confident you will send us many duplicate orders.

Don't delay— Write to-day.

WHITE'S EDGE TOOLS

The feature that commends itself about White's Edge Tools is that they are, easy going—they never cumber the shelves of a hardwareman.

Nearly Three-quarters of a Century on the Market

is the reason for this. They sell well because they are well made and because in all that time they have improved with age.

If you are looking for perfection in Edge Tools, look at White's. A single sample order will furnish conclusive proof.

Send for it to-day and be convinced.

L. & I. J. WHITE CO.

Buffalo, N. Y., U. S. A.

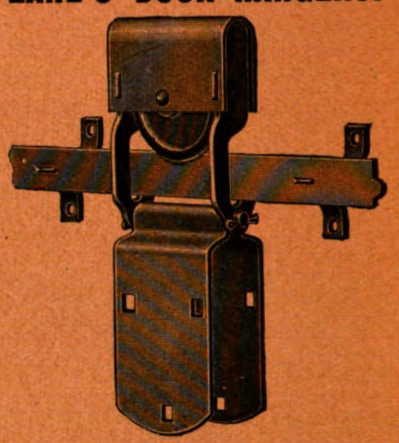
We Can't Help It.

Just think, we have devoted over seventeen years of our life *studying, testing, and trying to improve Gasoline Fire Pots.* This work has become second nature to us and we think we ought to know a lot about them.



No. 5 Fire Pot. $4.50 Net

Next to the No. 1 *the No. 5 is the best Fire Pot on earth.* Yes, it costs a trifle more than some but it is so much better that *a single day's use will save you its added cost.*

Our catalog is free and it describes the many advantages possessed by it. Jobbers sell at factory price. "Your money back if you are not pleased."

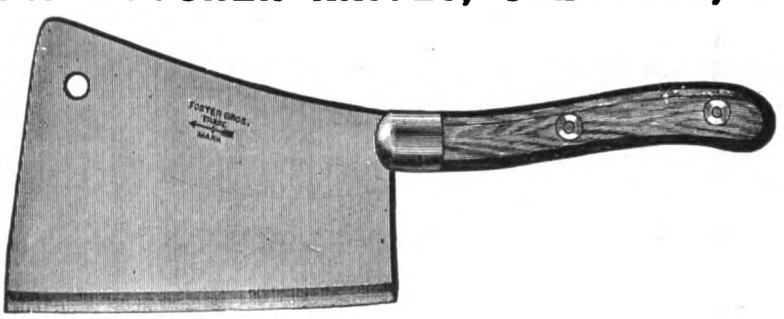
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

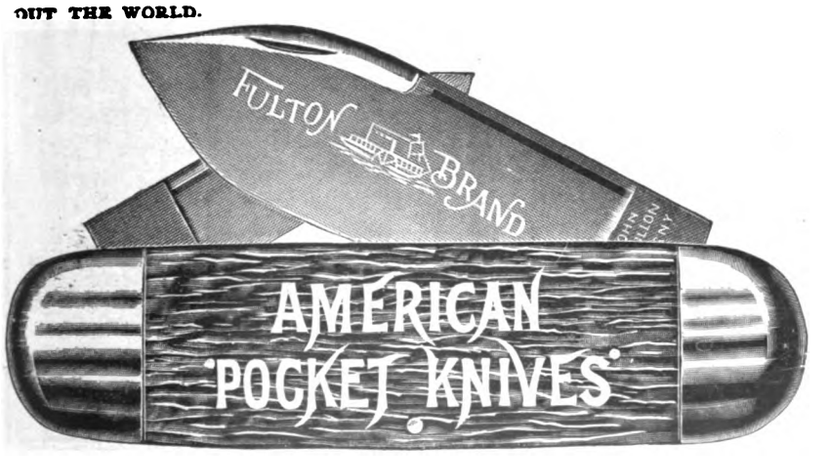


has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York, U.S.A.

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

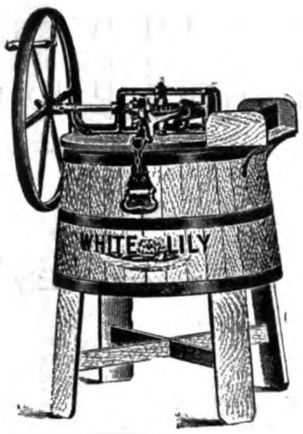
FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.



These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.



Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

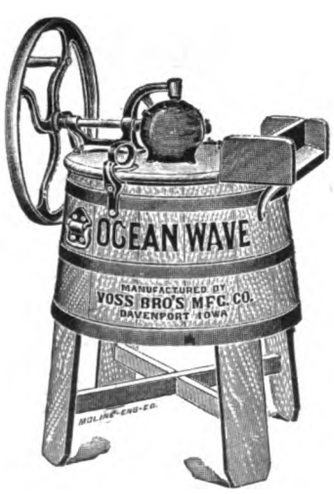
ALFRED FIELD & CO., 93 Chambers St., New York

If you're looking for a Washing Machine that is made for long, satisfactory service,—that has strong "talking points,"—and that can be sold at a fair price,—you should by all means, investigate

O. K. Washing Machines

They're made to please. There's nothing weak about the O. K.,—no springs to repair,—no cheap pins to rot or warp, no complicated gearing to break and cause annoyance.

O. K. Washing Machines are easy running, durable, reasonably priced, steam tight,—and there's a profit in them for the dealer.



Write for our booklet and prices.

Break Away from Competition

Give your customers something new—an article that has advantages over other goods—something to make them talk and buy

STERLING
STEEL CARPET
SWEEPERS

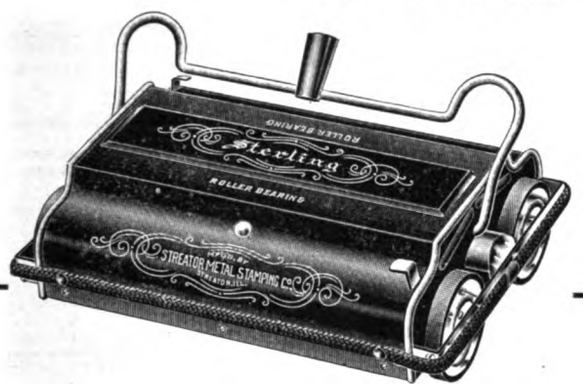
are distinctly new and novel, and are full of convincing, logical talking points, features that sell them on sight. They are easier to operate and last longer than any other sweeper made.

No clumsy wooden cases to warp and split, no sagging, carpet-digging dustpans, no cracks and openings to collect dust and dirt.

Made of the finest cold drawn steel, cases and pans are perfectly rigid. Dustpans dump full and clear. The Anti-Raveler prevents thread, hair, etc., from winding around the bearings.

These are but few of the exclusive features of Sterling Sweepers.

Will it pay you to sell them?



Ask any woman who uses an old-style sweeper.

Get Ready For Fly-Time!

It is THE time when both the Farmer and his dairy do a lot of unnecessary "kicking"—the Farmer kicks because his cows kick—dirt into the milk while being milked, toss their heads, switch their tails—until the milk is positively unfit for use. Worse than that—it decreases 25 per cent. in quantity.

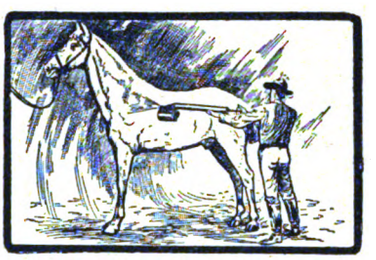
The cows kick—and rightly so—because they are bothered, beyond endurance, by swarms of flies, ticks, gnats or other insects, just because they are not sprayed with

"No-Flies-Here"

(Trade Mark)

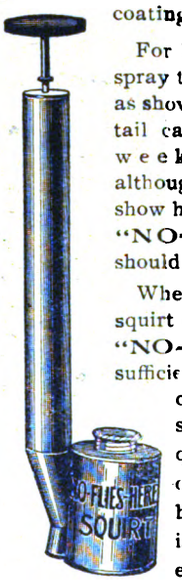
The only real Fly-Repeller and Insecticide ever introduced.

THINK OF IT!



A single application will last for a week. It will *positively keep away all flies, ticks, gnats or other insects* from cattle, horses dogs, poultry, etc., even in localities where these pests abound.

It gives the cows a chance to feed in peace. They give more and better milk, too.



Writes a Jersey Dairyman: **"Without the use of this perfect insecticide,** I would prefer not to own cows at all rather than see the dumb animals suffer during fly time, **but, with the use of "NO-FLIES-HERE"** it is not only a pleasure to enjoy the sight of them, but a great source of comfort, as well as profit, to the entire household."

It is healing and soothing, giving immediate and lasting relief without danger of injury to the stock.

There is nothing harmful or deleterious in it.

"An Ounce of Prevention."

"NO-FLIES-HERE" can be applied with a brush, sponge or piece of cloth, but it is easier, quicker, and more economical to use the **SQUIRT CAN OR SPRAY** here illustrated. This gives a thin uniform coating and obviates all waste.

For horses and cows simply spray the liquid on the animal, as shown, especially where the tail cannot reach. Twice a week is usually sufficient, although a little practice will show how much and how often "NO-FLIES-HERE" should be used.

When applied with a squirt can, one gallon of "NO-FLIES-HERE" is sufficient for five head of horses or cattle for an entire season. The same quantity is sufficient for one application to 400 head. *"NO-FLIES-HERE"* is so inexpensive that everybody can afford to use it.

Now is the time to lay in a stock of

"No-Flies-Here"

before fly time. It is a profitable article for enterprising dealers to push. Gallon can of "NO-FLIES-HERE" and Squirt Can (as illustrated) sent on receipt of $2.50.

SEND FOR INTERESTING BOOKLET OF DETAILS.

We supply this booklet in liberal quantities to jobbers with their names printed thereon.

Manufactured only by The Preservaline Mfg. Co.

The **"JUMPER"** is a disappearing kitchen closet and refrigerator. It can be placed in any kitchen, no matter how small it may be. The "Jumper" is made complete and ready to use—all that is required is a carpenter for a few hours to cut a hole in the floor and hang the waiter in. No extra casing as used with all other kinds of dumbwaiters. It is top level with the floor when not in use and you can walk over it.

The "Jumper" is made in two sizes—8 shelves each size, and is made especially for the Hardware Dealer who wants to carry a dumbwaiter in stock ready to deliver to his customer, avoiding the bother of taking measurements and then not knowing whether it will fit, as is often the case with others.

The "Jumper" is—a Necessity—a Labor-Saver—is strong and durable and, last but not least, is Inexpensive and easily operated.

Also Columbia Safety Dumbwaiters

Hand and Power Elevators, Side-walk Lifts

Chain Blocks, Overhead Tramway-Trolleys

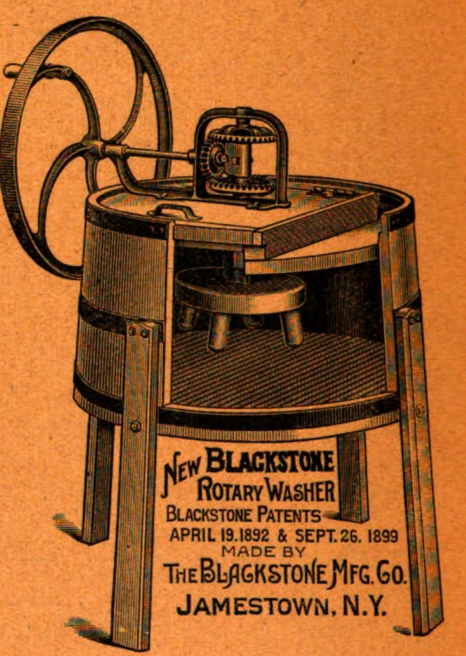
Blackstone Rotary Washers

We've been in the washing machine business 32 years. We've "improved with age." Our down-to-date methods have produced up-to-date washers. Our

Improved Pan American
New Blackstone Rotary
Imperial Rotary Washer

leave nothing to be desired in construction, finish and durability. They run easiest because they have no weak spots—no poor features, flaws or faults.

Our Improved Pan American



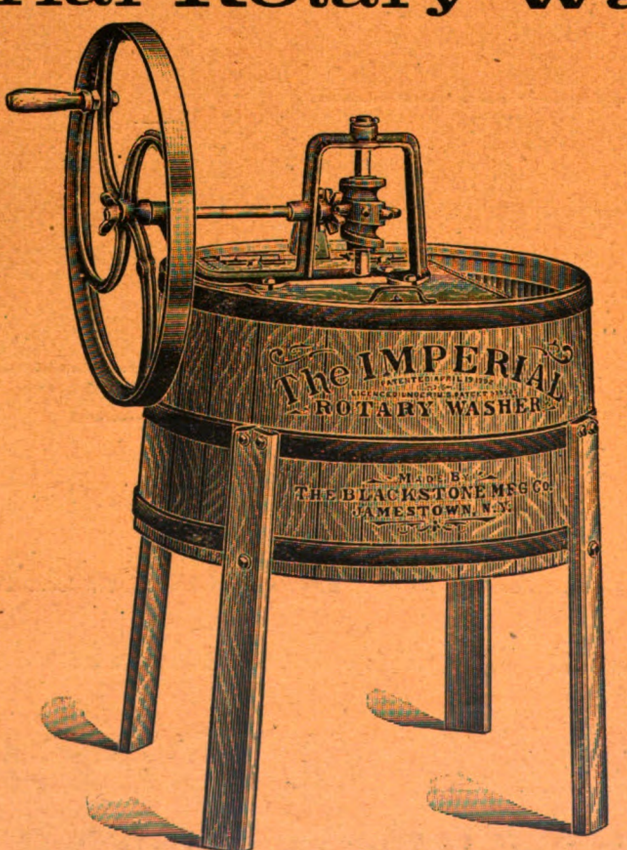
is the most popular Lever Machine on the market. Has the Blackstone Improved Bottom, four legs instead of three.

Easy selling, same as the

New Blackstone Rotary

It has made a hit because of its saving qualities: in labor, clothes, time.

A 12 in. wringer can be fitted to either of them.



Imperial Rotary Washer

Our latest product. Has sliding cylinder on square post, insuring greatest strength of any Rotary Gearing and roller bearings and spring cushion for cylinder, making it

Noiseless
Speedy
Substantial

Closes tightly. Handsomely finished. All castings finished in Gold and Aluminum Bronze.

Hardware men will search long to find as good a machine as our Imperial Rotary, as a seller. With its many improvements it is

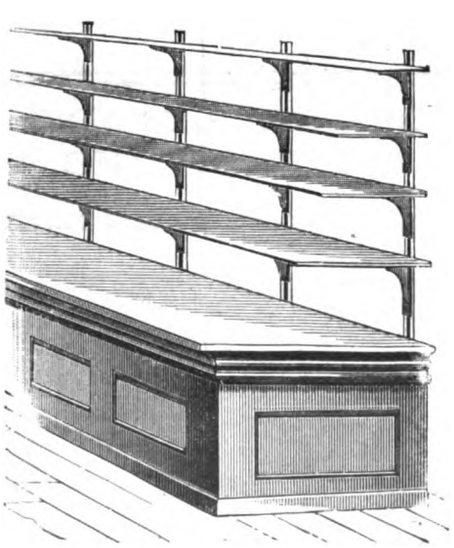
DO YOU NEED MORE SHELF ROOM?

You can get it without increasing the size of your store by installing

BAINES'

ADJUSTABLE SHELF BRACKETS



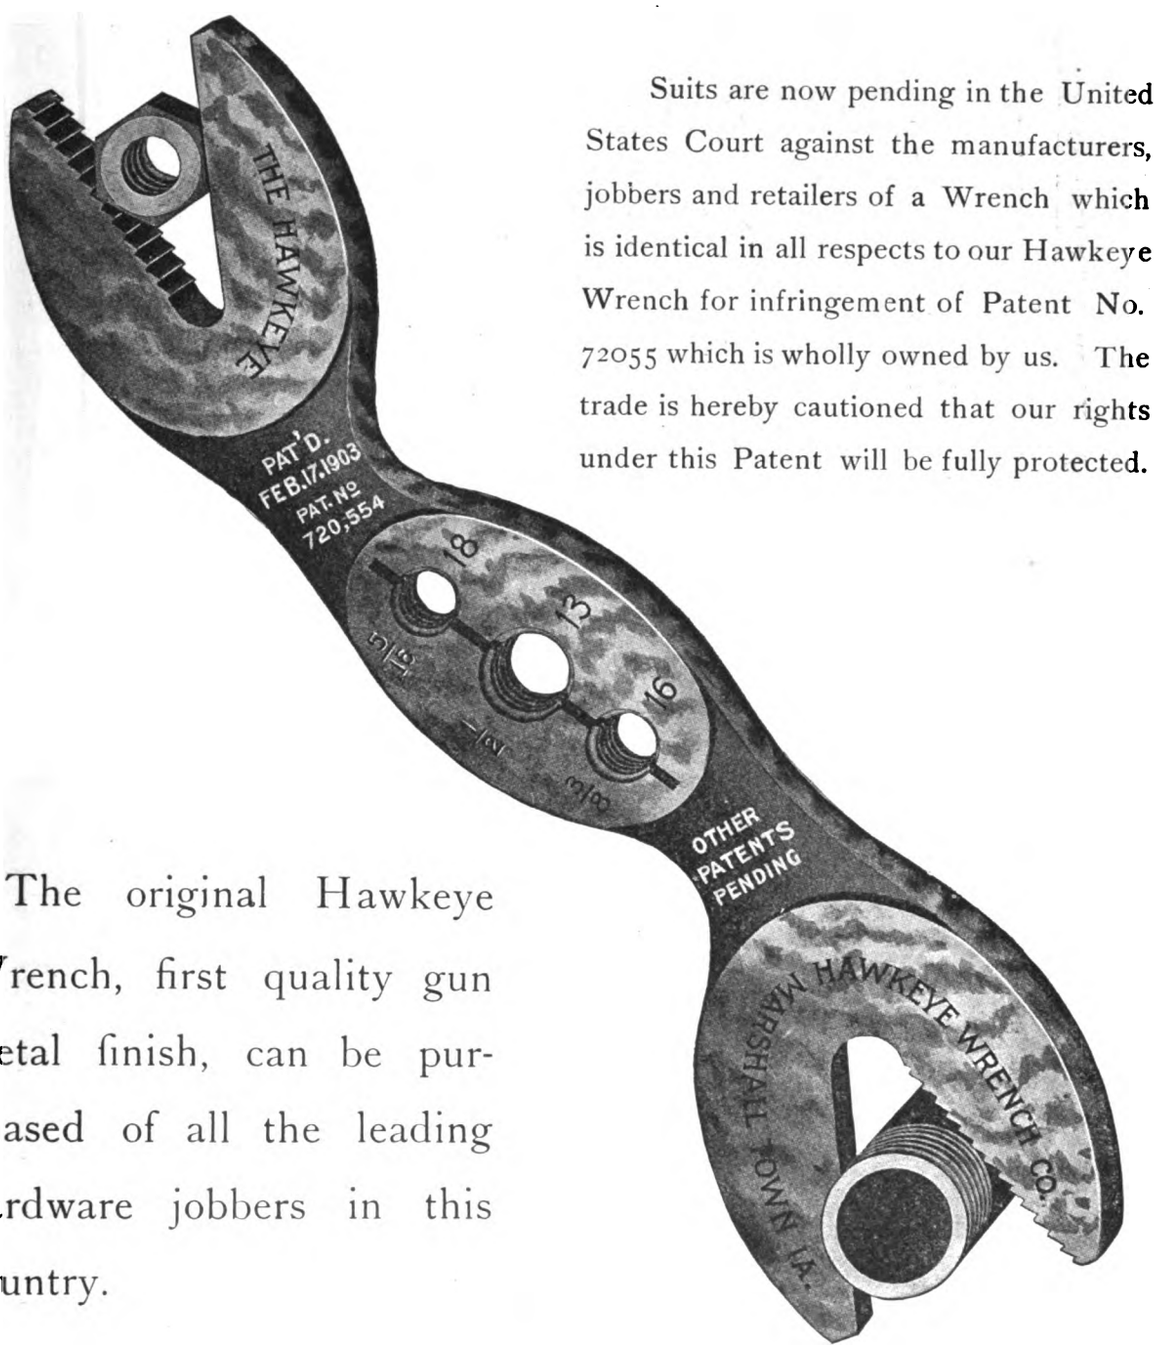
The illustrations on this page show how the use of these brackets increase shelf space by giving an absolutely clear shelf from end to end. There are no uprights or braces of any kind to get in your way and to take up space. The cuts at the upper part of this page show the construction of the brackets and the ease with which they are attached to the wall.

Will Hold any Weight that Can be Placed upon them

That's a strong statement but its truth can be demonstrated easily.

We Make Fixed Brackets

also, for stores and dwellings. They're easy sellers. Practically tell their own story, especially if you are using them on your own shelves.



Our catalogue "H" especially for Hardwaremen tells how to estimate the number of brackets required, and still more facts concerning the advantages of using them. Ask for it.

FIRST IMPRESSIONS ARE LASTING ONES

Patent Vrooman Sanitary Sink Strainers

are in such universal use that nearly every girl is familiar with their merits, and when she, too, becomes a housewife her first thought of kitchen cleanliness will be a Vrooman Sink Strainer.

The simple construction of Vrooman Strainers gives them great durability, makes them easy to clean and allows them greater capacity than any other strainer.

The habit grows on the housekeeper. After once using a Vrooman Strainer she will be satisfied with no other. Better cater to that habit--it means dollars to you.

Women Demand It. All Jobbers Handle It. You Ought to Sell It.

The Nome Refrigerator

GERM PROOF

A Refrigerator that's Different Because it's Better

NOTE SOME OF THE PATENTED IMPROVEMENTS

Revolving Metal Shelves, which can be raised or lowered as desired. Any article can be brought to the front without the inconvenience of upsetting others.

All interior construction, shelves, linings, etc., can be removed and cleaned quickly, as the parts are not complicated. There are no square corners or crevices to harbor germs, so can be kept as clean and sweet as the food itself.

The dead air chamber used in the walls is absolutely perfect in its construction and in the degree of coldness produced. It has been tested under all conditions, and proved that the Nome Refrigerator will save from 30 to 40 per cent of ice in cooling an equal number of cubic inches.

The body is round—a novelty in itself, but the object in being of that shape: It will hold more provisions than any square refrigerator, as dishes used are either round or oval, and in consequence there is no lost room.

CLEANLINESS, AIR CIRCULATION, ICE-SAVING QUALITIES, COMBINED WITH BEAUTY OF APPEARANCE, ARE THE STRONG POINTS TO WHICH WE ASK THE EARNEST CONSIDERATION OF THE TRADE—WE SOLICIT CORRESPONDENCE

HARDWARE

The Dunlop Coffee Pot will hereafter be made by Landers, Frary & Clark, New Britain, Conn., they having purchased the business of the Dunlop Percolator Company, Chicago, whose machinery they intend moving to New Britain.

The new trade-mark law of the United States Patent Office during the first ten days or so that it was in effect brought a registration of nearly 2,500, or an average of more than 200 per day. The law permits registration if the trade-mark has been in use ten years.

Savage Arms Co., Utica, N. Y., are sending to the trade a watch fob, consisting of a medal in old copper, picturing a wild savage in paint and feathers, evidently on the warpath, to which is attached a leather strap to hold it. These fobs are sent to all applicants who remit fifteen cents in stamps as long as they last.

A charter was issued yesterday for the Forsythe Hardware Co., of Winton-Salem, N. C., capital, $125,000 authorized, and $18,000 subscribed, to do a general wholesale Hardware and foundry machine shop business. The incorporators are: E. C. Jones, A. C. Miller and W. F. Miller.

We were in error in our recent issue in ascribing the manufacture of the Johnston Pipe Wrench to the Barnes Tool Company, New Haven, Conn. It is one of the leading specialties they handle, but they do not control the sale of it; as it is an article that has the confidence of the trade, we correct our error without delay.

T. C. Richards Hardware Company, Winsted, Conn., manufacturers of fancy metal goods, had their factory damaged by fire on May 22. The roof and upper floor of the building, which was 40 by 200 feet, were consumed and the whole building flooded by water, which destroyed all of the company's merchandise and damaged the tools and machinery badly. The company makes the announcement that some time will pass before it will be in condition to ship goods again, but repairs will go forward at once, and everything urged to an early completion.

The quarterly meeting of the Retail Hardware Dealers' Mutual Fire Insurance Company of Minnesota was held May 25 in Minneapolis. The annual election of officers took place which resulted in the entire old staff being re-elected. M. S. Mathews, the secretary, presented a financial report, showing though the losses of the company were heavier than usual, yet on account of the low ratio of expenses, the company had been able to return 35 per cent. of the premiums paid to policy holders, and increasing both their assets and net surplus.

EAST ASIAN MERCANTILE COMPANY.

The East Asian Mercantile Company has recently been organized and incorporated under the laws of the State of New York for the purpose of conducting an export and import business with Siam and other far Eastern countries. The officers of the company are: Frank J. Oliver, president; M. A. Cheek, vice-president, and Thomas E. Oliver, secretary and treasurer. Associated with these officials are: Herbert C. Cheek and James H. Oliver, directors. The Messrs. Oliver are of the firm of Oliver Brothers, 127 Duane Street, New York, and are prominently known from their connection with Hardware interests in this city. The New York office, 127 Duane Street, is in charge of George H. Diehl, Jr., and Walter C. Knole.

CATALOGUES WANTED

For Bohemia.

Exporters and importers would greatly oblige our Consul at Prague, capital of the Kingdom of Bohemia, by addressing to his Consulate their latest catalogue, together with the following commercial information: Name of firm; street, city and cable address; codes used; export discounts and terms; languages of correspondence; references or commercial rating; nature of exports and imports; list of foreign branches and agents; supplementing this with complete information permitting immediate sales—thus getting rid of irritating epistolary angling. This will be filed gratis under the heads of "firms" and "merchandises" in the Commercial Intelligence Department of the Consulate of Prague, by the card and catalogue system devised by our Consul at this post. The Kingdom of Bohemia has a population of over 6,000,000, and that, in the very heart of Europe, and is practically virgin territory for American exporters.

CHINESE GOVERNMENT GRANTS FIRST PATENT.

The Chinese Government, according to an official report to the State Department, has granted its first patent. It is for an electric lamp, the inventor being an inhabitant of Nankin, the old capital of the Chinese Empire. The comment is made that the fact that China has entered upon the granting of letters patent is undoubtedly of more importance than the particular invention.

STEVENS ACCURACY JUSTIFIED.

The chain of Stevens victories is ever lengthening as the latest link will testify. At the May Festival and Golden Jubilee of the German Rifle Club, Charleston, S. C., May 8th to 13th, 1905, the first two prizes in every event (all comers, open events), were won by the Stevens. F. C. Ross, shooting a Stevens rifle, obtained first prize on Charleston target; second prize on German ring target; second prize on American Standard target, and second prize on Point target. H. M. Pope, shooting a Stevens-Pope rifle, secured first prize on German ring target; first prize on American Standard target and second prize on Charleston target. August A. Efelberthe obtained first prize on Point target and was equipped with a Stevens. Record target shots are the inevitable result if a crack marksman shoots with a Stevens or Stevens-Pope rifle. Stevens sweeping National and International victories are an "old, old story," but new chapters are constantly being added to it.

MICHIGAN RETAIL HARDWARE DEALERS' ASSOCIATION.

The annual convention of the Michigan Retail Hardware Dealers' Association will be held at Saginaw on August 9th, 10th and 11th. As the most complete and elaborate preparations are being made for a perfect convention in all its interesting details, the officers believe it will surpass in interest and attendance any previous convention of the Hardwaremen of this State. Any information in regard to details of the meeting may be obtained by addressing A. J. Scott, Secretary, Marine City.

TO RETAIL DEALERS.

Co-operation is Requested in Regard to Catalogue Business.

The National Cutlery Company, of Detroit, Mich., are manufacturing a full line of warranted axes, hatchets and tools, razors, butcher knives, etc., under the trademark "S & S," making a specialty of their butcher knives, which have been given the support and hearty recommendation of all of the largest packing houses and butchering plants in the country. Their entire product contains exceptional quality, by reason of the original quality of the steel, their special process of tempering same and the careful handling and testing which it receives during the entire course of its manufacture. Only the most skilled workmen are employed by them, and the entire line is strictly hand forged, and their factory is completely equipped with the most up-to-date efficient machinery to complete the manufacture of the product. They offer this line to the retail trade direct and although their salesmen cover the country very thoroughly, they find it impossible to reach anything like the entire retail trade. They have, therefore, published a very complete and comprehensive catalogue which will be found of real value, and upon receipt of request, this catalogue will be promptly mailed to any address, and a salesman will call upon any interested dealer with samples of the entire line, and while in town will do whatever missionary work is possible to establish a permanent market for the goods, if they are not already known. They are, of course, unable to cover the territory as frequently as do jobbing or commission salesmen, but with the aid of the catalogue, and salesmen, they are able to take equally as good care of their trade. The National Cutlery Company therefore requests the co-operation of the retail dealers in this regard and in consideration of this co-operation will supply them from the factory without a jobber's profit and at the lowest price at which goods of this quality can be produced with a line of cutlery and tools that will secure for them the business of that locality.

JUNE 10, 1905.

Editorial Trade Review

In trade channels there appears to be every feeling of confidence that the volume of business will reach the majestic figures proclaimed for it earlier in the season, and yet in some sections there is not as much snap to the purchasing of products as the promised vigor for Fall trade would lead one to suppose. There is a hesitation among the jobbers about giving those confident and aggressive orders that would stock up complete, which is taken as an indication that no strength is felt in the buying at present prices. This does not apply to large lots of goods bought previous to advancing quotations, or ordered in the late Fall or the early Spring, and which facilitated Spring trade when it was most active, and provided conditions of prosperity on which a good business was prognosticated.

There is less buying for Fall trade at present quotations, that are giving evidence of having felt the necessity for an upward trend. In the early stages of the present year, with the warehouses full of goods bought at concessions from ruling prices, the jobbers were loud in proclaiming goods were too cheap and surely ought to be advanced, while they disposed of their purchases, hoping for the changes that would make their patrons eager to buy; but when as now the purchases are needed for Fall trade they are not so confident, and when advanced prices are facing them they buy freely for immediate wants only. They do not feel that actual reduction in prices is necessary, but they are apprehensive that a lower market may follow, when the cautious buyer will worry over the loss of possible profits.

The increased facilities which are every day given to the many factory plants, enabling them more generally to keep abreast of orders, surely create surplus stocks in the absence of orders to carry them off; and to heap up goods and wait for orders as a general thing is something of a new experience, unless it is for staple goods, about the demand for which there is but little doubt. The manufacturers will have to face this fact, when regular orders do not absorb their daily production they must carry them in stock, and not get the fear that "the other fellow" is carrying off all the orders.

The trade do not want a market that makes leading goods look too high in price. Radical changes of any kind only have a tendency to unsettle trade and cause a cutting of regular quotations. While moderate fluctuations are expected, and quotations that are reasonable are easily handled if any changes are deemed essential, the slightly reduced prices in some of the raw material scarcely justifies a scarehead prominence in the present market prices of Hardware. While a wide distribution of goods is going on, it cannot in any event affect trade greatly.

Activity in all lines of Hardware is reported, with no cut prices of any importance to interfere. The volume of sales in Hardware and analogous goods for this Spring will be found of generous proportions, and where comparisons are made with previous seasons results will be in harmony with the prophecies that were given with so great a degree of confidence at the outset, as to produce the present optimism.

The conventions of the Southern Hardware Jobbers' Association and the American Hardware Manufacturers' Association, which were concluded yesterday at the Virginia Hot Springs, may be relied upon to furnish subjects for thoughtful consideration for some time to come. The Transportation problems that will have to be wrestled with, and the many-sided difficulties which confront them on this account will furnish work which can safely be left to the discretion of the committee having them in charge, who will be zealous in the prosecution of every branch of the subject.

The "Special Brand" business, which opened up wider differences of opinion regarding its merits and demerits, will not be settled so easily, touching, as it does, upon the Jobbers' profits, which the abolition of special brands will have a tendency to reduce; and the gain or loss of the manufacturer's prestige, which results from the sale of his specialties under his own name and trade-marks, and the permanent holding of his large trade in them, backed up, as it is, by judicious exploiting of their merits at a large expenditure of money.

Questions like these, so vital in importance to both interests, need the most thorough treatment at the hands of the contending forces in order that permanency of action may be evolved; that the lines of goods readily susceptible to such treatment may be abolished entirely to the Manufacturer's great delight, bringing freedom from so many irksome conditions, or at least concentrated on fewer lines.

THE MANTLE OF CHEER.

Did you ever consider the commercial value of a cheerful face when things are not all cheerful? Of course, it's always valuable, but our business needs our help the most when at the ebb tide; at other times it can, if necessary, supply its own smile.

No one is really master of his field until he masters himself. That is the very first step in all kinds of conquests. But neither is any one master of himself who allows every little, or even big, discouragement to hang its threatening headline out to repel the world. Nothing attracts like success itself, and nothing repels it more than evidence of its absence. Most of us have seen people who fairly give one the dyspepsia just by the way they rub their own stomachs, and the business man who allows the commercial cloud to settle upon the most conspicuous part of his countenance is making fine progress toward business dyspepsia.

Aside from the matter of keeping up appearances, everything moves along so much more readily and keeps us brighter if we wear our business mantle hopeful side out and stick a few cheery smiles into it by way of ornament.

THE MAN ON THE JOB.

One Hardware dealer in a town of moderate size takes the following somewhat unique method to get in touch with the various special lines his business makes it necessary for him to handle, and secure an occasional good advertising suggestion with very little trouble. Each employee at the time he is hired is required to file a paper stating what he has worked at in his past life and what the line of business into which his place of birth first brought him. These files are frequently consulted and when some special line of advertising is to be prepared the assistance of these clerks is called for. For instance, when the copy is being made up for the sale of plows or some other line of agricultural machinery, all clerks who have been reared on a farm are called upon to give in a list of the chief difficulties which beset the farmer in the use of the plow; its usual defects; the points where, under special conditions, it seems to fall short of satisfactory service. If the subject is builders' Hardware the carpenter's son is at a premium; for drillers' tools, a clerk who has some personal knowledge of practical well-drilling is a bonanza. The idea is to get the advertising written from the standpoint of the consumer, one of the difficult things for the manufacturer or dealer to do. It takes the man who has been on the job himself to know just what his successors want and what they frequently find; and no one else is on the job of plows quite so well as the fellow who has stood between the handles "when the wind was strong."

PERSONAL INTEREST.

Let the merchant or employer who would like to receive personal service in his business from his employees try this method of an eastern Ohio Hardware dealer to enlist their personal interest:

In each pay envelope is enclosed a printed circular like the following:

THREE QUESTIONS.

1ST. Can you offer any suggestion whereby you think the management of this store can be made more serviceable to the public?

2D. Can you offer any suggestion as to how it could be made more agreeable to the employees?

3D. Have you any personal trouble you would like to lay before Mr. (the proprietor) in strict confidence, for advice or possible assistance?

A prize for ideas has occasionally been used by merchants and others to secure the interest of their employees to the first two items, but the last of the three questions has in this case proven more effectual than prizes, for it has not only established a confidential relationship between the two ends of the business, but has also created a feeling of genuine affection for the employer who is so far interested in the well-being of his helpers. In a number of instances advice has been sought and conscientiously given, and in a very few a more substantial form of temporary assistance has been extended, in cases of sickness or unusual misfortune. Always the respondents to the third question have been welcomed as cordially as those to the first two.

Another advantage in this system is that it keeps the employer more in touch with the outside life of his employee. It is a well-known fact that the service of any man is more or less affected by his personal interests, and any person's private troubles are a pretty sure index to his self-sought environments, be they social or financial in their nature. More than one embryo speculator has been cautioned both to his own benefit and that of his employer, while social difficulties give the shrewd man a pretty good idea of the sort of company the applicant is keeping.

One who has never seen it tried will be surprised how often a timely word of advice will be the making of a most valuable employee. The less reliable sort seldom ask it unless their difficulty is very pressing, but the conscientious young man or woman who is honestly trying to succeed and to contribute to the employer's success would frequently give much for a few words of honest counsel from some successful business man in which they have confidence. Many of them are making their own way, have no one to counsel, and make their first false steps entirely through want of foresight. A helpful word from their employer not only is the making of their lives, but also secures for him from them a genuine regard that will be shown in all their future service. Even the invitation, if it never be accepted, excites the quick sympathy of fellowship and renders that establishment impervious to the encroachments of the walking delegate.

NEW METHOD OF EXTRACTING ROSIN.

W. M. Gill, of Selma, Ala., has patented a method for extracting rosin from pine without injury to the timber, at the same time producing a superior quality of rosin. Samples of the product have been examined by the Standard Oil Company, and it is stated that a contract will be closed whereby Mr. Gill will furnish that company from 50,000 to 100,000 barrels of rosin annually. A requisite number of stills will be installed to supply the demand.

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Will—Wife's Rights Under It.

QUESTION: C died leaving a wife (his second) and several adult children by his first wife (dead.) His will provided for all the children leaving remainder to wife. In event of property left to wife, not being worth $300, can wife hold all or part of property bequeathed to children? C resided in Pennsylvania—had no real estate.

REPLY: The wife's rights would be dependent upon the terms of the will, and unless it was provided that the gifts to the children should take effect only in event of the wife's remainder exceeding $300 in value, or unless there was some similar provision for the wife's protection, she would have no right to retain possession of any of the property bequeathed to the children.

Broker—When Commissions Earned.

QUESTION: If A employs B to sell a piece of property for him and B finds a purchaser, but A refuses to make the sale, has B any claim for commissions against his employer?

REPLY: The duty of a broker employed to sell property is to bring the buyer and seller together. To entitle him to commissions he must produce a purchaser ready and willing and able to enter into a contract on the employer's terms. When this is done his work is complete and his commissions earned. The failure of his principal to complete the bargain does not affect the agent's right to compensation.

Surviving Partner—Rights and Duties.

QUESTION: Two men were engaged in business as partners and one of them died leaving no will. His interest in the business cannot be ascertained until the accounts are collected and the books closed. Who has the right to the possession of the partnership property, the surviving partner or the administrator of the decedent?

REPLY: The surviving partner is entitled to the possession and control of the assets of the partnership and can sell, mortgage or dispose of the same to pay debts and close up the business. He holds the legal title subject to the administrator's equitable right to an accounting and to the due application of the assets to the payment of the partnership debts. His duty is to wind up the business, pay the debts and account to the administrator for the amount of the interest of the deceased in the business.

Execution of a Will—Requisites.

QUESTION: What are the requirements of a will in order that it may be valid to pass real and personal property in any State?

REPLY: The requirements in each State differ materially and it is necessary to consult the statutes in each locality to ascertain their precise requirements. But we believe that a will executed in the following manner would comply with the laws of any State or territory: It should be subscribed and sealed at the end by the testator in the presence of three witnesses, who should be over twenty-one years of age. His signature should be attested by these three witnesses, who should sign their names and addresses to the will in the presence of the testator and in the presence of each other. At or before such signature the testator should declare the document to be his last will and testament and request the witnesses to sign their names thereto. A brief attestation clause should be added reciting compliance with the foregoing requirements and this attestation should also be signed by the witnesses. The attestation clause, however, is not essential to the validity of the will.

Law in New York State in Relation to Veterinary Medicine.

QUESTION: I would like to ask, has any one a right to manufacture and sell veterinary medicines, such as colic cure, condition powder and liniments? Kindly inform me what the law is, and what I will have to do to start in business.

REPLY: The public health law of the State of New York forbids the practice of veterinary medicines or surgery without obtaining a license and without registration in the county under penalty of $50 for every day of such unlawful practice. The same rule also provides that the sale of drugs, medicines and poisons must be by licensed pharmacists under similar penalties, but the latter provision does not apply to the manufacture or sale of proprietary medicines. We know of no law expressly requiring a license for the manufacture and sale of veterinary medicines, except the foregoing, and suggest that for full information regarding compliance therewith, you communicate with the Secretary of the State Board of Veterinary Medicine Examiners, 195 Western Avenue, Albany, N. Y.

POPULAR TALKS ON LAW.

Copyrighted by William C. Sprague, President The Sprague Correspondence School of Law.

SELF-DEFENCE.

It is a matter of importance that one know how far he may go in using force against force in the defence of himself, his family and his property. The right of self-defence will occur to us as being a natural right. One could scarcely be expected when attacked, either in person or in property, to say "I will wait for the law to punish the aggressor," for the one attacked has no means of knowing how far the attacking party may go in the use of violence, as he even may go to the extent of taking life.

Then, too, the law recognizes a weakness in human nature—or shall we call it strength, rather, that impels one when attacked to defend himself by the use of force. Self-preservation is truly the first law of nature.

The law of self-defence is an old one, recognized from the beginning. It extends not only to one's own person, but to one's own family and possessions. The old law speaks of a man's home as his "castle" and gave him the right to defend it, even to the extent of taking life; with certain limitations, which we will learn, that right still exists.

Of course, there must be a limitation put upon the right of self-defence or it will be abused, and men, under cover of the excuse that they were put to an act of violence by necessity, will cover up acts which are unjustifiable and hence punishable. The law, broadly speaking, limits the right to cases where necessity exists, and it will only excuse a man when he uses that violence which under the circumstances would appeal to a reasonable man as necessary for his self-protection. Nor will a court compel him to exercise the best of judgment at the time, for it recognizes that when the occasion for self-defence presents itself, the mind of the one attacked is more or less disturbed and the even balance of his judgment shaken; but where the means taken to defend one's self are manifestly more than necessary, as where one slapped in the face draws a revolver and kills, the act will be considered unjustifiable and the perpetrator of it held to account; but if the person attacked has reasonable grounds for fearing that killing or a felony is being attempted by the attacking party, the defence may go to the extent of taking life. It is well decided that where one is merely struck with the fist and has no reasonable grounds for believing that he is in danger of being killed or of a felony being committed, his use of a gun, or a knife, or deadly weapon is unjustifiable.

The fact that the person defending himself was mistaken as to the intentions of his assailant does not affect his right to take life if there appeared to him at the time reasonable grounds to believe that unless he did so he would be killed or a felony would be perpetrated against him. It has been held that the mere fact that the assailant put his hand in his pocket was not sufficient to justify the taking of the assailant's life on the ground that the assailant was believed to be reaching for a weapon.

Suppose that the person called upon to defend himself had been himself the provoker of the quarrel or the immediate cause of the attack, would his subsequent use of violent means in self-defence be justified under the rules laid down? The question has arisen in many cases and has usually been decided in the negative. The person himself must be free from fault in order to justify himself for killing another.

The cases go to the extent of saying that any one who brings on or provokes a personal encounter cannot rely upon the plea of self-defence. We can quickly see that if the law were permitted to be otherwise one desiring to kill another would only have to provoke that other sufficiently to cause him to use violence in order to take his life and escape the consequences. The main question as to whether or not the force used could have reasonably been deemed necessary is a question to be left to the determination of the jury in all cases.

It is also of interest to ask whether a man attacked is bound to retreat. It is quite well decided that when a man is attacked with a dangerous weapon he must retreat as far as he can safely do so before using like means in defending himself; but where the one attacked has reasonable grounds for believing that he cannot safely retreat he is justified in using violence in self-defence. The right of self-defence goes to the extent of excusing a man for resisting arrest by violence where the attempted arrest is unlawful.

How far one may go in the defence of his property, or possessions, is reserved for treatment in a subsequent article.

(To be Continued.)

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED MAY 22, 1905.

383,093. Cork Extractor. H. J. Boggis, Cleveland, Ohio.
383,119. House Warming Apparatus and Stove. J. Fries, Reading, Pa.
383,155. Window Screen. H. Speer, Chelsea, Mich.
383,173. Ash Sifter. J. E. Crosby, Westfield, N. J.
383,234. Bench Plane. T. H. M. Millsap, Harper, Kan.
383,243. Step Ladder and Bench Combined. J. W. Peacock, Cleveland, Ohio.
383,312. Ash Sifter. M. Lynch, Chicago, Ill.
383,319. Sad Iron. T. H. Patterson, East Saginaw, Mich.
383,334. Wrench. J. D. Abbott, Reading, Pa.

PATENTS ISSUED MAY 23, 1905.

790,360. Mangle. C. T. Gilmore, Sault Ste. Marie, Mich.
790,411. Combined Pan and Stove-Lid Lifter. E. L. Watrous, Des Moines, Iowa.
790,477. Tool Handle. C. E. Borner, Chemnitz, Germany.
790,500. Pliers. J. D. Harper, New York, N. Y.
790,533. Adjustable Plane Handle. F. A. Shontz, Eureka, Utah.
790,590. Tool Handle. W. R. Reynolds and J. R. Gordon. Brooklyn, N. Y.
790,668. Wrench. H. J. Wilson, South Canonsburg, Pa.
790,760. Hoe or Weeder. C. W. Stuart, Newark, N. Y.
790,773. Staple Setting Implement. F. Wiseman, John Day. Oreg.
790,830. Wrench. L. Haneke, Eureka Springs, Ark.
790,860. Wrench. H. G. Weatherill, Elgin, Ill.

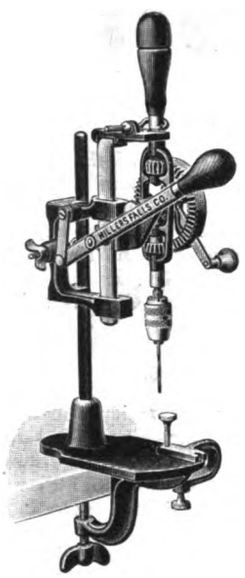
PATENTS ISSUED MAY 30, 1905.

790,936. Lock and Latch. H. G. Voight, New Britain, Conn.
790,951. Combined Self Heating Soldering Iron and Torch. J. W. Buchanan, Ashville, N. C.
790,973. Attachment for Hatchets. J. O. Oliver, New York, N. Y.
790,988. Floor or Wall Wiper or Mop. H. O. Thomas, Harrisburg, Neb.
791,117. Attachment for Wrenches. E. M. Uren, McKeesport, Pa.
791,238. Self Closing Faucet. I. N. Baker, Bay City, Mich.
791,245. Wrench. W. S. Casterlin, Pittston, Pa.
791,263. Wrench. R. A. Hammond, Sandwich, and F. E. Walden, Worcester, Mass.
791,298. Wrench. C. H. Smith, Allentown, Pa.

THE HONORS WHICH ADORN THE NATIONAL SWEEPER.

In our advertising columns the National Sweeper Company of Marion, Ind., show reproductions of the medals granted them at the World's Fair in St. Louis last year. The Grand Prize and two gold medals, comprising the famous triple awards conferred on National's Roller Bearing Carpet Sweepers, the easy running kind. This remarkable tribute to the superiority of National's, exhibited there in competition with the world, is not only the highest and greatest award ever made on Carpet Sweepers, but includes the First Grand Prize that any exposition has ever granted to a manufacturer of sweepers, which is all the more significant when we learn that this was the first exhibit made by the National Sweeper Company and that here for the first time did any competition enter into the question as the result of more than one manufacturer exhibiting.

Although in business less than five years, the National Sweeper Company has rapidly forged to the front and the success which it has achieved is the result of an active, progressive and enterprising policy. From its inception the constant aim has been to better the quality and improve the efficiency of the carpet sweeper of commerce and steadily plugging along with that idea in view, the gratifying result of the searching tests made at St. Louis is eloquent testimony to their having reached the goal of this ambition.



It seems almost incredible that such extensive and rapid progress could have been made in such a short time, yet the National people tell us that not only do they make the largest variety of models, ranging from the cheap bazar sweeper to the "gold plated Louis XV." at $120 per dozen, but that each and every National Roller Bearing Carpet Sweeper contains every device that has ever been invented for the betterment of a sweeper and embodies many live patented features and improvements of real practical merit.

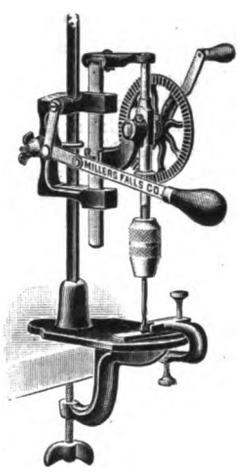
NEW GOODS AND SPECIALTIES.

BENCH DRILL PRESSES.

Millers Falls Company, 28 Warren Street, New York, are introducing to the trade two entirely new styles of Bench Drill Presses, of which we give illustrations. They differ radically from other Drill Presses of its manufacture and are much more moderate in price. Fig. 1 represents the bench drill press No. 22, which is designed for use in connection with the company's hand drills Nos. 1, 2 and 5, any of which may be attached to the frame quickly and easily if the individual already possesses the drill, or the frame complete with any of the drills can be furnished.



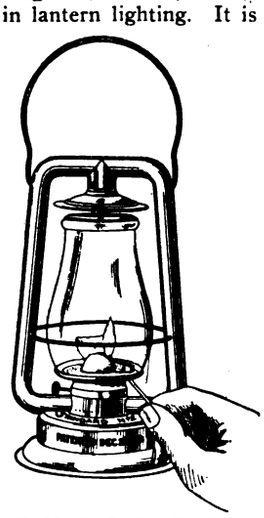


FIG. 1. BENCH DRILL PRESSES. FIG. 2.

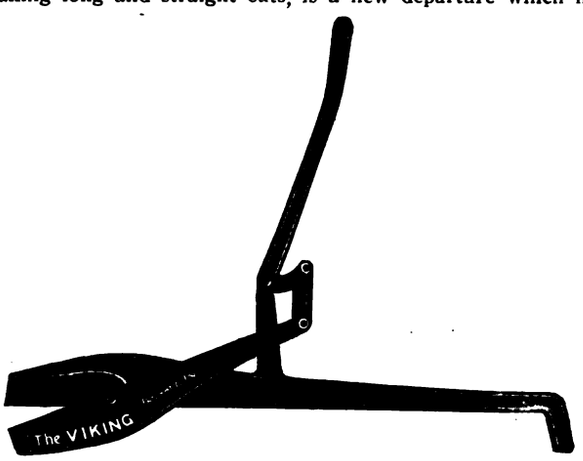
The feed is supplied by a compound lever, which is convenient, sensitive and effective. The frame proper is made of steel and iron, and finished in japan. The distance between the chuck and table when hand drill No. 1 or No. 5 is used at highest point is 7¼ inches. When hand drill No. 2 is used the distance is 6½ inches. The height over all above table is 15½ inches; weight, 7½ pounds. Fig 2, bench drill, press No. 23, is similar to No. 22, except that it has a permanent operating attachment with geared spindle and drill chuck holding drills from 0 to ⅜ inch. The distance from chuck to table with sliding frame at highest point is 6½ inches. The finish is japan and bright nickel; weight 6½ pounds. Both drills are put up in telescope boxes, 17½x7½x4¾ inches.

STANDARD SELF-LIGHTING LANTERN.

A novelty in the Lantern line is made by the Standard Tinware & Manufacturing Co., Toledo, Ohio, which should prove to be an evolution in lantern lighting. It is called the Standard

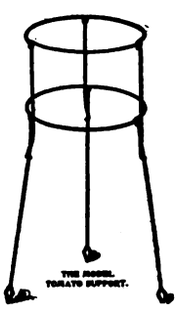


STANDARD SELF-LIGHTING LANTERN.

Self-Lighting Lantern and gets its name from the fact that all that is necessary is to insert a friction match in the lighter attached to the lantern, and the friction ignites the match which lights the lantern, while the operation of withdrawing the match extinguishes it, thereby eliminating all possibilities of danger from the disposal of the match. Among other manifest advantages the lantern can be lighted without lifting or removing the globe; this enables it to be lighted in a rain or wind storm and makes it a favorite for a farm lantern. A good idea of its general construction and appearance can be obtained from the above illustration.

THE VIKING SHEARS.

Charles Swan & Company, Corry, Pennsylvania, are offering to metal workers the VIKING Compound Leverage and Portable Bench Shears, of which they are sole manufacturers. A view of these shears is given in the accompanying illustration. The application of compound leverage on a portable shear, capable of cutting No. 12 gauge Bessemer steel with ease, the full length of the blades and affording perfect clearance in making long and straight cuts, is a new departure which has

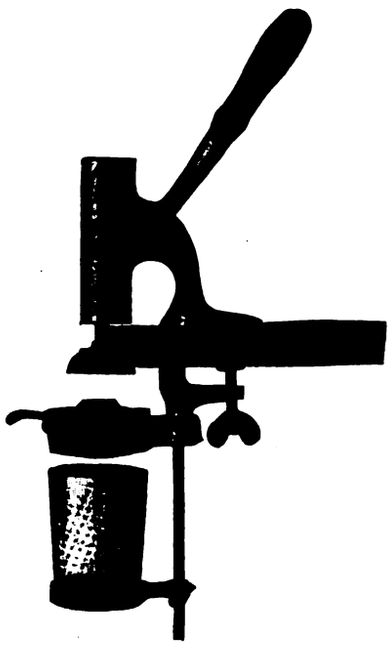


THE VIKING SHEARS.

been received with general favor in machine and sheet metal working shops where the qualities of the Viking shears have been demonstrated. It is pointed out that the use of these tools effects a saving of time as well as an economy of strength and labor to the workman when manipulating gauges of metal from No. 12 up to No. 20. The shear is provided with removable and adjustable blades made of the best tool steel, the tempering of the same being guaranteed. The tool is also guaranteed against any imperfections as to strength, durability and capacity. The point is especially made by the manufacturers, that in the Viking shear the sheet iron worker is provided with a portable shear wherewith he can cut heavy metals as well as light metals without resorting to the power or stationary shears, located, as they are in many establishments, at the far end of the shop.

TOMATO AND PLANT SUPPORT.

Igoe Brothers, 226 North Ninth Street, Brooklyn, N. Y., are introducing through the Hardware and seed trades a Tomato and Plant Support, which meets the approval of those in the busi-



TOMATO AND PLANT SUPPORT.

ness to whose attention it has been brought. It is made of heavy galvanized wire in the manner and style of the accompanying illustration, and will be found admirably adapted for the purpose intended. Its dimensions are: height complete, 34 inches; of bottom section, 24 inches; top division, 12 inches, while the diameter of circle is 14 inches.

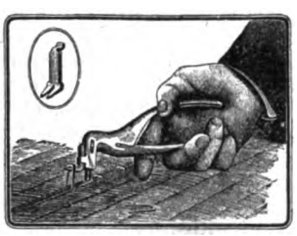
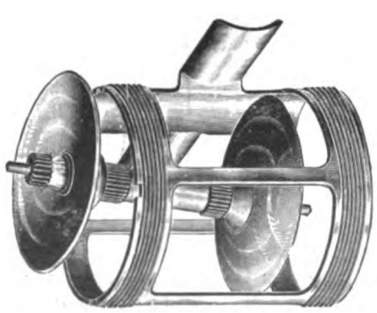
PREMIER LEMON SQUEEZER NO. 100.

Logan & Strobridge Iron Company, New Brighton, Pa., are placing upon the market the new and improved Lemon Squeezer of which we present an illustration. The Premier style No. 100 has a rotary plunger motion which will accommodate the largest lemon, and it is said will extract all the juice. It is provided



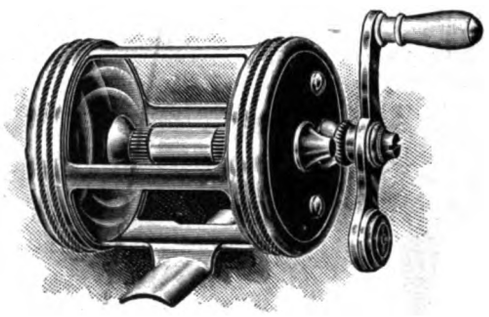
PREMIER LEMON SQUEEZER NO. 100.

with a separate strainer cup with handle which may be lifted out and emptied of the rind and seeds without touching the lemon with the fingers. All parts coming in contact with the lemon juice are heavily coated with pure tin to prevent corrosion and provided with glass holder. It is made in two styles, No. 100B, Oxydized Copper Plated, and No. 100 heavily polished nickel plated. Each Squeezer packed in a strong box, and six in a case.



THE "BI-PED" TACK PULLER.

The changes wrought by modern advertising methods in marketing a new specialty, have had a notable demonstration in the sale of "Bi-ped" Tack Pullers. While unknown to the trade six months ago, this article has been in demand in every State in the Union, and in Canada and Mexico, so that jobbers in many instances were unprepared to supply demands promptly. It should be noted, however, that the aggressive advertising campaign that was carried on for the "Bi-ped" would have been considerably less effective, had there not been a demand already existing for an improved tack puller; and the "Bi-ped," with its interchangeable feet for pulling carpet tacks and matting tacks, supplied this demand at once. The "Bi-ped" is one of the patented specialties controlled by the General Specialty Co., of Philadelphia.



THE TUBULAR FRAME "TAKEAPART" REEL.

A. F. Meisselbach & Bro., Newark, N. Y., are the manufacturers of the tubular frame Takeapart Casting Reel, of which

THE TUBULAR FRAME.

we give an illustration. The frame of the reel is rigid and strong, there being no screws to jar loose and become lost. It has a friction device upon a novel and scientific plan by which any degree of friction can be secured on the spool, thus preventing all back lashing. With this adjustable screw cap on the rear axle of the spool, all looseness between the spool and frame may be taken up. The metal bands on both ends may be unscrewed from the frame in a few seconds and the spool can be lifted out for clearing a tangle in the line, or for cleaning and oiling the mechanism, without the use of any tools whatever. The pinion gear is cut from steel and the pivots are turned upon a

THE TUBULAR FRAME "TAKEAPART" REEL.

solid steel shaft running through the entire length of the spool. The head plate is adjustable, which allows the handle to be placed in different positions. The same applies to the end plate with the click mechanism. These reels are made in two styles of click mechanism, viz.: "Automatic" Click, or with "Regular" Click. The "Automatic" click is silent when reeling in and only sounds when line is running out. The "Regular" Click is light when reeling in and stiff when running out.

CHAMPION PATENT HOOF PLANE.

The Champion Tool Co., Meadville, Pa., who are large manufacturers of specialties in the Blacksmiths' Line, have added to it lately the Champion Hoof Plane, patented, which we illustrate herewith. We show in Fig. 1 a section of the Hoof Plane No. 64, actual width, which is made in 16 and 18 inch. The cut

FIG. 1.

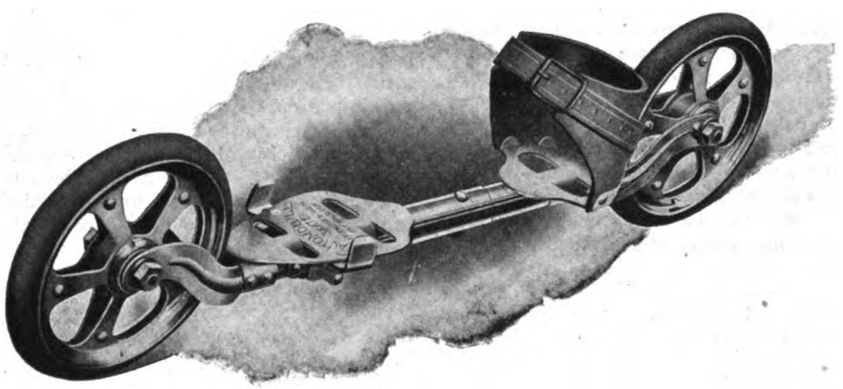


FIG. 2.

will give an idea of its size and appearance. In Fig. 2 we show a cut of the tool No. 65, which is made in 14 inch only. Among the many advantages which are claimed for this specialty may be mentioned the following: It cuts faster than a rasp; leaves the foot perfectly smooth, similar to the work of a plane; will outwear a rasp, as it has three times the cutting surface, and will not clog; is self-cleansing; is much easier on the hand than a rasp, and will not jump. Send for further information, which the company will gladly supply.

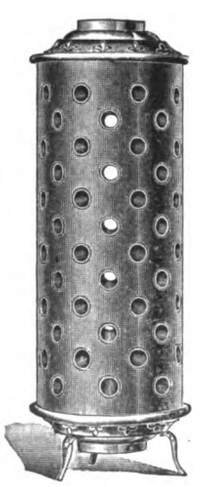
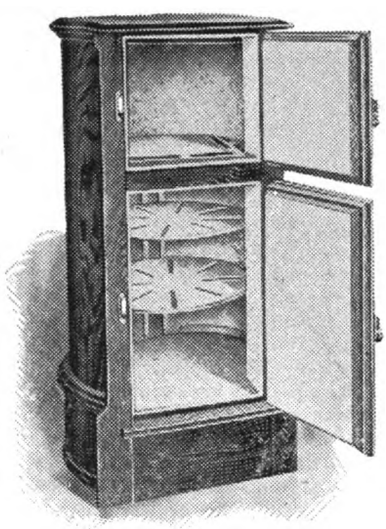
THE AUTOMOBILE CYCLE SKATE.



The Cycle Skate and Sporting Goods Co., 37 Park Street, New York, are placing upon the market the Automobile Cycle Skate, an illustration of which is shown herewith. In its construction the constituent parts are formed of sheet steel of suitable quality and Shelby seamless tubing. The positive fastening of the telescoping tubes, which are adjustable from 10 to 12 inches, inclusive, there being one hole through the outer tube and a series of holes at suitable distances through the inner tube, by the means of which a round head screw passes through both tubes, and is held rigidly by the nut and curved washer underneath. This is an important feature. If by any means the nut should be lost, the union of the front and rear sections is secure regardless of clamp and strap fastening. The front and rear forks are hardened and tempered, making them lighter and stronger. The russet heel straps are fastened in an improved manner that makes them stronger and handsomer; and by an important change in the clamp fastening the forward double threaded clamp screw, is kept underneath the front plate. The tires are rigidly held in position by substantial inner lugs, which form a part of the tire itself, screws with nut fastenings passing through the lugs and clamping steel spokes and tire in one solid wheel, which runs on steel ball bearings, having hardened steel cups and cones. The parts of both 4 and 5 inch sizes are standardized, parts being interchangeable. All metal parts are polished and nickeled.

THE AUTOMOBILE CYCLE SKATE.

THE ROCHESTER RADIATOR.



The Rochester Radiator Company, Rochester, N. Y., are again in the market placing their Radiator through the Hardware trade, and it increases in popularity with each successive season. We give an illustration of their style "B," which is the size used on ordinary sized stoves and for any fuel except soft coal. It is made from American Russian iron, with highly ornamental nickeled cast iron top, base and legs. It is 12 inches in diameter, 34 inches long and weighs 30 pounds. This is the most popular style for general use, and for size and price gives maximum results. On the inside of the register there is a pipe closed at both ends, with a number of little tubes leading from this to the outside and communicating with the air in your room. These tubes get intensely hot, and they keep constantly radiating this heat into the room. By the constant pressure the heated air is kept in circulation and the room soon shows the effect. It is claimed that attaching this register to your stovepipe next your stove will double the heating capacity of your heater, or give you the same amount of heat with half the fuel; or by placing it upstairs or in an adjoining room it will do all the work of an additional stove without expense. It is made in four sizes of pipe, No. 15, 155, 16 and 17, for 5, 5½, 6 and 7-inch pipe, respectively. No. 15 and 155 have 84 cross tubes; No. 16 and 17 have 96 cross tubes.

THE ROCHESTER RADIATOR.

THE NOME REFRIGERATOR.

Mills-Elliott Manufacturing Company, Port Huron, Mich., are the manufacturers of the Nome Refrigerator, of which we present an illustration. The cases are made of ash veneer, highly polished and fitted with brass locks and hinges, and are mounted on ball-bearing castors. They are provided with revolving shelves of galvanized iron, which can be raised or lowered as desired, and by which the contents of the refrigerator are easily brought within reach without the danger of upsetting other articles. The entire interior construction, shelves, lining, etc., can be removed and cleaned very quickly, as none of the parts are at all complicated. There are no corners or crevices in its construction, it is claimed, to harbor germs, no unsanitary drawbacks to prevent cleanliness. The dead air chamber used in the walls is claimed to be of absolute perfection in construction, as the cold temperature produced has been tested under all conditions, proving that this refrigerator will use in cooling 30 to 40 per cent less ice than refrigerators built on the ordinary plan. The novel idea of making the Nome refrigerator of the original round shape and style was to make more room for provision capacity; economize space in the home, which is usually wasted by refrigerators of other makes; and also to have an artistic model that could be placed in the dining-room and harmonize with the furniture.

THE NOME REFRIGERATOR.

ATTIC SALTPETER.

Diogenes had just arrived at the foot of a steep hill. Getting into his tub, he asked Alexander to roll him to the top. Half way up, Alexander stopped, having become weary, saying:

"Get out and walk. Why should I roll you up this hill, anyway?"

"Because one good turn deserves another," replied Diogenes, thus inventing a time-honored saying.—*Chicago Record-Herald.*

RECENT TRADE PUBLICATIONS.

The Bronson-Walton Company, Cleveland, Ohio, are the authors of an artistic catalogue exploiting goods of their manufacture, including bread, biscuit, cookie and dripping pans; double roasters and bakers (including the Never-Burn); steel coffee mills; heavy tin pails or buckets; "Bull Dog" wire rope clamps, etc. The book is finely printed on excellent paper, thoroughly illustrated and bound together by a heavy silk cord. The Never-Burn pans are a specialty for which they claim that bread baked in a Never-Burn pan never sweats, the crust formed is of even thickness and well browned bottom, sides and top. They are made in single, double and triple pans, either smooth or polished. Write for catalogue.

The Miller Lock Company, Frankford, Philadelphia, Pa., have issued a new illustrated catalogue and price list of the products of their factory. The catalogue is an elaborate one, having a bright red flexible cover, and contains 64 pages. They illustrate in color six patent standard lithographic padlock card assortments, consisting of one dozen locks, each mounted on a heavy cardboard, which would make an attractive display. Send for copy of catalogue No. 20 for further particulars.

Keuffel & Esser Company, 127 Fulton Street, New York, with branches in Chicago, St. Louis and San Francisco, have placed before the trade the third edition of their 1905 Trade Price-List of measuring tapes. They claim the variety of these goods they now offer is greater than that of any other manufacturer, and comprises every kind from the highest in quality to the lowest in price. This edition of their catalogue is the first one to describe and list their Favorite Measuring Tapes and Tin Top Tapes, which they have added to their line to complete the assortment. Their Fine Flat Steel Wire Tapes are not described in this list, not being generally carried in stock by the Hardware trade, but will be found in their General Catalogue. Either of above books will be sent upon request.

Silver & Company. Inc., 304-314 Hewes Street, Brooklyn, N. Y., and 18 Warren Street, Manhattan, have issued several catalogues recently; among them we have received Nos. 11 and 12. No. 11 embraces their line of Household Novelties, and includes such goods as coffee pots, bread pans, egg poachers, steam cookers, alcohol, gas and oil stoves and ranges, soap dishes, milk sterilizers, etc., etc. No. 12 is devoted to Silver's Artistic Bath Fittings, which consist of high-grade nickel-plated accessories of every description, white cellu and white enamel medicine cabinets, etc., etc. Both books are well gotten up and will be sent to interested parties upon application. They will gladly supply, free of charge, any cuts in their catalogues, to dealers wishing to use them for cataloging or advertising purposes.

The Baldwin Refrigerator Company, Burlington, Vt., are the authors of one of the neatest envelope size pamphlet catalogues of its kind that has been brought to our notice. It exploits eleven handsome convenient and otherwise desirable sizes of opal, or white glass-lined refrigerators, which are represented by handsome interior and exterior photographic views. In designing this line of goods, no expense or pains have been spared to produce a perfect article for practical use; conveniently arranged; solidly built of best materials; well insulated, and an attractive and durable piece of cabinet work. That they have succeeded is demonstrated by the photographs. Send for their pamphlet of Baldwin Opal Refrigerators.

The Markham Air Rifle Company, Plymouth, Mich., have recently issued an attractive pamphlet catalogue of envelope size devoted to the King Air Rifle, which they make for the use of juveniles. They illustrate several styles, which shoot either B.B. shot or darts. The "Queen" take-down air rifle is one of their best. The stock is of carefully selected black walnut, barrel of seamless brass tubing, beautifully finished, nickeled and polished; 33 inches long, with removable barrel. This air rifle is certainly a little beauty, elegant in its structural lines; it lacks nothing in efficiency or accuracy, and possesses that loud snappy percussion report that appeals to both juvenile and adult buyers of air rifles. Get their booklet and find out about their other rifles.

The Champion Tool Company, Meadville, Pa., manufacturers of Horseshoers' and Blacksmiths' tools, are distributing their illustrated catalogue and price list No. 55, in which they direct special attention to their change in address and additions to their line. They have more than doubled their capacity and have made their new plant up to date in every respect. Their goods are drop forged from steel and they state: "The Champion Tools are manufactured by no secret process, and can be redressed and tempered successfully by any blacksmith." They claim to be the designers of seven-tenths of the Farriers' Tools on the market. For description and prices on their goods, write for catalogue No. 55.

The Stewart Iron Works, Cincinnati, Ohio, are presenting their catalogue No. 35, in which they illustrate their standard designs of iron fence, gates, posts and other iron work made by them. They have added many new and handsome designs of iron fence and made improvements which add value to this line of work. They illustrate heavy steel and iron fence for parks and public grounds more fully in other catalogues, which can be had upon application. Years of experience, special machinery, patents and skilled workmen have placed them among the foremost in the iron fence business in the United States. They have every facility for manufacturing the best iron fence, and for competing with the world in prices. The marvelous growth of their iron fence business is a flattering acknowledgment that their work has been satisfactory, prices right and dealings fair. Their catalogue will be sent upon request.

American Fork & Hoe Company, Cleveland, Ohio, in their catalogue "E" present a variety of Special Tools for Farm and Garden. Their book is high grade throughout, and reflects credit upon the firm issuing it. In its pages they simply call attention to a few of the special goods which they make and which are receiving more than favorable attention wherever they have been introduced. They ask especial consideration of their Acme Forks, Heavy Jumbo and Columbia spading forks, Long Island street fork, vegetable scoops and potato forks, as well as their complete line of heavy forks, beet and weeding tools and scuffle hoes; German handled Acme and Beebe hoes; full line of sprouting and mattock hoes; special Warren hoe, heavy street cleaning hoe; Victor and Evans cultivators, etc. Write to-day for catalogue.

N. G. Taylor Company, Philadelphia, have sent us a copy of Ye Fifth Arrow of Ye Third Quiver, in which "Rufus" explains to his son the necessity of having a good tinner to do justice even to a Taylor Old Style Tin roof, as usual interspersed with amusing tales used to corroborate a theory of his. They boast that "Taylor Old Style Roofing tin on the roof is just as good to-day as it was fifty years ago when it was put on."

The International Silver Company, Meriden, Conn., successor to Rogers Brothers and Meriden Britannia Company, have sent to us one of their books, No. 70, which in an unusually handsome manner illustrates and describes the high-grade silver-plated ware which they manufacture. Their latest design is the "Vintage," made on most graceful lines, and will be found something entirely different from anything heretofore produced. To this design two entire pages are devoted and thereon thirty-three different spoons, ladles, forks, butter knives, pie server, etc., are shown. Two pages each are devoted in like manner to the "Avon" and "Berkshire" designs. The book contains 61 pages, and is finely printed on heavy coated paper and neatly bound with an artistic cover of red. List prices are given throughout. If you are interested in their line, send for a copy of catalogue. They have also issued some unique circulars, of which they have sent us copies, contrasting their advertising matter of to-day with their first advertisement in The Silver Standard of 1847. The latter day advertisement is indeed a fine one, displaying silverware in many shapes and for many uses. For further information, send for their printed matter.

The Griffin Manufacturing Company, Erie, Pa.; an illuminated hanger of exceedingly attractive appearance intended for the retail dealer and calling attention to the Fleur-de-Lis Hinge made by them. This hanger is made of red transparent material that looks well when hanging in the window.

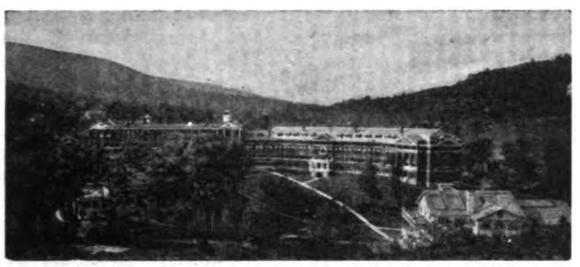
THE HOT SPRINGS CONVENTIONS

STAFF CORRESPONDENCE

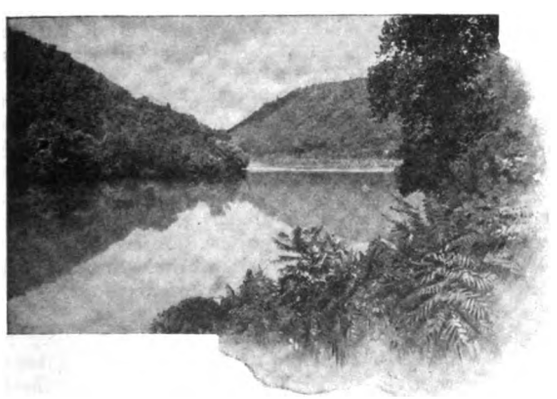


BY TELEGRAPH.

The fifteenth annual convention of the Southern Hardware Jobbers' Association, and the eighth convention of the American Hardware Manufacturers' Association were held at Virginia Hot Springs, Tuesday, Wednesday, Thursday and Friday of this week (June 6-9).

In point of results accomplished it was one of the most successful meetings ever held by these associations and its location at this famous resort with the unequalled facilities of the "Homestead" for entertaining the conventioners made it one of the most enjoyable affairs of its kind.

As early as Friday of the previous week delegates and guests began to arrive at the Springs in order to get in a few days of pleasure in advance of the work of the convention.



The executive officers of the two associations and the members of the entertainment committee were on hand early to perfect the details of the meeting, so that there would be no delays after the session began. Tuesday morning the visitors arrived by train load and soon the immense lobby of the Homestead took on the appearance of an intermission at an old-fashioned Methodist Camp meeting as members from widely separated places

THE HOMESTEAD HOTEL.

came together and began, with a hearty hand shake, the renewal of old acquaintances. The excellent service of the hotel soon had everyone located in comfortable rooms and the visitors settled down for four days of business and pleasure.

Judge Taft, Secretary of War, arrived with his party by special C. & O. train late Monday night and during Tuesday made many friends among the visitors. The fact that this well known man, favorably mentioned for the highest office in the

THE GREENBRIER AT MEADOW CREEK.

land, was to be a guest of the convention assisted materially in bringing out the large attendance.

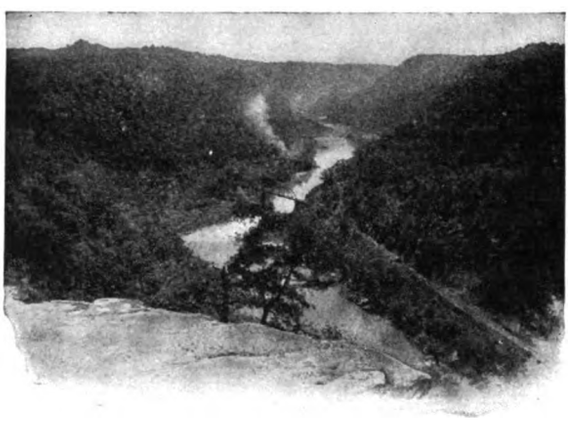
Senator Carmack of Tennessee arrived Tuesday morning and during the day added largely to his list of acquaintances.

The railroad interests, ever watchful for resolutions and recommendations affecting freight rates and related matters, were represented by Samuel Spencer, President of the Southern Railway.

The National Hardware Association was represented by its president, Samuel A. Bigelow, and Secretary-Treasurer T. James Fernley, while President Bogardus kept every one reminded that the National Retail Hardware Association was in every sense alive, growing, and to be considered a power in the world of Hardware.

From all parts of the North, East and West, came members of the Manufacturers' Association the word having been passed along that there would be "something doing" at Hot Springs.

New England was well represented, as usual, headed in point of numbers, by the delegation from Connecticut, which is in a fair way of becoming better known as the "Hardware" State, than as the "Nutmeg" State.



The members of the Southern Association, meeting in their own territory and urged by the persistent efforts of their able president and secretary and with the stimulating example of last year's Atlanta meeting, were out in strong force, both as to numbers and enthusiasm.

The Reading Hardware Company, to whom several recent conventions are much indebted for entertainment features, were on hand with thirty-six people and a band of twenty-five pieces. Their rooms back of the balcony at the end of the lobby were filled at all hours with those who were viewing the display of goods, while the band and the several vocalists made up the principal part of the programme of practically all of the entertainment features of the meeting.

HARDWARE'S SPECIAL.

Responding to the suggestion of the manager of HARDWARE one hundred and thirty-five manufacturers and jobbers made the trip to Hot Springs in a special train that left New York at five o'clock Monday evening, reaching Hot Springs the following morning.

The train left Jersey City with diner, baggage car and four Pullmans, and at Wilmington the two Reading Hardware Company cars were attached. All through the evening, until the small

THE NEW RIVER CANON.

hours, the time was pleasantly spent in getting acquainted, and all on board reported having had a very enjoyable trip. On the train were the following:

CAR 6.

The Philharmonic Band of Reading, twenty-five men, with the Reading Hardware Company.

Arriving at Hot Springs, the entire party, headed by the band, marched up to the Homestead and into the lobby, where they were received with open arms by the earlier arrivals.

For the return trip the train left the Springs at mid-day Friday, giving those on board a daylight view of the magnificent scenery of the Blue Ridge Mountains, which in this part of Virginia is unequalled. Many of the party had never made the trip before, and until the sun went down their eyes were continually delighted by the changing scenes of mountain and valley, farmland and wilderness.

RECREATION.

Golf enthusiasts were in their element at the Springs and many hours were spent by them on the 6,000-yard links to the north of the hotel. Other sources of recreation were found in the tennis courts, the beautiful drives through valley and over mountains, in the fifty-seven or more varieties of external baths and the endless varieties of baths internal. Of the latter the one in special favor was the brand manufactured in one of the buildings at Warm Springs, five miles from the Homestead, this particular bath being made of a certain reddish brown liquid, plenty of chopped ice and a bunch of fragrant mint. The livery at the Homestead was soon being worked overtime carrying conventioners to Warm Springs. At this place, a health resort for nearly 150 years, his august highness, the clerk in charge, exhibited with pardonable pride records setting forth that the Father of our Country "took the baths" at Warm Springs in 1761, and an account book in which Thomas Jefferson—he of simplicity fame—was charged with "one week's board, $9.15," and "wine during the week, $1.00." Other drives were taken to Healing Springs and to Fassifen farms and to other points of interest.

The banquet of Tuesday night was one of the most successful ever given by these associations in both service and programme. The musicale of Wednesday night, followed by a dance, and the outdoor concert and reception of Thursday night were greatly enjoyed by all participants. For both evenings' entertainment the associations are indebted to John Harbster, of the Reading Hardware Co., who brought with his party the band and vocalists.

BUSINESS.

Long before the opening of the convention it became apparent that the business transactions at Hot Springs would be of the greatest importance to the Hardware business. Committee work during the past year has been carried on with great vigor, particularly on the subjects of "Special Brands," "Restricted Prices," "Freight Matters," and "Catalogue House Business."

SPECIAL BRANDS.

A special committee of nineteen members of the Manufacturers' Association got down to business several months ago on the subject of Jobbers' Special Brands, with the idea of getting the opinion of all members on this matter and formulating a plan for either wiping out entirely this thorn in the flesh of makers of Hardware, or, at least, cutting down the spread of the evil. The work was done quietly, the committee realizing that they had in hand a work of the utmost importance and that the matter must be handled with the greatest care and skill.

The result of the committee's deliberations prove them to be unanimous in the following: (1) That the consumer demands goods bearing the maker's name and mark; (2) That he will get these goods at the retail Hardware store if possible; if not, from some other source of supply; (3) That the attitude of those jobbers who insist on handling goods bearing only their own Special Brands has a tendency to force the manufacturers to a more direct distribution of their goods.

In a recent HARDWARE editorial it was stated that the questions of "Special Brands" and "Catalogue House Business" are closely allied—in fact, inseparable; the report of this committee would seem to indicate that they are of the same mind as the editor.

Catalogue houses invariably prefer to handle well-known goods bearing the maker's brand. The big Chicago houses have built up their enormous business on this policy; by so doing they get the advantage of the manufacturer's advertising and the reputation of his goods. The secret of success in all manufacturers' business is "Make what the people demand," and there are some jobbers who seem to be waking up to the fact that the rule that means success to catalogue houses should also mean success to the jobber.

The Manufacturers' Association is to be congratulated for having taken up this subject with such evident earnestness. Their desire to continue to do business with jobbers as heretofore is very apparent, as is also their desire to protect the interests of the retail merchants. The jobber should, however, realize that there are two sides to every question and that the "giving" cannot always be done by manufacturers.

When a manufacturer refuses to sell a catalogue house he cuts off one of his largest customers—that means a big sacrifice; when he does this should not the jobber reciprocate by handling the manufacturer's goods bearing the manufacturer's name? The original idea of the jobbers was that he was to be a distributor; if, however, he, by insisting that all goods bear his brand, becomes in the eyes of the retailer and consumer a manufacturer, can the real manufacturer be expected to give to the "jobber-manufacturer" the same loyal support and protection that he would give to the genuine jobber?

RESTRICTED PRICES.

The discussion on this subject, opened in Wednesday's session by W. W. Ayres, and followed by extemporaneous addresses by several other gentlemen, should have a strong tendency, if properly followed up, toward reducing to a minimum the practice of price cutting so prevalent in all branches of the trade. Closely allied with this subject were the addresses on "Increasing Expenses and Decreasing Profits," opened by R. M. Dudley, and "How to Enforce Uniform Terms," by Spencer James.

CATALOGUE HOUSES.

This important matter received attention in the Thursday afternoon session, the discussion being led by the following members of the committee: R. M. Dudley, W. P. Bogardus and S. Norvell. The work on this subject is steadily progressing, and, while there is much to be accomplished, still enough has been done to prove that with proper co-operation among all branches of the trade the "bogie" of mail order business and its accompanying demoralization of prices can be made much less terrifying to the maker and distributor of Hardware.

FREIGHT MATTERS.

In handling this subject, the association was badly handicapped by the absence on account of illness of E. B. Pike, chairman of the committee. Mr. Pike is also chairman of the Interstate Commerce Committe of the National Association of Manufacturers, and at their May convention in Atlanta made a report that was considered one of the most important papers read at that meeting. The Freight Committee has already brought about several minor reforms and has collected a large amount of material from which great results are expected.

In this as in other matters, the co-operation of all of the associations—including the retail organizations—is needed, as all are equally interested.

The railroad interests of this country are powerful and often inclined to be extremely independent in considering requests for reforms, but it would seem that if these reforms were asked for—or demanded—by a committee backed by the four associations among the jobbers, manufacturers and retailers, proper consideration would be given.

Always watchful in matters of this sort, the railroad interests will no doubt be found opposing every step, particularly at the outset, while the work on these matters is in its infancy, following their universal policy of nipping in the bud all movements toward reform of any sort in matters referring to transportation.

JOHN DONNAN,
First Vice-President.

TUESDAY MORNING SESSION.

The jobbers assembled for their opening executive session at 9:30 in the breakfast room of the hotel.

After the reading of the minutes of the 1904 convention, President Crumley made his annual report which was as follows:

ANNUAL ADDRESS

of W. M. Crumley, President.

Gentlemen:—Fifteen years ago a few Hardware jobbers met in the City of Knoxville, Tenn., and organized this association. I hardly think that any one of them dreamed how their work would grow. I believe we have the honor of being

THE FIRST INTERSTATE ASSOCIATION,

if not the first commercial association to form in the United States. It certainly was a wise thing to do else our example would not have been so extensively followed, for there is hardly a State now in the Union that does not have its Hardware association and there is no man who could tabulate the benefit and good that has been done the commercial world by our works and yet our work has just begun, for there are many things which we dared not tackle alone, which we fearlessly take hold of now, because we know we will be supported by all these other associations. Though we have separate organizations when one or the other needs help to correct a public evil, we stand as one man and with such power that when we put our shoulder to the wheel something has to move.

Let us therefore not weary of our work, but let every member

GIVE HIS BEST THOUGHT AND EFFORT

to our Southern association that it may continue in the front as an association for the closer allegiance you give it makes our strength and power the more assured.

I will not weary you with a recital of our year's work for that report more proper belongs to your secretary, but I will call your attention to a few things which will need your best effort and thought to correct in the year that is ahead of us.

First. The Parcel Post bill will need watching, for the catalogue houses are using every effort to have a law passed that will enable them to reach the consumer,

THEREBY DAMAGING THE RETAILER, WHOM YOU MUST PROTECT

at all hazards, for it is from him you get your business, therefore, I would recommend that you by resolution have a committee appointed from this association to work in conjunction with a committee from the other associations, whose business it will be to keep watch on these people and see that no law is passed that will be detrimental to the retail trade.

Second. I would recommend that you continue our Committee on Catalogue House question for their work has been well done so far, but is far from finished.

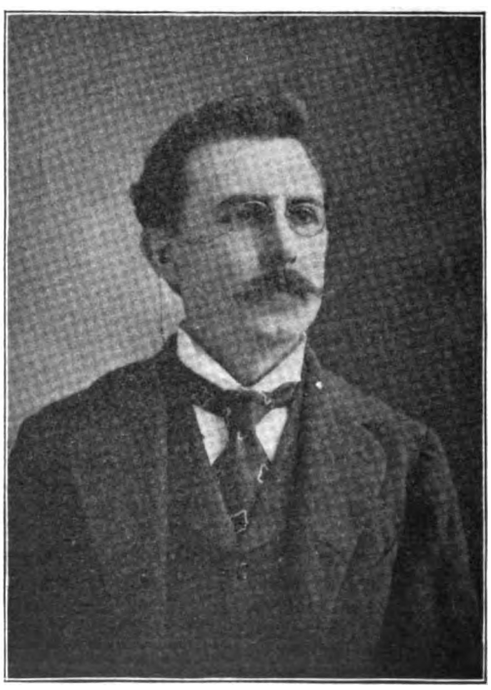
Third. The freight question will require your best efforts. The railroads have become so arbitrary that they are almost unbearable, even when they acknowledge an injustice, they take no steps to correct it. They scarcely deny that they seek and do control our legislators and if they are not soon checked they will throttle even the Government itself.

The American people are patient, but when once aroused even these great corporations had better look out.

There are many vital matters to be discussed by the association during this session and let me beg each member to be punctual and prompt in attendance on the meeting, giving us the benefit of your advice and the encouragement of your presence.

It is with great pleasure that I can report that we have the sincere respect and confidence of the Manufacturers' Association. We must keep this, for without it half our strength is gone.

Your executive committee will make recommendation to you in their report which I hope you will consider very carefully, for they come from people who have given their time and best efforts to this work.



In this connection, and in closing, I wish to give those gentlemen and your secretary and the whole association, earnest thanks for the uniform kindness you have shown me as your executive officer and to bespeak for my successor your full and earnest allegiance and to recommend that whatever association you may be members of, your first duty shall be to the Southern Hardware Jobbers' Association.

We have many visitors with us. We bid you all welcome and will be glad of your attendance at our sessions. I thank you for your attention.

SECRETARY CARTER'S REPORT.

To the Members of the Southern Hardware Jobbers' Association.

In submitting a report of the work transacted through the office of your secretary-treasurer during the past year we wish to convey to you as forcibly as possible the importance of the work, both in a general way and specifically. We feel that it is not only desirable, but also absolutely necessary, that every possible

C. B. CARTER,
Secretary-Treasurer.

influence for good, which the association is capable of exerting, should be fully developed. To accomplish this result it has reached the point where every symptom must be analyzed and where trouble is found special treatment should be prescribed and the patient placed in proper hands, in order that it may be carefully watched and every unfavorable tendency checked in its incipiency. Favorable conditions must be nurtured and such treatment applied as will develop the same in every possible way. A comparison of the Hardware jobbing business to the human body may possibly illustrate our views in a more concise manner. Just so sure as the human body is the highest form of animal

Digitized by Google

nature, responding quickest to every form of impression which can be described, so is the Hardware jobbing business the highest form of commercial dealings, being recognized as the barometer of trade by all lines. For the human body to have health and happiness and retain the same conditions must be favorable. In other words, the body must be supplied at regular intervals with food and drink and the same must be nutritious as well as satisfying. A too large proportion of satisfying food, but possessing little if any nutriment, will soon bring about unfavorable conditions. If a change in diet is made in time no serious trouble will result, but on the other hand if no steps are taken to remedy the trouble, then the body will become unhealthy and unless medical aid is secured and vigorous treatment prescribed and followed the body will die. Again, if the human body is surrounded by pleasant circumstances and trouble of every form is avoided happiness and contentment will result, but if conditions are unfavorable and troubles develop, then the body becomes unhappy and unless relief is afforded there will be a complete breakdown, insanity and perhaps a trip across the river from which no traveler has returned.

We do not think we are making a mistake in stating that the Hardware jobbing business is susceptible to the same conditions we have just enumerated. For the jobber to succeed or even exist the business must be healthy. By health we mean that the goods which are purchased for re-sale should be profit-bearing. In other words, there should not be too large a proportion of staples, which may be termed satisfying lines—which are sold without a profit and often at an actual loss when considering the cost of doing business. We do not claim that it is possible at all times for some lines of staples to be sold at a profit above the cost of doing business, but we do claim that unless the proportion of these unprofitable goods is much in the minority that the business will become unhealthy. An unhealthy person or an unhealthy business cannot hold their own against the troubles that confront them. There is no such thing as holding your own or breaking even. If there is no gain in health or not profit then there must be deterioration or less, and under such conditions it will be impossible to stop the retrograde movement. If the jobber does not possess the nerve to ask a remunerative profit upon the goods he sells, or is unable to secure such results through co-operation with his fellow jobbers or through the manufacturers, then there is little if any hope for a continuance

F. D. Mitchell,
Secretary-Treasurer.

of the business. It is also true that inside and outside complications in a jobber's business, causing worry and vexation, will also prove detrimental to the welfare of the jobber. Experience has shown most conclusively that a divided house will fall sooner or later and the same is true along other lines. The point we desire to impress upon you is that the Hardware jobbing business is the highest type of commercial traffic and should be transacted upon the same high plain. This result can only be secured by the jobbers operating their business along profitable and satisfactory lines, and it is to assist in accomplishing this result for which we are laboring.

It will not be necessary for us to review in detail the past year's work. Our office has kept you promptly and fully posted as to all matters of importance which have been taken up for consideration. However, it may perhaps be interesting for your having a brief report presented to you at this time.

A larger amount of traveling has been performed by your secretary-treasurer this year than at any time in the past. The attention which has been given to local association by our organization during the past few years has called for further enlighten-

George W. Corbin,
Vice-President.

ment upon the part of the jobbers and the services of your secretary has been requested and utilized to good advantage by the jobbers at various points.

Secretary Carter detailed the visits he had made to various jobbers and some of the complaints he had received. These were considered in executive session by the convention.

The report of Mr. Carter as Treasurer showed the finances of the association to be in good condition.

The Committee on Transportation, through its chairman, Mr. W. E. Newill, made the following report, which was read by the secretary in the absence of Mr. Newill.

The committee reported that requests made of railroads for change of classification on a number of articles had been refused; that other requests had been granted to the satisfaction of the association, among which were the following: The classification committee changed its ruling so that mixed C. L's of Children's Vehicles (including velocipedes and tricycles) minimum 15,000, would take the C. L. rate.

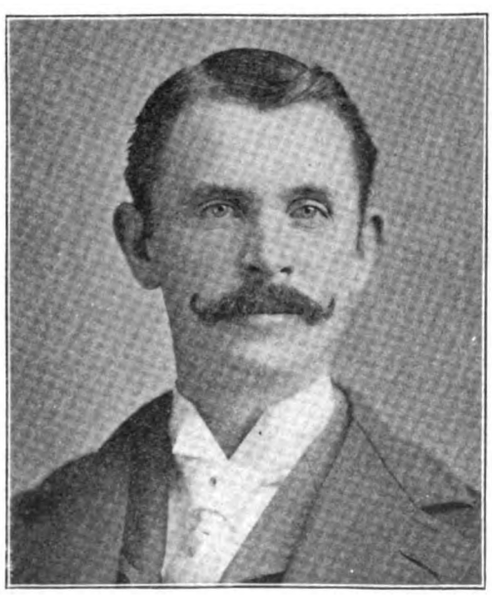
A reduction was secured on picks, mattocks and grub hoes in C. L. from fourth to sixth class.

The report of the committee desired to impress the importance of having each of the members keep in close touch with the attitude of their representatives in Congress on the Interstate Commerce bill; that it was exceedingly important that a conservative and yet very strong Interstate Commerce Committee be in a position to protect our citizens against excessive freight charges and other abuses along this line.

The chairman of the committee expressed himself as very glad to see that the Hardware manufacturers' association had been active in the work of its freight committee and that certainly good results could be looked for along the line of co-operation between the two associations, as per the resolution of the association at its last annual meeting.

Referring to Loose Leaf Price Book, Mr. Newill said in his report:

Another matter presents itself, which it might be well for our association to take up at the June meeting. It would seem that the Loose Leaf Price Book has come to stay. Why cannot the manufacturers adopt a uniform sized page, not larger than the page used in Belknap's Loose Leaf Catalogue? By so doing they can at least expense to themselves and to the greatest convenience of the jobbers provide illustrations and descriptive matter to introduce their goods.



Mr. J. D. Moore of the Supply Committee made the following report:

Digitized by Google

Your Supply Committee in making their annual report desire to say that we judge that this department of our business is enjoying great harmony, since we have not had as much as one complaint during the year just closing. Are we really thus peaceful or are we sleeping over our rights and not observing things that are transpiring all around us? Is it the duty of your committee to be quiet and wait for complaints from the membership, or shall they go in vigorous search until they find something to do? We have proceeded along on the plan that it was our duty to keep peace, and so long as no one brought any complaint to us we enjoyed a good quiet time without having any work to do. However, we have observed what appears to us a growth in the number of manufacturers seeking to widen their sphere of action in selecting desirable active business centers and establishing their own houses or representatives, thus enabling them to go directly to the consuming trade and to our customers, feeling that they are fully within their province sailing under the flag of the jobber or distributor.

Your committee feels like this subject should engage active thoughts of the members of this association, and that they should find some line of action that we should pursue. It occurs to us that if the manufacturer thus ignores the legitimate channel of distribution through the jobber to the retailer and the consumer that we should refuse to distribute the products of such manufacturer—even though he be not a disturbing factor in our immediate locality. Since, when the unoccupied territory becomes attractive to him he will not hesitate to have his representation and do his own distribution and when he has become strong and well established the difficulty will be all the greater on our part, and it behooves us to find some line of action in ample time. We must admit that they have every right to this line of action if they so elect, but if they ignore the jobber then the jobber should not support him and take care of his business where he has not yet sought direct representation. This will, of course, require concert of action on the part of the membership, and if we are to get full benefits of our association we must have this co-operation. We trust that the wisdom of the members of the association will find the solution that is best and equitable to all.

A letter was read from Mr. Joseph Orgill of the Membership Committee of Memphis, Tenn., in which he made the following report:

Chas. H. Ireland,
of the Executive Committee.

The following new members have been admitted during the year and we have a large number of applications on hand, which have not yet been acted upon:

Coleman-Wagner Hardware Co., Charleston, S.C.
Scott Hardware Co., Paducah, Ky.
Merritt Hardware Co., Macon, Ga.
Bluefield Hardware Co., Bluefield, W. Va.
Blakeney-Brooks Hardware Co., Paris, Texas.
Monroe Hardware Co., Monroe, La.
Crane-Hinman Hardware Co., Yazoo City, Miss.
Meyer-Neville Hardware Co., Meridian, Texas.
E. L. Wilson Hardware Co., Beaumont, Texas.
Virginia-Tennessee Hardware Co., Bristol, Tenn.

Mr. J. Van Dokkum of Little Rock reported on conditions regarding steel shapes. It was moved and carried that the committee on the steel shape situation be continued for the coming year with such additions as may be necessary. President Crumley stated that that committee would be announced along with other committees.

O. B. Barker,
of the Executive Committee.

Mr. Ireland moved that a committee on wire rope be appointed for the ensuing year.

President Crumley: This committee on wire rope, I will explain now, because I might overlook it at the time the committee is announced, is expected to work in connection with the committee that was appointed by the Supply Dealers' Association. They handle, you know, more rope than the Hardware dealers and it is necessary for us to join hands to do anything with the wire rope question.

The secretary read a report from Mr. George E. King of the Steel Goods Committee, referring particularly to the subject of the profit in handling hoes.

Mr. O. B. Barker, Chairman of the Executive Committee, read the report, which in part was as follows:

EXECUTIVE COMMITTEE'S REPORT.

The report first referred to the responsibility felt by the committee in making the report; that possibly some of the old members who had not taken a deep interest in the association's affairs may have felt that many needed reforms had not been accomplished. The explanation was that conditions and remarks were not always favorable for securing proper and needed legislation. Certain sections of our territory may be suffering from conditions imposed by the manufacturers, while another section is greatly benefited by the same arrangement; that for the association to demand of the manufacturers that the plan be changed would bring about a disagreement within the ranks of the association. That the proper method to adjust such troubles would be for the jobbers who are interested or inconvenienced to bring their troubles to the manufacturers and if there was justice in their claims the manufacturers will open up negotiations with the association. Again, the association may be working on needed reforms which require perhaps years to bring about the desired relief.

The report said that the experience of the past two years had demonstrated the desirability—in fact, the necessity—of doing something of real monetary benefit to the individual members; that the association had learned from past experience that mistakes were but stepping stones to greater success.

Further, the report stated with the exception of the meeting of the Executive Committee at this hotel on yesterday, only one meeting was held during the year, and that at Knoxville, Tenn. At that meeting considerable correspondence was taken up and considered relating to complaints against manufacturers, demoralization in prices on various lines brought about by jobbing com-

Digitized by Google

petition, lack of uniformity in terms of sale from jobber to retailer and other similar troubles and provision was made to have the same discussed at this convention in the hope that some satisfactory solution of the difficulties could be reached.

The report said that one of the most important subjects for consideration at the convention was a satisfactory arrangement between the manufacturer and the jobber for the maintenance of stipulated prices—upon a profitable basis. That in the judgment of the committee the jobbing interests had in a measure reached a crisis—in other words, restricted prices, if satisfactorily adopted and enforced, means further development, increased usefulness and profitable returns for the Hardware jobbing business; that if no favorable action or uniform arrangement was consummated for the control of prices upon the staple and kindred lines, which have been brought down to a plane of unprofitable han-

BRUCE KEENER,
of the Executive Committee.

dling, then there was no hope for the advancement of the jobber's interests, but rather sure indications of a steady depreciation in the importance and volume of business of the jobber as one of the principal channels of distribution; that the association must decide upon a plan which has the sanction of the majority of our members and of jobbers from other sections if they hoped to have the manufacturers favorably treat with the association on the subject. The committee referred to the efforts made to control prices on several staple lines.

The committee expressed the opinion in the report that for the association to accomplish the greatest good they must become specialists; that proper returns from association work could not be secured by confining its work to generalities; that special committees of two or three members should be appointed to handle one certain line; that these committees should be expected to confer with each other and with the manufacutrers when found desirable.

The report said that the catalogue question had been given considerable attention by the committee; that the formal report of the Committee on Catalogues would be presented at a later session.

On the question of terms, the committee requested that this question be taken up and carefully considered by the association; that some method be devised to awaken the interest of the members in this question.

Certain changes were suggested in the constitution and by-laws looking to an increased revenue from the membership to provide the association with funds to carry on the work proposed for the coming year.

In conclusion, the committee recommended the following resolution:

Resolved, That while we appreciate the great kindness that the manufacturers and their representatives have shown us in entertaining us so elaborately in the past, yet we feel some embarrassment in accepting so much from them. Therefore, be it

Resolved, That the members of our association who participate in the entertainment features bear their portion of the expenses of all future entertainments at our annual convention.

On motion the report was accepted to be taken up at the session on the 7th and acted on in detail.

President Crumley appointed the following special committees:

COMMITTEE ON POULTRY NETTING.

F. B. Dunlop, S. C. Dinkins, Bruce Keener.

FIRE INSURANCE.

J. D. Moore, George E. King, Ben. J. Schuster.

NOMINATION COMMITTEE.

J. D. Moore, W. W. Webber, O. B. Barker, Bruce Keener, H. R. Miller.

CAST PLOW COMMITTEE.

John Donnan, C. H. Ireland, O. B. Barker, S. C. Dinkins.

AUDITING COMMITTEE.

J. C. Sproull, S. B. Hubbard, Jr.

STEEL SHAPES COMMITTEE.

J. Van Dokkum, John Donnan, C. H. Ireland.

WIRE ROPE COMMITTEE.

J. D. Moore.

STEEL GOODS COMMITTEE.

George E. King.

CATALOGUE HOUSE COMMITTEE.

R. M. Dudley.

TUESDAY AFTERNOON.

GENERAL OPENING SESSION.

This session was opened to all present and was called to order in the Homestead Ball Room by President Birge of the Manufacturers' Association at 2:30.

Dr. J. G. Scott of Hot Springs offered prayer and all present joined in singing the National Hymn.

After prayer, Secretary of War, William H. Taft, escorted by H. B. Lupton, entered the room amid great applause and was fittingly introduced by President Birge. The secretary spoke briefly in a humorous vein and easily won the hearts of all present.

President Crumley of the jobbers in the following words extended a hearty welcome to all present.

ADDRESS OF WELCOME.

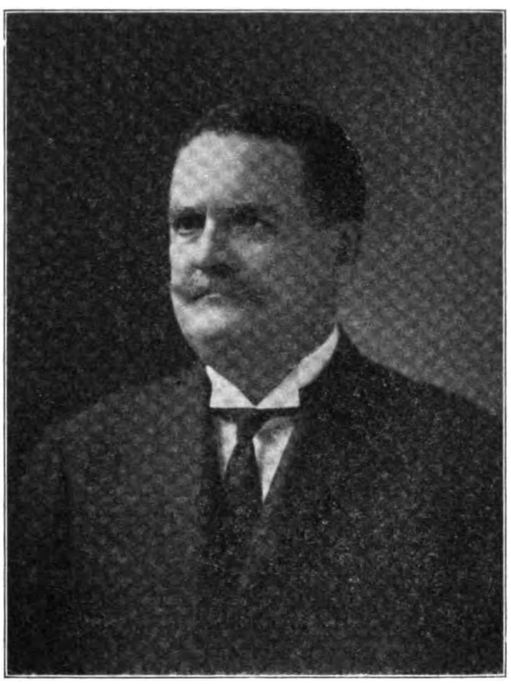
W. M. CRUMLEY.

Gentlemen:—When you realize that I am weighed down with the joy the whole membership of the Southern Hardware Jobbers Association feel in meeting again the American Hardware Man-

F. B. DUNLOP,
Of the Executive Committee.

ufacturers' Association in convention, you will not be surprised that I confess myself unable to find words sufficient, so I will just say, "Shake" and imagine I am holding each of your hands in mine and you will feel a throb pulsating right from the heart of the Southern Hardware Jobbers, bidding you a cordial welcome and assuring you of our confidence and respect.

May the day never come when any discussions shall arise between our two associations, for we need to stand together to overcome the evils which threaten both alike. If at any time we do not behave exactly to suit you, come to us and we will reason with you until you think as we do or are convinced by you that we are in error.



To the ladies, I do not know what to say, for my wife not be-

Digitized by Google

ing able to come, instructed me not to have anything to do with you, but she surely would allow me to salute you in public and say we are glad you came, for our conventions would be—I was going to say dry, indeed, but after looking over my audience am afraid I should say wet, if it were not for your sweet presence.

J. M. McAllister, Attorney for the Virginia Hot Springs Company, followed with a few well chosen words of welcome.

Ex-Governor Goodell of New Hampshire responded to Mr. McAllister in his usual happy manner and on behalf of the Manufacturers' Association expressed his appreciation of the hearty welcome tendered.

HENRY B. LUPTON,
Vice-President.

George E. King, of King Hardware Company, Atlanta, in extending to the manufacturers a welcome on behalf of the Jobbers' Association, spoke of the necessity of the Jobber to the Manufacturer; of their pleasant relations in the past and the hope that they would continue as pleasant., intimating at the same time that in the event of friction between the two classes, the jobbers might take up manufacturing.

President Samuel A. Bigelow, of the National Hardware Association, and W. P. Bogardus, of the National Retail Association, were called to the platform and introduced. Both spoke of their pleasure in meeting the association from the South and were greeted with much applause.

The session then adjourned.

THE BANQUET.

Tuesday evening the Manufacturers' Association tendered the Jobbers a banquet which will be remembered long as one of the most successful affairs of the kind in the history of Hardware conventions.

The immense dining room of the Homestead was beautifully decorated for the occasion, the main portion of the tables being in that part of the room surrounded by huge Gothic pillows which were tastefully draped with green and the nation's colors.

The menu was as follows:

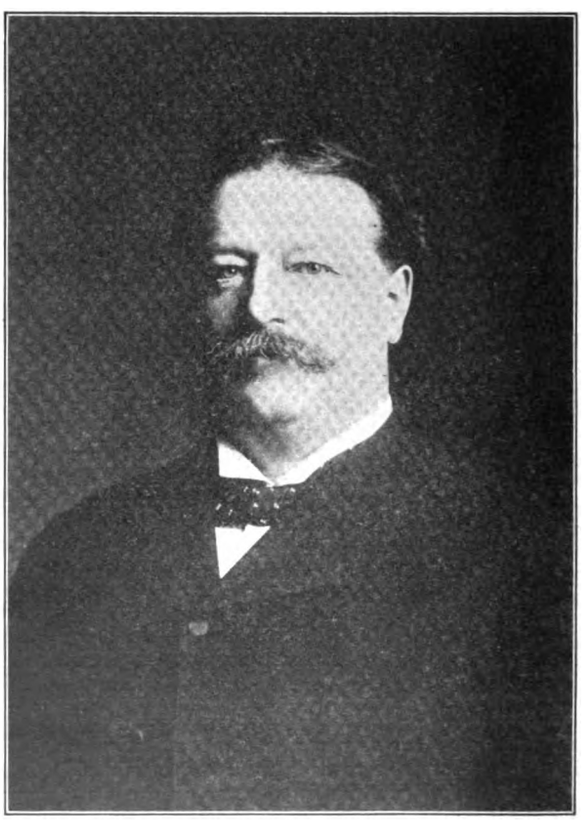
Chicken. Gumbo. Sherry.
Boiled Kennebec Salmon, Hollandaise Sauce.
Potato Croquettes. Sliced Cucumbers.
Saddle of Lamb.
Potatoes Chateau. Green Peas. Sauterne.
Punch au Kirsh.
Broiled Chicken on Toast. Moet & Chandon White Seal.
Romaine Salad.
Neapolitan Ice Cream. Petit Fours.
Brie Cheese. Crackers. Coffee.

At the speakers' table were the following:

Toastmaster, Henry B. Lupton.
Chairman of Entertainment Committee, Irby Bennett.
Secretary of War Wm. W. Taft, George T. Oliver, Senator Edward W. Carmack, W. W. Supplee, George P. Hart, J. D. Moore, T. S. Kretsinger, Hilary A. Herbert, John Harbster, W. P. Bogardus, N. A. Gladding, S. Norvell, O. B. Barker, R. R. Williams, W. B. Belknap, George H. Sargent, Samuel A. Bigelow, Wm. M. Crumley, Julius C. Birge.

While the banquet was being served, music was furnished by the Philharmonic Band of Reading, Pa., and all present joined in several songs.

As coffee and cigars were being enjoyed, Chairman Bennett, of the entertainment, called the assemblage to order in a brief speech in which he mentioned with pardonable pride the fact that the present committee was almost exactly the one which provided entertainment for the first meeting of the Southern Hardware Jobbers' Association fifteen years ago. In introducing Toastmaster Lupton, Mr. Bennett spoke of Mr. Lupton's twenty-five years of service in the Hardware business as merchant and manufacturer.



Mr. Lupton, who was greeted with enthusiastic applause, spoke feelingly of the great value of such gatherings where competitor meets competitor and where seller meets his customer. He read communications from several gentlemen who were unavoidably absent, among them being Samuel Disston, John Bindley, Samuel Spencer and E. C. Simmons.

In his "address of welcome," Julius C. Birge, president of the Manufacturers' Association, the hosts spoke of the earliest find of iron ore at Falls Creek, Va., by Capt. John Smith and if the consequent fittingness of this meeting of iron men at this place three hundred years later. He reviewed briefly the iron business of America and reminded his audience that the progress of decline of iron industries in this country was the barometer of all business. He paid a high tribute to the officers of the National Hardware Association, the Southern Hardware Jobbers' Association, the National Retail Hardware Association and the Trade Press.

The toastmaster then introduced Wm. M. Crumley, president of the Southern Hardware Jobbers' Association, telling as he did so the story of Crumley's ride as a despatch bearer at the battle of Fredericksburg.

President Crumley was at his best and delighted his audience with a ringing speech, the chief theme of which was the upbuilding of the South and her love of the Stars and Stripes.

President Samuel A. Bigelow, of the National Hardware Association was next introduced. He spoke of the great work now being accomplished through co-operation among the association's working in close harmony to improve trade conditions.

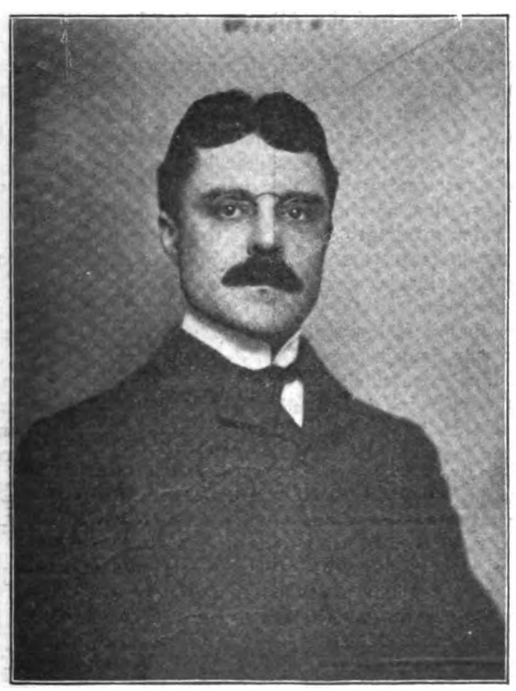
WILLIAM H. TAFT,
Secretary of War.

The toastmaster, in introducing the next speaker, said:

"Through the fortunes of war there came into our possessions a great Pacific Archipelago. To us it was a new and untried responsibility. The lamented President McKinley, in consulting with a close friend and adviser, told him as to the kind of man he wanted to send as the governor to Manila. Judge Day

Digitized by Google

promptly replied: 'Mr. President, the man of men is Billy Taft.' Such he was and is called by his friends and admirers at his old home. The post was tendered, and sacrificing most cherished ambitions, he accepted the trust. 'Peace hath her victories no less renowned than war,' and in the annals of our country there is no brighter page than which tells of the administration of the first American governor to the Philippines. He honors us by being with us to-night and will respond to the toast, 'Our Country.' I have the honor to present you to the Secretary of War, Hon. William Howard Taft, of Ohio."



As he arose to respond, the secretary was greeted with tumultuous applause, the entire audience rising. He congratulated the guests and the associations on having met in such a beautiful spot as Hot Springs, the Southern Hardware Dealers and Iron Manufacturers on their growing prosperity. He said Birmingham was challenging the supremacy of Pittsburgh; that Atlanta, Galveston, New Orleans, Pensacola and other southern cities were becoming sharp competitors for the business of the Northern and Eastern cities, but that the North did not begrudge the prosperity of the South.

Referring to the subject assigned to him he said that it was freedom of individual effort that had made the marvelous prosperity of the United States; that the freedom of opportunity enabled men to rise from obscurity to positions of prominence and to become leaders of industry. The present is certainly a peculiar time; the great prosperity of the country added to the general confidence, without regard to party, in the president of the United States, Theodore Roosevelt, has created an era of good feeling in politics.

Referring to matters in which the people might make progress he expressed the hope that by legislation discriminating in railroad rates, boycotts and other abuses could be remedied.

Our foreign relations are in a very interesting state; the Russian-Japanese war had reached a point where all hoped for a return of peace. The attitude of the President of the United States is well known upon that subject; he is anxious, if he can be sure that both parties are willing to accept his good offices, to bring the belligerents to a conference which may lead to a conciliation.

The speaker referred to the relations of the United States with China and said we were now engaged in trying to make an ar-

C. W. ASBURY,
Vice-President.

rangement with China which shall not be as unjust to China as the present practice under the Chinese exclusion act; that China looked toward America as her nearest and best and least land-grabbing friend; that in seeking that enormous Oriental trade that there is in the 400,000,000 of China, we should not do something we ought not to do; that in excluding the Chinese we should discriminate between the Chinese laborer and the educated classes of Chinamen; that we ought to make our treaty of such a character that it shall not subject Chinese merchants, Chinese students of high character, who come to this country to take away to China the best of our ideals, to insult and contumely merely to prevent a few hundred Chinese coolies from getting through the meshes.

Referring to the Philippines he said the American investor and merchant had not yet been taught to run the risk of putting his money a long ways from home; that he looked for a change in that respect and then the foreign investments of this country will increase as those of England have done. He said the Islands would become a credit to the United States if we follow the rule which McKinley laid down that we must deal with the Filipinos for the benefit of the Filipino; that we must let in the products of this country into the Philippines free.

WM. M. PRATT,
of the Executive Committee.

He said there were many other things in this country that needed remedying. One of the first things, in his opinion, is reform in the administration of criminal laws in the United States; the reason for lynchngs can be found in the delays in the administration of justice. Another matter needing reform is the divorce laws in the United States.

He closed his remarks on questions of reform by referring to the low salaries paid to officials in the United States. He said salaries should be paid that would tempt capable men to accept office. He said there were problems before the people to be solved, but that we could rest assured that with a people as courageous, as energetic and as resourceful those obstacles will be overcome and the progress towards the highest ideals will continue.

The secretary was frequently interrupted by great applause and was given a genuine ovation as he closed his address.

Senator Carmack in responding to the toast "The New Century," gave his audience a genuine oratorical treat. He opened his address by referring in a humorous manner to Secretary Taft and "the lid," and stated that he wished to object most emphatically to the idea of nominating the Honorable Secretary for our next President, as to his mind he was entirely too popular, at the same time, "if the country is to be inflicted with another Republican president he would think that the Lord had again tempered the mind to the shorn lamb if that next president was Mr. Taft."

The Senator's address was in theme a ringing prophecy that the new century would bring about a reign of peace, that war would become a matter of history only, and that universal peace would be brought about by the progress of industrial science. He said that every forward step in this matter is one to increased effectiveness in tools and implements or in the skill in using them. The machine is the great central factor in the new civilization, the hammer is mightier than the sword, the American Republic is not in vain, Christianity is not in vain.

His closing remarks were a glowing tribute to the enterprise of the South and its love for the flag of the whole country.

The audience evidenced its appreciation of the Senator's splendid address by rising to ts feet, as he took his seat, and making the air ring with cheers and applause.

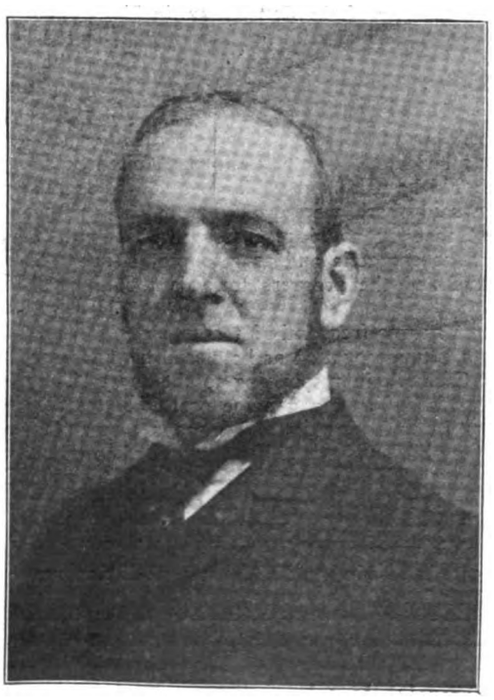
George T. Oliver, of Pittsburgh, in responding to the toast, "The Evolution of the Manufacturer," sketched the history of the iron business from the time of Tubal Cain, the original

Digitized by Google

worker in iron, undisturbed by strikes or lockouts, jobbers or middlemen, through the upgrowth of the business to the present day of great combinations. In speaking of combinations, the speaker said: "They are the chief industrial factor: A fact existent, insistent and militant combinations when conservatively handled act as a conservator of prices, but that the unchecked power to control prices is inimical to public welfare and should exist only under government control.

The combination, properly handled, will become a potent factor in the forward march of our industries.

W. B. Belknap, of Louisville, Ky., in a particularly happy vein sparkling with wit, spoke of



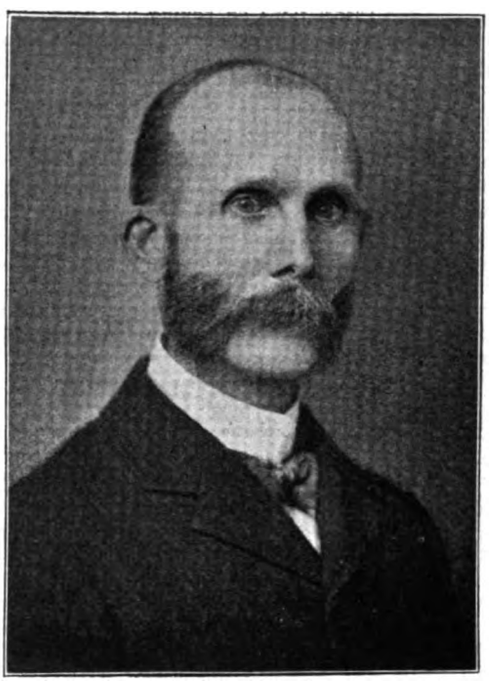
THE EVOLUTION OF THE JOBBER.

When I was at college in the sixties the bare word "evolution" still had its terrors for the orthodox. Huxley and Herbert Spencer might indulge in its use and pass on to perdition, but Agassiz at Harvard and Dana at Yale could no more bring themselves to swallow the theory as then propounded, than the average Socialist of to-day could advocate the methods of the Standard Oil Company. It demolished the existing accepted beliefs as to the creation of the world, and the fossils found on the everlasting hills were to no longer prove the absolute reality of the flood and Noah and the "Ark of gopher wood pitched within and without," which only goes to show how rough the seas through which it sailed; and that was long before the days of its appropriation by college students as a theme for roundelay and chorus. These same fossils had served their purpose from many a pulpit and for many a year as proof positive of the deluging waters, for whoever heard of an oyster climbing a mountain peak? But the theory of evolution was promulgated to stay, and the bivalves had to fairly turn over in their Devonian and Silurian beds, and present an entirely fresh side to science and its votaries.

We are all of us in these later days more or less familiar with

THE ADAPTATION OF EVOLUTION

to everything in nature, science and art, and the suggestion of it as the key to the enigma of life no longer makes us quake. If we start with the simple amoeba, little more than a rudimentary gelatinous stomach, and come up through the comparatively highly developed and radiating sea urchins and star fish, we are bound to keep on and later progress through the tortuous channel of fishes, birds, reptiles and inferior mammals until we arrive



W. B. Belknap.

at our immediate progenitors, the ourang-outang and the gorilla. It is a fit theme for verse, and has been so used. I think those from a Louisville Yale man express the idea as well as any.

But after we have reached this age of man, to say just what the original Hardware dealer or merchant looked like, what he kept and sold, bartered and traded in all, how he did it, how far back in the centuries his root had struck in the soil—that is a question. I find myself at once in the predicament of the English Lord accused of drawing on his imagination for his facts, and his memory for his wit—and my memory is very poor at best.

THE PRIMEVAL HARDWAREMAN

from whom we have evolved the cultivated, many sided, suave, intellectual, attractive gentleman of to-day, known as the Hardware jobber, what did he look like on week days and when he was decked out for Sunday? Did he get his own sheepskin off the back of the sheep in those days so that his B. A. was a palpable contraction of B-a-a? Was his daily meat locusts and wild honey as in the prehistoric wilderness his prophetic eye glanced down through the paths of the ages made straight thereby? Whatever we may be in doubt about we know for certain that his Sporting Goods Department was the first one to open in

J. D. Moore,
of the Advisory Board.

the morning, and not with such effeminate toys as Winchester and Stevens put up for us to test our skill with on moving targets or empty bottles, but with substantial axes shaped from granite, and arrow heads from flinty spalls; and slings which bespoke a flight of smooth stones from the brook. The croquet mallets of those days were for tapping your adversary on the cranium to the intent that he should never assay another wicket. Hunting the hairy mammoth or the five-toed horse of

THE GLACIAL WORLD GAVE HIS CLIENTS PLENTY TO DO,

and the boys inside must have worked overtime. But he has left us no record of the prevailing discount on double pointed tacks, so that it is impossible to say whether or not the special extra 10 was then in vogue.

After him came the artificer in bronze. The old stone stock was put on the job table and no knives, spearheads, hand mirrors or shields that did not bear a genuine Pompeian green trademark (see the Metropolitan Museum of New York in confirmation), could be fairly counted in the profit bearing lines. Much of this stock was, I am persuaded, bought by the more provident people for the express purpose of burying beneath the surface of the earth for the benefit of future savons and collectors, also to give R. & E. Yale & Towne, Corbin *et id omme genus* hints as to color for 20th century escutcheons and door knobs.

Possibly it is best not to try to deal with affairs too remote, but to come down within the limits of our own memory. I recently heard President Eliot speak on certain educational topics. He seemed to find his only safe-ground in what he had seen for himself during his thirty-five years administration of Harvard, and accordingly dealt with that exclusively instead of stretching our imagination by stories of what had gone on before or gone on elsewhere. So following his worthy example, let us take up

THE HARDWARE JOBBER AS SOME OF US KNEW HIM

forty or fifty years ago and compare him with his fully evolved descendant of the 20th century. To begin with, his chief boast and title was that of Importer by reason of the fact that so little Hardware originated in this country, that his shelves willy nilly groaned under foreign brands. Files, rasps, nails and horse nails were all in English or German wrappers. It is only a few years since French Wire Nails were the only ones to be had in seaport towns at least, and it did not occur to him, our jobber in transit, that he would ever be independent of English

Digitized by Google

artisans of Sheffield and Birmingham, or of German forgers of Solingen and Chains, both coil and halter, chisels, bars of steel and knives it would have been idle to mark "Made in England or Germany," for we knew that they were necessarily made there.

The demands of our country were primitive and small, and the Hardware jobber's stock comparatively light. He relied as it were on anvils and grindstones to hold it down. Now with the ever increasing civilization and wealth, wants multiply and a Hardware stock is of infinite variety, and moreover pondering to our national vanity, it is nearly all of domestic manufacture, the saws, the shovels, the nails, the hammers, hammerless revolvers and guns, scales and rails, all are our own made, thank heaven, in the United States.

Besides other bits of cheer, he was always being reminded that there was really no use for him, no room for him, that he, the middleman, was going to have the breath squeezed out of him, between the manufacturer and the dealer.

THE RLALIZATION OF THIS PREDICTION

has like the milennium been postponed from time to time for a more convenient season. Whether it is from being in the middle and getting more or less of animal warmth from those on either side as did David in his old age, or whatever it may be, he is to-day just as surely among the quick as he ever was. His talents are fully employed with "Injuns" on the upper road and death upon the lower, but he drives the old coach and four with the same assurance of being able to keep in the middle of the road, same as any long-haired populist. The very fact that his way has been difficult is what has developed his resources. In every community, the prominence of the Hardware jobber as a social and civic factor may be noted. It is true he has been remonstrated with because of his wide range of merchandise, but he has gone on developing despite these remonstrances, and like the Latin philosopher may now declare, as he turns the pages of his unabridged catalogue, *nihil humani alienum puto.*

And what must the jobber of to-day be and know? A few, very few years ago, his main qualifications were to occupy with recognized, comfortable distension the revolving chair of the general buyer while his roll top desk looked to have that full feeling to relieve, which up to them no nostrum had been invented. In a clip under all was the insoluble residue—each of us knows what that is.

THE IDEAL JOBBER OF TO-DAY

is the man essentially who selects his help, and educates and refines it while he keeps on learning himself; one who can read results in ratios and draw significant deductions. (He must scan many papers and delve into the best). He must hold such high standards of conduct that not only those who are numbered among his own employees, but those who come in casually as salesmen or callers, shall go away imbued with respect if not inspired. He must have good will for his fellow jobbers, larger or smaller in their scope as the case may be so that whatever surplus he lays by shall bear no taint of covetousness or unfairness in it. He must know how to write a letter that buoys up his sometimes weary traveling salesman or wins a customer. He must be a judge of art lest his advertisements fall flat, for with all his lofty aspirations, he must reckon with the printer's devil. A press bureau all his own is as near an essential feature as anything that can be named.

He must have order in his stock so that very item may claim its own of space and no more, and so that they who handle the packages shall have the right sort of respect for them and their contents. He must study the comfort of his employees so that each shall yield his best for the common cause, yet, none be overstrained mentally or physically, and that none shall be subjected to degrading influences in association that he can prevent. All should go home in the evening better and stronger than they came in the morning. He must

STUDY THE PROBLEMS OF TRANPORTATION,

so that in his calculations neither coming or going, shall he be undone. He by degrees establishes a basis of credits born of experience and trained judgment adapted specially to the section of country in which he operates, and incidentally he may train into the right path the banking novice of the country town.

He is expected to assist the community in which he lives by taking a leading part in civic betterment. If he is to be the citizen of no mean city, he must lend his aid to the end that there are no mean Hardwaremen in it.

He must qualify himself to debate the points of order between the retailer and himself with an inclination to do the liberal thing at all times, and protect the interests of those who have proved themselves his loyal customers. In short, he must belong as President Eliot declares the merchant of to-day ought and does—to the learned liberal professions, and as much to be had in regard for attainments and influence as he who wears a doctor's gown or an attorney's wig, for with him are the issues of intelligent distribution to the advanced needs of his most humble and most exalted fellow men.

In introducing R. R. Williams, the toastmaster paid a tribute to the Trade Press of the Hardware business and spoke of its great help to those in the trade. Mr. Williams spoke briefly, but in his usual charming manner. He said that the trade press as it exists to-day is distinctly an American product; that in that line American thought is absolutely supreme. In his closing remarks the speaker quoted three maxims. They were: "The best reward for work done is more work to do." "The best dream is to keep wide awake," and Kipling's "They asked me how I did it—I gave 'em the Scripture text, just keep your light shining a little ahead of the next."

F. A. HEITMANN,
of the Advisory Board.

WEDNESDAY MORNING.

The Manufacturers' Association assembled in close executive session at ten o'clock. Admission to this session was regulated by cards that had been issued by the Credentials Committee. On previous occasions no such precautions had been taken and as a result speeches that were made were so guarded in character that little that was of real import could be accomplished. At this session all members, being assured that only members were present, spoke their minds freely and it is certain that if this policy is continued, more material results may be expected from the manufacturers' organization.

After the transaction of certain routine business the question of Jobbers Special Brands was taken up and the report of the committee of nineteen read and discussed.

As the result of the discussion on the committees report the following resolutions were adopted.

"SPECIAL BRAND" RESOLUTIONS.

To the President and Members of the American Hardware Manufacturers' Association.

Gentlemen:—Your special committee of nineteen members, to whom was referred the matter of jobbers' special brands, having unanimously adopted the following report, respectfully submit the same with the recommendation that it be adopted by the association.

Investigation leads to the conclusion that at the present time manufacturers of Hardware confine their business largely to jobbers. Many manufacturers in other lines of trade sell their products extensively to retailers and consumers.

As an association we have favored the policy of distributing goods chiefly through the jobbers as being the most favorable method for the trade at large, provided the reputation of the manufacturers and the preferences of the consumers are fairly considered.

Digitized by Google

In the last few years, however, there has been a growing practice on the part of many jobbers, whereby they stipulate that the manufacturer's name shall not appear on manufactured articles which they purchase, but in lieu thereof that the jobber's name, with some special name, brand, or device, shall be placed upon the goods. It is further required by these jobbers that the name distinguishing such brand, as well as the brand itself, shall be used only upon the goods of the jobber first adopting such name.

The practice of using jobbers' special brands results in an increased cost to the manufacturer, for which some one must be the loser.

There are many jobbers who, as the result of slight concessions in prices, given by a competing manufacturer, and with no reasonable assurance of a maintenance of quality or of improvement therein, have their goods of a given kind made by various manufacturers, so that the goods bearing such jobber's brand, of necessity cannot be expected to be uniform in quality.

The obvious tendency of this practice, and especially if it be adopted as the result of competition in prices, is deterioration in quality.

Manufacturers are generally willing to stand behind the jobber or any other purchaser on the quality of their goods bearing the manufacturer's own established brands. Jobbers guaranty against some articles which bear their private brands, yet it must be apparent that the inferior quality of a knife, saw, carpenter's tool, or other article of Hardware, does not necessarily imply such a defect as would be covered by an ordinary guaranty, for the reason that an article may be of inferior quality and yet not be defective.

The best articles should not only be free from defects, but should be made from the best quality of materials and workmanship, and worthy not only of the recommendation of the merchant, but also worthy of the name and endorsement of the manufacturer.

We believe that knowledge as to who really produces any article may be of value, not only to the person who will use such article, but also to the retailer who sells it.

If an article bearing a manufacturer's brand has proven to be of excellent quality and in all respects very satisfactory, and the buyer desires to secure another of exactly the same character, he may do so from the merchant who furnished the original, or possibly through another merchant, and in either case with the assurance that it is of like quality and pattern as the original. If an article under a jobber's brand has proven unsatisfactory, a retailer has no assurance of obtaining an article of better quality under another jobber's private brand, for the reason that both may have been made by the same manufacturer and of like quality, and this for the reason that manufacturers who make special brands are compelled to put out the same grade of article to many jobbers under their many private brands.

A jobber may without serious loss discontinue the use of any of his many brands on any given line of goods, in case the reputation of such brand becomes impaired, but "A manufacturer who has built a reputation on his goods knows its value as well as its cost and will maintain it."

The younger and smaller factories under the system of jobber's special brands, can have no hope of establishing for themselves a reputation, as was done in former years by some manufacturers whose goods have become favorably known as the result of honest work and good material. There is, therefore, under the present system of using special brands, but little stimulus which would lead manufacturers to make goods of the best possible quality such as are desired by intelligent consumers.

We are compelled to report, as the result of a full exchange of experience with representatives of the various branches of manufacturers composing this association, that, in our judgment, the practice now pursued by many jobbers, by which their goods are made under private brands (and in fact the present methods of marketing these brands which is pursued by many jobbers), is not for the best interests either of the manufacturer, the merchant, or the consumer, as nearly all jobbers admit that their chief reason for requesting special brands is because they can make a greater profit thereon, freeing themselves from competition, often buying a second quality and selling it under a private brand as a first quality. On the other hand, a manufacturer with an established reputation will not allow his name to appear on anything except his best qualities of goods, using brands without the factory name for lower grades.

A few months ago a number of Hardware manufacturers were selling their own established factory brands of various grades and in considerable quantities through the so-called catalogue houses, the goods going from these houses direct to the consumers. As the business of these houses seemed to be reaching immense proportions, a committee of Hardware merchants requested various manufacturers to discontinue the practice of furnishing these houses with their wares.

Some of our members, however, claim that the refusal of the manufacturers to sell these catalogue houses will deprive many consumers of the only means of obtaining goods bearing the manufacturers' brands, unless the manufacturers will sell to the consumers direct, which policy the manufacturers as a class are disinclined to adopt. They also claim further that it will deprive the manufacturers of an important avenue of distributing staple brands and in quantities fully equal to that purchased by many large jobbers.

We desire as far as practicable to co-operate with the merchants of the country by distributing our products through "the avenues of trade" which the Merchants' Associations have frequently prescribed as being the ones that they would wish us to follow; but if we abandon all other avenues of trade, except the one wherein the jobber becomes practically our sole distributor, and if we permit him to establish and in many cases lower the grades and eliminate our names, we sink the individuality and reputation of hundreds of manufacturers representing long experience, great investments and the highest skill, and we believe such a policy will not best serve the interests either of consumers or of retailers. With this condition it will be impossible long to restrain many manufacturers from selling through such

ROBERT GARLAND,
of the Credentials Committee.

channels as will carry their own best goods to the consumer. A fair consideration of this subject by jobbers and retailers will greatly aid in solving the problem.

We therefore ask the Southern Hardware Jobbers' Association now in session to consider the question, whether or not the sale of standard factory brands, in preference to the enormous multiplicity of irregular private brands would not also be to their advantage. We invite this consideration with the assurance that we certainly can and do furnish similar goods with special brands.

Many jobbers do now preferably sell manufacturers' brands. Some doubtless have adopted the use of private brands in view of the possibility that if an article bearing a manufacturer's brand proves to be highly satisfactory, or profitable to the retailers and consumers, such persons may seek to deal direct with the producer. The present policy of the manufacturers should certainly remove this fear if it exists; but we believe that the use of jobbers' private brands is calculated more than anything else to drive the manufacturers to a more direct distribution of their goods.

Such merchants as will assist in the mitigation of this evil by handling regular manufacturers' brands will receive our most cordial support and co-operation.

JOBBERS SESSION.

The Jobbers Association came together again at 9:30 and immediately took up the subject of "Restricted Prices."

This discussion was opened by

Digitized by Google

W. W. WEBBER

of Webber-Ayres Hardware Co., Fort Smith, Ark., who spoke as follows:

I feel perfectly secure in the position I shall take here to-day. I believe that a restricted or minimum selling system is the most feasible, satisfactory, and profitable method of handling goods, not only for the jobber, but for the manufacturer.

I received my early business training in a wholesale grocery house where we had the restricted prices on a number of articles and my observation was that where we were limited to a certain selling price we made some money though the per cent. of margin was not at all times satisfactory. During my six years in the Hardware business my experience has been the same and I dare say has been the experience of every man here to-day.

Is the restricted or minimum selling system a deterrent to price cutting? It is, most emphatically, provided the manufacturer is sincere in his work and will enforce his regulations. The old phrase "Humanum Est Errare" is just as potent to-day as when spoken in the heavy centuries of long ago and just as true, and no manufacturer need think the simple promulgation of a minimum selling system will constitute his entire work. When he

W. W. WEBBER.

undertakes it he may expect to find that all who handle his goods are not like Caesar's wife, but that here and there are those who will seek an advantage by lowering the price, but

A VIGOROUS POLICY WILL SOON CORRECT THE EVIL.

I am promulgating no new fact when I say to the assembled gentlemen here that we are handling poultry netting, scale beams, horseshoes, traces, steel goods, nails, wire, roofing and sheets at ridiculously low margins, and sometimes at no margin at all, whereas if we had a minimum selling system backed by people who would enforce it we would be compelled to realize more than we do now. Each of us would feel that we were on a parity with all the others, hence the incentive for price cutting would be minimized if not in time eradicated. We would then be put on our mettle as salesmen, and business men, there would be a feeling of security in the price made and I think the margin of profit would improve all along the line. I realize that some of the articles named and others not mentioned cannot be brought under the plan because of the promiscuous manufacture, but I think we should ask that it be done where it is clearly apparent it can be done.

I do not think any manufacturer who is in position to put the system into effect will decline to do so when he must realize and concede that the plan is feasible and is working in many instances. They should and I believe do appreciate the soundness of the doctrine that their prosperity

DEPENDS LARGELY ON THE PROSPERITY OF THEIR CUSTOMERS,

that the augmentation of our fortunes means the expansion of theirs, that we travel hand in hand to success or failure, and rise or fall together.

The manufacturer is dependent largely upon the jobber for the distribution of his product and his every thought should be toward building up first class relations with the jobber, protecting him in every way possible, seek to put him and keep him on a basis where he can prosper by the exercise of ordinary prudence.

The listing of a manufacturer's product may require a great outlay of work and some expense on his part, but in time he will be repaid in knowing he has a satisfied list of customers who delight in putting his goods at the front.

If any of them conclude to meet our views and embark on the plan let him understand that he

CANNOT HOLD WITH THE HARE AND RUN WITH THE HOUNDS,

cannot make fish of one and fowl of another, but must hew to the line irrespective of the man or volume of his business. There is nothing that so hampers a limited price system, nothing that renders it so surely and certainly abortive and useless as for those whose duty it is to enforce it to be guilty of a halting or hesitating policy or to play favorites as is often done. "I'd rather be a dog and bay the moon than such a Roman."

If we succeed in prevailing on even one manufacturer to adopt the system let us give him to understand that we want a plank in his platform as broad as a boulevard and as long as a turnpike to the effect that whosoever is caught in willful premeditated violation, with malice aforethought and deliberate intention and as the lamented Judge Parker of Arkansas, was wont to say "With a mind fatally bent on mischief," he must walk the plank, and I trust that every jobber here can heartily say "Them's my sentiments." And too we must ask that we be consulted concerning the margin of profit the price will carry.

We of the South and Southwest must have a larger margin than is looked for or expected in the North and East. With us we must show our stockholders at least ten per cent. in dividends, whereas smaller returns are satisfactory elsewhere. The further you get from manufacturing centers the larger must be your capital if you hope to keep your assortment intact, hence we cannot work under as small per cent. as can a dealer who can draw frequently and quickly his supplies. We have to anticipate our wants considerably ahead of the time we need them, because we

N. A. GLADDING,
of the Entertainment Committee.

have delays incident to all shipments and numerous annoyances unknown to those in close proximity to the centers.

Therefore in making up the selling price we want them to consider that we have to pay for our goods days and weeks, and some times months before we get them, that to do this and carry a respectable assortment we must have an abundance of capital which must yield good returns or there is a hiatus in the business. I have devoted considerable thought to this question and I have had expressions from some of the brainiest men in the association and they are all in support of the plan.

IT IS CERTAINLY WORTH A TRIAL

and if we meet with failure and disaster we are in no poorer condition than now.

It quite frequently happens that the profit bearing qualities of an article become so poor and the sale of it so distasteful to a dealer that he endeavors to curtail the sale of it, and if we all come to the same way of thinking there will be a curtailment and the manufacturer will feel it the first of all—hence is it not the part of wisdom for him to ascertain and anticipate the wants

Digitized by Google

and needs of his customers and endeavor to meet their views while he is yet in the hey-day of prosperity.

A WISE MERCHANT OR MANUFACTURER SCANS THE HORIZON

and takes the temperature of his business just as far ahead as the human faculties will allow and if a squall is looming up and it appears there will be "something doing," he adjusts his rigging to meet it without waiting for it to administer a broadside unaware.

There will be no appreciable curtailment felt because of an article being placed on the limited plan. The increase in the selling price will be nominal, and the retailer will be able to get his usual per cent. of profit. The jobber will get a fair return for the energy and effort put forth, the manufacturer will have a host of contented and amiable customers.

I have tried to point out some of the benefits to arise hereunder and have indicated something of my idea of the "Modus Operandi," but I am open to conviction (provided you don't give me over ninety days), and I want to invite a full and free discuss.on of every conceivable phase of the case.

I do not see any objection to the plan, but since infallibility is not one of my virtues or accomplishments, I want to be enlightened further. I may be chasing a foolish rainbow or following an Aurroa Boreal.s into the bog of makebelieve, I may be afflicted with all the isms in the category of ills and need a guardian to direct my thoughts and pen out the good to come from the restricted price plan has impressed me and I believe in it.

We have found that it does work on some things, then let us now conclude to present a united front in asking for the plan where we by our experience know it is feasible and I believe success will be ours. I fear that unless we ask for the plan we will never get it, because it is regarded by some as an innovation and something they prefer to let alone if the movement be left to them.

I DO NOT THINK WE SHOULD BE DRASTIC IN OUR DEMANDS

or arrogant in our demeanor, but in a lucid, cautious and friendly way point out our needs and fortify our argument with all the data possible. Our progress may be slow and the ends accomplished few, but if we succeed during the next year in having listed just one of the prominent articles our work will not have been in vain.

We must not expect to accomplish all this good by a simple twist of the wrist nor hope that our "Ipse Dixit" be accepted as a matter of course. The other fellow must have his day in court, we may expect demurrers to the jurisdiction and motions to dismiss at the cost of the plaintiff. We must have a committee in charge of our interests, if we ever reach that point, who understands the situation and who, after the underbrush has been cut away, will be found on the firing line doing business at the old stand.

This is

ESSENTIALLY THE AGE OF CO-OPERATION,

the very air is full of it. There was a time when a big and brainy, forceful and fearless man could map out his own course and construct his own fortune while standing absolutely alone, but in these days of "Frenzied Finance" when every man you see is camping on the trail of the Almighty Dollar with a persistency born of insatiable greed the very best and ablest must call into service every available force or go down in the maelstrom of defeat and disaster.

I thank you gentlemen for your attention.

The next subject taken up was "Increasing Expenses and Decreasing Profits." The opening address was made by

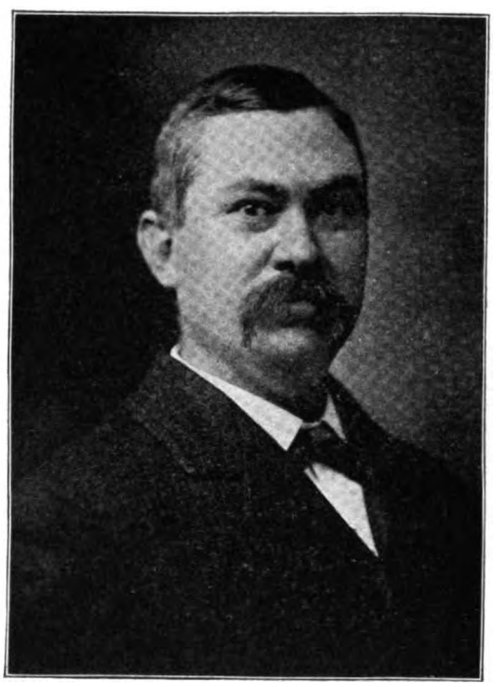
R. M. DUDLEY

of Gray-Dudley Hardware Co., Nashville, Tenn., who addressed the convention as follows:

"INCREASING EXPENSES AND DECREASING PROFITS."

This is certainly an easy proposition for the manager, if he is not troubled over the disappearance of his original investment. The primary meaning of the word "profits" is gain above cost; the question naturally arises, What is cost? I take the position that cost is the amount you pay for the goods, plus the expense of doing business.

I am fully aware of the fact that this question of cost of goods, as well as the question of Profit and Expenses, are old subjects, and have been worn threadbare in this association, but this question of cost is one that should be kept prominently before all of us, is my only apology for mentioning it in this connection. The question of percentage of profit, volume of business and expenses, should go hand in hand.



The expense of conducting a wholesale Hardware business has steadily increased for many years, while

THE OPPORTUNITIES TO GET A PROFIT

seem to have decreased. All will admit, therefore, that it behooves us to watch these matters with an eagle eye. Twenty-five years ago, when I first went on the road as a traveling salesman working the small trade on and off the railroad, the customary price of a meal's victuals was twenty-five cents, and the price for staying all night with a horse and buggy was $1.00—the average price of a meal's victuals to-day in the same territory is not less than fifty cents, and for staying all night with a horse and buggy it is never less than $1.50. Only a few samples was carried, and a horse and buggy were all that was necessary. The rivalry of houses and strong competition have made it necessary to carry a larger amount of samples, a larger catalogue, and a horse and buggy is hardly sufficient, so two horses and a driver are more frequently used. It is not surprising, therefore, that instead of our traveling men calling on us for $15.00 per week for traveling expenses, they are asking for from $25.00 to $35.00 in the same territory where $15.00 was considered sufficient a quarter of a century ago.

THE EXPENSE OF LIVING IN CITIES HAS BEEN GROWING GREATER

all the time; it has, therefore, become necessary to pay larger salaries to bookkeepers, stenographers, shipping clerks, receiving clerks, stock clerks, etc., house rent, insurance, and, in fact, everything seems to be higher, except the percentage of profit. I would mention the increase in the rebate and returned goods

R. M. Dudley.

account, but I do not want to bring up an unpleasant matter.

I think I am speaking conservatively when I say that the expenses of conducting a Hardware store have increased since I have been in the business, 25 per cent all around. I mention all these things to emphasize the necessity of making a profit. I am not one of those who considers himself wise enough to conduct a business in such a way as to do an immense volume of profitable business, and with an increased volume reduce the percentage of expense to almost nothing. If you will leave out the word "profitable" in the above statement I think I can fill all of the other requirements.

I have mentioned in detail these increased expenses, in order to more strongly

EMPHASIZE THE NECESSITY OF MAKING A PROFIT.

I am unable to suggest any way that the expenses can be materially reduced. To get good service you have to pay a good price, and to get suitable quarters in which to conduct your business you have to pay good house rents, etc. To make any money it is absolutely necessary for the gross percentage of profit to be greater than the percentage of expense of doing business, as both are estimated upon the sales. If your percentage of expense of doing business is 12½% of your sales, and you sell goods at a profit of 12½% on sales, you have made money. It would, therefore, appear that the all important question is—how can we make a percentage of profit in excess of the percentage of expense of doing business?

There are many ways in which we should be able to make a profit, if our business is a legitimate one. In trying to advance ideas on this subject to the members of the Southern Hardware Jobbers' Association, I feel that I am undertaking to carry "Coals to Newcastle." In fact, my only idea in the outset was to, if possible, impress upon you more fully the necessity of making an increased profit.

IT IS EASY FOR THE MANUFACTURERS TO MAKE A PROFIT

on a line of goods, where only two or three men are engaged in

Digitized by Google

what is a legitimate profit, and what percentage of profit they are entitled to—ask it, and get it; but where there are a very great number of houses from different cities contesting for the same trade in the jobbing business, it is very difficult to formulate any understanding of this character.

The competition in the jobbing Hardware business for many years has looked like a race that would result in the survival of the fittest. The advice that we have given our salesmen in selecting and soliciting business is not to push the sale of unprofitable goods, such as do not bear a sufficient profit to cover the expense of doing business! Do not slight the small things—they pay a better profit sometimes than the larger ones. The best profit salesmen always have goods of this kind on every order. A salesman who cannot give his time and attention to the sale of small articles in profitable lines is too busy to succeed on the road. Some salesmen claim that their customers do not handle many shelf goods—that they only handle an unprofitable line of goods. I take the position that this is largely the fault of the traveling salesman. If he will make the proper effort, he can induce the customer

TO CARRY A LINE OF SHELF HARDWARE

and profitable articles, and if he follows it up carefully after selling the customer the goods, and looks after the customers' interest, as well as his own interets and that of his house, he will see that the goods are kept nicely displayed and worked off in due course of trade, and usually the customer will be ready on the next trip to give another order for the same line of goods, possibly adding other articles of a similar character, since he has found that they are profitable to handle.

A SALESMAN SHOULD PUSH THE PRIVATE BRANDS OF HIS OWN HOUSE, which will make him both money and reputation; usually the house has established prices on these goods, which pay a reasonable margin of profit, above the expense of doing business. It is, of course, understood that private brands should be all high grade—no reputable house could think of offering anything else. A salesman should strive to do these things, and, as an incentive, the house should let the size of his check at the end of the month depend upon the amount of net profit which he has obtained during the month.

The greatest demoralization in jobbers' prices is caused by one jobber meeting the price of another, when he in reality does not know whether the other jobber has made the price or not; he has only heard that he has, and in nine cases out of ten

HE IS MEETING AN IMAGINARY PRICE.

If every jobber would make his own prices and maintain them, independent of everybody else, and in doing so have in mind the percentage of expense of doing business, all the jobbers would make money. This is the best suggestion that we can offer. Every jobber is entitled to a reasonable return for the capital invested and the effort put forth, and we believe in this way he can get it.

WEDNESDAY AFTERNOON.

JOINT SESSION.

At 2.30 the members of both associations gathered in joint session in the ballroom of the Homestead, with President Birge, of the Maunfacturers' Association, in the chair.

In order, as he said, to divide the responsibility of the position Mr. Birge called to the chair, Vice-President Asbury, who at once introduced Samuel Spencer, president of the Southern Railway, who spoke in part as follows:

"One of the most important elements in the growth of the South for the last twenty years has been the development of large and efficient systems of railway transportation, their systems taking the place of the small, disjointed units which served only local communities.

"Without detracting from the importance of any other element in the growth of this great section, which now promises to be among the wealthiest of the country, it is not too much to say that without this development of transportation on broader lines, cooperating for greater usefulness, that growth could not have taken place, and unless those transportation systems, and such others as may be created, are financially able to do their part in the future, the rich and varied civilization that is before the South must be retarded.

"The average price of transportation in the South to-day is less than it was in 1895 and such increase in prosperity as the transportation interests have been enabled to obtain has been made possible only through increased economies due either to larger investments or to the securing of a greatly increased volume of traffic.

"This necessity for the growth of the transportation business to keep pace with the development of the country has not been, and is to-day not fully recognized. The shipper and the carrier have unconsciously and unavoidably drifted apart, possibly neither understanding nor appreciating as he should the position of the other.

"It has been asserted that the Esch-Townsend bill which passed the House of Representatives at its last session would provide only partial remedial legislation, because it seeks to grant the commission with power not to make rates, but to correct an unreasonable rate, and yet it is a significant fact that at the recent hearings before the Senate committee not a single member of the Interstate Commerce Commission nor a single advocate of the rate making power for the commission has endorsed that bill. Practically every witness who appeared on that side of the question suggested grave defects in it. Is it moderate remedial legislation to grant a power to correct one rate, when the same tribunal, in attempting in the past to exercise such power, has ordered two thousand rates reduced in one order? Is it moderate remedial legislation to provide that when a rate has been put into effect, that the carrier shall have no power thereafter to change that rate to meet a change in commercial conditions? Is it moderate remedial legislation to provide that a decision of seven men at Washington shall name a rate or rates upon any commodity or commodities between any two or more points on the 210,000 miles of railroad throughout the entire United States, and that the rate shall take effect upon their decision alone prior to appeal to the courts without protection to the carriers against loss which must occur pending such appeal in case the court's decision should be in favor of the carrier? Has there been anything in the history of railway regulation since the passage of the interstate commerce act in 1887 which calls for such drastic procedure? Within that period, according to the interstate commerce commission's report, it has before it seven hundred and seventy formal cases. Of these cases only forty-five, or only two and one-half per annum, have become the subject of litigation—that is, have been contested in the courts by the carriers. Of this number not a single case of rates unreasonable in themselves has been sustained by the courts, and in only three cases have the courts sustained the findings of the commission in respect to rates unjustly discriminatory. Is this a situation which calls for such legislation as would be enacted by the final passage of the Esch-Townsend bill?

"That there is no necessity for such an unwise and injurious expedient is becoming more and more evident. The evils which have undoubtedly existed as a basis for the demand have been largely diminished, and over large areas of this country substantially if not entirely removed.

"It has been long admitted by those who knew, and it has been established by evidence in the recent hearings by the Senate Committee, that preferences between individuals as to special railway rates have almost, if not entirely, disappeared. The remaining charge, so far as any charge now exists as a basis for railway rate regulation, is the alleged unjust discrimination between sections and committees. This is but one form of the broad question with which you are so familiar, the competition between markets in contra-distinction to competition between individuals and firms. The existing competition between markets is most aggressive, and for the welfare of the country, it must remain so. It is effectively fostered by all transportation lines in the interest of the special communities which they serve. If a governmental commission should undertake to fix rates, and thus establish the relative competitive conditions between communities, the geographical position of each community must be carefully considered by that commission. Each of the striving communities will be entitled to equal consideration, and the natural drift of the commission's decisions would be toward mileage rates, and the establishment of limited zones of distribution from each manufacturing or jobbing center. The activity of the railway interested in the development of a particular center as against some other not reached by its rails would be gradually eliminated as a factor in the enlargement of that center's horizon of distribution. Much stress has been laid in recent discussion of this absorbing subject of governmental rate-making upon the necessity for the prompt adjudication of questions at issue between the shippers and the carriers. In support of the argument that a decision as to the reasonableness or unreasonableness of a given rate should be made effective by the commission prior to review by court, the long delays between the bringing of the complaint and the reaching of final conclusions have been cited. An examination of the record shows that the unnecessary delays have occurred in the proceedings of the committee itself. To meet this objection of long delay a bill was passed—The Elkins Law of 1903—which provides that the commission can summarily appeal to court, that the court shall have power to enjoin any unreasonable or any

Digitized by Google

unjust or discriminatory rate or practice, that the trial of the cause shall have precedence in the Circuit Court over all other than criminal cases, and that in case of appeal, the appeal shall be direct from the Circuit Court to the Supreme Court of the United States."

At the end of Mr. Spencer's address Chairman Asbury said:

"Without undertaking to consume the time of putting the question, I am going to assume the responsibility of expressing your vote of thanks to President Spencer.

"We have to announce that we have invited the Honorable Secretary of War, Mr. Taft to address us for a few moments upon this question this afternoon, and he has very graciously consented."

Irby Bennett,
Chairman Reception Committee.

The Secretary spoke in part as follows:

"I did not intend to indulge in the discussion of railway rates. It is a matter to which I have given more or less consideration. I cannot claim the detailed and technical consideration of Mr. Spencer, and with respect to which upon some details possibly more or less important I have reached a different conclusion, I first wish to congratulate the members of the Southern Hardware Jobbers' Association and all the men of the South, that they have had at the head of the most important railway system of the South a gentleman of the integrity, of the experience, and of the moderation of Mr. Spencer (applause) and if anything could make me doubt my conclusion with respect to the wisdom of the proposed legislation—of the Esch-Townsend bill—it would be Mr. Spencer's opposition. The truth is I feel like saying with respect to Mr. Spencer that we are old railroad men together. I had the pleasure at one time, while Judge of the United States Court, of appointing the receiver and directing the movements of the receivers—for there were a number of them who had to do that work that Mr. Spencer now does himself—for the East Tennessee, Georgia, Cincinnati, Southern and a great many other roads that go to make up the present Southern Railway System, and during that ten years of what might be called the burial and revival of railroads of that region it became my duty to sit in a number of cases arising under the interstate commerce law. Now, Mr. Spencer has said, and has said truly, that under the last interstate commerce law it was possible to unite, and is possible under the existing interstate commerce law—to unite the discussion of a great many rates, speaking generally, under the old system—the Esch-Townsend bill does not at all affect the old system, for there is nothing in the Esch-Townsend bill, if you will read it, that speaks of how many cases may be united in one. Under the old system generally the cases presented involved only one complaint or two complaints or three complaints—growing out of practically the same question of discrimination. Now, the Esch-Townsend bill does this: It provides, first that the tribunal which is to consider the question of rates will say, not only that a rate is unreasonable, but may say authoritatively to the parties who are to be influenced by that decision what is a maximum reasonable rate. It is possible that the mind can decide that a rate is unreasonable without the mind reaching a conclusion as to what a maximum reasonable rate is, but I cannot in my mind. In order to determine a rate is unreasonably high, you must take, it seems to me, logically in your mind what is reasonably high—that is, what a maximum reasonable rate is. Now, under the existing system the tribunal or the court says this rate of five cents is an unreasonable rate. A maximum reasonable rate is three cents. They order you to put on a reasonable rate. Under that order the company does not violate the order, although the court or tribunal, indicates what it thinks is a reasonable rate. If the company reduces the rate from five cents to four and one-half and you then desire to remedy what you regard as that abuse you have to go into the court again and have that pronounced an unreasonable rate, and so on down until you get to the three cents which the court thinks is reasonable. Now, as business men, as looking at the thing from the ordinary standpoint, as it is not true method? Is it not the just method, that the court in enjoining you from fixing an unreasonable rate should say and give a guide as to what is not only an unreasonable rate, but anything over and above 3 cents is an unreasonable rate, and therefore you ought to come down to three cents. Now that is one thing in the Esch-Townsend bill.

"The second thing it does to make the action of the tribunal prima facie, so that if that tribunal—and we must not assume that that tribunal because it is not an administrative tribunal, is necessarily an unjust tribunal. If this present interstate commerce commission have so become imbued with fanaticism that they want to destroy the railroads of the country, then abolish the interstate commerce commission and then put in a new commission—a commission that can be trusted to do justice between the railroads and the public and be able from constant acquaintance with the question to deal with in intelligently, and they can say, after looking the situation over that this rate is an unreasonable rate—that a reasonable rate is three cents—the railroads, on reversal of the decision could recover back by being protected with bonds or some other method—that is only a question of detail. But the

H. H. Beers,
Sergeant-at-Arms.

principle is that the order should be effective when those gentlemen charged with the duty, as you may say, say that such and such a rate is a maximum reasonable rate—that shall be effective until the railroad should go into court and show either primarily or finally by a hearing that that ruling is not correct. Now, what is going to be the effect of that—and we are dealing with practical questions or legislation? That has the effect of throwing the burden on the railroad and they call for a hearing or an injunction and the case comes up and is disposed of promptly.

"Another remedy of the proposed bill is that under the present system the railroads were in the habit of making a small showing when called upon by the interstate commission—they did not bring in all their evidence. They would say "Oh, this is not important—just let it go by default, and we will put in our

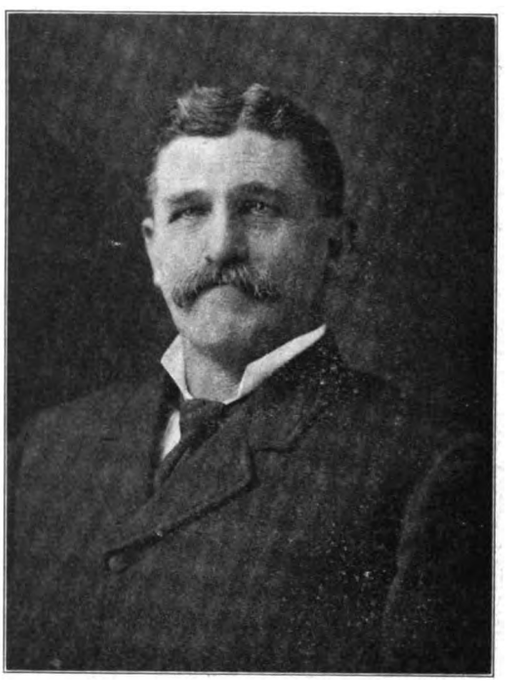
Digitized by Google

evidence afterwards in the court." The result was that in many cases the interstate commerce decisions are on an entirely different state of facts from the decision in the courts, and that was one of the reasons and the chief reason, I may say, why in the record which Mr. Spencer cites do many cases decided by the interstate commerce commission were reversed in the courts, because the railroads did not make their full case before the interstate commerce commission.

In conclusion Secretary Taft expressed the opinion that Mr. Spencer was frightened by a ghost as to what is going to happen if the present laws are changed. The Esch-Townsend bill can be modified if it needs some qualification, but something shall be done to remedy the defects of the present interstate commerce law and satisfy the public demand for some remedy in order that this thing shall not grow and grow until we have extreme remedies and certainly interfere with the railroads and which we will all deplore.

Chairman Asbury invited Mr. Spencer to again take the floor in reply to Secretary Taft.

Mr. Spencer said in the first place he wanted to disabuse Secretary Taft's mind of the idea that he was "frightened at a ghost," that the railroads had long since ceased to fear ghosts. He expressed the opinion that the railroads wanted to do what was fair and proper; that the railroads disavowed the claim made that they were occupying an obstructive position, but on the other hand they desired a full and free discussion of the question of railroad rates. He said that Secretary Taft must be mistaken in some of the conclusions he had reached. Mr. Spencer said that the first step suggested by Secretary Taft, that should the interstate commerce commission adjudge a rate as unreasonable, they should then proceed to name a reasonable rate which should immediately go into effect—he said that that first step under our law was distinctly a judicial question, and the question being purely a judicial one should not be effective until passed upon by the judiciary. He said that if the Esch-Townsend bill was carefully read it would be found to say, not that the commission shall establish a maximum rate, but that it shall



J. C. SPROULL.

establish an absolute rate and that that rate shall remain in effect for all time unless modified by the courts or the commission itself. Mr. Spencer said that out of over 700 cases passed upon by the interstate commerce commission there were but forty-five in which the decision of the commission was not acquiesced in by the railroads.

In reference to the suggestion made that the policy of the railroad companies was to make only fractional reductions in rates or technical reductions when an order was made by the interstate commerce commission for a reduction in rates, Mr. Spencer said that that had never been the policy of the railroads and would not be in the future. He said he did not believe that 1 per cent. of the railroads of the country or the railroad managers would take such action.

Mr. Spencer claims that the interstate commerce commission now had the power to take any case they desired directly into the United States Circuit Court for adjustment. He said there had not been a year since 1897 that there had not been a large number of cases in which the decision or the opinions of the interstate commerce commission with respect to those questions had gone absolutely into effect by consent; that they went into effect because the carriers on the one hand felt that they did not want to contest it and on the other hand it was considered good transportation business and that the parties making complaint had made a fair case. He said that at the late hearing before the interstate commerce commission committee of the Senate

R. D. WARREN.

there was an almost entire absence of specific, well-defined complaints on any subject.

In conclusion he said the position of the carriers was simply that that question shall be sifted to the bottom and that nothing shall be taken for granted about it, and that there shall be a perfectly free discussion in every forum in this country and at least in the forum of public opinion, which he said at last settles all these questions. (Applause).

The chairman stated that E. B. Pike, of Pike, N. H., was unable to be present to deliver his address on the subject of

"FREIGHT MATTERS OF INTEREST TO MANUFACTURERS AND JOBBERS,"

but that his son, E. Bertram Pike, was present and would address the meeting.

Mr. Pike read extracts from memoranda prepared by his father on the subject, which were as follows:

"Your chairman, though unable to give this subject but a small portion of the time he would have liked, has for months past given the matter the greater part of his spare time. He has read with much interest many of the articles and speeches representing the railroad point of view, as those by Presidents Tuttle, Spencer, Wilcox and others; also the excellent articles by members of the Interstate Commerce Commission and others presenting the opposite side of the question, and it does not seem to us that it will be difficult to agree upon some legislation that will be reasonable, satisfactory, and, in the final result, beneficial to both sides. From our point of view, it is quite as much in the interests of the railroads as of the shippers and the public at large that reasonable and equitable legislation be enacted at an early date. Without this, or if the railroad interests shall successfully oppose such legislation, it is almost sure that eventually more drastic and paternal legislation will be proposed and supported by an irresistible tide of public sentiment.

"The act to regulate commerce contemplates two distinct things: First: The act provides that carriers shall publish their rates and shall maintain those rates as published without discrimination between shippers.

"The second purpose of the act is to compel carriers to publish a just and reasonable rate.

"Now, the first provision of this law has been habitually disregarded. The injunction granted in 1902 and the Elkins bill passed in 1903 have done much to stop the payment of rebates;

Digitized by Google

that is, money rebated, but other devices amounting to the same thing have been substituted, so that the result is almost as bad, if not perhaps worse, than it formerly was. In amending the law and making it adequate to cover these various devices, it would be necessary to arrange for machinery for the enforcement of that law. At the present time there is no way by which the Interstate Commerce Commission or anybody else can obtain evidences of the payment of rebates when such payment is secret. Perhaps this might be accomplished by compelling railroad companies to keep their accounts, both as to the movement of traffic

E. B. PIKE,
of the Executive Committee.

and as to their finances, in accordance with the rules prescribed by the government, and that these accounts should be at all times subject to government inspection, and that the duty of enforcing the law should be vested in the department of justice.

"It appears that at the present time six railroad systems control fifty-five per cent of the railroad mileage, sixty-two per cent of the gross receipts and constitute two-thirds of the railroad capitalization of this country. Thus, you see, competition exists more in name than in fact, and can no longer be depended on to prevent excessive rates; the railroads can practically impose whatever rates they may see fit. We believe there should be some tribunal which in a public case can judge between the railroad and the public. When a railway files its tariff, it should be considered presumptively a just and reasonable one, but if the justice or reasonableness of that tariff is attacked, there should be. and there must be, in fairness to all, some method by which it can be passed upon and by which, if it is found to be unjust, it can be made right. No lawsuit affords the slightest relief, for reasons which you well understand. The Supreme Court of the United States has decided that the court cannot be invested with the right to prescribe a rate for the future, as this is a legislative function; therefore, the only tribunal that can consider such a question and apply a remedy is a tribunal in the nature of a commission. Our belief is, therefore, that you must create a commission or tribunal with power to entertain complaints against unreasonable rates in the published tariff and with power to correct these rates, if, after hearing them, they are found to be wrong.

"This proposition, you will note, is not for the government to fix the railway rates of this country; nothing of the kind. We believe that railroads should be allowed to make their own rates. This is a matter of justice to the railroads themselves so long as they are operated by private enterprise. Not only that, but we think it for the interest of the public that railroads should name such rates as they may see fit for the development of their respective lines. It is only when those rates are unjust, discriminating or unreasonably high that the government should interfere to prevent the wrong.

"It seems to your committee, therefore, that, as proposed by the president, the Interstate Commerce Commission should have the power, when it finds that a rate which has been complained of is wrong, to substitute a right rate in its place, but that the order should be for a specified time, only, say, for one year; and perhaps full benefit would be obtained if the railroads were simply compelled to put in effect the rate ordered by the commission and have the right to charge this rate like all their other rates. We must assume in these matters that there will be good faith on all sides. The railroads of the country will not wantonly defy the law, and it is just as foolish to assume that they will, as it is, to assume that a commission or court with that power will confiscate all the railroads of the country.

"The opinion on this subject of a man so highly respected for his patriotism and legal attainments as the late President Harrison is well worth noting at this time, and we quote from a speech delivered by him in the United States Senate, when the original Interstate Commerce bill was under discussion:

"What is the trouble? It is that the shipper needs to be reance at the bottom of this great popular clamor against the railroad companies?

"'I think as both these bills admit, just two things:

"'First: Extortion, the charging, especially for the local freights, of unreasonable rates, thus unduly burdening the local traffic for the maintenance of the railways; and secondly, and chiefly, discriminations between shippers of the same class.'

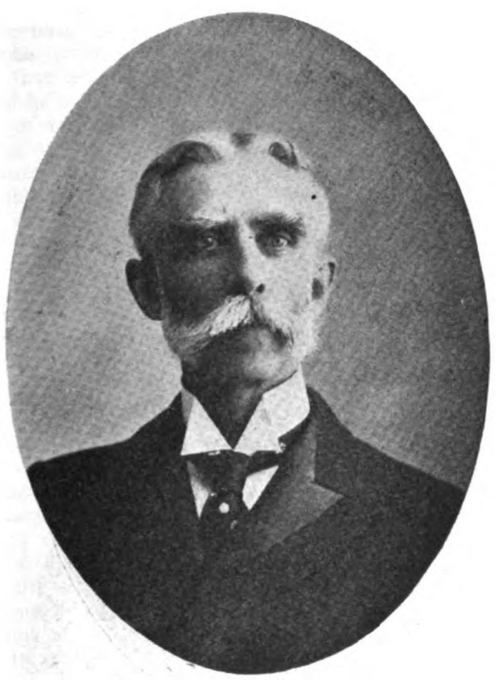
"What is the trouble? It is thta the shipper needs to be reenforced in his contest with the railroad companies. If some one should ask me why it is, if the exaction of an unreasonable rate is now unlawful and the excess may be recovered back, that shippers do not recover it back; or, if some one should ask me why it is, if discriminations are illegal, that shippers do not expose them and recover their damages, my answer would be that it is an unequal contest to which the shipper is invited.

"I think, then, I may declare, with the approval of those who listen to me, that legislation upon this subject to be efficient must re-enforce the shipper in his contest with the great railway corporations.

"The United States has thrown itself into the scale in behalf of the citizen in this contest. By its own agency, at its own expense, it pursues the inquiry; and when it is closed, if it is found that on a particular day the railroad companies were giving one shipper under the same conditions and circumstances an advantage over another, it places in the hands of the man discriminated against, all the facts that enable him to maintain his case.

"Then, again, the commission has the power to get the public ear as the individual shipper has not. It has the power to concentrate public sentiment upon any practice of the railroad company that is thought to be unjust. Take the humblest man in any

B. F. ESHLEMAN.



of our towns; he cannot make himself heard beyond the village in which he lives. He has no influence; the railroad managers would laugh at him; he is but a pigmy in this contest and he is contending with giants. But when this commission, representing the United States, composed of able, intelligent men, men of wide reputation, of calm judgment, and without prejudice, looks into the grievance of this humble citizen and says to the railroad companies and the country, 'You have practiced an oppression upon that man,' the whole country hears the case, and public opinion is concentrated on its condemnation.

"What we think our members probably demand, is, first, fair and equal treatment in respect to railroad rates and transportation; second, stability in the rates so that the rate cannot only

Digitized by Google

be readily ascertained by shippers, but so that they can rely upon a continuance of the charge for transportation for a reasonable period. The rates should be equal and just and not enable one man to succeed in business while another fails through no fault of his own. A shipper should know at all times what it would cost him to deliver his goods to any market; that no man is getting any better of different rate on the same commodity than he is; and should he find or feel that he is being wronged, there should be a tribunal before which his case can be determined. It is a courageous man, indeed, who will raise a point against a railroad when it is remembered that it is within the power of the railroad to crush him completely if umbrage is taken because complaint has been made.

"A community naturally fears to antagonize a railroad combination because of the great power of the railroad to ruin its interests. It seems to us that the only proper method is to place the matter in the hands of some tribunal with power to determine, upon complaint, whether the rates are reasonable or unreasonable, such a tribunal to represent the interests of the whole people. The railroads employ an ample corps of attorneys, well equipped to defend the rights of their employers and to deal with all kinds of litigation, the shipper has not this advantage; he cannot generally afford to hire an expensive attorney to conduct his case. And when a shipper whose complaint is filed in his youth dies of old age, the disposition of his case is of no use to his business or his widow. We believe the government should take upon itself the duty of seeing that the interests of the people, as well as of the railroads, are properly safeguarded.

F. S. KRETSINGER,
Ex. Vice-President.

"In conclusion, your committee would recommend the following:

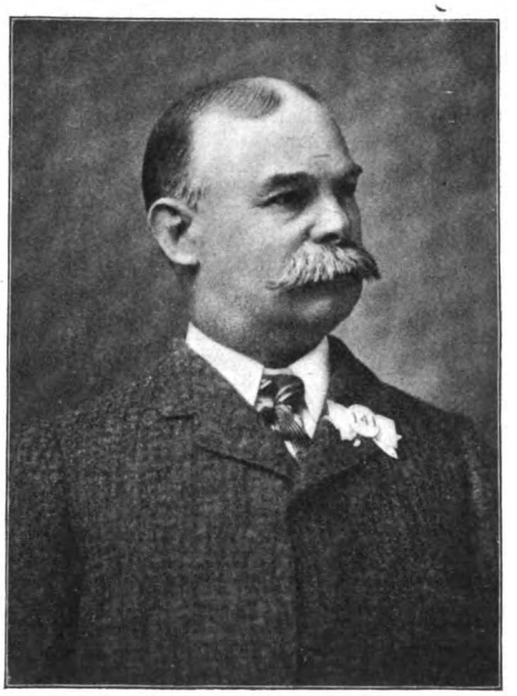
"First: The employment of a traffic manager, by the association in conjunction, if it be found practicable, with the National Hardware Association, and the Southern Hardware Jobbers' Association, including possibly the American Supply & Machinery Manufacturers' Association.

"Second: The framing of a suitable resolution regarding railroad rate legislation along the lines of conservatism and square dealing.

"It would suggest a resolution something like the following:

"WHEREAS, The subject of interstate commerce regulation, owing to the enormous growth of power and the short-sighted methods of certain railroad corporations, has become a vital one in the minds of the people, claiming the serious attention of all thinking men; and,

"WHEREAS, The shipper and the people justly claiming equality of treatment for themselves, and the railroads justly insisting that their own rights should be protected, and all properly unite to bring about legislation which shall be for the best and the lasting interests of all; therefore, be it,



"Resolved, By the American Hardware Manufacturers' Association, in convention assembled, That the following suggestions looking to a practical solution of present difficulties be laid before the proper committees, and before the Senators and Representatives, in Washington generally, as the basis of legislation proper to be enacted in the interests of all.

"Resolved, That we favor the active enforcement by the executive department of the general government of all existing laws to prevent the giving or acceptance of rebates or special favors (through whatever device) to or by favored shippers, we call on the Interstate Commrece Commission to apply all the remedies at their disposal as provided by the original Interstate Commerce act and the Elkins act amending the same.

"Resolved, That if the existing laws for the detection and punishment of the giving or acceptance of such rebates are insufficient or defective in any respect, we favor the enactment of such further legislation as may be necessary adequately to deal with the evil and to secure this complete prevention.

"Resolved, That in order to carry into effect the provisions of the foregoing resolutions, Congress should be asked for a provision to be made for the necessary examination of the books of the railroad corporations somewhat after the manner of the National Bank examinations, for the purpose of detecting and eliminating special favors and discriminations against the small or less favored shippers; and a provision for adequate punishment for improper disclosure of confidential information so gained.

"Your committee believes if a measure based on these principles should be enacted by Congress impartial justice would be done to all sides, to shippers and carriers and public alike; and is convinced that under such an enactment litigation on the rate question would be extremely rare, all difference being settled amicably by commission and railroads without having courts. The shipper would be thus well assured of obtaining what he most needs, a prompt and definite settlement of the charge he must bear, by competent and equitable authority."

JOHN R. GILFILLAN.

Secretary Taft started on his return trip to Washington in the early evening, going in George T. Oliver's private car. As he left the Homestead, George Harper created considerable merriment and brought a hearty laugh from the honorable secretary by presenting him with a "lid"—a tin one. He accepted the gift and in thanking the donor said that the "lid incident" had given him a large amount of free advertising, and that he would remember this as one of the many pleasant incidents of his visit at the convention.

MUSICALE AND DANCE.

Wednesday evening the Philharmonic Band, assisted by several vocalists, brought by the Reading Hardware Co., gave a very enjoyable musicale, after which dancing was participated in by a large number of the visitors for several hours.

PROGRAMME.

1. Hymn and Triumph March, from Aida - - - - - - Verdi.
2. Vocal duet, Carmen - - - - - - - - - - A. Lane Wilson.
3. Unfinished Symphony, first movement - - - - - Schubert.
4. Violin Solo, Gypsy Dances - - - - - - - - - Sarasate.
5. Egmont Overture - - - - - - - - - - - - Beethoven.
6. Vocal Quartette, Song of the Vikings - - - - - Faning.
   A, Berceuse - - - - - - - - - Simon.
7. Violin Solo B, The Bee - - - - - - - - - Schubert.
8. Dance of the Hours, from La Giaconda - - - Ponchinelli.

THURSDAY MORNING.

The manufacturers assembled in executive session at ten o'clock for the purpose of closing up the business in hand.

JOBBERS.

At 9.30 the Jobbers met in executive session in the breakfast-room, and, after spending some time in discussing committee reports, took up the subject of "How to Enforce Uniform Terms," the opening address being made by Spencer James, of the Piedmont Hardware Co., Danville, Ky.

This was followed by an address by C. H. Miller, president of the National Hardware Mutual Fire Insurance Co., Huntington, Pa., who spoke on the subject, "Mutual Fire Insurance in the Southern Hardware Jobbers' Association."

A communication was presented by two officials of the American Hardware Manufacturers' Association, from that association, on the subject of special brands, and the communication was referred to a committee of five, of which O. B. Barker was chairman, to consider the question and report back to the association their recommendations on the subject.

The report of the executive committee was taken up for further consideration and the report adopted as a whole, and the recommendations therein concurred in.

Among the important recommendations adopted were:

We recommend an amendment to the constitution and by-laws: Any firm or corporation whose business is the selling of Hardware at wholesale, exclusive of machinery implements and mill supplies and whose sales to merchants shall not be less tnan seventy-five per cent. of their gross sales and who have not less than three regular salesmen on the road, and whose capital is not less than $50,000 upon application to the secretary in writing and a four-fifths vote of the executive committee may become a member of this association upon subscribing to the Constitution and By-Laws and payment of $25 membership, fee in advance, and agreeing to pay annual dues of $50 within thirty days after each meeting. We recommend that this association records its unqualified disapproval of any manufacturer marketing any part of his product through any other channel than the legitimate Hardware jobber, and when this policy is disregarded by any manufacturer offending party shall be reported to the secretary, who shall take the matter up through personal correspondence and endeavor to cause the manufacturer to discontinue this practice, and we further most earnestly protest against the manufacturer selling to small dealers at all, as by doing so the small dealers frequently purchase more goods than they can legitimately handle and therefore dispose of the surplus at cost to the damage of the jobbers for hundreds of miles around.

THURSDAY AFTERNOON.

GENERAL SESSION.

The members of both associations met in the ballroom at 2.30, with President Crumley, of the Jobbers, in the chair.

The "Catalogue House Question" was first taken up, and the meeting listened to the report of R. M. Dudley, chairman of the Southern Hardware Jobbers' Catalogue House Committee.

Mr. Dudley being absent his report was read by C. H. Ireland.

The report in part included a review of the original resolution under which Mr. Dudley was appointed a member of the Joint Committee. It complimented Secretary Carter for his assistance and reviewed a history of former unavailable work against catalogue houses. As a result of later work many houses have cut the catalogue houses from their list of customers, over 600 manufacturers having taken this action.

Co-operation is absolutely necessary to the success of this movement. He urged members of the Jobbers' Association to attempt to induce manufacturers now selling to catalogue houses to discontinue such practice, and stated that the committee was hopeful of even greater results provided co-operation is given.

W. P. BOGARDUS,

President of the National Retail Hardware Association, who has done so much thorough work on this subject, then addressed the meeting as follows:

Mr. President and Gentlemen of the Southern Jobbers' Association:

I wish to thank you for the courtesy of the invitation to come before you, and to assure you that the retail trade of the country appreciate the invitation to be present at your conventions, for the opportunities these occasions offer to compare notes, and to get knowledge of conditions and suggestions of ways to surmount and solve some of the problems that confront us. To put one's self in another's place is to come nearest to understanding his conditions. And as education comes from iteration, we come before you to present our point of view, and if possible impress it on you so that you may become interested in looking at conditions from our standpoint.

The retail trade stand in the position of the final distributors of the manufacturers' product. And the difficulties that they meet, and the questions that they must solve, should be of vital importance to both jobber and manufacturer.

ONE OF THE SERIOUS PROBLEMS THAT CONFRONT THE RETAILER is the competition of the catalogue house. A competition that is immoral and unfair. Immoral because it seeks to secure a monopoly by breaking down all opposition. Unfair by making very low prices on some standard goods it seeks to convey the impression that the retail trade are charging excessive prices to the consumer. We do not object to the catalogue houses selling goods. We have no right to do so. But we do object to their methods, and the help that they receive from manufacturers who supply them with goods at prices that permit them to undersell the balance of the manufacturers' trade, and so bring disorder and distrust between the manufacturer and the great majority of his distributing agents.

That the manufacturer must have distributing agents goes without question. That they must work in harmony is just as apparent.

Now if the manufacturer sells his goods making the quantity the only gauge of price, and taking the position that his interest in, and control over his output ceases when the goods

W. P. BOGARDUS,
President National Retail Hardware Association.

leave his warehouse, then the problem for the retailer becomes more serious, and the downfall or absorption of the manufacturer draws one step nearer.

THE GIVING OF PRICES FOR QUANTITY ALONE regardless of all other considerations is putting a weapon in the hands of unscrupulous catalogue houses to break down the other trade of the maunfacturers and to open the way to a combination that will absorb or control the manufacturing interest of the country. Do I state this too strongly? In the *Iron Age* of April 27th, 1905, you will find the following as a clipping from a Southern newspaper: "Wanted to buy the entire output, or part of the output, of Southern factories manufacturing furniture, woodenware, agricultural implements, machinery, blacksmiths' tools, vehicles, wagons, team harness, stoves, and such other heavy goods as are shown in our catalogue. We want to extend our connection with Southern manufacturers for the accommodation of our growing trade in the Southern States and arrange with manufacturers in all lines to ship direct to our customers on our orders. We are prepared to figure with manufacturers in the various lines for any part or all of their output."

That is to say, the catalogue houses purpose to make the manufacturers of the South their distributing agents. To have them send, to any one who orders from the catalogue house,

Digitized by Google

a single stove, a set of harness, a wagon or any other article that may be ordered. If this proposition is accepted by the manufacturer of the South, what becomes of the retailer and jobber of the South, to whom will they sell goods? And when the retail trade of the South is broken down and the manufacturers have but the catalgoue house for a customer, what will be the prices the manufacturer will get for his output?

EVILS CREEP IN SLOWLY AND FROM SMALL BEGINNINGS.

The private ownership of cars; the secret rebates by railroads, and the accompanying favoritism and consequent ruin of those not in the ring, that has resulted in government investigation and a possible regulation of rates, did not come full-fledged into being. The great trusts and combinations that control for their own gain without regard to the effect on others, the avenues of commerce, raising and lowering the prices of the necessities of life without regard to the economic conditions of supply and demand, came into existence little by little and their restriction, control, or extinction depends on the arousing of a public sentiment that will demand that they play fair or quit.

When the idea first came to the catalogue house man that by cutting the prices on standard goods

A LARGE QUANTITY OF UNKNOWN GOODS COULD BE PALMED OFF ON THE PUBLIC

at good prices, and at the same time doubt and suspicion could be cast on the retail trade, for he recognized from the first, which the jobber did not, that his success meant the failure of the retailer. At first it was considered good business for the jobber to supply the wants of the catalogue house, and the catalogue house grew apace. The retailer soon discovered that he was being hurt, and that in the house of his friends. He protested, with but little success. In the meantime the jobber was learning that the margin on standard goods was getting very small and to recoup himself goes to the manufacturer with this proposition that the manufacturer should make for the jobber a lot of goods that were not to be stamped with the manufacturer's name, but should be stamped with such names and brands as the jobber might select. While the proposition was not entirely satisfactory to the manufacturer, yet in the hope of increasing his business he consented. Other jobbers asked and received the same favors. It was not long until the manufacturer found that he had made a mistake. That he was losing his identity, and that his own brand of goods was being either sacrificed for, or crowded out of the market for special brands.

THE RETAILER WHO AT FIRST THOUGHT THE SPECIAL BRANDS WOULD HELP HIM

soon discovered that they were not always to be relied upon. That while the special brands on some goods mean steady reliable goods, that could always be counted on, it very often meant everything but steadiness and reliability. For one year the brands were put on by one factory and the next by another factory, because of a lower price and consequent reduction in quality until the brand meant nothing as to quality, but simply that the goods were made up for the jobber whose name they bore. Thus a condition of things has arisen that to the manufacturer is no longer bearable, and all branches of the trade are suffering the evil effects of the movement. The goods that the retail trade have made standard are being used as catspaws to palm inferior goods onto the public.

Great evils demand heroic treatment. But some one says what is the use of bothering? We cannot help the conditions, nor can we change them. Is it true that there is a steady drift towards consolidation that is the

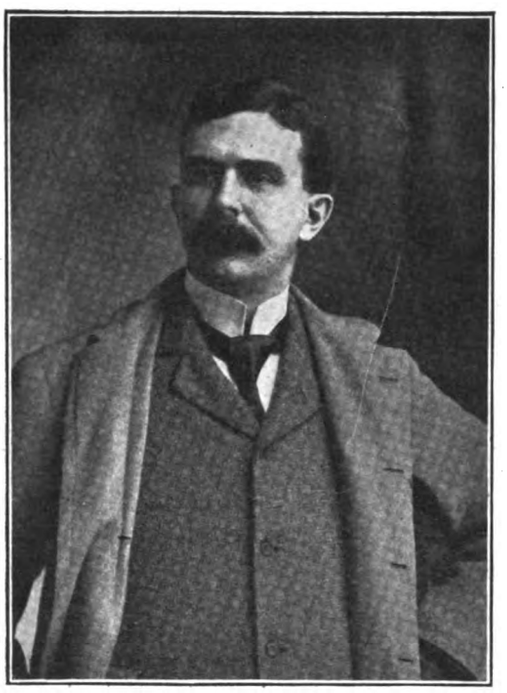
OUTCOME OF ECONOMIC CONDITIONS THAT WE CANNOT CONTROL?

Is it true that the manufacturer is so hampered that he cannot control the prices on his goods? Is it true that the responsibility of the manufacturer for his goods ends when they leave his warehouse? Is it true that under threat of additional competition the manufacturers are bound to conditions that will ultimately break down nine-tenths of their trade and centralize the business in the large cities? Or, is it true that the drift towards consolidation is not the outcome of economic forces over which we have no control, but a fever that will run its course and subside. A fever that has been encouraged by government aid through the postal law, and by the further hope that the government would enter more largely into the transportation business, in competition with its citizens doing the work so cheaply, the taxpayer paying the shortage, that the present facilities would be broken down. Facilities that are not surpassed in any other part of the world. Paternalism should have no place in this country.

GOVERNMENT IS A POLITICAL INSTITUTION,

not a business institution. The natural outcome of paternalism is socialism, and socialism leads to the destruction of individual rights and government and morals and religion and the establishment of a reign of terror that would appal humanity.

From the point of view of a retail man, a partial remedy for these growing evils is to realize that business is an avocation by which we earn our living. That success should not be measured by our ability to sell cheaper than our neighbors. That reputations are based on honesty and fair dealing and not on sharp practice and misrepresentation. I would



CUT OUT THE GROWING EVIL OF SPECIAL BRANDS.

If the jobber is needed to distribute the manufacturers' goods, and I do not see how he can be dispensed with, let the manufacturer arrange to protect him, by giving him prices that will encourage him to handle the manufacturers' standard brands. Discard forever the idea that quantity alone should govern prices. See that retail stores, no matter how much they buy, or under what form or guise they may approach the manufacturer, do not get the prices given the jobber.

PROTECT THE JOBBER AND HE WILL PROTECT THE RETAILER,

and standard goods will be sold at a profit, and catalogue houses will stand on the same footing that other retail stores stand and there will be a chance for all of us. There is something radically wrong when retailers can buy of manufacturers as cheap as jobbers, especially when the retailers do not buy to exceed ten per cent of the manufacturers' output. The remedy for this condition of things is in the manufacturers' hands.

He was followed by S. Norval, chairman of the Joint Committee, who, in his usual able manner, gave an interesting talk on the same subject.

S. NORVAL,
Chairman Joint Committee.

Mr. Norval spoke in part as follows:

It was predicted a year ago that the catalogue house movement would soon play out. The record shows the contract. He expressed surprise at the ignorance evidenced by both jobbers and manufacturers as to the actual facts of the case. The committee has tried to avoid publicity and antagonizing. There are seven classes among manufacturers as regards this question. One class say they will not sell catalogue houses, of these one class do not sell them. Another say they do not sell these houses, but their goods reach these houses indirectly, and another say they will not sell, but do. Another class sell under price maintenance contract; of this class one makes such a price as to give retailer a profit, the other class the reverse. Still another class are non-committal in the matter.

Class number seven continue to sell where they please, claiming that objection to catalogue houses is interfering with modern progress and that goods should reach the consumer at the lowest possible price. The catalogue houses matter is a question of 'protection' as surely as protective tariff. Some manufacturers seem very short-sighted, refusing to see that the work of this commission is for the greatest good of each member. It costs jobbers 15% to do business, the retailers 20%, so the manufacturers must add at least 35% to their list before there is one cent of profit either to jobber or retailer.

Anything that establishes a standard of prices affects every one in the trade. If a catalogue house cuts a price a cut all along the line results. The greatest evil of catalogue houses is that they create a low standard of prices. The greatest argument the

Digitized by Google

jobber has in selling special brands is the catalogue house. In this Mr. Norvel takes a stand exactly the opposite of the resolutions passed this week by the manufacturers. The speaker continued:

"The jobbers have been very long suffering; it is time they were doing something. If the manufacturer wants catalogue house business jobbers will turn catalogue houses, or manufacturers. Catalogue houses do not maintain any prices on any goods—in some cases even returning some of the money sent by customers." Mr. Norvel accused the committee of nineteen of stirring up suspicion of the jobber in the minds of the retail dealer. The resolution will hurt the jobbing business. The speaker advanced the claim that manufacturers make many goods without their firm name; that jobbers use more enterprise on the putting up special brand goods; that they have originated many improvements in goods; that special brands are in the majority of cases better goods in quality and finish and packing than the same goods put out under manufacturers' brands, the whole question is a question of who shall control. Jobbers want manufacturers' brands, so more than one firm in a town can be sold. There are not enough manufacturers' brands to go around. There should be more of them. The jobbing drug trade of this country has been practically ruined by cutting out special brands and limiting territory. In conclusion, if manufacturers do not want special brands, why don't they stop making them? If jobbers can't buy goods in this country as they want them they can work for free trade and buy goods abroad. Is the retail dealer so unintelligent that he will continue buying special brands if the goods are inferior? The small manufacturers are assisted by the increased facility of getting their goods on the market, therefore the large manufacturers in insisting on cutting out special brands is cutting out the small manufacturer.

C. W. Asbury took the floor and in a short speech reminded those present that this was the Crystal anniversary of the Jobbers' Association, and that it was his pleasant duty in presenting to President Crumley a crystal-handled knife from ex-Gov. Goodell. President Crumley accepted the gift with sincere thanks.

The unavoidable absence of W. P. Smith removed the next number on the programme, "Where Are We At?" which was to have been the subject of Mr. Smith's address.

Irby Bennett, chairman of the Reception Committee, presented President Crumley, in a few well-chosen words, with the gavel given to the association several years ago. This was accepted by Mr. Crumley, who was deeply touched. Mr. Bennett also promised a new gavel before the next convention. President Birge, of the Manufacturers' Association, spoke briefly of the high regard in which Mr. Crumley is held by the members of that organization.

Harry Wise, of the *Tradesman*, next addressed the meeting on

"ADVANTAGES AND OPPORTUNITIES AFFORDED BY THE SOUTH FOR MANUFACTURING."

We are living in an era of what might be termed competitive competition, for not only do manufacturers in kindred lines find it essential to sell in competition, but to manufacture under the same conditions, so that the vital necessity is economy in production.

Margins of profits have gradually dwindled until economical methods only can hope to result in profitable investments.

This being the case (and I have no doubt but that you will agree with me that it is), the necessity exists that those who are the producers to seek

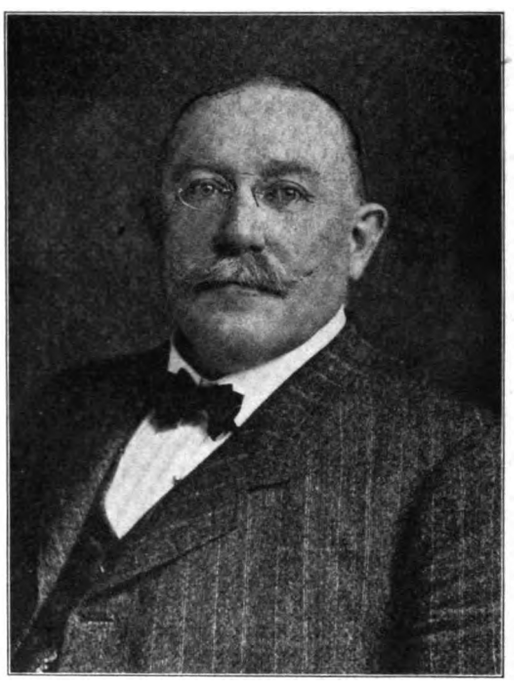
CONDITIONS MOST FAVORABLE TO THEIR INTERESTS.

Man's struggle for existence with his Nemesis. "The survival of the Fittest" constantly staring him in the face, has dwarfed his sentimental nature and made of him the strictly business man. So I will not speak of nature and nature's Creator, but launch you without introduction or comment into that section of our country which lies between 26 degrees and 39 degrees N. latitude and 110 degrees W. longitude, and popularly designated as the South.

I must of necessity keep within certain bounds, or else it would require volumes to exhaust a

SUBJECT SO PREGNANT WITH POSSIBILITIES.

I will therefore limit myself to such matters as I believe are of special interest to you: but what I say in this particular holds equally good in every line, for the South to-day has that to offer which no other section of the civilized globe possesses.



In 1903 the total value of pig iron produced in the United States was $285,065,456. The value of the bituminous coal was $327,075,530. Of the former the South's quota was $61,378,938. and of the latter, $91,628,655. During the same year the total of mineral products in the South, which included the coal and iron, represented a value of $234,194,422, and the value of the lumber in the same year was $185,727,890, making a total of these two classes of products of $419,922,312.

In 1900, the latest available statistics, there was invested in the South in manufacturing industries $953,875,192, turning out products valued at $1,184,398,684, showing an increase in investment since 1890 of $443,080,832, and in production an increase during that period of $477,564,290, and I feel safe in the assertion that during the past five years the ratio of increase has been greater by over 75%.

These few figures are simply to give you a general idea of one branch of the South's resources, as you will note that cotton, live stock, grain, farm porducts, etc., have not been mentioned, for it is not necessary to call your attention to the solvency of the section to-day nor the fact that it is gradually becoming the country's greatest producing section. I mentioned coal, lumber and iron, because they are the materials that you specially need, and I mentioned also what the South was already doing in the manufacturing line. These facts and figures are simply an evidence that

THE SOUTH IS THE LOGICAL MANUFACTURING SECTION

of the United States. Having the raw material, and having it in inexhaustable quantities, is not, I admit, in itself sufficient, but when this is coupled with the fact that the climatic and labor conditions are more than satisfactory, that in the past year over half the railroads in construction and placed in operation were in the South, that Southern ports for export are numerous and accessible, that facilities for economical handling and distrib-

FRANK GUILDENER,
of the Freight Committee.

uting of products are here, that we have everything you want, and have it at hand, it is easy to understand that the South is worth your serious consideration.

In speaking of the South, one is prone to forget exactly what it means. When we stop to consider that it embraces about one-third the area of the United States and includes about one-fourth its population, we begin to realize that it is quite an important section. And again, everything that is grown, mined or made elsewhere in this land of ours is grown, mined and made also in the South, and in addition there is much that is exclusive to that section only.

So when I speak to you of the advantages offered you by the South for manufacturing, I need only point out the fact that if your raw material to-day is not already a Southern product, it certainly will be, in part at least, in the near future.

The industrial growth of the South has been the result of certain existing conditions. The inherent wealth that has lain dormant so many years, was only called into service through the necessity which was the author of its development. Once this development commenced it grew to tremendous proportions, and the greater the development the greater has been the knowledge of what still remains to be discovered.

We have, therefore, in the South, in one section or the other, every requirement for the economical production of every manufactured product.

No matter what you make you will find in the South one or more localities that would make it possible to produce what you now manufacture economically and under circumstances

Digitized by Google

and conditions that I am reasonably safe in asserting are an advantage over that which you now enjoy.

The question of easy access to necessary material and the economical handling of it is, of course, the most essential matter to be considered. There are other conditions, however, which have to be taken into account.

THE DISTRIBUTION OF FINISHED PRODUCTS.

I will later on call your attention to some special details relative to some of the more important cities bearing on the facilities offered for distributing the finished products throughout the South, and for Northern and Western points and for export, but I wish now to call your special attention to the fact that practically all the future commerce with Mexico and the South American Provinces, as well as the Island Province lying between, will emanate largely from the Southern States, and with the completion of the Panama Canal opportunities will be opened up that will practically change the present centers of trade. One need not be a prophet to foretell what the future in this particular holds in store for us.

LABOR CONDITIONS.

With only sufficient exception to prove the rule, it is safe to state that the South is practically free from strikes, lockouts and other labor disruption. It will be within the province of this paper to discuss the conditions which make this so, but suffice it to say that the dangers from this source are very remote, even after the section has doubled its population.

THE CLIMATE.

Another feature most favorable to manufacturing is the climatic conditions prevailing almost in all sections of the South. To lose a day on account of extreme heat or cold is a rarety, the working classes are not subjected to the same unfavorable conditions as exist in the North and West, and, strange as it may seem, the summers in New York, on an average, are more trying than they are in Florida or Texas. True, the summers in the South are longer, but they are less severe.

IMPORTS AND EXPORTS.

New Orleans, Charleston, Savannah, Mobile, Galveston and a number of other seaport cities offer facilities for coastwise and export trade equal to any ports on the Atlantic or Pacific coasts, and some of them have already gained supremacy in certain lines.

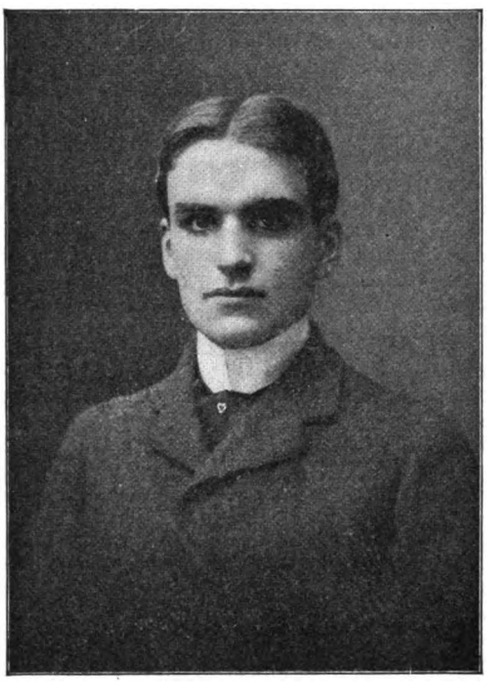
THE RAILROADS.

The many trunk lines of railroads now ramifying the South and building on each day, have grown and developed with the sections through which they extend, and are working arduously for the upbuilding of the entire South. Gradually, as conditions warrant, they are making it possible for those, even in remote sections, to ship everywhere and anywhere, and it is only a question of volume before every section of the South will be on a parity as to shipping facilities with every section in other localities.

SOUTHERN PRODUCTS.

How long ago was it that it was said that no good cutlery was made outside of Sheffield, or that innumerable other products could only be produced at certain foreign points? Not long, within the recollection of nearly all of us. Many Southern products have already gained a place among the standard goods. A few years ago it was said that the South only used second-hand machinery and cheap goods of all classes; to-day it is admitted that the best and only the best can find a ready market. New industries naturally equip themselves with the latest and best machinery, and it is somewhat on this account that the Southern textile mills have become such formidable competitors, and it is on this account that the South already has forced recognition for many of it goods, and an added reason why as it grows and develops it will increasingly continue to do so.

And now what are



THE OPPORTUNITIES OFFERED MANUFACTURERS?

I have partially mentioned these, the close proximity to Mexico, South America and the nearness to the Panama Canal, these of themselves open up great possibilities, but even greater than these is the fact that the South is almost a virgin field, a section only in the chrysolis stage, demanding little, offering much, all, in fact, that has been offered as to its advantages, express as well its opoprtunities.

Do not understand me to say that the South expects or even wants its manufacturing interests built up and developed at the expense of any other section. On the contrary, we who know best what we may expect, foresee that to economically meet the rapidly growing demands required for consumption in the South and the territory it controls, and because of the foreign markets which it can most advantageously supply, the goods themselves will have to be made in the South; this section will require manufacturers far in excess of its present ones, to supply its needs and demands.

For years the South, possessing every resource and advantage that it has to-day, was urging investors to come and locate on any terms and conditions. Without money of its own, it was exerting all its influence to encourage those more fortunate, to help develop what a kind Providence had endowed it with. And it took years to have the cry heeded. The South had little attraction for financiers, but its own people were wise in their generation; if they could not have large industries, they could, by pluck, energy and enterprise, develop what they had, and it was only after success had crowned their own efforts that the country awoke to the realization of what it really meant.

The South to-day is as anxiuos as ever to encourage manufacturers to locate, but conditions have somewhat changed. We

EDWIN A. MALTEN,
of the Freight Committee.

are lenders now, not borrowers, and enterprises are not only still welcome, but financed as well.

Thus you have a general idea of what the South is doing and what it has already done. The various sections have presented my proposition for me, accurately and intelligently. You can for yourselves read between the lines and discover what are the advantages and what the opportunities that the South to-day affords manufacturing enterprises. There is food for much thought in this and good and sufficient reasons for giving the subject thorough consideration. We are not builders of to-day. It is always the to-morrows that occupy our thoughts.

The South will in the lives of some of us present to-day represent the section of the United States that will produce within its borders the bulk of every manufactured product this country turns out, that is made of iron, steel, wood or cotton, and it will ship from its various ports in time the bulk of the tonnage of all freight destined for the Southern Atlantic ports, the entire Pacific and the Orient.

The industrial development in the South in recent years will in a measure serve as an index as to what is taking place along this line, and what may naturally be looked forward to. The new industries and industrial organizations, as reputed by *The Tradesman* for the past four years showed the following as to:

1901	3,675
1902	4,440
1903	5,236
1904	5,596
And for the first quarter of 1905	1,447

which indicates that during the present year the number will reach nearly the 6,000 mark.

This marvelous growth, I wish to impress on your minds, has not been at the expense of any other section, but is due to natural causes; the development of the section itself has made it essential and the industrial growth will continue in direct proportions to that development.

CONCERT AND RECEPTION.

Thursday evening the conventions were again entertained by the Philharmonic Band, this time on the lawn in front of the hotel. An informal reception was held afterwards that was universally enjoyed.

Digitized by Google

FRIDAY MORNING.

The only session held on Friday was that of the Jobbers, who met in executive session at 9.30 and proceeded to wind up the business of the week.

The following officers were elected for the ensuing year:

PRESIDENT—F. B. Dunlop.

FIRST VICE-PRESIDENT—J. F. Warren.

SECOND VICE-PRESIDENT—Frank Gray.

EXECUTIVE COMMITTEE—O. B. Barker, C. H. Ireland, Bruce Keener, W. W. Webber.

The next place of meeting in 1906 will be Virginia Hot Springs. Convention adjourned.

SOUVENIRS.

Among the many handsome souvenirs given out at the convention were the following:

E. C. Atkins & Co., Indianapolis; gun metal watch and silk and gun metal fob.

Dana Manufacturing Co., Cincinnati; leather card case and memorandum pad.

National Enameling and Stamping Co., Baltimore; shaving cup and pin tray.

Peters Cartridge Co., Baltimore, Md.; unique paper weight.

American Axe & Tool Co., Glassport, Pa., miniature axe.

International Cutlery Co., Fremont, Ohio; "Star" razor, and pocket scissors.

Boss Washing Machine Co., Cincinnati; "pocket surgeon," court plaster case.

Blacklock Foundry, South Pittsburgh, Tenn., miniature kettle and standard in aluminum.

Daisy Manufacturing Co., Plymouth, Mich.; mirror paper weight.

Nicholson File Co., Providence, R. I.; manicure in sterling silver case.

Yale & Towne Manufacturing Co., New York; paper weight of unique design.

Hopkins & Allen Arms Co., Norwich, Conn.; embossed picture.

North Brothers Manufacturing Co., Philadelphia, Pa., pocket tool holder.

American Can Co., New York; set of dice in miniature tin pail.

Simonds Manufacturing Co., Fitchburg, Mass., badge and pencil of sterling silver.

American Fork & Hoe Co., Cleveland, Ohio; embossed calendar.

Winchester Repeating Arms Co., New Haven, Conn., watch fob with gold charm.

Dover Manufacturing Co., Canal Dover, Ohio, miniature sad iron.

Oneida Community, Oneida, N. Y., silver spoon with gold bowl.

Russell & Erwin Manufacturing Co., New Britain, Conn., souvenir screw driver.

American Sheet & Tin Plate Co., Pittsburgh, pedometer.

Reading Hardware Co., Reading, Pa., "Owl" mantel, ornament, brass medalion pin tray and ink stand.

Fayette R. Plumb, Inc., Philadelphia, hammer.

Meriden Cutlery Co., Meriden, Conn., miniature anvil paper weight of aluminum.

J. D. Warren Manufacturing Co., desk cabinet.

Bullard Automatic Wrench Co., Providence, R. I., miniature wrench.

ATTENDANCE.

The following were among those in attendance:

A. C. Albrecht, Philadelphia, Pa.: Charles W. Asbury, Philadelphia, Pa.; Mrs. Charles W. Asbury: Mr. and Mrs. John E. Avery, Atlanta, Ga.; Mr. and Mrs. Henry W. Avery, Cleveland, Ohio; Mrs. Charles Allen, Philadelphia: J. H. Allen, New York City.

A. T. Babcock, New York City: Mr. and Mrs. O. B. Barker and Miss Lelia Barker, Lynchburg, Va.: Henry H. Beers, Richmond, Va.; Louis G. Beers, Trenton, N. J.; John C. Beggs, Springfield, Mass.; Wm. R. Belknap, Louisville, Ky.: Howard R. Bemis, Springfield, Mass.; N. Benedict, Memphis, Tenn.; C. H. Bennett, Plymouth, Mich.: Irby Bennett, Nashville, Tenn.: W. H. Bennett, Chicago, Ill.; Mr. and Mrs. John M. Berry, Rome, Ga.: Clement M. Biddle, New York: Samuel A. Bigelow, Boston, Mass.: Mr. and Mrs. J. C. Birge, St. Louis, Mo.: Miss Ada Birge, St. Louis, Mo.; Walter Birge, St. Louis, Mo.; S. B. Bispham, New York City; John L. Blaisdell, Providence, R. I.; Frank R. Blauvelt, New York City; W. P. Bogardus, Mt. Vernon, Ohio; A. Eugene Bolles, New York City; G. Bommer, Brooklyn, N. Y.; J. S. Bonbright, Philadelphia, Pa.; A. W. Bond, Baltimore, Md.; J. C. Brammi, Plantsville, Conn.; S. H. Brown, Oklahoma City, O. T.; E. G. Buckwell, Cleveland, Ohio; J. W. Bailey, Lynchburg; A. C. Briggs, Richmond, Va.; A. Barritt, New York; C. P. Bowman, Staunuton, Va.

Senator Edward W. Carmack, of Tennessee; Mr. and Mrs. C. B. Carter, Knoxville, Tenn.; J. A. Carter, Cleveland, Ohio; R. D. Carver, Birmingham, Ala.; Mrs. Elizabeth D. Carver, Birmingham, Ala.; Mr. and Mrs. George E. Chatillon, New York City; H. P. Chenoweth, Birmingham, Ala.; Mr. and Mrs. W. A. Chenoweth, Birmingham, Ala.; A. W. Clark, New York City; Frank I. Clark, Fitchburg, Mass.; Mr. and Mrs. F. S. Colvin, Wilmington, Ohio; G. L. Corbin, New Britain, Conn.; George W. Corbin, New Britain, Conn.; M. L. Corey, Argos, Ind.; W. A. Corry, New York City; W. M. Cosgrove, Columbus, Ga.; Mr. and Mrs. Frank S. Cowles, S. Norwalk, Conn.; W. M. Crumley, Atlanta, Ga.; R. M. Crumley, Atlanta, Ga.; Mr. and Mrs. H. A. Curtiss, Meriden, Conn.; Mr. and Mrs. William A. Corry, Cincinnati; Mrs. W. A. Corry, New York City: Mrs. W. A. Chenoweth, Birmingham, Ala.; Miss Chenoweth, Birmingham, Ala.; Miss Julia Cabanne, St. Louis.

George F. Dana, Cincinnati, Ohio; G. S. Davidson, Memphis, Tenn.; H. A. Dean, Rome, Ga.; O. S. Decker, Pittsburgh, Pa.; S. C. Dinkins, Atlanta, Ga.; John Donnan, Richmond, Va.; Frank G. Drew, New Haven, Conn.; R. M. Dudley, Nashville, Tenn.; A. E. Duncan, New Britain, Conn.; Mr. and Mrs. F. B. Dunlop, Ft. Smith, Ark.; H. M. Davis, Pittsburgh; Louis Dietz, Cincinnati, Ohio; Harry C. Disston, Philadelphia; Dwight Divine, Ellenville, N. Y.; S. St. J. Eshleman, New Orleans; Mr. and Mrs. H. M. Davis, Pittsburgh; Mr. and Mrs. George Davidson, New York City; Mrs. Elizabeth Davidson, New York.

Clarence A. Earl, New Britain, Conn.; Mr. and Mrs. T. G. Ewing, Gadsden, Ala.; E. L. Enneking, Cincinnati, Ohio.

T. James Fernley, Philadelphia, Pa.; E. C. Ferriday, Wilmington, Del.; William J. Fickle, Bristol, Tenn.; W. H. Foege, Chicago, Ill.; J. A. Fopeano, New York City; C. F. Forsyth, Meriden, Conn.; H. C. Fox, Pine Bluff, Ark.; J. S. French, Cincinnati, Ohio; W. B. Fox, Jr., New York; D. W. Fleming, Anniston, Ala.

Mr. and Mrs. Robert Garland, Pittsburgh, Pa.; Miss Alice Garland, Pittsburgh, Pa.; Jos. W. Gates, Philadelphia, Pa.; T. W. Gathright, Atlanta, Ga.; J. J. Gilmore, Chicago, Ill.; Mr. and Mrs. B. M. Gladding, Memphis, Tenn.; N. A. Gladding, Indianapolis, Ind.; Ex-Gov. D. H. Goodell, Antrim, N. H.; R. C. Goodell, Antrim, N. H.; T. H. Gossett, New York City; James C. Griffin, Erie, Pa.; C. W. Griswold, New Britain, Conn.; J. H. Grubb, Philadelphia, Pa.; Frank Guildener, New York City; Miss W. A. Gladding, Indianapolis.

B. F. Hadley, Columbus, Ohio; D. P. Hale, Sandersville, Ga.; Geo. B. Harbster, Reading, Pa.; Mr. and Mrs. J. E. Harbster, Reading, Pa.; Mr. and Mrs. Mathan Harbster, Reading, Pa.; Lewis R. Hardy, Louisville, Ky.; C. B. Hancock, Bluefield, W. Va.; Mr. and Mrs. George H. Harper, Baltimore, Md.; Mr. and Mrs. George P. Hart, New Britain, Conn.; Mr. and Mrs. Harry D. Harvey, Baltimore, Md.; Master Harold LeRoy Harvey, Baltimore, Md.; George L. Haven, New Britain, Conn.; Paul E. Heller, Newark, N. J.; Elias G. Heller, Newark, N. J.; Jos. L. Hemp, St. Louis, Mo.; Mrs. Jos. L. Hemp, St. Louis, Mo.; T. B. Hendrickson, Reading, Pa.; John Hoen, Baltimore, Md.; George F. Holton, Catasauqua, Pa.; Jos. M. Hottel, Philadelphia, Pa.; E. C. Hough, Plymouth, Mich.; S. B. Hubbard, Jr., Jacksonville, Fla.; Jas. Hutchinson, New Britain, Conn.; B. A. Hawley, New Britain, Conn.; W. H. Hayes, Pittsburgh; T. L. Hosball, Atlanta; Miss Hemp, St. Louis; F. L. Hoshel, Atlanta, Ga., E. C. Atkins & Co.

Edw. Ingalls, Newark, N. J.; Charles H. Ireland, Greensboro, N. C.

W. B. Jackson, Athens, Ga.; G. N. Jacobi, Reading, Pa.; James Spencer, Danville, Va.; G. W. Jeffords, Columbus, Ohio; Mr. and Mrs. M. P. Jemison, Tuscaloosa, Ala.; W. T. Johnson, Glassport, Pa.; R J. Johnston, Philadelphia; E. G. Jacques, New York; Charles T. Johnson, Canal Dover, Ohio; S. J. Johnson, Philadelphia.

Mr. and Mrs. Bruce Keener, Knoxville, Tenn.; T. H. Keller, Cincinnati, Ohio; J. E. Kelley, Fitchburg, Mass.; Mr. and Mrs. J. P. Kelly, Charleston, W. Va.; C. M. King, Allegheny, Pa.; Mr. and Mrs. Charles P. King, Atlanta, Ga.; A. M. Kinsley, Oneida, N. Y.; George D. Kirkham, Memphis, Tenn.; Mr. and Mrs. Lewis W. Klahr, Philadelphia, Pa.; Mr. and Mrs. George W. Knapp, Baltimore, Md.; George L. Knight, Nashville, Tenn.; Mr. and Mrs. F. S. Kretsinger, Cleveland, Ohio; Miss Mildred Kretsinger, Cleveland, Ohio; J. H. Keating, Chicago; Miss K. Knapp, Baltimore, Md.

B. Luerssen, Reading, Pa.; Robert M. Lee, Erie, Pa.; S. R. Leonard, Oneida, N. Y.; Mr. and Mrs. Henry B. Lupton, Pittsburgh, Pa.; Chas. M. Luthy, Columbus, Ohio; S. B. Luttrell, Knoxville, Tenn.; R. F. Lund, Canal Dover, Ohio; Robert M. Lee, Erie, Pa.; C. F. Lowe, Monroe, N. C.; John J. Ladrick, Cleveland; J. H. Lake, Greenville, Miss., Goyer Company; Edw. Lee, Knoxville.

Mr. and Mrs. James J. Mandelbaum, Little Rock, Ark.; Mahlon H. Marlin, New Haven, Conn.; Mr. and Mrs. W. H. Matthai, Baltimore, Md.; W. L. Mayer, Fitchburg, Mass.; Joseph J. McCaffrey, Philadelphia, Pa.; H. J. McHue, Chicago, Ill.; J. C. McDonald, Reading, Pa.; Mr. and Mrs. O. C. Mead, Louisville, Ky.; Mr. and Mrs. Fred. S. Merrick, New Brighton, Pa.; Mr. and Mrs. F. D. Mitchell, New York City; Guy Mitchell, Atlanta, Ga.: Mr. and Mrs. John G. Mohn, Reading, Pa.; Mr. and Mrs. J. D. Moore, Birmingham, Ala.: Miss Moore, Birmingham, Ala.; V. A. Moore, Atlanta, Ga.: F. E. Muzzy, Chicopee Falls, Mass.; Mr. and Mrs. C. L. Miller, Pittsburgh: S. L. Mitchell, New Orleans: D. M. Milligan, Philadelphia: G. J. Metzler, Halifax, N. S.; Charles C. McFarlane, Cincinnati; G. G. Moore, Roanoke, Va.; Miss Lucy Matthews, St. Louis.

George B. Nichols, New Britain, Conn.; George M. North, Cleveland, Ohio; A. A. Norton, Chicago, Ill.; Mr. and Mrs. S. Norvell, St. Louis, Mo.

Thomas O'Brien, Norwich, Conn.; George T. Oliver, Pittsburgh, Pa.; John C. Oliver, Pittsburgh, Pa.

George S. Parkes, Birmingham, Ala.: J. B. Parrent, Atlanta, Ga.; Thomas E. Parnell, Chattanooga, Tenn.: A. W. Peck, New York City: Robert N. Peck, New Britain, Conn.; E. E. Perry, Norwich, Conn.; E. R. Philip, Atlanta, Ga.; E. Bertram Pike, Pike, N. H.; Mr. and

ANCIENT AND MODERN LOCKS AND KEYS.

Who Was the First British Lockmaker?

An enthusiastic inquirer into the origin of the Hardware goods he handles, asks the question, "Who made the first lock?" The antiquity of locks goes back far into the past, and reaches away beyond written records, making it impossible to answer the question asked. We are, however, inclined to extend the query and make it to read, "Who were among the earliest makers of locks in England?" in the hope that some of our readers may discuss the question in our columns, and bring to light the names of those early pioneers of the lock-making industry, which has rendered the Black Country, with its numerous Hardware cottage industries, so famous for several centuries.

Locks play an important part in the stock of every builders' and cabinet ironmonger, and their different uses should be learned during the early days of apprenticeship. The manufacture of locks has been one of evolution commencing with the most simple forms of fastenings. Different methods of securing doors and chests have been adopted from earliest times by all civilized nations. English museums contain valuable examples of the early art of lock making, says the *Ironmonger's Chronicle*, many of which belong to the Roman period. Some of the ancient keys now owned by collectors have been discovered in the beds of rivers and buried in the remains of old fortifications. They are usually made of bronze, and are often covered with rich green patina. Many of these specimens clearly show how the wards in old locks were arranged, and although their uses could only be guessed at, it is evident that some wonderfully intricate locks kept the intruder out of old chests and prevented an unlawful entrance into castles and strongholds. There seems to be a dearth of specimens of English keys from the eighth to the thirteenth centuries. Probably this is owing to the fact that English artificers of that period used soft iron instead of case-hardened bronze. In the thirteenth century Gothic architecture had reached its highest point of perfection, and many of the examples of keys, with elaborate bows, now in existence, belonged to cathedrals and monasteries, the remains of which are dotted all over the country. Some of the grilles and wrought-iron work of the thirteenth, fourteenth and fifteenth centuries are still preserved in their original position in many of our old churches. The fifteenth century showed a marked improvement in the locksmith's art in England, the severe form of the lozenge-shaped bow becomes modified and Gothic decoration takes its place. The Guildhall Museum in London possesses two fine examples of this period. The early part of the sixteenth century wrought-iron keys were ornamental with graceful trefoil bows and moulded stems, several examples of which have been discovered in Somersetshire. Gothic decoration was long continued, and formed a prominent feature in the designs of wrought-iron work in this country. The locksmith's art is said to have attained its highest point of excellence in the reign of Elizabeth, fanciful designs, crosses, crowns, and cyphers being introduced, not only in the construction of the bows of keys, but in the form of the wrought-iron decoration of the locks themselves, together with their link plates and cases. The large and massive wrought-iron keys, the examples of which predominate in collectors' cabinets, appear to have been used specially for the coffers and strong boxes of merchants and others, in the days when banking facilities were very different from what they are at present, and fireproof safes were unknown. The stems of the keys were rarely solid, and are almost invariably worked on pins, the bits being elaborately cut, doubtless all the wards being fully represented in the locks to which they belonged. In the seventeenth century keys were made stronger, and door keys were frequently case-hardened, making them more serviceable and better able to serve their purpose of throwing the bolts, which in these old locks were of great weight and required some force to shoot. During the eighteenth century there was little change in the locks used, and cupboard, chest and door locks were fashioned in a clumsy manner. The keys, although retaining their size and weight, had lost much of their beauty, and less and less attention was paid to their form. In the nineteenth century attention was turned towards effecting greater security, and Bramah, Hobbs, and Chubb gained notoriety by their skill in making intricate locks. The original patent held by Chubb & Sons, Ltd., is dated 1818, the outcome being multiplied levers and the wonderful combination lever locks of the present day. Doubtless the oldest form of lock now in use is the stock, or plate lock. Some ironmongers will remember the peg locks of former days, and the crude types of fine-plate locks formerly used on cottage house doors, barns and outhouses. The old pipe locks are now almost obsolete, and the majority of the keys of stock locks—that is to say, locks with wood stocks—are made with solid pins, although the old form of the bridge and collar ward is still retained. In addition to these, rim locks—that is to say, locks which have a rim which is secured to the edge of the door—and dead locks, the latter being distinguishable from rim locks, inasmuch as they have no latch and consequently require no handle, are prominent in every ironmonger's stock. Latches with rims, and also the older types of bow latches without rims, are generally associated with this particular group, although in actual fact they are not locks. On the other hand, night latches are essentially locks, inasmuch as they can only be opened by the use of a key from the outside and a draw-back handle from the inside. Again, draw-back locks, commonly used on front doors, are operated with a key from the outside and a draw-back knob from the inside, and are usually made with latch and slide bolt. Limited space prevents description of mortice locks of English and American types, the introduction of machinery in the manufacture of which has greatly simplified their production and lightened the keys. Among the remaining locks found in present-day ironmongers' stocks may be briefly mentioned straight and cut cupboard locks, box, chest, camp desk, bureau and trunk locks. Many of the older forms of the last-mentioned type have been revived during recent years in consequence of their adaptability to tin trunks and dress baskets. The modern roll-over desks and other articles of furniture, now so much in use, require locks of special construction. Although there are many different types of pads, the majority retain the old form and are secured by a hooked clasp. The extended sale of American locks in this country has introduced a new feature in the stock patterns kept by British ironmongers; the number of peculiar shapes and forms, more or less built upon the Yale type, are well known to all present-day assistants. Among the eccentricities of former days was the screw lock, the key of which was threaded and screwed down to the end of the lock until it caused the link to open. Locks of this type were D-shaped, like donkeys' fetter-locks of still older days. There is a wide difference between the large padlocks with galvanized frames used on outdoor buildings and the small miniature pads sold for dog collars. Many makers of locks have exercised great ingenuity in the construction of microscopic specimens of different types—silver locks made from threepenny pieces are by no means uncommon, and there are several instances recorded of the wonderful ingenuity of lock makers. Mr. Henry Yates, of Woverhampton, once possessed a padlock on Barron's principle, full of tumblers, measuring only one-eighth of an inch in thickness, and Mr. Chubb, in 1849, exhibited one of his patent detectors set in a gold finger-ring, lock and key together weighing 16 grains.

Thus briefly the history of locks has been traced. The question, "Who was the first British lockmaker?" remains unanswered. Can any of our readers answer it?

HOW THE FORK ACHIEVED SUCCESS.

Time Was When This Common Article Was Regarded as a Luxury.

From the stupendously diverse array of forks now in use for oysters, for fish, for meat, for salad, for ices, for cakes—forks, as a wit says, for everything except clear soup—we may look back to the days when even the man of wealth owned none save his own individual fork; or through a still longer vista, we see the "proud Athenian" and the "noble Roman," with an air of savoir vivre, calmly partaking of food from their aristocratic fingers.

When hot dishes were served, this mode of procedure doubtless proved trying to sensitive cuticle. Hence, as early as the time of Cratinus and Aristophanes, according to an exchange, dandies wore gloves at meals. The old writers also refer to persons whose fingers had become callous from handling hot foods.

But, although table forks were unknown, the ancients possessed large implements of similar shape for agricultural and other purposes. Fleshhooks are frequently mentioned, an early example being a kind with "three teeth" used during the priesthood of Eli's sons, for plunging into the kettle where the sacrificial meat was "in seething." The fork's characteristic form also found expression in Neptune's trident. However, it is reasonable to believe that primitive man obtained the idea of prongs from his own prehensile fingers. In fact, one of the classics particularly notes the marked resemblance between the human hand and the rude kitchen fork of the Greeks.

Until the late Middle Ages, the Chinese alone owned the sole table appointment tantamount to a fork—their national chopstick, dainty and beautiful, but useful only in the grasp of a Mongolian or a prestidigitator. Still, the table fork of the present may boast a noble lineage, its earliest-known ancestors being those utensils of gold and silver mentioned among the valuables of Edward I.

Somewhat later, in 1379, forks are included with the inventory of plate belonging to Charles V. During his time, they were evidently not yet customary even at aristocratic tables, as a miniature of a "Grand Ceremonial Banquet at the Court of France" represents large and small spoons and knives at each cover, but no forks. Another miniature of the same century depicts an entertainment among the high nobility at which forks do not appear, although knives are provided for the company.

It is possible that at first the fork was used only for sweetmeats. A will of the year 1463 designates such a one: "I bequeathe to Davn John Kertelynge my silver fork for grene gyngour." Toward the close of the fifteenth century, forks were becoming fairly well known. About 1458-90, Galeolus Martius, a resident at the Hungarian Court, commends the King for his ability to eat "without a fork, yet converse at the same time, and never soiling his clothes." This writer also tells us that in his day the Italians used forks, but the Hungarians had not adopted the custom. He notes, too, the general staining of the fingers from handling animal foods whose accompanying sauces were frequently colored and flavored with saffron.

Naturally, large joints of meat could not be presented at table when there were no forks, and when knives, as well, were somewhat unusual. Hence, for the sake of the diner's convenience, meat was sent from the kitchen already cut into "dice," or "sops," or "gobbets." This mode of preparation is still adhered to in most Asiatic countries, where the five fingers exercises in eating are also practiced.

Jeffreason believes that the introduction of the fork into Great Britain brought about an improvement in the cuisine. He says. "The beef of Old England never had its proper honor until the fork enabled the carver to cut it properly." And we are told that Queen Elizabeth showed a gourmet's discrimination in particularly appreciating a "cut of roast."

Nevertheless, from the sixteenth to the seventeenth century, the fork was obliged to battle strenuously for existence. In France, at the monastery of St. Maur, the young and progressive men sanctioned its use, but the old and conservative monks regarded it askance, as an object of sinful worldliness. Thudichum notes that "when forks began to be used at Venice, notably by the wife of a son of the Doge Peter Orseleolo, she was censured for this insenate luxury by one Peter Damian, an ecclesiastic," who called down the vengeance of Heaven upon her and her husband. They both died of the plague, which circumstance the fanatic considered an avenging deity's direct answer to his prayer. Another clergyman insisted that holding meat with a fork amounted to an impious declaration that "God's comfortable creatures were not worthy of being touched by human hands." The celebrated Thomas Coryat, who ushered the fork from Italy to England, was dubbed "Furcifer" in derision. Ben Johnson thought it necessary to make a fling at "The laudable use of forks brought into custom here as they are in Italy to the sparing of napkins."

Beaumont and Fletcher likewise sneeringly spoke of the "fork-carving traveler"; while Fynes Moryson endeavored to pour oil on the troubled waters, advising all young travelers, "on returning home, to lay aside the fork of Italy," and also "the affected gestures of France," and "strange apparel."

But, though the conflict waxed fast and furious, the fork finally prevailed. And this, no doubt, for the quite sufficient reason which Coryat naively gives in his "Crudities:" "The Italians cannot by any means endure to have their flesh touched by fingers, seeing that all men's fingers are not alike clean." In those troublous times, the custom of purchasing forks by the dozen was unknown. Each intrepid spirit who believed in their use owned his individual fork. Done up in a shagreen case, it was carried with him to all entertainments, for hosts did not provide such utensils through fear of offending guests of the old regime. Lord Lytton makes Mr. Pelham provide his especial fork when dining out, but because of this hero's idiosyncrasies.

Governor Winthrop, among our own countrymen, was probably the first possessor of a fork. According to Alice Morse Earle: "In 1633, when forks were rare in England, he received a letter from E. Howes, saying that the latter had sent to him a "case containing an Irish skeayne, or knife, a bodekyn and a fork, for the future application of which I leave to your discretion."

Toward the close of Charles II.'s reign, the fork began to appear on all well-appointed English tables. Its first form had but two tines. This style was made in quantities at the Sheffield works, and continued in general use, even among the well-to-do, until the latter part of the eighteenth century. Ashton's "Old Times" contains a representation of the "Installation Supper" given by the Knights of Bath, 1788, and shows the august company with two-pronged forks.

Those of three prongs were known, however, at an earlier date. An order for three-pronged forks was sent from America to England in 1738, while even before this, persons of wealth occasionally owned forks with four prongs, which number, at about the opening of the nineteenth century, became the accepted standard for general utility.

Thought and care have been exercised in the manufacture of the fork from the initiatory period of its career. New York's Metropolitan Museum shows a collection of fourteenth and fifteenth century styles noticeable for the variety and beauty of materials used in the handles. Nichols describes three handsome forks which belonged to Queen Elizabeth, one being of crystal, garnished with gold and sparks of garnets; another of coral, having gold decoration, and a third of gold, set with rubies, pearls and coral. The German artificers of that day executed many ingenious designs. Among examples still in existence there is one whose handle is surmounted by the figure of a jester jointed like a child's doll, which tumbles about as the utensil is used. Another odd fork is mentioned in a will of the year 1554: "I give and bequeathe my neighbor my spone with a fork in the end." We find, in 1608, forks "made of yronn or steele, and some of the silver, but these are used only by Gentlemen." Ben Jonson, some of whose associates belonged to the beau monde, says that you must "learn the use and handling of your silver fork at meals."

In 1652, those of precious metal were evidently not yet well known to the general public, as Heylin's "Cosmography" mentions "the use of silver forks by some of our spruce gallants taken up of late." This remark suggests the idea of foppishness which clung to the fork for many years, and which caused it to be decried by the substantial middle-class. The author of "A Book About the Table" tells us that as late as 1845, he heard an English squire, at a hunt dinner, order a waiter to "take away that thing and bring me a fork." The object thus disdainfully rejected was a silver fork.

Yet, after its long struggle for recognition, the fork, on the twentieth century dinner table reigns supreme, while the manner of handling this utensil has become the shiboleth of table etiquette, revealing one's social status to all beholders.—*House Furnishing Review.*

A LAST RESORT.

Caller—What a beautiful baby! And what is its name?

Young Mother—Bridget Sullivan De Vere.

Caller—Mercy sakes! How did you happen to git it a name like that?

Young Mother—Why, the cook threatened to leave when baby came, and we got her to stay by naming the baby after her.—*Brooklyn Life.*

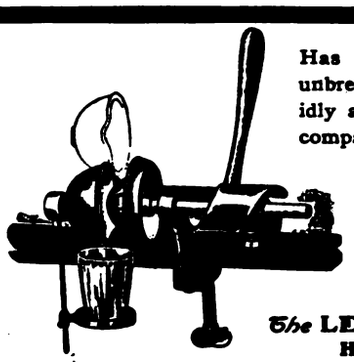
GALVESTON'S SEA WALL.



Galveston's great sea wall is rapidly nearing completion. It is believed that the massive concrete barrier will forever (barring earthquakes) secure the city from waves and storm. The structure is seventeen feet high, sixteen feet wide at the base and five feet wide at the top. The foundation wall rests upon four rows of round piling twelve inches in diameter and driven four feet apart and forty-four feet down into the clay. There is also a row of sheet piling just inside the outside row of round piling, driven into the ground twenty-six feet below mean low tide to prevent undermining. There is also an apron twenty-seven feet wide by four feet thick extending seaward in front of the wall, composed of solid granite blocks, as a further protection in case of some handsome literature in the form of envelope size pamphmagnitude of this great undertaking, the following figures, taken trom the Galveston correspondence of the St. Louis *Republican*, are appended: Concrete used, 102,000 yards, or 150,000 tons, or 7,500 carloads; riprap, or broken stone, to prevent the action of the water directly on the sea wall, 100,000 tons, or 5.000 carloads; sand, 40,000 yards, or 50,000 tons, or 2,500 carloads; cement, 135,000 barrels, or 27,000 tons, or 1,350 carloads; round piling, 18,000 tons or 1,000 carloads; sheet piling, 4,000,000 feet, or 750 carloads; reinforcing steel rods, 10 carloads; total number of carloads, 18,000. This is equal to one carload of 40,000 pounds, or twenty tons, to every foot of completed wall.

A SOUVENIR WORTH REMEMBERING.

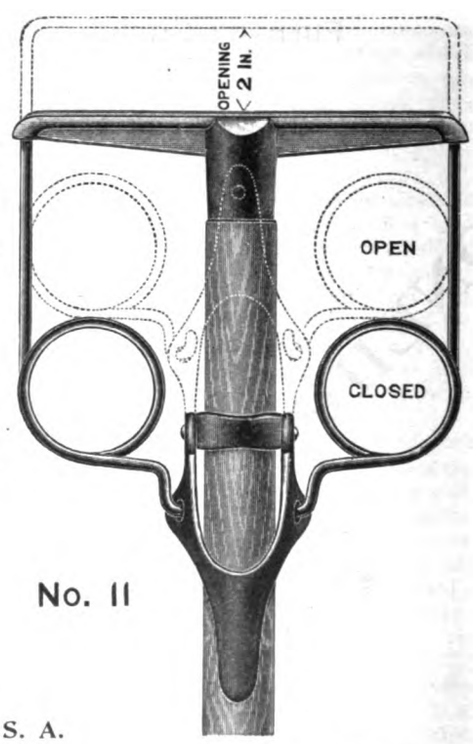
One of the most useful souvenirs designed for convention purposes was that of J. D. Warren Manufacturing Co., Chicago, the well-known manufacturers of sectional shelving. It consists of a Flemish oak cabinet to be placed on the office desk, containing two cut glass ink wells, sponge, eight compartments for the different articles that are usually required for the convenience of the desk in the way of black and red ink pen holders, rubber bands, wire clasps, pins, pens, eraser, postage stamps; all nicely assembled under a glass sliding cover so that they are in keeping with the idea of everything in sight. Its object is to eliminate the great diversity of trays from one's desk and centralize all these little necessities so that they can be seen at all times and quickly reached.

Russell & Erwin Manufacturing Co., New Britain, Conn., with New York office at 41-45 Chambers Street, are the authors of storms and undermining currents. To better judge of the let catalogues, of which we have received five. One is devoted to the artistic "Itasca" design lock and lock sets, made in cast metal bronze plated; another pamphlet exploits Window Stop Adjusters and Bead Screws for door and window stops; a third embraces the "Breton" design cast bronze metal locks, and a fourth the "Century" design made in wrought bronze metal and wrought steel, bronze plated. The last and most attractive one of the series is the pamphlet devoted to the Russwin Liquid Door Check. The cover of this book is a pale shade of blue for a background with the door check and lettering embossed in white. The illustrations are fine half tones and they show how the check may be applied to any style of door. Any of the above booklets, which are all illustrated, will be gladly sent to interested parties, upon application.

The "Leader" Lemon Squeezer

Has no loose parts. Is unbreakable. Works rapidly and thoroughly. Most compactly put together.

Two styles — nickel plated and Japanned.



Mention Hardware.

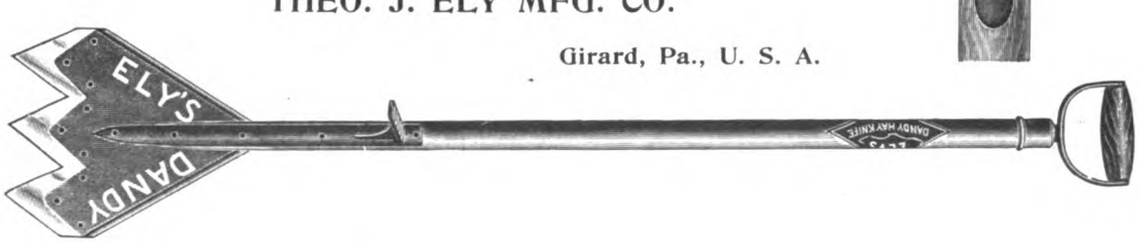
The LEADER MFG. CO.
Hartford, Conn.

Ely's Dandy Mop Head

Is the best in every respect, because:

1st---It has 25 per cent. larger opening for inserting mop than any other. 2d---We do not weaken onr handle by turning it down to make room for coil spring. 3d---Our spring has double the capacity of any coil spring which operates around the handle. 4th---The lever and ring are made of head of malleable iron instead of brittle gray iron.

No. 11



Ely's Dandy Hay Knife

will do the work of an extra man, thereby saving more than the price of it in one day, besides doing it easier than others. **Made on the right plan,** of malleable iron and steel, with oil-tempered Steel Knives. Combination hand and foot power.

We manufacture a large line of saw handles, waffle irons, towel racks, etc.
Be sure and get our catalogue. It tells all about our complete line of profitable sellers.

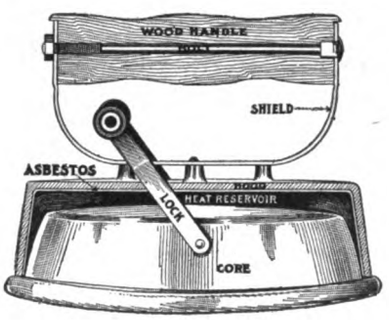
ASBESTOS SAD IRONS satisfy the user --the sales gratify the dealer. It pays to keep them in stock.

ASBESTOS SAD IRONS



AN IRON FOR EVERY PURPOSE

The Goods

For fifteen years The Dover Manufacturing Co. has devoted its **entire efforts** to producing a **perfect** sad iron. The result is the **Asbestos Sad Iron** as it is now constructed. Examine the **Sectional View** shown herewith, and you will see a feature which no other sad iron possesses—an **asbestos-lined hood or cover.**

This hood does two things: (a) It retains the heat in the iron; (b) it renders absolute coolness and comfort in the handle.

While the heat-retaining qualities of Asbestos Sad Irons are always appreciated, **the cold handle feature** is a specially strong selling point in the hot days of summer.

If you, Mr. Hardware Dealer, desire to handle goods that will **please your customers** — be sure to stock Asbestos Sad Irons. Do it **now,** when you can make the "cold handle feature" a special argument.

Ask for our Descriptive Booklet.

The Policy

The Dover Manufacturing Co. believes in **co-operation.** We co-operate with the trade in every way possible.

Following are the three chief articles of our creed:—

First, **We believe in co-operating with the trade by furnishing goods which will satisfy the final consumer—and thereby gratify the dealer.**

Second. **We believe in co-operating with the trade by liberal advertising.** Note the fact that we are using larger space to advertise Asbestos Sad Irons in magazines which women read than has ever been used in exploiting a household utensil.

Third. **We believe in co-operating with the trade by establishing and maintaining minimum retail prices.** The Dover Manufacturing Co. cannot afford to have Asbestos Sad Irons in the hands of price cutters. We therefore refuse to sell dangerous trade. We cut off the supply of dealers who will not adhere to our policy.

ASK YOUR JOBBER FOR PRICES.

THE DOVER MFG. CO.

CANAL DOVER, OHIO.

CO-OPERATION expresses the true economic relation which should exist between the Manufacturer and the distributer of his goods.

JAP-A-LAC

REGISTERED TRADE MARK

"WEARS LIKE IRON"

IMPORTANT NOTICE TO ALL DEALERS

The List Prices of Jap-a-Lac Must be Maintained at all Times

We are informed that some dealers handling JAP-A-LAC have been so unmindful of their profit that they have cut the retail prices as established by us through six years of constant advertising and at an expenditure of more than TWO HUNDRED THOUSAND DOLLARS.

We wish to announce to the trade that we do not sanction any cutting of the list prices and

WE SHALL POSITIVELY DECLINE TO SELL JAP-A-LAC TO ANY DEALER WHO DOES NOT AT ALL TIMES MAINTAIN THE PRINTED LIST PRICES ON ALL SALES TO THE CONSUMER.

We shall be very glad to be promptly advised of any case where JAP-A-LAC is sold or advertised to be sold to consumers at less than the regular list prices. The co-operation of all the dealers and jobbers is earnestly requested that full protection may be afforded to dealers who are entitled to and shall receive every assistance from us to reap all the benefit of our extensive advertising.

REVIEW OF THE MARKETS.

WIRE NAILS: The result of the action taken in Chicago last month has strengthened the market perceptibly, the influence being felt throughout the trade, the maintaining of the official quotations generally observed and less shading of prices noticeable by manufacturers and jobbers. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in ten days:

Carload lots to jobbers	$1.80
Carload lots to retailers	1.85

New York.—Under a much more satisfactory demand Wire Nails are moving readily at firm prices, jobbers having less difficulty from competition than is usual. May was a satisfactory month and the local market is a steady one. Quotations are as follows: Single carload $1.99. Small lots from store $2.05.

CUT NAILS: At the recent meeting of the Cut Nail Association, May prices were reaffirmed for June. There are few, if any, concessions heard from now, prices being carefully maintained. Prices remain as previously quoted, as follows:

Carload lots	$1.80
Less than carload lots to jobbers	1.85
Less than carload lots to retailers	1.95

f.o.b. Pittsburgh. Iron Cut Nails for delivery at Pittsburgh, Buffalo and all points west of these cities 10 cents advance per keg on Steel Cut Nails.

New York.—May reported sales of a satisfactory character. The market is firmly held, the regular quotations being as follows:

Carload on dock	$1.94
Less than carloads on dock	1.99
Small lots from store	$2.00 to 2.05

BARB WIRE: A large quantity of Barb Wire was moved during May, wet weather only interfering with the deliveries. Trade is now moving at a regular pace, as sales are reported large and satisfactory at official prices, which are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$1.95	$2.25
Retailers, carload lots	2.00	2.30
Retailers, less than carload lots	2.10	2.40

SMOOTH FENCE WIRE: A fair demand for this staple is noticeable. Orders are being placed at present prices which are maintained at specified rates as the market gives indications of an advance. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

Jobbers, carload lots	$1.65
Retailers, carload lots	1.70

The above prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

BINDER TWINE: General market quotations f.o.b. Eastern factories, may be given as follows:

White Sisal (500 feet to the pound)	9½ @ 9¾
Standard (500 feet to the pound)	9½ @ 9¾
Standard Manila (550 feet to the pound)	10½ @ 10¾
Manila (600 feet to the pound)	11½ @ 11¾
Pure Manila (650 feet to the pound)	13 @ 13¼

Less than carload lots quarter of a cent extra.

ROPE: The following prices may be said to represent the market:

	Cents per pound.
Pure Manila, 7-16 and larger	12¼ to 12½
Pure Sisal, 7-16 and larger	10
No. 2 Sisal, 7-16 and larger	8¼

Less ¼ cent to the large trade.

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....51 cents per gallon.
In lots of 5 barrels or more.....50 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil.....60 cents per gallon.

THE ALBANY TRADE.

Trade conditions have been especially favorable in this section of late. The weather has become more seasonable and the farmers have needed implements and material to carry on their customary Spring work and this has started heavy trade with the dealers in the smaller towns which leads up to the jobbing trade and all those who handle Hardware have been highly favored with an excellent business. Steadiness in prices is noticeable and the slight falling off on a few leading goods which appeared to indicate lower prices was but temporary, and when such instances occur, as they do at intervals, the source is usually traced to some party who makes a special effort to unload a quantity of material and then re-establishes the current rate of prices on such goods. A temporary weakness is shown, but recovery is quick. The excellent demand in the line of tools, Builders' Hardware and roofing materials indicates an activity among the builders which is not disturbed in this section by any labor. In the sporting goods line there has been great activity. The aid given to the sale of these goods by the newspapers reciting the wonderful stories which returned fishermen tell, incites the interest of all lovers of sporting and the dealer gets the benefit by his increased sales. This branch of business—sporting goods—has been a great help to the Hardware dealers who have taken up this line and it is interesting and not unprofitable to handle. Collections are very fair so that "an all 'round" satisfactory condition can be reported from this territory.

ALBANY HARDWARE & IRON CO

THE CLEVELAND TRADE.

The corner stone of the Federal Building in this city was put in place on the 20th of May. The event was made more interesting because it is the beginning of a group of public buildings that will make this city notable. The city and county are preparing to place their public buildings under the advice of the best obtainable architects in a group that will be an example for other American cities. Circumstances make it possible to erect all the county and city buildings on a mall extending from the Public Square with the Federal Building, and the New Union Depot being a part of the plan. The City Hall, County Court House, Public Library, School Administration Building and Public Armory with the Federal Post Office and Union Depot will form the group, surrounded by beautiful grounds on a bluff overlooking the lake. Already a fine bronze memorial statue of M. A. Hanna has been ordered to adorn the grounds. This indicates attention to beauty and art in public building, that gives promise for the future. Cleveland is a business city, but it is making large expenditures to provide for the culture and comfort of its future inhabitants. Its thousand acre farm for its Infirmary and Hospitals, and its farm for a suburban home for neglected boys, its splendid park and boulevard system, all testify to its interest in the future welfare of its people. Fifty years hence, no one will believe that the present generation were entirely absorbed in getting rich and unmindful of better things. The unusual number of bank failures in this vicinity is having some influence on trade. Most of them were caused by criminal acts, and the bankers' row in the Ohio Penitentiary is said to be over full. The lobby at the last Ohio legislature prevented the passage of a banking law and now as some of the representatives are being shut up, it may be possible for the next legislature to pass one. Amid all our prosperity a sense of timidity seems to prevail, caused by a lack of confidence in the integrity of our captains of industry and finance, but the business of the country is on too sound a basis to be stampeded by rascality. Some of the trust companies may have financed speculative ventures too freely, but the foundation is not in danger, and the warning has come in time to prevent anything like universal collapse. Lawson even may be turned into benefit, as the sun converts dung into food, and maggots consume putrefactions. It is wholesome to feel that right will find a way to have its innings, however tortuous or winding may be the passages.

THE LOCKWOOD-TAYLOR HARDWARE CO.
C. B. LOCKWOOD, President.

THE PITTSBURGH TRADE.

May closed showing some increase in business over 1904, but not up to the expectations of the earlier months of the year. Large manufacturing interests are still busy with orders taken months since and it is hoped there will be a renewal of orders for the latter half of the year as soon as the crops are assured

Digitized by Google

as being up to or above an average. Talk of a 12 foot canal from Lake Erie to Pittsburgh has been revived by the incorporation of a company to build it. As it is only a matter of 30 million dollars and would be of immense value to Pittsburgh it should be put through at an early date. Large transactions in coal lands, especially in the coke region, are reported, the most recent being one of 10,000 acres bought by Jones & Laughlin's at an expense of $3,000,000. This concern is now well fortified with ore and coal for many years to come. The wholesale Hardware houses agreed to close on Saturdays at 1 P. M. from June 16 to September 17, inclusive, and it is expected that during the remainder of the year some earlier hour than has been customary will be agreed upon.

Logan-Gregg Hardware Co.

THE PHILADELPHIA TRADE.

After a cool Spring we are having warm Summer weather and the effect on trade will doubtless be immediately felt. Already renewal orders are being received for Wire Cloth, Poultry Netting, Lawn Mowers and similar goods, and we are inclined to think that this late season demand will probably be fully up to the average. Trade on the whole continues in very fair volume, equalling the last two years, both of which were considered above normal. Prices are without marked change in either direction, although the market is in the usual waiting condition natural to this time of the year. Less than one month from now and we shall see the end of Spring trade and all our thoughts and energies will be working toward a new record in the Fall. The weak spot in trade during the last few months has been the matter of collections, as owing to the severe and long continued Winter, money was very scarce in the country, and farming communities are only now beginning to realize a return from Spring products so that an improvement in collections is now discernible and the worst probably over. A steady improvement may now be expected.

Biddle Hardware Co.

THE SAN FRANCISCO TRADE.

When on the second instant Vice-President Fairbanks was delivering an address at the dedicatory services of the Washington State Building at the Lewis and Clark Exposition, in Portland, Oregon, three Hardwaremen were grouped within earshot —the president of the Washington State Hardware Association, the secretary of the North Pacific Hardware Jobbers' Association, and a member of the San Francisco house of Baker & Hamilton. When the distinguished speaker, with his eyes focused on nearby piles of California ores—copper, iron and gold—delivered an eloquent outburst of unstinted praise of the exposition, the growth of the Pacific coast, and marvelled at the prodigious possibilities of commercial development in the near future, the San Francisco member of the group of Hardwaremen made this undertone remark to his two companions: "The Vice-President is talking with the insight knowledge of our prophetic tradespeople."

"The best news I have to give out this week," said President Bennett, of the California State Retail Hardware Association, "is the rapidly accumulating result of the association's recent assignment to duty of a State canvasser, Mr. F. B. Dickson. His good work in the interior is enlarging our membership wonderfully, and if he keeps it going as his few weeks of operation have demonstrated, I predict that by Christmas time our State Association of retail Hardwaremen will be numerically greater than any like society of our entire country."

"Tell Hardware readers of our Pacific Coast Window Glass Company's progression," remarked a prominent Market Street Builders' Hardware merchant. And, continuing, he said:

"It is well known that much difficulty is experienced by the glass workers in producing perfect window glass. A small lump in the melted sand, a mistake upon the part of the gatherer, or any one of many other seemingly very trivial errors, will cause an imperfection in the finished product. If there should be what is known as a bubble or a stone in a piece of glass that is sufficient to designate its quality as not of the best, inferior priced goods, of course. A few years ago, however, a glass worker in Belgium discovered a process by which glass of this character could be made to command a price even greater than window glass of the highest quality, and it is this process that has recently been made a part of our Pacific company. In making the chipped product the glass is first treated by the sandblast. A piece of glass, of any size, is placed upon belts which move very slowly. These belts carry the sheet directly under the bellows that blows sand with terriffic force upon it, destroying the smooth surface on the upper side. The glass is then heated and while in this condition boiling glue is smeared on the blasted side. The glass is next taken to the drying room, which is heated to a high temperature. Here the glue dries very quickly and by its rapid contraction it pulls or forces the surface out of its original shape and leaves it in a roughened condition. By giving the glass another application of glue and again placing it in the drying room, it increases the roughness even more, the conclusion of the process leaving the glass beautiful in appearance and highly in demand for ornamental doors and windows."

Outside men of Builders' Hardware houses report the finding in California of several kinds of material that will, they think, cause a quickening in building operations. One of these materials is fireproof building stone, found in Shasta County, a full 1,000-acre tract containing vast quantities of the rock. Fireplaces and chimneys built of this material twenty-five years ago in now dismantled miners' camps, have been found to be flawless, and this new discovery is now receiving considerable attention. The other discovered material, said to have recently come into great favor in Eastern States, is a cement brick material, found in several of California's northeastern counties, and cement brick factories are about to be built, both at Chico and Auburn.

Industrial Press Association.

DEATH OF HEZEKIAH KING.

Hezekiah King, one of the oldest New York Hardware merchants, died at his summer home in Dobbs Ferry-on-Hudson, Monday evening, June 5, after a short illness, in his eighty-third year.

Mr. King was born in Vernon, Conn., October 4, 1822, and was descended from a family which early settled at Weymouth, Mass. He received a good education at a private academy in Middletown, Conn. Mr. King began his business life in 1839 in the employ of John David Wolfe, Bishop & Co., 87 Maiden Lane, New York, then a prominent Hardware firm, of which he later became a partner. After the dissolution of that house he began business in his own name in 1856 at 86 John Street, which so continued until 1863, when he took into partnership his brother, John Warburton King, the firm style becoming H. & J. W. King. During the early seventies the Hardware trade underwent marked changes in New York as the volume of domestic manufactures increased, and the business was moved to 596 Broadway, near the Metropolitan Hotel, where a retail department was added, the firm becoming King, Briggs & Co., in 1873. In 1880 the business was moved back to the Hardware district, locating at 111 Chambers Street, where it was disposed of to Francis T. Witte, a former partner, since becoming the F. T. Witte Hardware Company, removing later to 106 Chambers Street, as now. Mr. King had always maintained an office at the latter address and retained for himself the taking of importation orders for certain Hardware specialties, which business he conducted until his decease. The trade of this house had always been chiefly English Hardware, Guns and fine Cutlery. For nearly forty years he served as a ruling elder in the Presbyterian Church. He was also for thirty-five years a member of the Board of Construction of the Presbyterian Church and filled other equally important positions on various committees in that work.

AGE.

"Man has seven ages," she said.

"Yes," he replied. "Woman has only two, her real age and the one she tells her friends."—*Chicago Record-Herald.*

IT MAY SURPRISE YOU TO KNOW THE TRUTH

Some of our customers who were most conservative at first now buy

Star Safety Razors And Supplies

at what they would have formerly considered "terribly reckless purchasing." They have learned the value of the "STAR" PROPOSITION.

THINK IT OVER

Our first year in business we manufactured and sold 1,600 STAR SAFETY RAZORS. We were the pioneers. It is always hard to convince the "other fellow." When Columbus said the world was round, people called him crazy. To introduce the STAR SAFETY RAZOR, we had to convince each purchaser of its merits and that it was not a novelty of no practical value. Each purchaser became a whirlwind of enthusiasm and an advertising medium for STAR SAFETY RAZORS. To-day over 7,000,000 STAR SAFETY RAZORS are in daily use. Our sales are larger than all other makes of safety razors combined, and we fully expect to sell 1,000,000 in 1905; that means an output each day of over double of what we sold in one year at the start.

Quality and Practicability have brought about this result.

Since the advent of the "STAR" over forty safety razors of various designs and patterns have been offered to the trade as a substitute for the ORIGINAL and MECHANICALLY PERFECT "STAR."

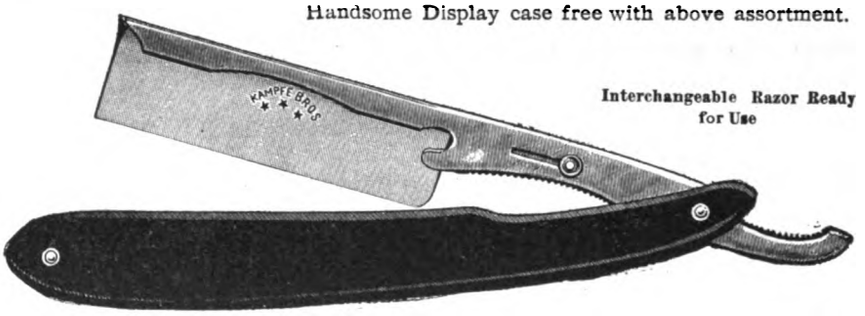
Did you purchase any of these various makes? Were they satisfactory?

Did they meet with the endorsement of the public? Can you conscientiously recommend them?

Have you any dead stock of safety razors on hand to-day and would you be glad to close them out at less than cost?

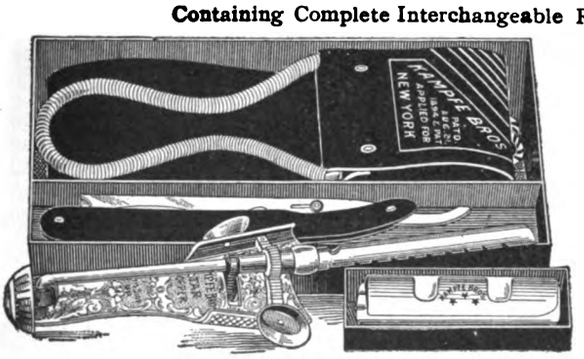
Do you think it is good business policy to carry in stock an inferior article because it is offered to you at a lower price?

WE WANT EVERY DEALER to have one of our "STAR" Assortments "A"; it will swell your profits.



Assortment "A"

6 only—No. 1 Star Safety Razors, complete.
3 " —No. 2 Star Safety Razor Blades.
2 " —No. 3 Stropping Machines.
2 " —No. 25 Star Stroppers.
2 " —No. 26 Diagonal Strops.
1 " —No. 4 Jewel Case, one blade.
1 " —No. 5 Star Case, two blades.
1 " —No. 6 Star Case, three blades.
1 " —No. 7 Star Case, four blades.
1 " —No. 9 Traveling Case, two blades.
1 " —No. 24 Combination Outfit.
2 in Signs, 1 Counter Mat and Catalogues.



Handsome Display case free with above assortment.

Kampfe's Star Interchangeable Razor

Interchangeable Razor Ready for Use

Handsome Leatherette Covered Paste-Board Box.
Containing Complete Interchangeable Razor, one Blade, Star Stropper and Strop.

No. 99--One Blade Set.

Experience teaches us that about one man in twenty-five knows now to strop a razor properly. Many can and would prefer to use an old-style razor, but have found the proposition unsatisfactory for the reason that they are unable to keep their razor in condition for use. On account of such conditions existing many advertisements appear in the various publications: "*Razors requiring no honing or stropping; always ready for use; guaranteed to give satisfaction.*" THIS IS FALLACY. No razor can shave properly unless properly stropped, giving it the keen edge that cuts the beard and does not pull or scrape. Any practical cutler will bear us out in this statement. Our Interchangeable Razor overcomes all these difficulties. It is an improved old-style razor with interchangeable blades to be inserted in our new device (blade holder and handle). These blades can b. stropped with our SPECIAL Star stropper (size larger than the stropper used to strop a safety blade). We offer them for sale in sets only, the razor and handle complete, including Star Stropper and Diagonal Strop. Also in sets containing two, three, four and seven blades.

We are catering to the thousands who wish to overcome the difficulty that they have had in properly stropping their razor, and for this reason we have decided to offer the New Interchangeable Razor in sets only, including the Star Stropper and Diagonal Strop.

"Star" Safety Corn Razor

Send for catalogue, circulars and wholesale quotations.

Simple, Safe and Sure. Gives immediate relief to sufferer from any corn, no matter how hard it may be. Impossible to cut the foot. Can be stropped or honed like any razor. With every initial order for 12 we send handsome display case. Leather pocket with each Razor.

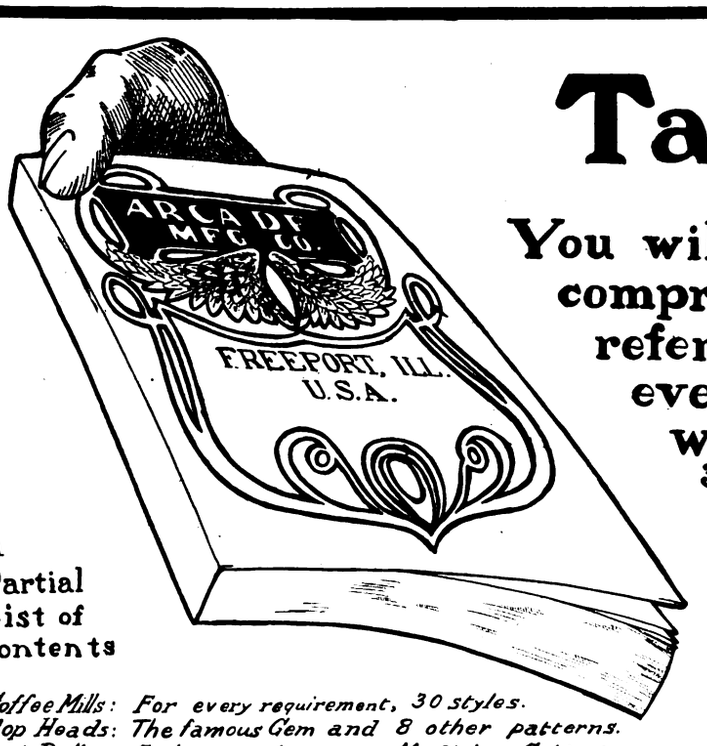
INVENTIONS YET TO COME.

The following interesting paper has been taken from the *Woman's Home Companion*. It was prepared by Hudson Maxim, the inventor:



I will commence with what may be reckoned our domestic primaries, or the matters which affect us immediately in the familiar circle of home life. I refer to inventions which have to do with light, heat and food. Obviously there is scope for an immense revolution. Hundreds of electricians are at this moment striving to construct lamps in which nothing is consumed save the electrical energy applied to them—lamps that have the radiance of the sun and the coldness of the moon. The reason why determined study is thus being prosecuted with respect to illuminants is the need for lamps of longer life and purer light than the arc and incandescent lamps now in vogue. The economy of these is not high enough. They are not really very superior to the best forms of gas, which, for cheapness, still holds its own.

With regard to the great fuel problem, it is well known that Mr. Edison is concentrating much of his attention on the higher economics of the use of coal. Coal is king to-day. The immediate task of scientists is to draw from this commodity something like its real value in work so as to obviate the enormous waste involved in present methods. Mr. Edison declares that a bucketful of coal should drive an express train from New York to Philadelphia, and a few tons be sufficient for the largest ocean steamship whose bunkers must now hold thousands. The Oceanic consumes a ton of coal every three minutes, or about 500 tons a day, during her voyage between New York and Liverpool. But a single pound of coal burned under perfect conditions would do as much work as the strongest hod-carrier climbing stairs or ladder with brick and mortar during a weary day of ten hours' working time. At present we waste six-sevenths of the value of coal. Our inventors will know no rest until they have found the furnace, the engine or the appliance, or whatever it may turn out to be, which will substitute absolute economy for this immense extravagance.

Both for domestic and for manufacturing purposes, engineers and men of science are diligently studying the art of harnessing the direct rays of the sun. They anticipate the time when the world's supplies of coal, petroleum and other combustibles will be practically exhausted. Vast regions of the earth's surface are sunburnt to aridity and everywhere the sun's heat is constantly deluging that surface with stores of latent potential energy, which might be made available for the purposes of civilized humanity. Water power and wind power both derive their energy from the sun's rays, and many clever inventions yet unheard of will have for their special object the application of each of these sources of activity. But the defect in each case is the lack of certainty. Wind and tide are variable and intermittent. Therefore, scientists look with great expectations to the perfection of the solar engine, which was produced by Ericsson in an elementary form. Some day there will be discovered a method of gathering and storing the energy of the direct rays of the sun for use in producing a heat motor. But the practical sun engine is still among the "uninvented inventions."

Science will be more and more concerned with problems of food supply. Here the chemist comes into evidence. Scientists predict wonderful results as the ultimate reward of the researches now going on quietly in many a laboratory. The way will be found of growing strawberries as large as fine apples, and raspberries and blackberries will be produced in such dimensions that one will suffice for the fruit course of each person. Cranberries, gooseberries and currants will be as large as oranges. One cantaloupe will supply a large family. Melons, cherries, grapes, plums, apples, pears and peaches will be seedless. All varieties of summer fruits will be of such a hardy nature that they will be capable of storage all through the winter, as potatoes now are. How will all these wonders in culture be achieved? By the discovery of new methods of applying electric agency in glass gardens, so that at one and the same time currents will be passed through the soil to make plants grow faster and larger, and also to exterminate weeds and to destroy bacteria; while plants will be bathed all night in electric light to stimulate their progress. All this will be done, but the way to bring it to pass has yet to be invented.

One of the dreams of medical men is likely to be realized in

Take It

You will find it the most comprehensive, compact reference catalog you ever received.

Within its 200 pages over 375 different styles and patterns of Arcade Goods are tersely described and fully illustrated – and every one of these articles is of interest to the Hardware Dealer.

ARCADE GOODS give consumers exceptional service at moderate prices and assure dealers quick sales and good profits.

the near future. Few drugs will be swallowed or taken into the stomach unless needed for the direct treatment of that organ itself. The methods of administration of healing medicaments will be revolutionized in the day of our great-grandchildren. With the aid of diagnosis by X-rays and by the medium of electric currents drugs will be applied to various organs through the skin and flesh, and the treatment will be painless. It will be easy, with the instruments that are certain to be invented—of which the microscope, the photographic camera and the X-ray apparatus are but the pioneers—for the pathologist, physician and surgeon to see the interior of the body and to explore its recesses as it is now to survey the exterior. Furthermore, food will be made for travelers in the pemmican style known to our North American Indians. All kinds of nutriment will be condensed into tabloids containing in very tiny compass the essentials to sustain life in full vigor for long periods.

Though the means are as yet undevised, there will be no intermission of research until everybody can see and hear everybody without the slightest regard to intervals of space, no matter how great. The coming age will demand wireless telephone and telegraph circuits which will span the circuit of the globe, so that it will be as easy to telephone from New York to Pekin as from New York to Brooklyn. Our descendants will not be satisfied if the scientists of the next generation do not enable them, with greatest facility and economy, to witness by perfected kinematographs the weddings of any of their friends at the antipodes, the battles being fought on the other side of the world, and the races of horses, yachts and boats in every land. Balloons will rise high above contending armies, and with automatic cameras will "snapshot" the whole scene, bringing down forthwith to the respective generals perfect pictures of their enemies' forces.

There is much to be done in the way of improving transportation. In this sphere invention has but initiated its attempts. Many observers imagine that aerial navigation is to be the realm of immediate scientific advancement, but though the aeronaut is one of the foremost of present day scientific sensationalists, the engineer knows that he really holds the field. The possibilities of navigating the air, although its navigation is sure to come, offer to practical minds a far less inviting field of achievement in the lines of transportation than the necessary improvements on terra firma. On land and sea vehicles for travel will be in use which will render all those known at this hour only eligible for a museum of antique and obsolete curiosities. The automobile has come, but that is only pointing out the way of possibility. So far as velocity is concerned, the automobile has accomplished wonders, but it attains speed only on deadly conditions. What inventors have to contrive is a train that will cover two miles a minute and cross the American continent at that rate without danger of disaster. They have to produce a ship which will cross from Liverpool to New York in three days. They must ponder the problems involved until they can solve the difficulty of avoiding collisions by the invention of automatic stoppage of trains and ships the moment there is any danger ahead.

In all departments of common everyday life there are outcries for new products of the inventor's genius. Take, for instance, the solicitude of the manufacturers of popular and genuine beverages for a non-refilable bottle. One of the most notorious of the swindles of the commercial world is the great "wine fake." For many a year the proprietors of the vineyards of Germany, France, Italy, Spain, Portugal and Hungary have complained with no little bitterness of the adulteration of their choicest wines by the unscrupulous middlemen. They therefore ask for a bottle which can be used only once—that is to say, when it is filled in their own cellars at the vineyards. Distillers, manufacturers of medicines and makers of choice perfumery all suffer immense loss through the lack of some receptacle which, when once its contents have been poured out, can never be refilled with an inferior article and sold as the original.

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Asheboro, N. C.—The Lewis & Winslow Hardware Co. has been incorporated with $5,000 capital stock. The incorporators are: S. Lewis and J. T. Winslow, of Asheboro, and W. P. Lewis, of Wayor, Ala.

Brenton, Wash.—E. Van Syckel is engaging in the Hardware business.

Carters, Cal.—C. J. Lundell has opened a new stock of Hardware, etc.

Evansville, Ind.—Griener Hardware Co. has been incorporated; capital, $25,000; directors, William Griener, Louis F. Kattlerjohn and Mary Griener.

Fort Smith, Ark.—The O'Shea & Hinch Hardware Co. has incorporated under the same name.

Gloucester, Mass.—The Presbrey-Mason Co. has been incorporated to carry on the Hardware business of the late William L. Presbrey, with the following officers: Fanny S. Presbrey, president; Ernest L. Mason, treasurer. The third director is Charles R. Mason. The incorporation is for $20,000.

Johnstown, N. Y.—James H. McGuire and Arthur Tymeson have formed a partnership under the firm name of The McGuire-Tymeson Co., for the purpose of conducting a Hardware business.

Knoxville, Tenn.—The W. W. Woodruff Hardware Co. has been incorporated. The capital stock is $60,000. The incorporators are: W. W. Woodruff, Sr., W. W. Woodruff, Jr., W. P. Sterling, L. W. McNutt and H. W. Sanford. The new company will conduct a general Hardware business and will occupy the new Woodruff Building on Gay street as soon as it is completed. The work on the building is progressing rapidly and will be pushed from now on. A reorganization of the old Woodruff Hardware Co. has occurred, which has made the new charter necessary.

Lakewood, N. M.—E. P. Moxley has engaged in the Hardware business.

Leonard, Texas.—The Grider-Wilson-Manning Co. has been incorporated. Capital stock, $20,000, to do a Hardware and furniture business.

Lincoln, Neb.—W. E. Jackway has opened a new Hardware store.

Litchfield, Neb.—J. H. Whittman has opened a new Hardware store.

Miami, Fla.—The Miami Hardware Co. has been incorporated. They will soon open with a full line of Hardware in the Nelson Block, on Twelfth street.

Monrovia, Cal.—The Monrovia Hardware Co. has incorporated with a capital stock of $25,000. The directors are: B. S. Davies, C. L. Daniels, Edith H. Daniels, Vera A. Sweatt, Monrovia; Mary C. Davies, Los Angeles.

Morrill, Kan.—Roy Summerfelt is engaging in the Hardware business.

Nebraska City, Neb.—Stukenholtz & Carlton have opened a new Hardware and notion store.

Newark, N. J.—Slip-Not Hardware Co. has been incorporated; capital, $50,000; incorporators, George W. Angell, New York City; Jacob R. Roelker, Brooklyn; Gustav P. Metz, Newark. The principal office of the company is located at Dock and Brown streets, Newark, and Gustav P. Metz is named as agent.

Niagara Falls, N. Y.—The Paterson-Thompson Co. has opened a new store and is ready to supply its customers with builders' Hardware, house furnishings, paints, oils and all articles found in a first-class Hardware store.

Oakland, Cal.—The Smith-Browne Hardware Co. has been incorporated with a capital stock of $100,000. This city will be the principal place of business. The incorporators are: George H., John F., LeRoy and Charles H. Smith and Harry R. Browne. The company has purchased the Hardware business of C. E. Freeman, near the junction of Broadway and San Pablo avenue.

Paragould, Ark.—The Stedman Hardware Co. has been incorporated. The capital stock is $12,000, all of which has been subscribed. The officers are: L. U. Stedman, president; W. H. Jones, vice-president; C. W. Stedman, secretary and treasurer.

Pensacola, Fla.—Pensacola is soon to have another retail Hardware store. The style of the firm will be the Gordon & Brown Hardware Co., and the incorporators are: O. M. Gordon, Homre Brown, W. W. Varn, E. E. Reese and S. Pasco, Jr. The new firm will carry an extensive line of Hardware. The amount of the capital stock of the corporation will be $50,000.

Post Falls, Idaho.—John Schlack has opened a Hardware store.

Russell, Kan.—Wilson, Nuss & Co. have opened a new Hardware store.

Ruthven, Iowa.—S. N. Wagner has engaged in the Hardware business.

Spokane, Wash.—The Hillyard Furniture Co. has been reorganized under the name of the Hillyard Furniture and Hardware Co., with F. S. Moore as president and Thomas LePage as secretary and manager. The business of the company will be enlarged and its frontage extended for about twenty feet.

Stuart, Iowa.—G. W. Hartman & Son have opened a new Hardware store.

White Plains, N. Y.—The White Plains Hardware Co. has been incorporated with a capital of $5,000, and the following directors for the first year: Calvin C. Crawford, of Florida, N. Y.; Samuel M. Crawford, of Brooklyn, and George H. Crawford, of White Plains.

Woodbine, Iowa.—Canfield & Hansen are about to engage in the Hardware business.

Changes.

Atlantic, Iowa.—The Marquis Merc. Co. has purchased the Hardware and harness business of Shoud Bros.

Bayard, Neb.—Burke & Harpole have purchased the Hardware and Implement business of North & Co.

Buffalo, Kan.—J. S. Johnson has sold his interest in the Hardware firm of Johnson & White to Dryden & Finney.

Cambridge, Md.—The North-Drennen Supply Co. and Hearn & Wilson, Hardware dealers, have consolidated.

Canyon, Texas.—Canyon Hardware Co. has succeeded to the business of the Canyon City Hardware and Grain Co.

College View, Neb.—Herrick & Vossberg have succeeded to the Hardware business of A. W. Herrick.

Crittenden, Ill.—Homer Ford, who formerly resided in this vicinity, has sold his Hardware store at Philo, and he and his brother-in-law, Clarence Jessee, have purchased Heacock Bros.' Hardware store at Villa Grove.

Fort Morgan, Colo.—Tipton & James have been succeeded in the Hardware business by W. H. Tipton.

Grand Rapids, Mich.—Kulpers & Welmers have been succeeded in the Hardware business on Grandville avenue by H. J. Minall.

Greenleafton, Minn.—B. F. Alink has added a line of Hardware to his other business.

Helena, Okla.—The Helena Hardware Co. has purchased the business of Walker Bros.

Imperial, Cal.—C. G. Witman has commenced the erection of a building 25x60 in which to place a stock of Hardware and have room made necessary by his increased plumbing business.

Johnstown, N. Y.—A change is about to be made in one of the oldest, most widely known and best established firms in Johnstown by the organization of the Frank Miller Hardware Co. The new firm, which will be composed of Frank Miller, James W. Miller, Jr., and Sidney E. Lyke, will take over the business of Frank Miller and continue to conduct it at the present stand.

Jolly, Iowa.—G. B. Peterson has purchased the Hardware business of Donaken Bros.

Julian, Neb.—D. H. Stout has sold his Hardware and furniture business to the Julian Hardware and Implement Co.

Lexington, Neb.—F. B. Harrington has sold his Hardware business to W. H. Wisda.

Middleport, N. Y.—Frank A. Rinn, of Gasport, and Edgar Knapp, of Middleport, have purchased the Hardware business of the late E. B. French.

Morrill, Neb.—W. E. Gaines has sold his Hardware business to W. L. Minor.

New Britain, Conn.—L. M. Barnes has purchased the interest of the other stockholders in the Barnes Hardware Co.

Osceola, Iowa.—Wasson & Son have been succeeded in the Hardware business by D. B. Hunt.

Portland, Me.—Walter V. Knight has purchased the stock of Hardware of Allen T. Skillings and will remove to his store on Main street.

Santa Ana, Cal.—S. C. Wright has sold his interest in the Hardware business conducted by Wright & Kendall to Henry Franzen, Jr. The business will be conducted under the name of the Santa Ana Hardware Co. Mr. Wright and family, who have been residents of the city for the past twelve years, will move to Los Angeles, where Mr. Wright will engage in the Hardware or real estate business.

Spokane, Wash.—O. B. Galloway has sold a half interest in his Hardware store to J. W. Adams, and the name of the firm will be The Farmers' Hardware Co.

Springfield, Tenn.—J. A. Long & Co. have succeeded to the Hardware business of Long, House & Co.

BISSELL'S

"CYCO" BEARING

CARPET SWEEPERS

are always offered to the trade in practical finishes, at reasonable prices, and these are two of the reasons why they outsell all other makes. The carpet sweeper is in the broadest sense an article of utility, and hence it is that we never attempt impracticable designs or finishes, that merely add to the cost of manufacturing, without adding anything to the utility of the machine.

We aim to produce our goods in the finest finishes consistent with the use to which a carpet sweeper is put, and anything beyond this is clearly impracticable, and can be no more forced upon the market than highly decorated brooms at $5.00 a piece. It is not in the nature of things to market domestic size sweepers at $15.00 to $25.00 a piece. $5.00 to $5.50 is the limit the consumer will pay for a domestic size carpet sweeper, and this fact is well understood by the trade.

Bissell sweepers are made in all the leading cabinet woods, as follows: Crotch Mahogany, Crotch Spanish Cedar, figured Rosewood, Hungarian Ash, Curly Birch Mahoganized, Brazilian Rosewood, Curly Maple in Seal Brown, figured Mahogany, figured Spanish Cedar, figured Walnut, Ash Burl (finished natural and Mahogany), Bird's Eye Maple, California Laurel wood (finished natural and Mahogany), Sycamore in three shades (natural, Cocobolo and Rosewood), Oak in Golden, Antique, English, Antwerp and Brown; and retail at from $2.50 to $5.50.

In an article of strict utility like the carpet sweeer, the mechanism and not its exterior embellishment, primarily determines its value. Bissell's "CYCO" Bearing Sweeper embodies valuable mechanical features not contained in any other make, and is the only carpet sweeper on the market sold under a sound system of fixed retail prices that insure to the dealer a good profit. *Remember* the demand to-day is for the advertised article of recognized merit.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Allentown, Pa.—The Kline Hardware Co. has been incorporated with a capital stock of $50,000 paid in, and has taken over the business formerly conducted by the Novelty Iron Works. The company will continue the manufacture of Hardware specialties without change in the management of the business.

Augusta, Me.—Granite State Tack Co. has been organized for the purpose of manufacturing tacks, nails, pins, screws, knives and cutting implements of all kinds, with $150,000 capital stock. President and treasurer, I. L. Fairbanks, of Augusta.

Augusta, Me.—The Mills Machine Co. has been organized for the purpose of manufacturing and dealing in tools and machinery of all kinds, with $100,000 capital stock. President and treasurer, I. L. Fairbanks, of Augusta.

Bridgeport, Conn.—J. P. Langevine has started a plant for the manufacture of sashes, blinds, screens and door screens, on the corner of George and Center streets.

Brooklyn, N. Y.—The Davies Automatic Shear Co. has been incorporated. It is proposed to make and sell cutlery, tools, saddlery and saddlers' goods and machinery. Capital stock, $24,000. The directors are: Frederick D. Davies, John H. Hotson and Peveril Meigs, Jr., of Brooklyn.

Chicago, Ill.—The Adjustable Lock-Wrench and Tool Co., of Guthrie and Chicago, has been incorporated with $100,000 capital stock. The incorporators are: George C. Clark and Edward Zulauf, of Chicago; G. V. Pattison, of Guthrie.

Cleveland, Ohio.—The National Tool Co. has been incorporated by J. F. Castle, Robert Bowie, C. G. Reynolds, C. R. Bissell and Samuel M. Parles. Capital, $50,000.

Detroit, Mich.—The Milburn Scale Co., taking over a one-half interest in the Milburn Co., now doing business in Detroit, has incorporated with a capital stock of $50,000. The half interest referred to is valued at $25,000. The stockholders are: John H. Milburn, John G. Milburn, Earl Roscoe Ryno, Andrew W. Smith and Thomas J. Parker.

Duluth, Minn.—The Duluth Brass Works Co. has been incorporated with $50,000. The company will manufacture brass machinery, implements, tools and novelties. The incorporators are: Edward G. Hilliard, Clyde W. Stilson and Martha Kerr, of St. Paul.

Greenville, S. C.—The Markley Wagon and Hardware Co. has been incorporated with $75,000 capital stock. Incorporators are: H. C. Markley, G. W. Sirrine, J. W. Cagle, Walter West and James Birnie, Jr.

Guelph, Ontario.—The Guelph Windmill and Manufacturing Co. has been incorporated to manufacture windmills and farm implements. Capital, $50,000.

Louisville, Ky.—The American Tool Co. has been incorporated with a capital stock of $50,000. The incorporators are: J. D. Augustus, J. V. Norman, J. S. Stewart.

New Haven, Conn.—Lieutenant-Governor Rollin S. Woodruff, Lewis H. English and Samuel C. Morehead are the incorporators of the C. S. Mersick & Co., which is organized with a capital stock of $500,000 for the purpose of manufacturing and dealing in machinery, Hardware, metals and merchandise.

New York, N. Y.—Combined Tool Co. has been incorporated; objects, to deal in tools, etc.; capital, $25,000. President, Evander F. Powers; treasurer, Wm. A. Putnam, both Leominster.

New York, N. Y.—Duplex Folding Tool Co. has been incorporated; capital, $100,000. Directors: Siegfried Steuer, G. C. Hemenway and Stuart Henry, New York.

New York, N. Y.—Fulton Furnace Co. has been incorporated; capital, $100,000. Directors: W. H. Crehore and W. H. Martin, New York, and W. T. Macrery, Brooklyn.

New York, N. Y.—Lanz Refrigerator Manufacturing Co. has been incorporated to manufacture refrigerating boxes, chests, closets, etc.; capital, $1,100. Incorporators: John Currie, Henry Spengler, Moses Cohen.

New York, N. Y.—Mutual Specialty Co. has been incorporated (household articles); capital, $10,000. Directors: J. W. Knight, Philip Harrison and A. M. Davidson, New York.

New York, N. Y.—Standard Stripping Machine Co. has been incorporated (Hardware supplies); capital, $2,000,000. Directors: W. B. Symmes, Jr., and H. B. Pogson, New York, and G. G. Schrieber, Hoboken, N. J.

New York, N. Y.—The Gunther Convertible Pipe and Nut Wrench and Cutter Co. has been incorporated. Capital, $50,000, and directors: J. I. Gunther, R. F. Blume, Buffalo; G. M. Kellogg, Hornellsville.

Pittsburgh, Pa.—Capital Manufacturing Co. has been incorporated for the manufacture and sale of Hardware, brass, iron, tin and other metal goods; capital, $20,000; directors, T. F. Washer, L. D. Atherbolt, Greenville; H. M. Williver, Pittsburgh.

Portland, Me.—Mattress Tufting Co. has been organized for the purpose of doing a general business in the tools and machinery used in the manufacture of mattresses, with $10,000 capital stock. President and treasurer, B. Marwin Fernald.

Upper Nyack, N. Y.—Block Light Co. has been incorporated (lamps, burners and mantles); capital, $2,500,000. Directors: Edward Steindler, Eugene H. Block, David H. Hyman, New York.

Warren, Pa.—A conference of creditors and stockholders of the defunct Penn Shovel Co., held recently, resulted in the raising of sufficient funds to pay off the indebtedness of $50,000, for which the syndicate will receive a transfer of the entire plant. A new company will be formed with a capital stock of $150,000, of which $100,000 will be common and $50,000 preferred stock. The sale and transfer will be consummated and the factory started as soon as the stock can be obtained. What Warren lacked of its required subscription was taken by outside men.

Washington, D. C.—William Liebig & Co. has been incorporated to manufacture machinery, tools and articles of like nature, made in whole or in part of iron or steel. The capital stock of the company is $100,000. The incorporators are: E. W. McCormick, B. E. T. Kretschmann, S. A. Terry, William Liebig and Herman A. Sperlich.

White Plains, N. Y.—White Plains Hardware Co. has been incorporated to manufacture and deal in Hardware, etc.; capital, $5,000. Incorporators: Calvin C. Crawford, Samuel M. Crawford, George H. Crawford.

Changes.

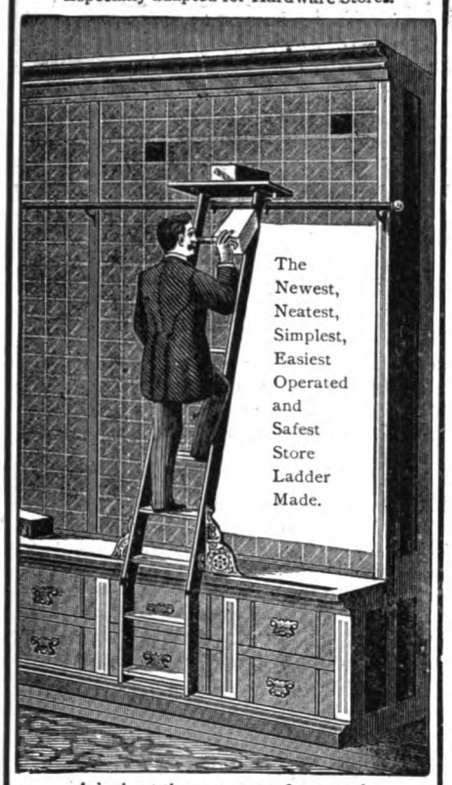
Ashland, Ohio.—F. E. Meyers & Bros., manufacturers of Hardware specialties, are preparing to erect an addition to their plant in the form of a large foundry.

Auburn, N. Y.—The American Wringer Co., of 99 Chambers Street, New York, has decided to close its factory in Auburn, N. Y., and concentrate the business at Woonsocket, R. I. This means that the Woonsocket plant will be enlarged. The best of the machinery at Auburn will be moved and it will be supplemented by whatever modern machines will be necessary to bring the Woonsocket factory up to the required capacity to take care of the business of both plants.

Bridgeport, Conn.—The Challenge Cutlelery Corporation has increased its capital stock from $100,000 to $150,000. Plans have been adopted and contracts signed for an entire rebuilding of the plant, which is devoted exclusively to the manufacture of pocketknives and razors.

Camden, N. J.—The D. B. Murphy File Works has been absorbed by the Carver File Co., of Philadelphia. The latter, which has a capital of $1,000,000, fully paid in, will fight the file trust.

Chicago, Ill.—The Yale & Towne Manufacturing Co. recently moved its Chicago office from the Silversmiths' Building, 131 Wabash Avenue, where a suite of offices of an upper floor has been occupied for about six years, to a large, well-lighted store and basement at 88 Lake Street.



Cleveland, Ohio.—The Standard Tool Co. will build an addition to its building at the corner of Central avenue and Cone Street. It will be a three-story brick building, costing about $10,000.

New Britain, Conn.—Landers, Frary & Clark, of this city, have purchased the business of the Dunlap Percolater Co., of Chicago, manufacturers of coffee pots, and will move the business to this city. C. C. Meredith, manager of the plant in Chicago, will come here to take charge of the work.

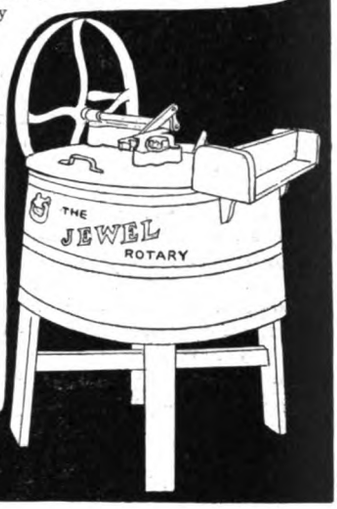
65 Randolph St., CHICAGO .ILL.

The Jewel Rotary

The Machine That Appeals to Economical Women



These justly popular washers are proving the fastest sellers and greatest trade builders in the hardware field. Their remarkably low price, **25% cheaper than any other rotary washer on the market,** gives dealers a forceful talking point, which combined with their cleanliness, ease of operation and effective work makes easy and profitable sales.

The Jewel has less machinery than any other rotary, making it much easier to operate and less liable to get out of order. It is durably made, finished in Mahogany finish, with two coats of varnish, outside castings Gold Bronzed, inside castings heavily galvanized. Furnished with stave legs if so desired.

Wherever these washers are introduced they sweep aside all competition of other Machines.

Write for full descriptions and prices of the 20 different machines we manufacture.

"I see your finish" the housekeeper said,
As she noticed the paint worn and light,
"With a single coat you'll be handsomely dressed—
In dull finish "Ad-el-ite."

FIVE MILLION WOMEN

are already familiar with

AD-EL-ITE
ONE-COAT DULL FINISHES

We will keep on Advertising Until Every Woman in America Knows of Them.

Ad-el-ite One-Coat Dull Finishes come in eight old Mission shades of rich dull browns and blacks and are intended for refinishing furniture, old and new, and for all interior decoration.

They are economical—only one coat is required and one gallon will thoroughly finish 800 to 1000 square feet. **They are durable**—they permanently stain the wood instead of drying on top. **They are beautiful**—they produce a deep, velvety glow of wonderfully rich appearance.

And They Are Popular—by our immense and persistent magazine advertising, we have sold thousands of gallons more than ever before this Spring and the demand has only begun.

A WOMEN OR CHILD CAN APPLY IT.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Bartow, Fla.—Oscar Balch has opened a Bicycle and gun repair shop.

Brookville, Can.—The St. Lawrence Engine Company, Ltd., has been incorporated to build boats and machinery. Capital, $40,000.

Buffalo, N. Y.—The Buffalo Specialty Co. has been incorporated with a capital of $500,000. Oliver Cabana, Jr., E. T. Brown and M. J. Cabana, all of Buffalo, are named as directors. Each of them was an officer of the old company—the Buffalo Specialty Manufacturing Co.

Camden, N. J.—Charles M. Buckman, who for several years has been engaged in the bicycle business at 120 Market Street, has been incorporated as the Charles M. Buckman Co. C. Edgar Shreve and Robert H. Dix are his fellow-corporators. Capital stock, $125,000.

Chicago, Ill.—Dean-Martin Company has been incorporated; capital, $10,000; manufacturing photography supplies; incorporators, F. P. Dean, H. T. Martin, F. A. Pennington.

Dover, Del.—M. A. Shipley Company has been incorporated to engage in the manufacture of camping outfits and sporting goods of all kinds. The incorporators are all of Philadelphia, and capital stock is $75,000.

Grand Rapids, Mich.—The firm of Willoughby & Brown have opened a new Bicycle store in the Judd Building.

Jefferson City, Mo.—The Center Creek Powder Company has been incorporated with a capital stock of $20,000, all paid. A. G. Cummings and Herbert Tally and other capitalists of Terre Haute are stockholders.

Lincoln, Me.—George Haskell has opened a new store.

Minneapolis, Minn.—The Luther Ford Co. has been incorporated to manufacture fireworks. The capital stock is $10,000.

New Haven, Conn.—Winchester Purchasing Co. has been incorporated to deal in firearms and materials and shares of concerns engaged in making such; capital, $2,000; incorporators, Arthur W. Hooper, of Boston; Winchester Bennett and Henry Stoddard, of New Haven.

New York, N. Y.—The A. G. Spalding & Bro. Manufacturing Co. is a recent corporation, its purposes to manufacture and deal in athletic goods, etc. The concern commences in business with a capital stock of $100,000. President, William T. Brown, East Orange, N. J.; treasurer, Horace Brown, Springfield, Mass.; clerk, Howard L. Holt, Chicopee Falls, Mass.

New York, N. Y.—The Laflin & Rand Powder Co., of New York, capitalized at $1,000,000, has been incorporated in Indiana with a capital stock of $80,970.

Norwalk, Conn.—Automatic Tool Co. has been incorporated to deal in autos, motors, electrical fittings, and to do a mechanical business; capital, $20,000; incorporators, Elbert N. Sipperley and Elbert N. Sipperley, Jr., of Westport, and Charles H. Jimmerson, of Norwalk.

Norwich, Conn.—The Uncas Manufacturing Company is a new concern, capitalized at $50,000, to manufacture automobile parts. D. F. Leavitt, of New York, is the head of the new concern.

Pekin, Ill.—Charles Harris has lately established a plant for the production of power launches and has already many orders for craft on file. The Weber Marine engines, built by Weber & Jewett, of Pekin, will be installed in all the Harris launches.

St. Louis, Mo.—Black-Bird Target Works has been incorporated by Brady S. Thompson, Edward R. Hoyt and W. P. Markle, to manufacture and deal in targets for trap-shooting, traps, etc.; capital stock, full paid, $50,000.

Terre Haute, Ind.—The Bruns Powder Company has been incorporated by John and Nora Bruns and Louis Leveque. The company is capitalized at $5,000, and is organized for the purpose of carrying on a mercantile business.

Trenton, N. J.—Federal Cartridge Co. has been incorporated to manufacture cartridges, shells, torpedoes, mines and ammunition; capital, $2,000,000. Incorporators: Cyrus O. Baker, East Orange; E. J. Hill, Norwalk, Conn.; J. Kingsbury, Jr., New Haven, Conn.; Henry S. T. Thompson, New York City; R. Jay Walsh, Greenwich, Conn.; L. E. Warren, New York City; F. Z. Maguire, London, England.

Changes.

Boston, Mass.—Wright & Ditson, manufacturers of outdoor game supplies and athletic goods, have recently opened a branch at 66 Wabash Avenue, Chicago, Ill., from which the Western trade of this concern will in the future be cared for.

Buffalo, N. Y.—The Crosby Co. has purchased of the Pope Manufacturing Co. its entire complement of tools for the manufacture of Thompson electrically welded parts, and also for a new line of English cycle parts, and already have installed them in their Buffalo plant. The Pope Manufacturing Co. have retired from the manufacture of parts for export and turned over to them the absolute production of the Thompson fittings.

Chicago, Ill.—The Federal Manufacturing Company, formerly large producers of Cycle parts, conducting extensive plants at Chicago, Milwaukee, Cleveland and elsewhere, have recently sold the last remaining factories, those at Cleveland and Elyra to a new concern which has been incorporated with a capital of $400,000, and will be devoted to the production of automobile parts and specialties.

Des Moines, Iowa.—Work is progressing on the building for the Barnes & Casebeer gun stock factory at East Twentieth Street and Court Avenue.

New Brunswick, N. J.—The stockholders of the United States Rubber Co., at a special meeting held on the 25th inst., by a vote representing three-quarters of entire stock, adopted the resolution passed by the directors at a meeting held on May 12, which recommended an increase of the capital stock from $50,000,000 to $75,000,000. The stockholders also ratified the action of directors in authorizing the purchase of no less than two-thirds of the capital stock of the Rubber Goods Manufacturing Co.

New York, N. Y.—E. G. Buckner has been elected president of the International Smokeless Powder Company, succeeding the late H. G. Watts.

Troy, N. Y.—J. Lucy has sold out his Bicycle business to E. H. Brunelle.

Winnepeg, Manitoba. — Anderson & Thomas, who were formerly Hardware dealers, have quite recently built up a satisfactory wholesale trade in sporting goods and now propose making this line a specialty. They have travelers covering the provinces to the Pacific coast.

Woodstock, Ont.—A. Gardner & Co., Hardware and sporting goods dealers, have recently moved into their new store building and are adding extensively to their stock.

Fires.

Columbia, Wash.—Hitt Bros., manufacturers of fireworks, lost their building and plant on May 6 by an explosion and fire, which originated from the accidental ignition of a bunch of special friction fuses. One of the workmen was slightly burned.

Gaylord, Mich.—A. H. Van Dorn; loss by fire, $1,000.

Laurel Run, Pa.—One of the buildings of the Oliver Powder Co. exploded recently, causing damage to the amount of several thousand dollars. Ignition occurred in the mixer and spread to the adjoining building.

Windsor Mills, Can.—The Hamilton Powder Mill Co.'s plant was wrecked by an explosion in the mixing house on the night of April 25.

West Hanover, Mass.—The entire plant of the National Fireworks Co. was destroyed by an explosion on May 25. It comprised a group of ten one-story wooden buildings. A similar accident destroyed the plant two years ago.

Miscellaneous.

Boston, Mass.—The Metropolitan Park Commissioners of Boston have decided to not only mount a unmber of the park policemen on motor bicycles, but to equip the machines with Jones speedometers. The Indian Motorcycle Co., of Boston, secured the order.

Omaha, Neb.—James F. DeJarnette, manager of the Anderson Manufacturing Company, has been granted a patent on a new spring tire, which is designed to supplant the expensive rubber tire. Mr. DeJarnette, who is an experienced constructor, uses an entire wheel instead of merely a rim or tire to get the desired effect. The elasticity is supplied by spiral springs, which are mounted radially between the outer tire and an inner ring. Thus vibration is absorbed by the springs.

Vancouver, B. C.—The well-known Hardware business of Fife & Hunter, on Cordova street, has been transferred to the George Hunter Hardware Co., Ltd., of which company George Hunter, of the former firm, will be managing director. Since the death of Mr. Fife Mr. Hunter has had charge of the business. The new company, with increased capital, will continue on the old lines, but will enlarge and branch out wherever need therefor is seen.

The HAMILTON RIFLE

No. 23

Price $3.00

OUR LATEST MODEL. A QUICK SELLER.

Full length, 35 in. Length of barrel and action, 21¾ in. Chambered for .22 Calibre S. and L.R.F. Cartridges. Take down Model, with genuine Walnut stock. **Model No. 23,** is of the **Bolt Action** type, deservedly popular for combining simplicity of action with strength and safety. The barrel, with action, is 21¾ inches in length, being finely tapered and beautifully finished in blue-black gun finish. The quality of rifling is unsurpassed, assuring absolute accuracy and strength of shooting. The action is automatic, both in putting cartridge into the chamber and ejecting the exploded shell. New locking device makes entire action of Rifle absolutely safe under all conditions. Breech-block and working parts thoroughly protected from dirt, rain and snow. Barrel and action easily and quickly cleaned.

Hamilton Rifle No. 19

Price $2.00

Combines simplicity, beauty of finish, strength and excellent shooting power. Simple loading process; improved extractor, rapid and perfect in action; convenient "take down" features; calibre .22.

Model No. 15 is made like No. 19 except that barrel is 4 inches shorter, Price, - $1.50

Manufactured By **THE HAMILTON RIFLE CO.,** PLYMOUTH, MICH.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

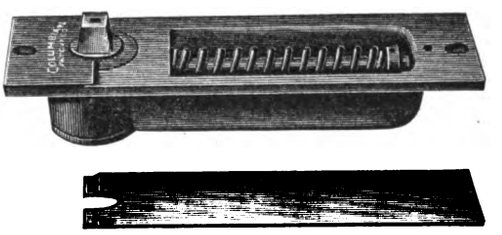
ONE WISE DEALER SAYS,



"THE MORE YOU BUY THE BETTER YOU LIKE 'EM"

It will pay you to know our "Columbian" Floor Spring Hinge—now. It has many points of superiority—depth of hinge is just the thickness of a double floor so that it may rest on an "I" beam, or if on a joist no gouging or tearing is necessary.

The hinge is ball bearing, works easily and noiselessly, is practically invisible, exceedingly compact and high grade in every respect.

We want to tell you more about it than space permits, and the hinge lives up to all of our statements.

A penny postal brings Builders Hardware Catalog No. 12. Send for it today and be prepared to buy from your jobber.

CUTTING

All hides vary in thickness and quality. The leather from over the hips and back of the animal being thicker and more evenly grained than any other part of the hide.

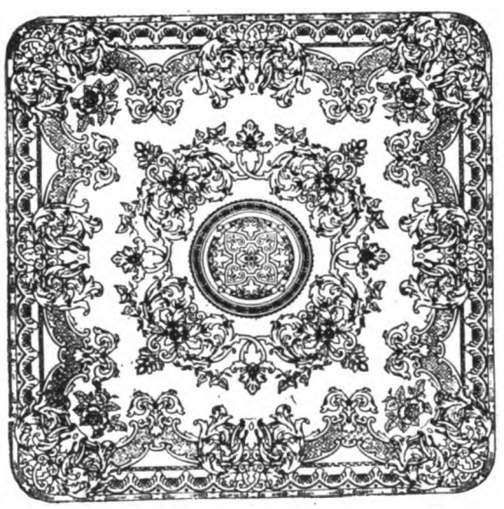
This leather only is used in making

GIBFORD'S

RED-E-FOR USE

RAZOR STROPS

and in cutting it great care is taken that each strop shall be of one unvarying quality and thickness so that it will not stretch or become uneven with use.



There is but one quality of leather in all **Red-E-For Use Razor Strops** (and that is the best). The difference in price is due to size and trimmings. We wouldn't injure the reputation of our strops by putting shoddy leather in our low priced goods.

Write for Catalog. Sold by all Jobbers.
